# ay 2nd August 2019, 1

61 Deyrah Road, Shannon Val

Carcass Where It Counts

# **Dance Angus 2019 Bull Sale**

# Friday 2nd August 2019 - 1pm

at "Carribber", 61 Deyrah Road, Glenn Innes NSW

40 Angus Bulls - Registered HBR/APR

All animals will be available for inspection on property from 10am on Sale Day.

Please contact David Dance for inspection prior to Sale Day.

# **Catering**

Morning Tea and Lunch provided.

# **DANCE FAMILY**

David 0407 889 125 Christine 0437 340 110 email: danceangus@gmail.com

www.danceangus.com

Philip Frame 0427 221 610 | Beau Frame 0428 221 623

This catalogue is available on-line at www.angusaustralia.com.au and www.danceangus.com

Please bring this catalogue with you to the sale.

Buyers must register prior to the sale.

Animals purchased on Auctions Plus **must** be paid for prior to delivery

**Disclaimer:** Every care has been taken in compiling this catalogue to ensure accuracy of information supplied, but no responsibility is acceptance for any errors which may have occurred.

# **NOTICE TO BUYERS**

All lots will be sold subject to the terms and conditions governing the New South Wales auction sales. All bulls are guaranteed fertile and sound under our 1 Year Bull Guarantee as listed below. Property Identification Code (PIC) and request for Transfer of registered Bulls should be notified in writing on the Buyer Delivery Instruction form. Bulls will be transferred at no cost. There is no obligation for commercial buyers to transfer animals. Rebate of 3% is available to outside agents, settling on behalf of buyers within 7 days. **Introductions must be in writing 24 hours prior to Sale.** 

# **1 YEAR BULL GUARANTEE**

All breeding cattle sold by Dance Angus are fertile and structurally sound to the best of our knowledge. All bulls have passed a semen test and reproduction examination. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 12 months, we will:

1. provide you with a satisfactory replacement if available, or

2. issue you with a credit equal to purchase price minus salvage value that may be used to purchase any animal in future Dance Angus Sales. This is not a life insurance policy. Normal care needs to be taken as we can not replace an animal that is injured or dies for any reason. We recommend you insure animals against injury: an insurance service will be available on Sale Day. This guarantee is in addition to normal terms and conditions governing auction sales, and as such the vendors decision will be final. In some cases buyers may be requested to supply a veterinary report.

# **DELIVERY OF SALE BULLS**

Free delivery will be offered on all purchases. This will be co-ordinated by Philip & Beau Frame. Contact Details below. We take personal interest in the speedy delivery of all stock after the Sale.

David 0407 889 125 Philip Frame 0427 221 610 | Beau Frame 0428 221 623

All due care is taken during the transit period of animals purchased. However buyers are responsible for the insurance of animals against injury or death from the fall of the hammer. Insurance is available on Sale Day – speak to Susan Murray, Frame Rural Agencies – or buyers may make prior arrangements with their own insurer. Buyers must also fill in the Dance Angus Delivery Form with delivery and transfer instructions.

# SALE DAY SAFETY

We have made every effort to ensure our bulls are quiet and accustomed to people, and have worked them through the yards regularly, however Sale Day adds extra pressure to bulls with crowds of people and small yards along with noise from selling. Bulls can be unpredictable and therefore people enter pens at their own risk and we request that children under the age of 16 years are not permitted to enter the pens.

# **VACCINATIONS**

All bulls have been inoculated with 7 in one and three germ tick vaccine

# **FERTILITY TESTING**

This year's Sale bulls have been semen tested by Jeff Steinbeck of Excel Genetics. A bull examination certificate is available on request.

# BREEDPLAN AND PERFORMANCE DATA

Breedplan EBVs of the sale lots are listed on page 8 and 9.

Averages for both the Spring and Autumn groups is also included for reference.

These traits include:

- Birth Weight (kg): The animal's actual weight on the day it is born (please note this figure is not adjusted for Gestation Length.)
- Adjusted 200DW, 400DW, 600DW (kg): The weight of each animal adjusted for the three stages of the animal's age.
- Scrotal Size (SCROT) and ultrasound measurements Fat (P8, Rib), Eye Muscle Area (EMA) and Intra Muscular Fat (IMF) were taken on the 3rd June 2015.

# **GENETIC INFORMATION**

All breeds of cattle, in fact all mammals including humans, have undesirable genetic conditions. Fortunately, advances in molecular genetics have facilitated the development of DNA tests for their management.

AM, NH, CA and DD are simply inherited recessive conditions. This means that a single pair of genes controls the condition. For this mode of inheritance two copies of the undesirable gene need to be present before the condition is seen; in which case you may get an abnormal calf. For the condition to be expressed the undesirable gene needs to be present on both sides of the pedigree and both the sire and dam need to be a carrier. The genetic status of animals is being reported using five categories:

- AMF Tested AM free
- AMFU Based on pedigree AM free Animal has not been tested
- AM\_\_% \_% probability the animal is an AM carrier
- AMC Tested AM-Carrier
- AMA AM-Affected

For NH, CA and DD simply replace AM in the above table with NH or CA.

Question: Crossbreeding and AM, NH, CA and DD

I use Angus bulls in a cross-breeding program. Have the genetic conditions been found in other breeds? What is the risk of an affect calf if joining to cows of another breed?

# **Short Answer:**

If the females you are using to crossbreed with have:

- 1. No Angus content you can use AMC, AM\_\_%, AMFU or AMF bulls without expecting any affected calves (substitute with NH or CA for same result)
- 2. Some Angus content you should use AMF or AMFU bulls to avoid any problems.

Note: Be aware that some breeds have had infusions of Angus in the past.

# **Welcome to our 2019 Dance Angus Bull Sale**

What an incredibly difficult year it has been, especially following on from an extremely dry 2018. Like many of you throughout the Eastern states we have been supplementary feeding all of our stock to maintain our breeding herd and in efforts to present our young cattle in a saleable condition. Sourcing quality feed also presents its challenges but we are happy to say that the standard of the 40 bulls we are offering this August are of the highest quality.

The dry weather has a way of unearthing those cattle blessed with genetics suited to harsher climates allowing them to hold condition when under stress. Originating at Millmerran, Queensland, our herd holds a certain resilience to dry conditions with those genetics in particular highlighted by the cow line beginning with foundation dam Double D New Design V1035 Z13 of whom we call "Federation Z13." The progeny from this line continue to impress with their ability to maintain condition with minimal inputs. This line has become the cornerstone of our herd with progeny by sires J204, J205, J198 and L4 all featuring in this sale. Sons of Federation females include Lot 4, 17 & 20 all of whom are prime examples of the easy doing soft cattle we have come to value.

The six sons of Millah Murrah Kingdom are a highlight with these cattle exhibiting the extra growth and length that made their Sire an all time top selling Sire. Two of the Kingdom sons are Embryo transfer calves out of star donors Federation J200 (Lot 4), a beautiful, maternal Emperor E343 daughter and the powerful, thick topped K5X Wilcoola J21 (Lot 11) who is a Raff Danny Boy daughter.

Renowned US sire Thomas Up River is represented by an outstanding draft of seven sons all blessed with moderate birth EBV's, solid 600 day growth potential and eye catching muscle expression.

The five Millah Murrah Loch Up sons are a testament to their sire's scale and length of body. Lot 14 is a prime example of the capacity of these heavy deep-bodied cattle.

Dance Timeless J78 is a son of the wonderful Grid Maker daughter Z15 that has gone on to form the backbone of the Marcella Angus herd in QLD. His five sons are very sound, attractive cattle all exhibiting his growth and muscling. The J78 calves are robust at birth and grow quickly with these sons bound to improve the growth in most herds.

Dance Emperor E343 J198 has only one offering this year but what a ripper he is! His easy doing nature, thick topline and depth of body made him a perfect choice for Lot 1.

Dance Concensus 7229 J204 has two sons in the sale both showing tremendous grace and balance always standing out every time we enter the paddock.

Dance Emperor E343 J205, another great sire of the Federation line, is represented by 3 lovely sons exhibiting evenness of fleshing, length and a strength of spine that sets them apart in the group.

Lastly super heifer sire Dance Comrade L4 is out of a Thunderbird sired Federation female. This boy's thickness has to be seen to be believed! Used over our maiden heifers with wonderful success. Two L4 sons will be offered at the sale, both with a great mix of superior carcase potential and calving ease.

Our Autumn Bulls are all sired by Trowbridge BBB Powertool L11 a sire that impressed us at Sydney Show who went on to win Reserve Senior Champion in 2016. Powertool sons are big, correct and lovely natured cattle with plenty of growth.

We have decided to offer free transport to anyone who requires it as a small incentive to help out in these difficult times. We believe this reduced offering of bulls is one of our best yet and represents a great opportunity for the discerning cattleman to upgrade their genetics in a year that promises to offer great value for money. We look forward to catching up with you on sale day and meeting new faces, all the best for the start of hopefully a better season.

Best regards,

David, Christine and Fergus Dance.

# WHAT ARE HBR & APR BULLS?

**HBR -** Herd book registered. These bulls are stud registered with the Angus Society and are transferable for stud duties.

APR - Angus Performance Registered are performance recorded bulls unable to be transferred for stud duties.

# **UNDERSTANDING ANGUS BREEDPLAN EBVs**

# What is Angus BREEDPLAN?

Angus BREEDPLAN is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. Angus BREEDPLAN uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

Angus BREEDPLAN includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

Angus BREEDPLAN analyses are conducted by the Agricultural Business Research Institute (ABRI), using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England. Ongoing BREEDPLAN research and development is supported by Meat and Livestock Australia.

# What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

# Using EBVs to Compare the Genetics of Two Animals

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

# Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to:

- ◆ the breed average EBV
- the percentile table

The current breed average EBV and percentile table is provided in these explanatory notes.

# **Considering Accuracy**

An accuracy value is published in association with each EBV, which is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50- 74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

# **Description of Angus BREEDPLAN EBVs**

EBVs are calculated for a range of traits within Angus BREEDPLAN, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this sale catalogue is provided on the following pages.

		BIRTH	
Calving Ease Direct	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
		GROWTH	
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
		FERTILITY	
Days to Calving	kg	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
		CARCASE	
Carcase Weight	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
Eye Muscle Area	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.

		FEED EFFICIENCY	
Net Feed Intake (Post Weaning)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a growing phase.	Lower EBVs indicate more feed efficiency.
Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
		TEMPERAMENT	
Docility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
		STRUCTURE	
Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.
		SELECTION INDEXES	
Angus Breeding Index	·	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index		Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index		Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index		Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.
