FRIDAY, 1ST FEBRUARY, 2019

LOT 8 – STUD SIRE AMARULA COOLAMINYAH

LOT 10 – STUD SIRE AMARULA OXYDIZE

COOLAMINYAH AT 10 MTH OLD

LOT 115 – STUD SIRE AMARULA MITCH

AMARULA DORPER SALE CATALOGUE

EVALUATION

Amarula Dorper and White Dorpers chosen in the sale team have been selected by Justin and Lorroi. We are both qualified Dorper Inspectors and judges. We have evaluated the rams following the Dorper Breed Standard. Our evaluation is a guide to be used in conjunction with the qualities you are looking for in a Dorper Ram or Ewe. Please look at the animals and decide what qualities are right for you.

The Dorper ewes were shorn to make them pretty. Rams have never been shorn except 4 Stud Sires Lot 7-10. Their videos include non-shorn footage. Feet have not been trimmed. We are breeding rams that are productive and commercial, that will breed you the best prime lamb. They will perform wherever they go.

What you see is what you get!

HEALTH

Amarula is an Ovine Brucellosis accredited flock. We have undertaken 2 negative faecal 350 tests in the last 4 years and have our own On Farm Biosecurity Plan. Amarula rams and ewes have been vaccinated with 6 in1 and Scabby Mouth vaccine.

DELIVERY

We take care in the efficient delivery of all stock after the sale. Landmark agents will be handling the delivery of rams & ewes after the sale.

NO STOCK WILL BE LOADED UNTIL AFTER THE SALE IS COMPLETED!

FREIGHT AND TRAVEL

We are willing to hold animals for a reasonable period of time to allow for coordination of transport to their new home. We can provide recommendations of suitable stud stock carriers and will assist wherever we can for a safe and efficient transport of animals to your home property.

AGAIN, WE HAVE FREE DELIVERY TO IVANHOE VIA COBAR AND BARCALDINE (VIA MITCHELL) AND PLACES IN BETWEEN.

INSURANCE

Animals will become the responsibility of the purchasers at the conclusion of the sale. We strongly recommend insuring your animals for a period at the conclusion of the sale. Insurance can be arranged with Landmark as required.

AMARULA DORPER SALE CATALOGUE

FERTILITY GUARANTEE

All Rams & Ewes are guaranteed to breed. Any claim against the breeding ability of an animal purchased should be made within six months of the date of sale.

The guarantee covers the purchase value of the ram or ewe. **This does not cover infertility due to injury, misadventure or disease contracted since the sale of the ram or ewe. Insurance covers this.** A veterinary certificate may also be requested at the vendor's discretion.

The ewe or ram shall be returned in the event of an animal failing to breed and either be replaced with an animal of comparable value or credit to the full purchase price will be given at the following sale or on a private sale animal (if available).

REGISTRATIONS

If you would like your purchase to be transferred to your name, fill out the buyer's instruction slip and tick Transfer.

AUCTIONSPLUS

The Amarula Production Sale is interfaced with AuctionsPlus. This allows buyers to place bids online over the AuctionsPlus system. This year there is live streamed video and audio. It is as if you are there. Please register online at <http://auctionsplus.com.au/Registration/PreRego> at least 48 hours prior to the sale.

If you don't think your service is good enough, phone bidding is always an option. Please ring our Landmark sale team.

LUNCH & REFRESHMENTS

All refreshments and drinks are provided by Amarula Dorper Stud. We have an Amarula Dorper Lamb on the spit on the menu for lunch. Stay and join us after the sale for refreshments sponsored by Suncorp Bank.

DIRECTIONS

Glenavon is 45km east of Moree on the Inverell Rd (Gwydir Hwy). You can't miss the Amarula Dorper sign at the turnoff. We are 3km west of Gravesend.

GOOGLE MAPS - 196 Avon Downs Rd, Gravesend.

SHEEP GENETIC ASBVS

Australian Sheep Breeding Values are an estimate of an animal's true breeding value based on pedigree and performance recorded information. They are essentially a projection of how that animal's progeny will perform for a range of traits.

It is important to know that ASBVs are a tool for breeding sheep, they do not provide all the answers. Visual selection is very important to cull sheep that will not be functional in a commercial production system, regardless of how good the ASBVs are.

ASBVs provide a measure of the animal's genetic potential independent of environmental influences that can affect the physical appearance.

WEIGHT

ASBVs describe the animals' genetic merit for growth rate.

WWT - Rams with a more positive weaning weight (WWT) will on average, produce lambs that grow quicker to weaning – 100 days.

Average for Dorpers is 4.9 and the top **10% is > 6.7**

PWT - Rams with more positive ASBVs for post weaning weight (PWT) produce lambs that grow quicker and reach target weights in a shorter time. Post weaning weight estimates the genetic difference between animals at 225 days of age.

Average for Dorpers is 8.2 and the top **10% is > 10.7**

CARCASE FATNESS

ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal. We recommend a positive PFAT.

PFAT - Rams with a more negative ASBV for post weaning fat (PFAT), will produce lambs that are leaner, at the same weight. Post weaning fat estimates the genetic difference between animals at 225 days of age.

Sheep with positive fat will survive better in tough conditions and dry times.

Fat increases the ability of breeding ewes to maintain weight and condition in "tough times." Also, increases the eating quality due to intramuscular fat.

CARCASE MUSCLING

ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.

PEMD - Rams with more positive ASBVs for eye muscle depth (EMD) produce lambs that have a higher lean meat yield. Post weaning muscle depth estimates the genetic difference between animals at 225 days of age.

Average for Dorpers is 1.2 and the top **10% > 2.2**

A positive PEMD is best as it increases the value of the carcass, by increasing the amount of lean meat it contains and increases dressing percentage.

Increases the amount of meat on higher priced cuts. Higher muscling is favourably related to reproductive rate.

WORM EGG COUNT (WEC)

ASBVs describe the value of animals' genes for carrying worm burdens – a combination of being genetically less likely to pick up worms and being better at getting rid of them. Resistance can result in fewer drenches being required each year. The best way to increase the genetic resistance of your flock to worms is to use rams with better than average worm resistance.

Worm Egg Count (%) - Rams with more negative WEC ASBVs

produce progeny who have a higher genetic potential to resist worm burdens. Lower WEC ASBVs are desirable.

Average for Dorpers is -12 and the top **10% is > -43**

MCP INDEX (MATERNAL CARCASS PRODUCTION)

A combination of ASBVs into a single value. Each ASBV is weighted to reflect the traits emphasis in the breeding objective. The Maternal Carcass Production (MCP) index ranks animals on their suitability for a self-replacing system with a carcass production focus.

This index balances the main economic traits relevant to Maternal breeders who consider that fleece traits or worm egg count are not economically important. This allows higher gains to be made for growth and carcass traits. The index also assumes no mating to terminal sires. The index aims to maintain adult weight at current levels.

Average for Dorpers is 133.7 and the top **10% is > 137.4.**
