## 11th ANNUAL ROMA BULL SALE

28th AUGUST 2019 11am

### ROMA SALEYARDS

### 129 ANGUS BULLS ON OFFER

Jonathan Schmidt 07 4663 4002 ~ 0429 067 313 [schmidtjk@bigpond.com](mailto:schmidtjk@bigpond.com)

Visit [www.burendaangus.com.au](http://www.burendaangus.com.au)  
to view videos, EBV's and full details of each lot

This sale is to be interfaced with Auctions Plus:

This sale is to be conducted on line in real-time, and will be interfaced with AuctionsPlus with the physical auction that is being conducted live by an auctioneer.

For further details on Auctions Plus please visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

# WE WILL DO THE WORK FOR YOU.

You can relax when you use Ruralco.

We offer our team of top class auctioneers, agents and administration staff to market cattle, by auction, online or in the paddock.

# Welcome to the Burenda Angus Annual Roma Bull Sale

A spectacular offering of 129 well grown good Angus bulls will be offered for our eleventh Annual Roma Sale. The presentation of these bulls comprise of **88** 2 year old's and **41** 18 month old's. Genetically these bulls represent some of Queensland's best bulls on offer with progeny by some of Australia's best AI sires together with several outstanding Burenda sires. **120 of the 129 catalogued Angus bulls are better than breed average for Angus Breeding, Domestic, Heavy Grain and Heavy Grass.** The number of bulls in the top 20% for each Market Index are **82 for Angus breeding, 72 for Domestic, 83 for Heavy Grain and 81 for Heavy Grass.** For your convenience we have shaded the EBV's of each sale lot in the top **10% blue** and top **20% yellow**. These bulls are bred in Queensland conditions and come with a full 2 year fertility guarantee which is detailed in the sale information pages in this catalogue.

We are currently running around 1000 registered Angus breeders, 250 Team Burenda Angus cows and 250 registered Brangus females. Over the last 15 years we have made good gains on fertility and progeny performance by being tough on fertility and temperament. Both of these traits are directly related to performance in the herd and there is no doubt the Burenda herd has benefited by the high standards we set ourselves for these two traits. The Burenda females are AI'd once and have only 6 - 8 weeks joining followed by pregnancy testing 40 days after bull removal. Empty females are removed from our programs. Fertility is crucial and this with adequate nutrition we believe plays a lot bigger part in the breeding philosophy and performance of a herd than we all would like to believe. The Burenda pregnancy testing rate this year was down a bit across all females at 90% which we feel is still very good as mother nature hasn't exactly been kind to them at joining time late last year. Particularly the bulk of the breeders which were running out at Glenmorgan and Surat.

We have again included the actual calving interval or ACI in our catalogue comments for those that use this information. Most lots have good ACI's of around 365 days. There are also others marked as Donor (AI ET), sold and 365/recipient. The recipient means his dam has had both natural and embryo calves. Around 80% of our females are 6 years and younger as we find these cows have the improvements of fertility, calving ease, growth, and carcass data that we are looking for. Our improvement in EBV's has been very noticeable in both our cows and the 2019 sale bulls. The combination of improvements in the fertility, EBV's, genomics and raw data performance within the Burenda herd has led to improved profitability through attention to these genetics. The Burenda females are run as if they were a commercial beef herd with around 8 months of the year spent on agistment country spread around the Darling Downs and Eastern Maranoa areas. The remainder of the time is spent at Dalby Downs for calving and the AI process.

Burenda has always used DNA verification where needed over the years and in the last 3 years all Angus progeny born have now been parent verified to a sire and a dam where possible and then had genomics incorporated into the EBV's. We have seen a slight improvement in our

EBV's and a significant lift in the accuracy of these figures. Over the next few years we expect to see some good changes occurring in our breeding for better commercially focused carcase animals. Within 5 years we expect the entire Burenda female herd to have a DNA, genomics, and genetic defects profile. Unfortunately, this year's sale bulls have not all been tested for genetic defects in time for the printing of the catalogue but we will have the test results available closer to sale time. Recently I attended a SBTS genetics and EBV discussion group and it was interesting in that unless you use carrier bulls over carrier cows the likely hood of a defect calf is very slight and even then, is only a 25% chance of occurring. Our thoughts on this are that we have far more important influences that we can control in the breeding productivity of the average commercial herd such as a good vaccination program for Vibrio, Botulism, Tick Fever, 3 Day Sickness, Pestiguard, and calf scours coupled with good nutrition. Any of these can cause a significant financial loss to a producer more so than the rare incidence of a genetically affected calf. In previous years we had two progeny that we felt could have had genetic defects at birth and yet on testing both progeny they were confirmed as congealed twins. We can make better productivity gains by focusing on more economically important elements of our businesses.

***Tim and Megan Allan "Argyle" Munduberra.***

Since our last sale Burenda sired Angus and Brangus progeny have excelled with wins at the Bell & Munduberra Shows. Tim and Megan Allan of "Argyle" Munduberra who took the time and effort to draft and cart 16 head into the local show for the commercial cattle section were well rewarded. Their exhibits of Angus and Angus x Charolais steers and heifers trumped the competition with a few wins and a close 2nd to the Champion Beast of the show with a two tooth Angus cross steer weighing in at 700kg. They also won the single two tooth bullock entry. They won the milk tooth best pen of 3 steers, the two tooth best pen of 3 steers and also the best pen of 3 heifers. The entries were all back grounded on "Argyle" from weaning on rye grass and clover pastures. It is amazing what a combination of good genetics, nutrition and sound management practices can achieve.

The Burenda Team took a truck load of Angus & Brangus weaner heifers, milk tooth heifers and fat cows for the Annual Bell Show and with their entries winning several classes. The females had only just recently come home from agistment at Glenmorgan so to win so many classes were very rewarding. Other highlights have been recent sales of Burenda Angus sired progeny with Peter J Holland of Roma selling a pen of 305kg Angus x Charbray weaner steers for 306.2c/kg to realise \$934. The Anderson Family from "Narrien" Clermont sold a good run of 413kg Angus x Braford steers for \$2.84 to realise \$1172/head. These steers were progeny from our Angus bulls selected for use over their Braford heifers for calving ease, short gestation, below average birthweight and good carcase qualities. Burenda has purchased a pen of 15 of these steers to enter into the Clermont Beef Expo Competition this year.

Manager Jonathan Schmidt has the bulls in great shape and they are doing well on the oats. There are photos of many of the bulls on our website. Please contact Jonathan on 07 4663 4002 or 0429 067 313 for any further details. Auctions Plus will be active again this year with

Live Streaming attached for those unable to make the sale and who would like to see the bulls go through the ring. Our insistence on breeding for fertility, growth and carcase quality is paying dividends. We believe buyers will be impressed when they assess this year's draft. The 2 year old bulls will average over 850kg and have plenty of length, strength and fleshing ability. The catalogue includes 82 sires suitable for use on heifers. Please view full details of each bull on our website [www.burendaangus.com.au](http://www.burendaangus.com.au) and remember - you are always welcome at Burenda to check out our herd and operation.

## **SPECIAL ALLOWANCES FOR 2019 SALE**

Burenda Angus & Brangus as part of our annual sales program will continue to offer the special conditions for this year's sale and these are detailed in the sale information pages in this catalogue. Briefly they offer extended terms for payment and volume buy discounts.

## **EXTENDED PAYMENT AND TERMS UP TO 1 YEAR**

Buyers of 2 or more bulls are offered extended terms as follows:

1. One half of the total purchase price plus full GST on sale day (or within 7 days through agents) and the balance payable on or before the 28th February 2020.
2. If the buyer is located in a drought declared area and the bulls are despatched to that location then one half of the total purchase price plus full GST is payable on sale day (or within 7 days through agents) and the balance payable on or before the 21st August 2020.

## **VOLUME DISCOUNTS**

Buyers of 2 or more bulls purchased at this year's Roma Sale will qualify for discounts as follows:

For 2 bulls purchased receive a 2% discount on total purchase price

For 3 bulls purchased receive a 3% discount on total purchase price

For 4 bulls purchased receive a 4% discount on total purchase price

For 5 bulls purchased receive a 5% discount on total purchase price

For 6 bulls purchased receive a 6% discount on total purchase price

For 7 bulls purchased receive a 7% discount on total purchase price

For 8 bulls purchased receive a 8% discount on total purchase price

For 9 bulls purchased receive a 9% discount on total purchase price

For 10 or more bulls purchased receive a 10% discount on total purchase price

# **Upcoming Burenda Sales**

**Clermont Angus & Brangus Bull Sale 3rd October 2019 at 10am  
80 2 year olds comprising of 40 Angus bulls and 40 Brangus Bulls.**

Burenda Angus Annual Roma Sale 2019

# SALE INFORMATION

## Sale location and inspection times

The Burenda Angus Bull Sale 2019 will be held at the Roma saleyards, Warrego Hwy Roma Qld 4455. Sale time is 11:00am and inspections can be made from 8am on sale day. We will also be at the yards the day before if you are in the area for early inspections

## Identification

All bulls have NLIS tags, lot numbers and freeze brands.

The Burenda PIC number is QAWB0619

All bulls are registered with the Angus Society of Australia

## Safety Rules & Recommendations

We are confident all our bulls offered for sale are quiet and of sound temperament and are used to being handled in yards. However sale day brings a differing set of conditions and the bulls are subjected to unusual levels of noise and pressure with many people invading their space. Even the quietest bull is still an unpredictable animal who can misbehave. Visitors entering pens do so at their own risk and are subject to conditions set out by the Roma Saleyards.

## Buyer Registration

A buyer registration system will apply. Please register with the selling agent well before the auction commences.

AuctionsPlus will be running in conjunction with this sale and registration must be completed within the conditions set out by

AuctionsPlus. For these terms and conditions please visit  
[www.auctionsplus.com.au](http://www.auctionsplus.com.au)

## Sale Conditions

All lots will be sold subject to the usual conditions governing auction sales which will be displayed on the day and are detailed in the back of this catalogue. The auction price is **exclusive of GST**

## Rebate

The vendor has agreed to allow 6% rebate to outside agents introducing the approved buyers no later than 24 hours prior to the sale, accompanying their buyer to the sale and settling on their behalf within 7 days of the sale. For outside agents introducing approved buyers within 24 hours prior to the sale **BUT NOT** attending the sale with their clients, a 3% rebate will be paid

## TERMS

Any buyer purchasing 2 or more bulls may pay one half of the purchase price on sale day ( or within 7 days through agents) and the other half on or before 28th February 2020.

**Buyers need to accept these terms on sale day when settling their account**

## Delivery and Transport

Free transport and delivery to selected Major centres is available by negotiation with Burenda Manager Jonathan Schmidt after the sale has concluded.

## Genetic Defects

At the time of printing the catalogue Burenda had undertaken testing on all genetic defects on the sale bulls and was awaiting the results. These will be made available ASAP prior to the sale. We expect the results by the middle of July.

## Volume Discounts

For buyers who purchase 2 or more bulls a discount will be allowed as follows:

Buying 2 bulls = 2% discount on total purchase price  
Buying 3 bulls = 3% discount on total purchase price  
Buying 4 bulls = 4% discount on total purchase price  
Buying 5 bulls = 5% discount on total purchase price  
Buying 6 bulls = 6% discount on total purchase price  
Buying 7 bulls = 7% discount on total purchase price  
Buying 8 bulls = 8% discount on total purchase price  
Buying 9 bulls = 9% discount on total purchase price  
Buying 10 or more bulls = 10% discount on total purchase price

## Health Treatments

All Burenda Angus Bulls presented at the sale have been treated for the following :

Pestiguard Vaccine (ear notch tested free), 7-in-1 Vaccine, Botulism Vaccine, 3 Day Sickness, Vibrio Vaccine, Tickfever Blood, and pre treated for lice.

Burenda has a JBAS score of 7. Bulls are free to travel to WA & NT.

## INSURANCE

Ownership passes at the fall of the hammer. Insurance can be arranged on the day through GDL or your own agent

## Breeding Soundness & Semen Test

All bulls have been semen & morphology tested and passed satisfactorily for soundness by John Chapman of South East Qld Genetics. Full details will be available on sale day

## Raw Data

All bulls will be selling with full information on weights, scrotal measurements and ultrasound scanning details. Enquiries prior to the sale regarding raw data can be made by contacting Jonathan Schmidt on 0429 067 313 also raw data will be posted on our website prior to sale day at [www.burendaangus.com.au](http://www.burendaangus.com.au)

## Semen Interest In Bulls

Burenda will retain a half interest in any semen sold from bulls in this sale. Because Burenda sells most of their top bulls it is possible they may wish to collect semen at some future date for their own use or for sale. This is a revenue sharing opportunity for buyers. We retain the right to access bulls at a negotiated time and place and at Burenda's cost. Owners have the right to use their half share in their own herds or revenue share with Burenda in semen sold to other users.

## 2 Year Guarantee

In addition to the standard warranties provided in stud stock auction terms, Burenda is proud to provide a 2 year guarantee for all bulls sold at this sale. We warrant that the bulls are fertile and capable of natural service at the time of the sale. Should a bull become infertile or break down within 2 years for reasons other than injury or misadventure from 28th August 2019 Burenda will:

1. Provide you with a satisfactory replacement  
OR
2. Provide you with a credit equal to the purchase price of the bull less salvage value and less seasonal value. This credit may be used at any future Burenda Bull Sale.

Burenda WILL require you to provide a veterinary report.

# IMPORTANT NOTICES FOR PURCHASERS

## SALE CATALOGUE DISCLAIMER

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

## DNA PATERNITY VERIFICATION

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

## PRIVACY INFORMATION

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

## DNA Suffix Explained

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

# : DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

### BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA

*If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.*

*I, the buyer of animals with the following registration numbers ..... from member ..... (name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.*

*Signature: .....*

*Date: .....*

*Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail office@angusaustralia.com.au.*

# A BRIEF DESCRIPTION OF EBVs

## UNDERSTANDING ANGUS BREEDPLAN EBVs

### What is Angus BREEDPLAN?

Angus BREEDPLAN is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. Angus BREEDPLAN uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

Angus BREEDPLAN includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

Angus BREEDPLAN analyses are conducted by the Agricultural Business Research Institute (ABRI), using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England. Ongoing BREEDPLAN research and development is supported by Meat and Livestock Australia.

### What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

### Using EBVs to Compare the Genetics of Two Animals

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

### Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to:

- ◆ the breed average EBV
- ◆ the percentile table

The current breed average EBV and percentile table is provided in these explanatory notes.

### Considering Accuracy

An accuracy value is published in association with each EBV, which is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50- 74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

### Description of Angus BREEDPLAN EBVs

EBVs are calculated for a range of traits within Angus BREEDPLAN, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this sale catalogue is provided on the following pages.

## BIRTH

Calving Ease Direct	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

## GROWTH

200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

## FERTILITY

Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

## CARCASE

Carcase Weight	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
Eye Muscle Area	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.

## FEED EFFICIENCY

Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
------------------------------	--------	--	---

## TEMPERAMENT

Docility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
----------	---	---	--

## STRUCTURE

Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.

## SELECTION INDEXES

Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

**Traits Observed:** BWT,200WT,400WT,600WT,SS,FAT,EMA,IMF,Genomics

Genesis has well over 1860 progeny recorded in a very short space of time due to the merit of his carcase traits. One of a few sires around with all EBV traits where we would like them. He has been easy to use over all cows. Seven traits that count in the top 1% are 200, 400 & 600 day growth, scrotal, carcase weight EMA & rib fat.

Producing outstanding ABI, DOM, GRN & GRS index values all in the top 6%. 13 Sons Lots 2,5,11,16,17,26,33,42,47,59,60,89 & 93.

214 progeny across three top studs, Clunie Range, Ascot & Burenda in a short time frame. On inspection Kaluha was a smooth clean coated sire with a high level of carcass merit. We used him to improve growth, carcase weight, EMA, Rib, Rump & IMF and he certainly produces some high index progeny. Top 3% for AB, Heavy Grain & Heavy Grass markets. 12 Sons Lots 6,7,46,51,69,78,90,98,104,112,113 & 114.

I like Neighbourlys EBV graph with the majority of all traits on the right side and in the top 20%. Angus Breeding in the top 7% and Heavy Grass top 5%. ACI 374 days over 7 progeny.

Purchaser..... \$.....

**Clews Cattle Co of "Croulla" Alpha purchased four Angus bulls from our Roma 2016 sale and due to the dry had to feed them until March 2019. Everything was stacked against them and it is only due to good management practices by the Clews that the bulls were not only able to survive but also sired a lot of progeny. The bulls settled in well and became quite close to them outside the joining periods.**

**Enjoying a cold ale after work with the boys.**

# Maximise the potential of your livestock with MegaMin

**AgSolutions Australia** are dedicated to helping all aspects of your operation from helping soil, helping plants, helping animals and helping people.

## Products and services available:

Livestock Supplements (including USDA/NOP Compliant Blends for the organic market), Feed Ration/Ingredient Testing, Feed Ration Formulations, Mineral Fertilisers and Soil Conditioners, Soil Testing, and Soil Management Programs.

## **FREE Ration Formulation Service**

### for all grain and grain assist diets!\*

Our nutrition team can review your current rations for early weaning, backgrounding, bulls, feedlot, dairy heifers, sheep and lambs.

\*Ration Formulation Service is only available to customers who purchase from the MegaMin Livestock Supplement Range.

**“** We value the information and advice that Paul Pritchard from AgSolutions has provided in both paddock supplementation, feedlot rations and with soil improvement.

We place emphasis on the minerals in MegaMin to ensure that our stock have a constant plane of nutrition for consistent growth.

In winter on green feed and pre-calving we switch to MegaMin Extra Magnesium as it has improved the ease of calving, especially with the heifers.

There has been an improvement in growth on bulls when grazing oats and being supplemented with MegaMin Extra Magnesium Sweet.

-Jonathan Schmidt, Manager at Burenda Angus

## Burenda Angus and Brangus

are proud users of MegaMin Livestock Supplements and NatraMin Mineral Fertilisers and Soil Conditioners.

# For the farmer, for the future

The team at Dalby Rural Supplies are your local experts in all things cattle including; fencing, steel, crushes, stock handling equipment, feed supplements, vaccines, animal health & husbandry products and much more!

From humble beginnings in a tin shed in 1994, Dalby Rural Supplies has remained locally owned and operated by business partners, John Cullen and Andrew Johnston.

At Dalby Rural Supplies, we are part of the fabric of the Western Downs community. We have your best interests at heart and our goal is to lift our customers to be cutting edge performers.

We can help you grow it, feed it, water it, wash it, move it and build it.

18080 Warrego Highway, Dalby QLD 4405
