**BJD Status:** J-BAS 7 (A copy of the biosecurity plan is available on request.)

**Tick Status:** Clearing for tick will be the responsibility of the purchaser. Please note that Douglas Research and Beatrice Hill are within the restricted zone for Parkhurst Tick and require clear dipping to move south. All other costs and clearing arrangements are on the purchaser's account.

**Pregnancy Status:** All females have been faithfully pregnancy tested via ultra sound by **Non Veterinary Providers** within the DPIR staff and as such no guarantee is offered.

**Terms:** Intending buyers - please be advised Elders terms are strictly CBD unless debt can be accepted by a nominated agency or an approved Elders account and limit is in place.

**Guidance:** This sale will not close out before 45 minutes have elapsed. There are a large number of lots for buyers to keep track of so I have 2 suggestions that may help.

**1)** Utilise the limit bid function by selecting your lots and entering your upper limit price. The auction will only take you one bid over the other guy and only hit your limit if the underbidder takes you there.

**2)** you can select your favourite lots and just concentrate on those. If you feel you are being confused or distracted by lots that you have no interest in.

Please register with Auctions Plus <https://auctionsplus.com.au/register> if you intend to bid on your own computer/device.

**Assistance:** If anyone requires assistance with bidding or has queries, please feel free to contact:
