## WELCOME TO EASTERN PLAINS ANGUS

### WELCOME TO EASTERN PLAINS ANGUS

Like so many others, we're caught up in one of our worst seasons on record. As a result, we've offloaded just over 800 head since January. However, amidst the desperate widespread drought conditions, it is heartening to see the cattle market sustaining premiums for Angus! Just one of the reasons we're committed to this fabulous breed.

This year we catalogue 78 bulls. They represent our commitment to producing quality bulls with a balance of fertility, growth & carcass traits, backed by comprehensive bull testing. Importantly, they are founded on hardy, resilient maternal lines, selected for fertility & low maintenance for over a century.

As in previous year's, we have again put our Sale Bulls through a very extensive bull testing program. Every bull catalogued has passed all components of this program (there are 7). We do this to provide clients with objective, accurate & independent information on the sale bulls, rather than just our opinion. Please refer to the HEALTH & BULL TESTING INFORMATION pages in the catalogue for details on this.

We have a long held practice of continually testing our seedstock genetics in our own commercial & stud herds, which are both entirely self-replacing. The first 21 lots were used as yearlings in either Spring 2018 joinings over commercial cows & heifers, or as back-up bulls in the stud following our Spring 2018 AI program. These bulls will well & truly have calves on the ground by sale day with our 1<sup>st</sup> calf stud & commercial heifers started calving mid-June.

We make a deliberate decision not to present bulls overly fat on sale day. They are presented ready-to-work, in strong forward condition in order to withstand the rigours of adjusting to their new home environment & joining, all ahead of them after sale day. Since birth, all the bulls have been mustered with dogs & horses (&/or the Toyota especially on a cold Guyra day!). Please note, rarely have they been handled with motor bikes so a new bull may react strangely to this.

We invite you to join us to inspect the bulls prior to our Bull Sale, at our OPEN Day on Wednesday 31<sup>st</sup> July, here at "Eastern Plains". The bulls will be yarded 10am to 3.30pm, & please stay for a complimentary BBQ lunch, tea & coffee & 'beverages' (!!). At only a week out from our sale, our OPEN DAY is an opportunity to inspect the bulls & bid with confidence via AuctionsPlus should you be unable to attend our Bull Sale.

Please don't hesitate to call if you'd like to discuss the bulls &/or our breeding program here at Eastern Plains Angus; Andrew mobile 0477 359 057 or landline 02 - 6779 4237.

Regards

Andrew & Sally White

## SALE INFORMATION

### DELIVERY

Eastern Plains Angus is offering free delivery of bulls up to 500kms. Andrew White will co-ordinate delivery – tel (02) 6779 4237. Local and interstate carriers will be in attendance at the sale. We recommend local carrier Peter Kratz, on tel (02) 6772 5597 or mobile 0412 667 320.

### INSPECTION

Inspection of bulls prior to sale day is most welcome – please phone Andrew White on (02) 6779 4237 to arrange. Bulls will be yarded for inspection from 9am on the morning of sale day.

### INSURANCE

A representative from Elders Insurance Agencies will be in attendance at the sale to assist with all enquiries. We recommend that purchasers insure their bulls.

### STUD TRANSFERS

Ownership transfer of bulls will be registered by the vendor with Angus Australia upon written request of the purchaser or by instruction as noted on the Buyers Instruction Slip in this catalogue.

### AIR TRAVEL

The nearest airport is located at Armidale. Please allow approx. 1hr to then to drive to “Eastern Plains” and the sale venue. Qantas Airlines (131313) fly regularly to Armidale. Please contact the selling agents to make arrangements to meet planes and for transport to the sale.

### REFRESHMENTS

Morning tea and lunch will be provided.

### SALE DAY SAFETY

Visitors enter yards/pens at their own risk. Children aged 16yrs & under are not permitted to enter the yards/pens. Please do not take prams/strollers into the yards/pens with the bulls.

### MOBILE PHONE SERVICE

Please note, there is NO MOBILE PHONE SERVICE at our selling yards.

### REBATE

A rebate of 2% payable to outside agents who introduce their clients in writing 24hrs prior to sale day.

### GST

Bulls will be sold GST exclusive. That is, if a bull is knocked down for \$4,000 you will be invoiced \$4,400.

### RECESSIVE GENETIC CONDITIONS

The genetic status for recessive genetic conditions for each bull appears in his Lot Details (look for ‘GENETIC STATUS’). For more information please see the Angus Australia website:

[www.angusaustralia.com.au](http://www.angusaustralia.com.au)

### ANGUS AUSTRALIA CATALOGUE AGREEMENT

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index Values, are based on the information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

### EUROPEAN UNION CATTLE ACCREDITATION SCHEME (EUCAS)

Eastern Plains Angus is an EU accredited herd.

### MEAT STANDARDS AUSTRALIA (MSA)

Eastern Plains has been registered with this scheme since 1999.

### AUCTIONS PLUS

The sale will be interfaced with Auctions Plus. Contact Paul Harris 0428 600 510, Auctions Plus Sydney 02) 9262 4222 or [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

*Australia's Livestock Marketplace*

## HEALTH & BULL TESTING INFORMATION

All bulls offered have passed a thorough physical examination conducted by Australian Cattle Veterinarians (ACV) accredited veterinarian, Dr Leisa Brown, Guyra District Veterinary Services as part of BULLCHECK™. This included:

### HEALTH & STRUCTURE

Bulls were examined for structural and gait soundness and freedom from physical and congenital defects. Bulls were inspected for penis health, sheath health and internal sex gland palpation via rectal entry for irregularities and /or infection. All bulls were certified as healthy at the time of veterinary examination.

### SCROTAL CIRCUMFERENCE

All bulls presented had two evenly sized, symmetrical testicles of good tone and consistency at the time of veterinary examination.

Scrotal circumference was measured as part of BULLCHECK™. All bulls had a scrotal circumference of at least 32cm. Attainment of 32cm or greater at 18 months of age is indicative of early sexual maturity and the ability to produce adequate quantities of high quality semen on a daily basis. Bulls with higher scrotal circumference are able to achieve higher conception rates.

### SEMEN TESTING

Semen samples were collected from all bulls in the catalogue as part of BULLCHECK™:-

- (1) SEMEN MOTILITY is an assessment of the percentage of sperm cells in a semen sample that are observed as 'moving forward' (as well as colour). Often referred to as a 'crush side' semen test, following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward. All bulls catalogued exhibited  $\geq 50\%$  progressively motile sperm in their sperm sample. Test results are reported for each bull with his lot details.

- (2) SEMEN MORPHOLOGY refers to the anatomy or structure of the sperm. It cannot be tested 'crush side', requiring a large and specialised laboratory microscope to examine a preserved semen sample. Semen Morphology is now seen as the most important measure of fertility in the bull. It will pick up defects in the sperm that 'crush side' testing cannot. A threshold guide for minimum Semen Morphology is  $\geq 70\%$  normal sperm for bulls used in single sire matings or AI and  $\geq 50\%$  normal sperm for bulls used in multiple sire matings. Test results are reported for each bull with his lot details.

### PESTIVIRUS

All bulls have ear notch tested negative to being Persistently Infected (PI) with pestivirus and can therefore be regarded as 'non-carriers'. Each bull was vaccinated with Pestigard™ on 20/05/19 and 19/06/19. We recommend purchasers maintain an annual booster vaccination program.

### VACCINATION & DRENCHING

All bulls were vaccinated with Vibrovax™ and 7in1 on 20/05/19 and 19/06/19. We recommend purchasers maintain an annual booster vaccination program. Bulls were drenched with Baymec pour-on, on 20/5/19.

### BOVINE JOHNES DISEASE

Eastern Plains Angus has a Johne's Beef Assurance Score of 8 (J-BAS8). We continue our involvement in BJD testing since 1998.

### TICK FEVER VACCINE

By prior arrangement, we can vaccinate bulls sold into cattle tick areas. We offer to run these bulls on-property until immunity develops prior to delivery. Please discuss prior to sale day with Andrew White on (02) 6779 4237 or 0477 359 057.

# HEALTH & BULL TESTING INFORMATION

## BEEFCLASS STRUCTURAL ASSESSMENT SYSTEM

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry.

Over the past decade, use of the Beef Class Structural Assessment System in the seedstock industry has produced a marked improvement in herds which have shown commitment to using the information appropriately. Through these dedicated breeders, there has been a flow on effect of structural improvement throughout all sectors of the beef cattle industry. This structural analysis has allowed the formation of trial structural EBV's which are gaining momentum within the industry.

Liam Cardile of 'BEEFXCEL' structurally assesses many of the leading seedstock herds in Australia. 'BEEFXCEL' is not involved in any genetic marketing or specific breeding advice and therefore has no conflict of interests to influence their stock appraisal. The integrity of the structural data provided by 'BEEFXCEL' is recognised throughout the industry as Liam is a fully INDEPENDENT assessor.

The Eastern Plains Angus Sale Bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft. Sale bulls were assessed by Liam Cardile of BEEFXCEL on 29/4/19.

How to use The Beef Class Structural Assessment System:

The Beef Class Structural Assessment System uses a 1-9 scoring system;

- A score of 5 is ideal. (Note: Temperament Score of 1 is preferable)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal.
- A score of 2 or 8 are low scoring animals and should be looked closely before purchasing.
- A score of 1 or 9 should not be catalogued and are considered culls.

Please contact Liam Cardile on 0409 572 570 should you wish to discuss the above.

## HEALTH & BULL TESTING INFORMATION

**Guyra District Veterinary Services**  
207 Falconer Street  
GUYRA 2365  
(02) 6779 1173

Andrew & Sally White  
Eastern Plains  
GUYRA NSW 2365

17 June 2019

On the 8<sup>th</sup> and 9<sup>th</sup> of June 2019, I Dr Leisa Brown of Guyra District Veterinary Services carried out a breeding soundness evaluation on each bull listed in the 2019 'Eastern Plains Angus' catalogue. This included:-

- *A physical examination* – including assessment of head, legs, joints and gait to ensure structural soundness
- *Examination of the reproductive organs* – Internal palpation, measurement of scrotal circumference and full examination of penis and testicles
- *Semen collection and assessment of gross motility* (using iSperm technology)
- *Semen morphology* – samples were assessed by an accredited morphologist at Australian Veterinary Semen Morphology

Semen morphology has become an integral part of the Veterinary Bull Breeding Soundness Evaluation. It allows assessment of individual sperm for defects that can potentially affect fertilisation and therefore conception. The most serious morphological defects can result in fertilisation of the ovum but not produce a viable embryo. In the paddock the result of this will be failure of that cow to achieve a pregnancy on that cycle. To achieve optimal fertility in a herd the conception rate needs to be 65% per cycle. The ultimate aim of a complete breeding soundness examination is to identify any risk factors that may compromise this.

All bulls have also been tested for pestivirus antigen by ear notch at Swans Veterinary Services and returned a negative result.

Each bull listed in the 2019 Eastern Plains catalogue has been found to pass the requirements set by the Australian Cattle Vets Association for a bull breeding examination.

Yours sincerely

Dr. Leisa Brown, BVSc Hons 8292.  
Guyra District Veterinary Services

# UNDERSTANDING ANGUS BREEDPLAN EBVS

## UNDERSTANDING ANGUS BREEDPLAN EBVS

### What is Angus BREEDPLAN?

Angus BREEDPLAN is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. Angus BREEDPLAN uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

Angus BREEDPLAN includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

Angus BREEDPLAN analyses are conducted by the Agricultural Business Research Institute (ABRI), using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England. Ongoing BREEDPLAN research and development is supported by Meat and Livestock Australia.

### What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

### Using EBVs to Compare the Genetics of Two Animals

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

### Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to:

- ◆ the breed average EBV
- ◆ the percentile table

The current breed average EBV and percentile table is provided in these explanatory notes.

### Considering Accuracy

An accuracy value is published in association with each EBV, which is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50- 74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

### Description of Angus BREEDPLAN EBVs

EBVs are calculated for a range of traits within Angus BREEDPLAN, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this sale catalogue is provided on the following pages.

## UNDERSTANDING ANGUS BREEDPLAN EBVS

### BIRTH

<b>Calving Ease Direct</b>	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
<b>Calving Ease Daughters</b>	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
<b>Gestation Length</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
<b>Birth Weight</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

### GROWTH

<b>200 Day Growth</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
<b>400 Day Weight</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
<b>600 Day Weight</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
<b>Mature Cow Weight</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

### FERTILITY

<b>Days to Calving</b>	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
<b>Scrotal Size</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

### CARCASS

<b>Carcass Weight</b>	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
<b>Eye Muscle Area</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
<b>Rump Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
<b>Retail Beef Yield</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
<b>Intramuscular Fat</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

# UNDERSTANDING ANGUS BREEDPLAN EBVS

## FEED EFFICIENCY

<b>Net Feed Intake (Feedlot)</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
----------------------------------	--------	--	---

## TEMPERAMENT

<b>Docility</b>	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
-----------------	---	---	--

## STRUCTURE

<b>Front Feet Angle</b>	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
<b>Front Feet Claw Set</b>	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
<b>Rear Feet Angle</b>	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
<b>Rear Leg Hind View</b>	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
<b>Rear Leg Side View</b>	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.

## SELECTION INDEXES

<b>Angus Breeding Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
<b>Domestic Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
<b>Heavy Grain Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
<b>Heavy Grass Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

## ANGUS AUSTRALIA – DNA PARENTAGE VERIFICATION

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

# : DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

# EASTERN PLAINS ANGUS SALE BULLS
