18th Annual Bull Sale
Saturday 10th August 2019

LOT 1 MYANGA MEDIATOR N109

THE ALL ROUNDERS

www.myanga.com.au

Welcome to the 18th Annual **Myanga** Bull Sale

*“ Our focus on **fertility, structure and docility** remains **absolute**”*

We are very pleased to present our 2019 Bull Sale draft for your consideration.

The 2019 growing season in the Southern Tablelands has been tough like everywhere in New South Wales. Despite the challenges, 2019 has been a busy year with stud heifers sold at the sale last year doing well in the show ring and client feedback being positive to how our bulls performed in tough conditions delivering high conception rates. This year also saw our inaugural Myanga Blood sale. This sale provides a platform for our clients to sell their Myanga offspring collectively under one banner to gain further reach and profile among buyers across the state and interstate.

This year's bull line-up represents a continued progression from last year. A combination of genetic improvement and numerous truckloads of hay see the bulls present very well. Overall this year's line-up is extremely even, offering outcross genetics and showing plenty of growth, fertility and exceptional structure. Most of the bulls on offer this year will be suitable to join with heifers as well as cows the All Round Sires.

The four dominate sires featured in the 2019 draft are

Musgrave Mediator - A sire that has really made his mark in our program, the daughters are just exceptional and his sons are outstanding. Ideal for heifers and cows, at the same time adds that extra dimension in carcase shape, depth of body big foot, extra rib and they weigh like led. (14 sons sell)

Young Dale Xcalibur 32x - Now that we have had daughters in production and grand sons coming through the Program, Xcalibur is adding that extra weight at weaning and massive 400 days, the daughters have beautiful udders and the feet on his progeny are exceptional. We used Xcalibur heavily in our ET program last year and his bull calves are the standouts once again in our autumn drop. (5 sons sell)

DSK T410 Justify J29 - One hell of a bull, big feet, extra length, more carcase and exception udders on his progeny. Complete outcross genetics in a complete package, Justify has been the most consistent sire we have used to date and sadly passed away early last year. (5 sons sell)

Hardhat Grass Range Y21 J518 - At 6 years of age he still looks like a 3 year old and never misses a cow. His breedplan numbers for EMA has jumped to +14.1 which puts him in the top 1% of the breed and his progeny sure show it. He is a true all round sire with great soundness of foot and is as consistent a breeder as you will find. (9 sons sell)

Our female herd continues to have exceptional fertility, foot structure, temperament and do ability. All this has meant the quality of our 2019 draft is a step up from 2018 and a continued progression of the Myanga programme.

We look forward to seeing you on Saturday 10th August for our 18th annual bull sale commencing 12 noon at Chapman's lane Chatsbury.

Kind Regards

Stephen and Sally

All bull videos are available to view online at www.myanga.com.au

2019 Bull Sale

Saturday 10th August at 12 noon

On Property 480 Chapmans Lane, Chatsbury NSW

40 ANGUS BULLS

Notes to Buyers

INSPECTIONS

Welcome any time by appointment or from 9am on sale day.

HEALTH

- ✓ Myanga is an Accredited JBAS 8 Herd
- ✓ 7 in 1 vaccinations
- ✓ All bulls have been Vibrio vaccinated

GUARANTEE

Myanga guarantee all bulls to be fertile and capable of natural service, however any claims must be accompanied by a veterinary certificate and made within 6 months of sale date. If a bull should prove infertile or breaks down due to reasons other than injury, misadventure or negligence Myanga will replace the bull with a satisfactory replacement if available or issue you with a credit equal to the purchase price, minus any salvage value.

INSURANCE

There is no vendor insurance on sale bulls. It will be the responsibility of the purchaser to insure their bulls.

SUPPLEMENTARY SHEET

With updated weights available prior to sale.

REBATE

A rebate of 2% on stud bulls will be offered to outside agents introducing clients in writing prior to the sale or in attendance on day of sale.

TRANSPORT

Delivery will be arranged as cheaply as possible, with FREE delivery of bulls for the first 100km. Bulls remaining at Myanga pending delivery are at the purchaser's risk.

INTENDING BUYERS

A buyer's number system will be in operation. Therefore, all prospective purchasers will be required to register on sale day at the agent's office prior to commencement of the sale.

INJURY TO PERSON OR PROPERTY

All persons who attend the sale do so at their own risk, and vendors therefore assume no liability. All persons entering bull pen's do so at their own risk. Please NO children allowed in bull pen's at the Myanga sale complex.

SALE CATALOGUE DISCLAIMER

Comments:

All round sire ideal for heifers and cows. Outcross pedigree with Maternal strength in a commercially focused package. These Mediator sons are the true all rounder sires that combine calving ease with big weaning weights that finish early which means more money in your pocket and daughters that have exceptional udders and fertility.

Comments:

Myanga Lucifer was our top price bull in the 2017 bull sale selling for \$14,000. His sons are just a chip off the old block, docile, sound, soft and are true calving ease sires. Suited to heifers and cows.

Purchaser..... \$.....

IMPORTANT NOTICES FOR PURCHASERS

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder nor owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents from member(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name:Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

BRINGING YOUR NEW BULL HOME

WHEN PURCHASING A BULL, CARE AND HANDLING AFTER THE SALE CAN BE AS IMPORTANT AS THE PURCHASE ITSELF. LOOKING AFTER YOUR BULL WELL DURING THE INITIAL STAGES OF HIS WORKING LIFE MAY ENSURE LONGEVITY AND SUCCESS WITHIN YOUR BREEDING HERD.

PURCHASE

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

DELIVERY

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

IF YOU USE A PROFESSIONAL CARRIER:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

BRINGING YOUR NEW BULL HOME

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

MATING NEW YOUNG BULLS

Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

DURING MATING

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

NORTHERN AUSTRALIA

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straight-bred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

ADAPTATION

The key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

PURCHASE IN COOLER MONTHS

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

CHANGE OF FEED SOURCE

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

MANAGING CATTLE TICKS

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.
