

**BROOKLANA
ANGUS**

2019

BULL SALE

30 HBR BULLS

9th August 2019 at Dorrigo Showgrounds

Brooklana Emperor N28, Lot 4

A NEW ERA

Our 2019 sale is the first sale since Brooklana Angus was established in 2010, where we are seeing both sides of our pedigrees, able to produce bulls from the genetics we have designed.

The cow herd determines the outcome of what it is that cow + calf operations produce, regardless as to whether it is a commercial or seedstock operation. In June 2019, Millah Murrah principal, Ross Thompson, stated “We concentrate on maternal traits”, coming from the most successful Angus stud in Australasia, in modern times, as they say, Success Leaves Clues. Taking a close look at the Millah Murrah, most successful, proven genetics, we found the bulls, BT Right Time 24J, dubbed the cowmaker and Te Mania Emperor E343 as being at the forefront. 24J figures in the pedigrees of the 3 Millah Murrah K bulls, Kingdom, Klooney and Kruse Time, whereas Emperor is in the pedigrees of many.

Add to these genetics the Dream cow family, record holders until our purchase of Millah Murrah Prue M4 and you will find the basis of our breeding programme at Brooklana.

Our decision to purchase Prue was based on a number of considerations. Figuring prominently was the opportunity to produce embryo calves from her, using our Emperor son out of our BT Right Time 24J cow, Brooklana Emperor L29. Having 6 calves from this joining on the ground, marks an exciting milestone for Brooklana.

Over half of our sale bulls have either Te Mania Emperor or BT Right Time 24J/Dream, or both, in their pedigrees. Our pinup boy N28, lot 4, is by Brooklana Emperor L29 out of a Right Time 24J/Dream heifer.

SALE BULL SELECTIONS

- 1.** Must be quiet, we don't tolerate anything else. They are easier to work with and grow quicker.
- 2.** Calve easy. Heritability of calving ease from the input of the sire is only 14%. Heritability of gestation length from the sire is 65%. Why? Management of the pregnant female is a major factor whereas management has no control over gestation length.
- 3.** Phenotype/ conformation. If they are not put together properly, they won't function properly.

4. Growth rate. Beef producers get paid on weight, they must do well to grow quick.

5. Records/Proof. When you are selling bulls at 2yr, the heifer portion are about to calve, so how they will be as Mums, can only be determined once they have proven themselves, so we can only go on our records and how their parents rate.

6. Carcase. The fashionable push for marbling, fats, we are conscious of. Retail Beef Yield, EMA, we select for. Pursuing individual traits within a breed may result in a reduction of dominant traits that the breed has become renowned for.

7. Estimated Breeding Values – EBVs. Low EBV animals are not selected as sale bulls at Brooklana.

8. Raw Scan Data. Measures the bulls actual scan data which we compare against others in the group. Several prospective sale bulls have been excluded based on this criteria.

SUSTAINABLE FARMING – BROOKLANA STYLE

We are what we eat, that's our cows talking to us! So to have the healthiest food for our cattle, we start with the soil, fostering microbial growth, growing pasture mixes including herbs (chicory), legumes, plantain, green crops such as lablab. Fencing out dams, creeks, reticulated water supply from pristine mountain creeks, river. Cell grazing paddocks, not overgrazing if possible, plant wildlife corridors, shelter belts. Keep away from chemicals wherever possible, including chemical fertiliser.

This works for us – and our cattle.

OUR THANKS

To all who have supported Brooklana Angus since 2010, especially to those who have purchased sires in the past and who have had to sell off their cows due to the ongoing ravages of the drought.

The prospect of limited competition for our bulls this year, is not as a significant concern as to that which we have for our fellow farmers. You are always to the forefront of our thoughts.

Jenny & Rodger Pryce

BREEDING REFERENCES

MEDLYN REVLON E17: E17 is an incredible matron of our herd, she is a daughter of SAV Traveller 004, the sire that SAV credit for putting them on the map. Perhaps best known for being the dam of Brooklana Emperor J64, the Angus Society Cohorts 6 member whose steer progeny ranked #1 out of the progeny for 40 other sires, for both 400 and 600 day weight gain. E17 has 4 sons in the sale .

BT RIGHT TIME 24J: This sire is having quite an influence within our stud, coupled with the Dream family. He can also be found producing the goods for Millah Murrah, their 3 “K” bulls, Kingdom, Klooney and Kruse Time, all of whom are A.I. sires, all have 24J at the forefront of their pedigrees. Dubbed the “cowmaker” , his females produce progeny that are breed leading.

PATHFINDER GENESIS G357: Already ranked #8 for registrations, Genesis is by the same sire as Te Mania Emperor, being Te Mania Berkley B1, his progeny are soft, quiet, calve easy, grow like steam. Our top bulls this year are predominantly by Genesis, 3 in the sale, they are outstanding.

MILLAH MURRAH KINGDOM K35: Sold for \$150,000, his progeny are coming through to the fore with a son selling in June 2019, in NZ for \$78,000, which adds to the growing list of records being set by Kingdom progeny. Our 2 Kingdom sons are out of the cow above.

TE MANIA INFINITY: Died in 2010, was the most popular sire being used and trait leader for IMF at the time, he died with little semen in storage. Infinity figures prominently in the pedigrees of high priced selling Angus stud cattle, to have progeny available for sale is now rare. He has sons in the sale from both E17 & Brooklana Dream H24.

MATAURI REALITY & BROOKLANA REALITY K57: We sold 3 sons of Reality for \$59,000 in 2015, including K57 for \$22,000 to overseas interests. K57 was selected into cohorts 7, he is the

only sire represented in cohorts 7 whose progeny rank in the top 10 for all calving ease and for 200 day ,400 day and 600 day weight. Reality progeny calve easy, grow fast, really quiet and great doers.

SCOTCHCAP & BURTHLENE PATRIOT 47M: Born over 30 years ago, both of these sires have had a significant influence in the popularity of the modern day Angus. In our opinion there does exist, legends of the breed who even today, can still make a meaningful contribution to our breed. Coupled to breed leading sires of today through daughters of Ardrossan Equator A241 and Te Mania Berkley B1, we are offering 2 sires of each with semen from lot 20 being retained for further use within our stud. We believe the female portion of these sires will contribute considerably to our future herd.

TE MANIA EMPEROR E343: Ranked 2nd for registrations, Emperor figures amongst the highest prices achieved at stud sales including Millah Murrah. His son Brooklana Emperor L29 was one of our motivations for buying our \$190,000 Millah Murrah heifer. We have 6 calves on the ground to this ET mating.

BROOKLANA DREAM H29: Last year one of our established customers purchased all 2 y.o sons from this sire that we had bred. Also selected into the cohorts 6 programme, his steer progeny ranked #1 for Retail Beef Yield. Being a BT Right Time 24J son out of a Dream cow, H29 is the ultimate cow maker, yet his progeny are excelling in the growth and carcass areas. His flush sister Brooklana Dream H24, is the dam of Brooklana L29 , who we flushed MM Prue to.

BROOKLANA EMPEROR J64: An Emperor son out of the cow at the top of the page, he has 7 traits in the top 1% , another 4 in the top 5% or better. In cohorts 6 his steer progeny ranked #1 for 400 & 600 day weight, coupled to a short gestation length in the top 3%. J64 progeny do for us as his EBVs suggest and as his steers grew in cohorts 6. His sons at lots 14 & 24 both have numerous traits in the top 1% .

ESTIMATED BREEDING VALUES (EBVs)

CEDir - Calving Ease Direct (%): Ability of the calves from two year old heifers to be delivered without assistance. The bigger the better.

CEDtrs - Calving Ease Daughters (%): Ability of a sire's daughter to calve without assistance as a two year old heifer. The bigger the better.

GL - Gestation Length (Days): Number of days from the date of conception to the calf birth date. The smaller the better.

BW - Birth Weight (kg): Liveweight (kg) at birth. The smaller the better.

200D - 200-Day weight (kg): Liveweight (kg) at 200 days of age. The bigger the better.

400D - 400-Day weight (kg): Liveweight (kg) at 400 days of age. The bigger the better.

600D - 600-Day weight (kg): Liveweight (kg) at 200 days of age. The bigger the better.

MCW - Mature Cow Weight (kg): Cow weight (kg) at 5 years of age. The bigger the better.

Milk - Milk Production (kg): Milk production, expressed as variation in 200 day weight (kg) of daughters' calves. The bigger the better.

SS - Scrotal Size (cm): Scrotal circumference (cm) at 400 days of age. The bigger the better.

DC - Days to calving: Female fertility, expressed as the number of days from the start of the joining period until subsequent calving. The smaller the better.

CWT - carcass weight (kg): Carcass weight, adjusted to 650 days of age. The bigger the better.

EMA - Eye Muscle Area (cm²): Eye muscle area (sq.cm) at the 12/13 rib site, in a 300kg carcass. The bigger the better.

RIB - Rib Fat (mm): Fat depth (mm) at the 12/13 rib site in a 300kg carcass. The bigger the better.

RUMP - Rump Fat (mm): Fat depth (mm) at the P8 rump site in a 300kg carcass. The bigger the better.

RBV% - Retail Beef Yield Percentage (%): Retail beef yield in a 300kg carcass. The bigger the better.

IMF% - Intra-muscular Fat Percentage (%): Percentage intra-muscular fat (marbling) at the 12/13 rib site in a 300kg carcass. The bigger the better.

NFI-P - Net Feed Intake (Post weaning) (kg/day): An estimate of genetic differences between animals in feed intake when animals are in a growing phase. The smaller the better.

NFI-F - Net Feed Intake (Feedlot finishing) (kg/day): An estimate of genetic differences between animals in feed intake when animals are in a feedlot finishing phase. The smaller the better.

ABI - Angus Breeding Index: An estimate of the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls.

DOM - Domestic Index: An estimate of the genetic differences between animals in net profitability per cow joined for a commercial self replacing Angus herd targeting the domestic supermarket trade.

GRN - Heavy Grain Index: An estimate of the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

GRS - Heavy Grass Index: An estimate of the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.

* Contemporary breed averages calculated by Angus Australia Breedplan are based on 2017 born calves.

HERITABILITY OF TRAITS

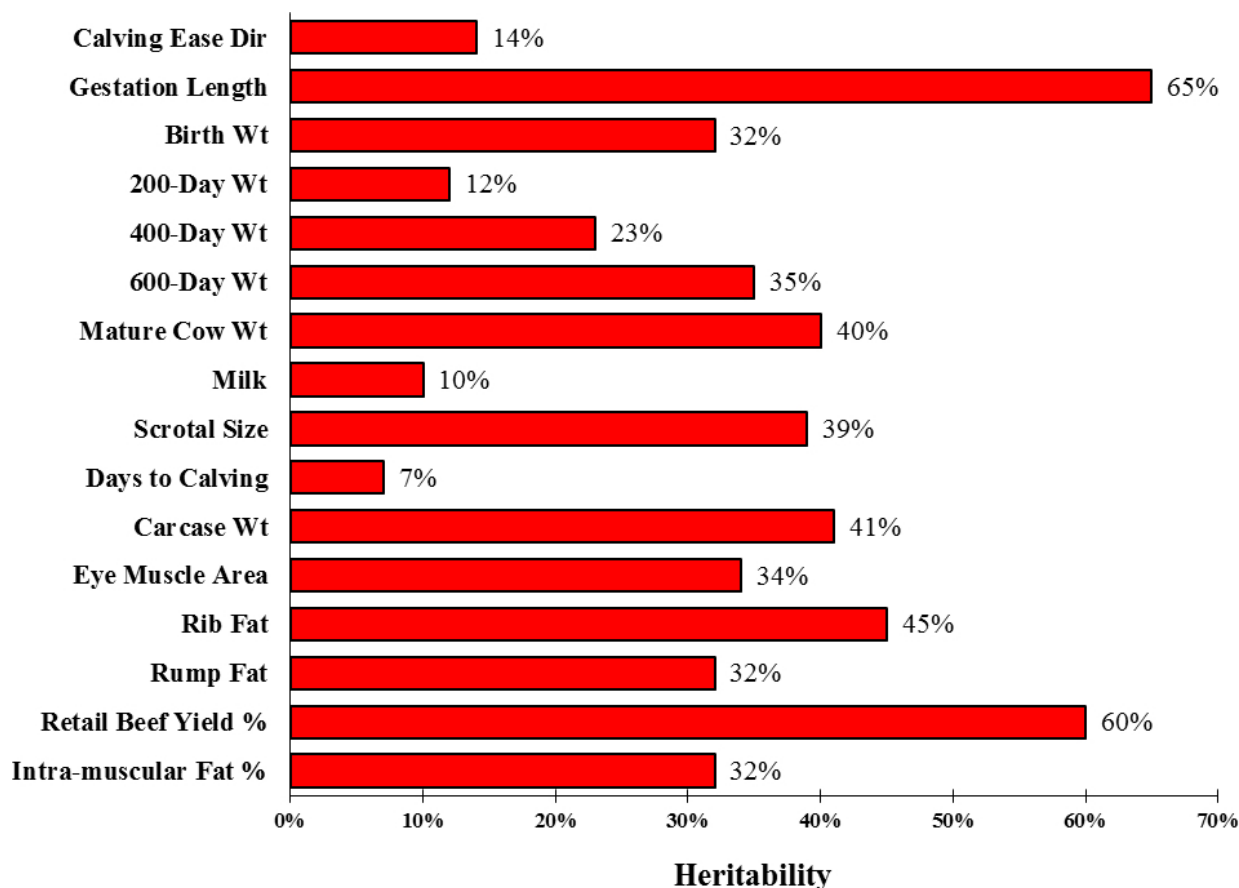

Only part of the variation that we observe among animals is due to genetic differences. The majority of the variation is generally due to non-genetic factors such as differences in environment and nutrition.

The degree to which genetic differences influence performance varies from trait to trait. This is explained by differences in the “heritability” of the traits.

Growth and carcass traits tend to have moderate to high heritabilities (i.e. 20 to 60%), whilst maternal traits have low heritabilities (10% or lower).

Angus BREEDPLAN takes into account the different degrees of heritability of various traits, and the known genetic relationships between the traits.

Shouldnt have favourites but I admit it, in my opinion, N28 is pretty special. Oldest son of Brooklana Emperor L29, who is one of the reasons why we purchased Millah Murrah Prue M4. N28 has the Dream/BT Right Time 24J genetics on both sides of his pedigree, with the iconic Te Mania Emperor in the middle. Our Prue M4 x L29 embryo calves look sensational. Half rights semen retained.

Another Medlyn Revlon E17 son. E17 is an incredible Angus cow, so powerful, she is over 900kgs in her natural state. Te Mania Infinity was the most popular sire used when he died in 2010, trait leader for IMF. Being an older sire, his EBVs have been wound back, N45 will produce smooth coated, fleshy, great doers. Infinity figures prominently in sought after examples of the Angus breed.

Youngest in the sale, his dam had our highest selling son - also selected into the cohorts programme by Angus Australia, her dam had the highest selling son the year before. Would be in my top 5 pick, a curve bender, bullet proof. A magic moment combining these genetics, all females born from this sire should be kept, you can build a herd around him.

GUARANTEE

**BROOKLANA
ANGUS**

Brooklana Angus Stud Guarantee

Any Brooklana Angus bull that proves to be structurally unsound, infertile or incapable of service is guaranteed for up to 2 years from the date of sale. The guarantee is contingent upon the purchasers managing the purchased bull(s) in accordance with the attached , Brooklana Angus Bull Management Plan.

Purchasers _____

Address _____

Bull Purchased _____

Date of purchase _____

Under these circumstances, Brooklana Angus Stud will:

Replace the bull with a satisfactory substitute if available, *or*
Issue a refund equal to the value remaining* see below, less the salvage value.

*The guarantee covers the purchase value of the bull, without interest, cost and damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving Brooklana Stud, the value remaining is calculated on the basis that the guarantee is reduced by one half of the purchase price for each year of service from the sale date. The purchaser on request must supply a Veterinary certificate.

Any dispute that may arise shall be settled by a mutually agreeable arbitrator and must be lodged within 12 calendar months from the date of sale.
