# Welcome

## We invite you to join us for our Spring Bull Sale.

At a recent resilience event, the talk was of 'bouncing back' from this drought. This really got us thinking....Is bouncing back the answer? Do we want to go back to how things were before? We don't think so, in our minds we need to 'bounce forward' & make things better, improve & implement change.

We've all been hit with a massive setback, this drought has gone on for far too long. But this is really just the beginning. If we want to come out the other side better off, we need to start working towards it now.

We've started to put the wheels in motion here at Trio Angus. Selecting genetics for herd rebuilding has been a key focus. We're breeding bulls with exceptional maternal characteristics, so the female progeny our clients retain will make great foundations for their herd. We're also introducing new calving ease genetics, so those who are choosing to retain more females will have plenty of genetic options.

Selecting & using the right bulls during the herd rebuilding phase is really important. These bulls will have a massive impact on the business for years to come. Bulls are responsible for 90% of herd improvement (or deterioration). So, start planning now; think about the ideal cow herd you want & what will be the quickest, most cost-effective way to

get there. To quote US rancher, Kit Pharo - "It takes a long time to breed the ideal cow with the wrong bull".

The bulls on offer in our Spring Bull Sale present you with a range of options. Ascot Lion Heart & Kidman Precedence are some of the best sire lines in the Angus breed to date. The eight yearling bulls are all excellent choices to use over heifers & include new genetics of Millah Murrah Maestro & Texas Mount.

We encourage you to make the most of the opportunity this Spring Bull Sale creates – it could be the perfect chance to buy leading genetics at very affordable prices.

We're excited about the future. The beef industry is going to be a great place to be once the seasons turn around. Prepare now, put your herd in the front seat to capitalise on the opportunities that will arise. There will be a huge demand for top quality genetics.

We're here to help you any way we can -whether you're looking for genetics, advice, information or industry contacts please don't hesitate to contact us.

**Coming together is a beginning. Keeping together is progress. Working together is success.**

*Matt & Shell*

# Sale Information

## **SALE DATE**

The sale will commence at 1pm on Thursday 15th August 2019. Bulls will be penned ready for inspection from 10am.

## **SALE LOCATION**

The Trio Angus Bull Sale will be held on-property at 'Ingleburn' 6914 Ulan Rd, Cassilis NSW. From Cassilis, travel 10 kms west on the Golden Highway, turn left onto the Ulan/Mudgee Rd, 'Ingleburn' is 2.5km on the left (map on following page).

## **SELLING SYSTEM**

The sale of bulls will be conducted under normal auction conditions. Buyers must register with the selling agents prior to sale commencement. All bulls are sold GST exclusive. Successful purchasers must give the selling agents written advice regarding payment & transport arrangements at the conclusion of the sale. EFTPOS payment available on sale day (1% surcharge).

## **OUTSIDE AGENTS REBATE**

A rebate of 2% will be payable to agents who introduce their clients in writing 24 hours prior to the sale and attend the sale with or on behalf of their clients & settle within 7 days. A rebate of 1% will be payable to agents who introduce their clients in writing prior to sale day, but do not attend the sale, and settle within 7 days.

## **HEALTH & FERTILITY**

The bulls are ready for immediate use. They have had the following:

- Semen tested
- Vaccinated with 7 in 1
- Vaccinated for Vibrio
- Tested Pestivirus free
- Drenched with Dectomax

The Trio Angus herd is Johnes' Beef Assurance Score (J-BAS) 7.

## **MANAGEMENT**

The bulls have been running as two management groups. We do not recommend joining younger bulls with older bulls. The bulls have all been grazing an oats crop and supplemented with rolled barley.

## **DELIVERY**

We are pleased to offer free delivery for the first 300km on all bulls purchased in the sale. Buyers may also pick up their bulls on sale day and receive a \$200 rebate. We will also be offering delayed delivery up to 1st October (agistment rate applies). For full details see the following page.

## **INSURANCE**

There is no vendor insurance on the bulls. We encourage buyers to insure their purchases, especially those that aren't getting picked up on sale day. Various insurance options will be available on the day.

## **INSPECTION DAY**

All bulls will be penned for inspection on Friday 2nd August, 9-4pm.  
Refreshments available all day.

## **BULL WARRANTY**

All bulls are sold as fertile and capable of natural service. If, within 6 months of sale a bull should breakdown due to reasons other than injury, misadventure or negligence, Trio Angus will provide you with a satisfactory replacement if available, or issue you with a credit equal to the purchase price minus salvage value. This credit may be used to purchase a bull from Trio Angus in the future. Any request for replacement/refund must be lodged with the vendor within 6 months of purchase and be accompanied by a current vet certificate.

## **SAFETY DISCLAIMER**

All of the cattle are quiet to handle under normal conditions. However, there are always risks associated with handling cattle. Visitors enter the cattle pens at their own risk. Children must not enter the pens under any circumstances. The vendor accepts no liability for accidents that may occur at the Trio Angus sale or whilst on the property.

## **DELIVERY OPTIONS**

**We are committed to making our clients post-sale bull arrangements as easy as possible. Pick which option works best for you.**

### **FREE DELIVERY**

We are pleased to continue our free delivery service. This is for the first 300km. All bulls will be delivered within two weeks of the sale.

### **TAKE YOUR BULL HOME ON SALE DAY**

Bring your own truck, or organise a carrier, so you can take delivery of your bull on sale day. In return we will offer a \$200 rebate per buyer.

### **DELAYED DELIVERY UP TO 1ST OCTOBER**

To help with the challenging season we will be offering all buyers the option of delayed delivery until 1st October. An agistment rate will apply to cover feed costs. We will still deliver the bulls for free if this option is chosen.

Like always, we will take all care to look after your bull after the sale, but no responsibility can be accepted whilst awaiting delivery. Various insurance options will be available on sale day and are recommended.

**PLEASE NOTE: DELIVERY OPTION MUST BE INDICATED ON THE BUYERS DELIVERY SLIP AT THE CONCLUSION OF THE SALE.**

# *Rebates & Discounts*

## **2% REBATE**

We are pleased to offer a 2% rebate to all agents who introduce and attend the sale with or on behalf of their client, and settle within 7 days.

## **1% REBATE**

A 1% rebate to all agents who introduce their client, but do not attend the sale, and settle within 7 days.

## **2% DISCOUNT**

A 2% discount is available for all buyers who settle personally and pay in full on sale day. In this case the agent rebates are not applicable.

## **\$200 DISCOUNT**

A \$200 discount per buyer is available to those that pick their bull up on sale day.

## **AGENT INTRODUCTIONS**

Agents must introduce their clients in writing no later than 24 hours prior to the sale to qualify for rebates. Please direct to [gtsmoffice@gmail.com](mailto:gtsmoffice@gmail.com) or call Michael Glasser on 0403 526 702.

# Using EBV Percentiles

## MAKING IT EASIER TO PICK THE RIGHT BULL

Selecting the right bull for your business needs to be as easy as possible.

So we've incorporated percentiles into our catalogue as an extra tool to help you.

A percentile value allows you to see where an animal sits in the breed for each trait.

This gives you more information than an EBV figure alone. Eg. If an animal sits in the

30th Percentile for IMF it means it's in the Top 30% of the breed. But, if an animal sits in the

80th Percentile, it means that 80% of animals are better than it. Generally, the lower

the percentile figure the better, except in the case of Mature Cow Weight where being the

biggest isn't always the best.

The 600 Day Weight of this bull sits in the 80th Percentile, meaning 80% of animals are better than him for this trait.

TRIO FRED N1					
	600	EMA	RIB	RMP	IMF
EBV	+90	+4.5	+2.3	+2.3	+2.1
PERC	80%	55%	5%	5%	30%

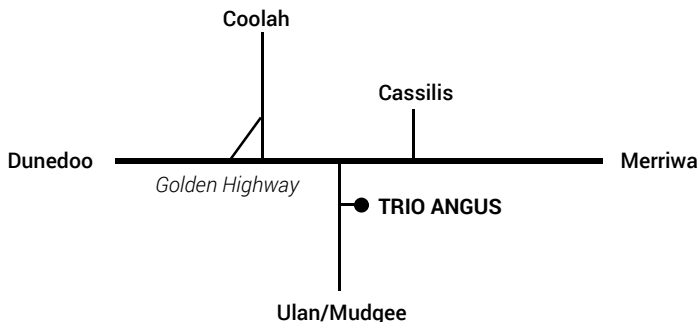

The IMF of this bull sits in the 30th Percentile, meaning he sits in the top 30% of the breed for this trait.

## Directions

**Trio Angus is located 12kms south west of Cassilis.**

**From Merriwa/Cassilis:** Travel 10km past Cassilis on the Golden Highway. Turn left on to the Ulan/Mudgee Rd, Trio Angus will be 2.5km on your left.

**From Coolah:** Leave town on the Cassilis Rd, follow it all the way to the Golden Highway. Turn left. Stay on the Golden Highway until you reach the Ulan/Mudgee Rd, turn right. Trio Angus will be 2.5km on left.

# ASCOT LION HEART L305

## 18 SONS ON OFFER

In 2016 we made a significant investment in Ascot Lion Heart. This sale is where our clients get to reap the true rewards of this investment.

### WHY LION HEART?

We're always trying to find bulls that meet our breeding objectives & can take our herd to the next level. When we came across Lion Heart he caught our eye straight away. So in the weeks prior to the sale we did alot of homework & on the day we bought him in equal partnership with Ben Nevis Angus for \$70,000.

### WHAT ARE HIS PROGENY LIKE?

His progeny are very consistent - the first sign of a great sire. They are **well muscled**, yet also deep ribbed & easy keeping. They have excellent **growth for age** & a soft hair type. He's also stamped them all with **excellent feet** - good heal & near perfect hoof shape. **Temperament** is very important to us & the Lion Heart progeny are second to none. He is now one of the leading bulls in Australia for growth rate, Scrotal Size & Carcase Weight - all traits that are important to our clients.

### WHATS THE FUTURE?

We have continued to use Lion Heart for the last few seasons. This has been through AI as we lost him in 2017 due to a back injury. His semen is also marketed commercially, so he will have an impact right throughout Australia in the years to come.

PERC	35	70	7	3	6	10	33	6	6	9	94	97	4	55

An impressive Lion Heart son to start the sale & a great representation of our breeding program. This bull has a ton of weight for age & is very long & powerful. He's ranked in the top 10% of the breed for numerous traits & has the largest EMA figure of all the bulls on offer. His pedigree is also second to none, going back to the great E63. She is one of our most productive cows to date, with all female progeny retained. Half brothers to this bull have sold for \$12,000 & \$10,000 in recent sales.

PERC	72	89	32	28	23	15	85	1	26	34	93	85	6	58

This bull is a real standout. He's a powerhouse with a ton of muscle & the depth of body to go with it. He has one of the largest Scrotal Size EBVs of any bull in the sale. Increased scrotal size indicates his progeny should reach puberty at an earlier age, which is desirable. His dam is an exceptional cow that is currently in our donor program & we look forward to having plenty more of her sons on offer in our future sales.

If you want to focus on breeding replacement females, then this bull is for you. He is from the Ninah maternal line, these cows consistently milk really well & wean heavy calves. They are also very fertile & hold their condition well – which defies all the rules for heavier milking cows. Their progeny also have big EMAs, just like this bull & are quiet. His half brother was a standout in our 2016 sale, selling for \$10,000.

The genetic cross of Lion Heart & Docklands has been magic. The result is an easy-keeping bull with tons of carcase on a moderate frame. He also has the highest 400 Day Weight of any bull in the sale & the equal best Carcase Weight. He has high Selection Indexes across the board indicating his progeny will be well suited to a range of market options. His dam is a lovely, smooth-made cow who received a lot of positive comments at our inspection day earlier in the year.

We really love this bull. We purchased his dam from Kansas Angus. She is an impressive cow, larger in frame & thicker made than most in our herd. After almost losing her in the Sir Ivan Fire we've flushed her extensively & are excited to have more of her progeny on the way. Her son in 2017 sold for \$10,000. For those that aren't afraid of some added frame & birth weight – be sure to check this bull out.

A young bull that's very structurally sound. His maternal grand-dam is another one of our 'blue-collar' Burnette cows who works hard & breeds very well for us. This young bull is developing well, showing plenty of thickness and an ability to lay down some fat. Should be a good option to use over heifers.

A Texas Mount son with a low birth weight & really short gestation length. By breeding for a short gestation length, not only are the calves born earlier & smaller, but the cow also has a little extra time to recover & get back in calf. This bull is smooth through the shoulders & also offers a good IMF.

Another Texas Mount son, but this time with a thicker muscle pattern. His dam is a moderate, thick set cow with a low mature cow weight. This bull has a great combination of calving ease genetics in his pedigree, which includes Ellingson Scotsman. As a result he should be a safe option to use over heifers.

We are very pleased to have secured Ascot Lion Heart L305 as the new leading sire for the Trio Angus breeding program. He was purchased at the record breaking Ascot Bull Sale in QLD for \$70,000 in partnership with Ben Nevis Angus, Walcha. He is a bull that offers a big hindquarter, is easy keeping, with good feet & a pedigree backed by the well respected Millah Murrah female herd. He sits in the top 1% of the breed for all growth traits, along with Scrotal Size & Carcase Weight.

Precedence has some outstanding progeny coming through, both bulls & females. His pedigree combines two great Angus sires in Matauri Reality & Te Mania Emperor. He has an exceptional temperament & offers calving ease, along with added rib & rump fat & fertility. Precedence always holds his condition well. We sold him to Peakes Angus, Barraba, last year for \$20,000 but continue to use him through AI.

# *Females are our Foundation*

## **BULLS ARE OUR BUSINESS, BUT FEMALES ARE OUR FOUNDATION.**

For the past 16 years our Angus cows have been very good to us. They have consistently produced every year and this has allowed us to grow the business we love. We started out with a handful of carefully chosen registered cows, and from there have slowly built our cow herd to as high as 245 quality females. Here is a background to some of the cow families in our herd.

### *Burnette*

The Burnette line began with one of the very first stud cows we purchased in 2003. We refer to the Burnettes as 'the workers' and today they are still the top producing cow family in the Trio Angus herd. Embryo transfer work allowed us to multiply this foundation line and as a result we've had over 40 females in production originating from the first Burnette cow. The more the better, as the impact the Burnette family has had on our breeding program is immeasurable. Our Burnettes breed power and performance, and also have plenty of longevity.

### *Expensive*

The Expensive family started with the purchase of a cow from Farrer in 2006. E63 is currently the matriarch of this line, with all her daughters retained & more coming through ET work. We have also used one of her sons as a stud sire. They have a distinct type, being well muscled yet also easy keeping & deep-bodied.

## *Wagon*

The Wagon family is new to our herd & was started through the purchase of a cow from Kansas Angus in 2015. We almost lost this new cow in the Sir Ivan Bushfire but she recovered & has been flushed extensively since. The Wagon line are larger framed & very solid. The calves are often born abit heavier & they maintain this weight advantage right through.

## *Lowan*

We purchased two half sisters from Tucklan Valley Angus to introduce the Lowan family into our herd. The dam of these two cows was a full sister to Te Mania Unlimited, a bull with an outstanding reputation for siring great maternal daughters that are easy keeping with good milk. With this genetic background they have proven to be a quality investment for our program.

## *Quoll*

The Quoll family is one of our favourites, they are stylish, with excellent growth & good temperaments. Our original Quoll cow, B57, was purchased with a group of heifers from Outwest Angus near Coonamble. B57 quickly rose to the top & has continued to breed one of the pick calves year in, year out. We have used two of her sons as sires in our herd with great success. Using the progeny of these cows has allowed us to add more of the Quoll family line into our program.

***When you invest in Trio Angus genetics you are buying more than a bull, you are buying a piece of our program. These females are the foundation of our program.***
