MARYVALE

LIMOUSIN & ANGUS

BREEDING BETTER BEEF

The Vogt Family looks forward to welcoming you to our on property Sale on Wednesday Feb 20th 2019

Congratulations on taking an interest in the Maryvale Cattle Sale for 2019. Thank you for your appreciation of cattle with a depth of genetic quality that we strive so hard to put together and achieve with our breeding program. We are excited to offer top quality genetics in both the Angus and Limousin breeds this year. At Maryvale we focus our cattle breeding on calving ease, growth, softness and feed efficiency. We aim to produce high yielding and genetically docile Limousin and Angus seedstock for the Australian beef industry. We choose quality genetics which will add value to all aspects of beef production from fertility and constitution to finishing and eating quality. Also of high importance are structural soundness and walking ability. We like to use EBV's with care but will not sacrifice structural soundness, functionality and good behaviour in the selection process. These performance sires are selected from a large Australian and global gene pool. This year we are excited to offer N drop Millah Murrah Angus bulls.

R.Champion Steer 2018 Royal Melbourne

Our 2018 Sale saw the top bull at \$10,000 Maryvale Magnificent M619 to Shannalea & Lonaker Limousin Studs, WA. Top Female at \$10,500 Maryvale Lipton L575 to Pelican Rise Limousins, Vic. Many others were amazed at the fantastic value they received obtaining top quality bulls from \$4000-00, with Agents having the confidence to buy on behalf of clients who were thrilled with the animal they received.

Once again Maryvale animals and descendants had success on the show circuit; congratulations to:

- Annie Boon with a Maryvale bred steer placing Reserve Champion Export led Steer @ Royal Melbourne Show 2018
- Sasha Lanyon (Horizon) with Horizon Nixon N7 placing Reserve Junior Bull @ Royal Adelaide 2018 - he's the result of the TMF Redwood pregnancy out of Maryvale Granita G135 purchased at our 2017 sale.

We are central to everywhere and it's never too far to come for fantastic seedstock. In the last 12 months clients from Indonesia visited and arranged an air shipment to their AI centre. Our cattle make it well worth the trip, near Kapunda, home of Sidney Kidman "The Cattle King". We would love to welcome you on the 20th of Feb at the Maryvale Power in the Pedigree Bull and Female Sale. Lunch will be provided.

Quality Angus now at Maryvale

We love breeding top quality cattle, so to establish our foundation Angus females we took the opportunity offered by one of the best herds in the business to attend the biggest event in Millah Murrah's history to obtain amazing breeders from Ross Thompson. (pictured right)

As a result we are offering N drop Millah Murrah Angus bulls, purchased as calves at foot Oct 2017 at the record breaking Millah Murrah female sale. A great opportunity for you to obtain these proven bloodlines; even the half-brother of the heifer (by Coonamble Hector H249) that made \$190,000- (he is Lot 1 on 20/2/19).

Once again at our annual sale on 20/2/19 we are offering a complete cross section of the very best females in our Limousin herd. This is the best we have to offer and this opportunity will only be available at our annual sale.

Barry Vogt

Naturally both sire and dam are equal components of any breeding programme. Most times the sire is discussed or noted without mention of the dam genetics. Genetic decisions are made by the breeder's desires and often checked against the EBV for certain traits that seem important to the breeder. Along with corrective selection to build the desired animal. To stabilize a breeding herd that meets any breeders aims takes years.

Maryvale has been breeding cattle for over 45 yrs. and has had a policy to only offer a small selection of females, to ensure the strength in the female family is one of good character. As the Maryvale herd is stabilized, we have in more recent

times realized we can offer small lines of females annually, which should make a contribution to other herds and the Limousin breed.

Due to seasonal frosts and changing seasonal conditions, we made a decision to increase our cow numbers. From our previous experience and the market strength, the choice to breed Angus was an easy one. We would like to think that Maryvale Angus genetics can assist the commercial breeders in the north and that we are geographically placed to do so.

When deciding the base females that we may choose as donors, again the decision was easy, as we had followed the Millah Murrah breeding programme, we were confident they would be offering suitable females at their female sale.

We needed females that were poised to go forward and meet the market demands and our critical genetic

traits. Along the fact that rarely are quality base females offered other than dispersals. Ross Thompson the principal of Millah Murrah made the comment, that they divided the herd in 2 with the intention of selling half with the knowledge that either half was ok to keep. This showed out to be correct at the sale, with an excellent line of females offered which sold to an amazing average. We hold docility high on our selection process, and have had 15 yrs of experience in selection of suitable docile cattle, fortunately we were able to find Angus females at the sale which demonstrated the behaviour we need, and this has proved to be the case. We now have many embryo calves at Maryvale which we are pleased to own.

We hope they will form a base cow herd that we can be proud of.

Next year we will have many more Angus bulls available for sale.

Sale Day Information

Sale Date: Wednesday 20th February 2019

Sale at 12.30pm – Inspection from 10.00am

4 Millah Murrah Angus Bulls

28 Limousin Bulls

29 Limousin Female Lots

J- BAS 8 & EU Accredited

Sale Information - Landmark will be facilitating the sale for us by video Auction with all cattle present onsite in holding pens for easy viewing, visitors can enter pens at their own risk. Please register with Landmark prior to the start of the sale, or with AuctionsPlus. Animals are sold exclusive of GST.

Phone Bidding – Key contacts (Interstate bidders please note we are on SA Central Standard Time)
Phone Bidding can be arranged in advance by contacting one of the following key contacts within Landmark:

Greg Beaton – Landmark Beaton Agencies Kapunda SA – 0428 847 510 or 08-85662004

Gordon Wood – Landmark Stud Stock – SA - 0408 813 215

Trevor Driver – Landmark SA & NT Area Manager – 0428 241 049

Richard Miller – Landmark SA – 0428 849 327

Ray Atwell – Landmark Stud Stock – Melbourne – 0428 836 136

Peter Godbolt – Landmark Stud Stock – Albury – 0457 591 929

John Settree – Landmark Livestock Sales Coordinator NSW – 0408 297 368

Rebates to outside agents

We appreciate the strong support that has been shown to us by Landmark and many other agents over the history of our stud. A 4% rebate will be made available to all outside agents purchasing stock at the sale of behalf of clients. Outside agents must introduce the clients to us in writing 24 hours before the start of the sale to be eligible for the 4% rebate.

Insurance

Animals will become the responsibility of the purchasers at the conclusion of the sale. We strongly recommend insuring your animals for a 3, 6, or 12 month period at the conclusion of the sale. Insurance can be arranged with Landmark as required.

Freight & Travel

We are willing to hold animals for a reasonable period after the sale to enable purchasers to coordinate the successful and efficient transport of animals home to their properties. We can provide recommendations of suitable stud stock carriers and will assist wherever we can to ensure the safe and efficient transport of animals to your home property. Please contact Matt Vogt on 0407 959 837 in regard to the freight and transport of animals post the sale.

Accommodation

Our property is located 10 kilometres North of Kapunda on the road to Marrabel on the Eastern side of the road. We are located approximately 1.5 hours North of the Adelaide Airport. The Kapunda airstrip adjoins our property and light planes are most welcome to use it. We are located between the two small townships of Allendale North and Hamilton. Our property has a "Maryvale" sign on the main road. Accommodation is readily available in Kapunda (Kapunda Tourist Park 0885662094 www.kapundatouristpark.com is one of many options) and both the nearby Barossa (25kms from us) and Clare Valleys which are both very renowned areas of attraction.

MARYVALE CONSISTENTLY ABOVE AVERAGE!

Maryvale herd averages in red
Limousin society averages in green

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

Horn Status: (HP*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, (2P) Homozygous Polled by pedigree, (P) Polled, (S) Scurred.

Colour: (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not apricot).

Protoporphyrin Status: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for protoporphyria, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for protoporphyria or have parents which have been tested normal or are free by pedigree.

Homozygous: is the term where an animal has two copies of a particular gene (tested or pedigree) for a trait (colour, polled). An example is Homozygous polled where by all progeny will be polled from that particular animal or Homozygous black where all progeny will be black.

F94L: (AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

UNDERSTANDING EBVS

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Calving Ease (DIR) EBVs: are estimates of genetic differences in the ability of a sire's calves to be born unassisted from two year old heifers. The EBVs are reported as differences in the percentage of unassisted calvings.

Gestation Length EBV: this EBV ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Birth Weight EBV: this EBV indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

Milk EBV: an important component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

200, 400 & 600 Day Weight EBVs: these EBVs give us an estimation of the animal's genetic potential for growth to the various ages.

Docility EBV: the docility EBV is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Domestic Terminal \$ Index: Estimates the genetic differences between animals in net profitability per cow joined for an example commercial crossbred herd (run in a temperate environment) targeting grass finished production for the domestic trade. Animals are assumed to be pasture grown with finished progeny weighing 4475kg at 18 months, from British Breed cows. All progeny are slaughtered.

Comparing EBVs

The EBVs for Limousins cannot be compared with EBVs for animals of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

AVERAGE EBVs for 2016 BORN LIMOUSIN CALVES

Breed Avg. EBVs for 2016 Born Calves																
Calving Ease DIR (%)	Calving Ease DTRS (%)	Gestation Length (days)	Birth Wt. (kg)	200 Day Wt (kg)	400 Day Wt (kg)	600 Day Wt (kg)	Mat Cow Wt (kg)	Milk (kg)	Scrotal Size (cm)	Carcass Wt (kg)	Eye Muscle Area (sq cm)	Rib Fat (mm)	Rump Fat (mm)	Retail Beef Yield (%)	IMF (%)	Docility
+0.3	+0.8	-1.9	+1.6	+19	+31	+43	+45	+6	+0.9	+27	+1.5	+0.0	-0.2	+0.6	-0.0	+37

Accuracies

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analyzed for that animal and its relatives.

Mid Parent EBVs

EBVs shown for embryo lots are mid parent values.

Disclaimer

The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

Health Maryvale is JBAS8 Accredited under the BJD Market Assurance Program. EU accredited. All bulls have been vaccinated twice with 7 in 1, and have also been vaccinated against vibriosis and pesti-virus.

Please note: Whilst every care has been taken to ensure that all of the details presented in this catalogue are accurate and correct we cannot guarantee that the content is free of any errors or omissions.

Bulls Summary Maryvale 20/2/19 Sale

MARYVALE DESIGNER 8129D (S) (PN)

Maryvale New York is the first son of the National Grand Champion bull Birubi Kaiser K140 that we have offered for sale. New York was used at Maryvale in 2018 to back-up cows from AI in July & August. This has had no effect on his growth or power or his amazing physical presence which is simply outstanding. New York was born easily without assistance and has great neck extension, smooth shoulders, body length, scrotal, docility and growth. The K140 bulls have a physical presence and type that is unmatched by many international AI sires.

Maryale Nexus is a super sound, soft, smooth, solid and stretchy son of Kaiser K140. A salivating tongue twister! He does all this from a very moderate birth weight as well. From our experience and other reports K140 is breeding some great cattle across Australia and the world. They have performance and phenotype that unfortunately figures seem unable to explain. We love this bull's type and the DNA that he is stacked with.

Dam: MARYVALE JEMMA J304 (AMSPJ304) (2P) (PF)
MARYVALE CURACAO 7057C (HP*) (B) (PN)

Purchased from Red Oak as a calf, North Bound has some growth meat and carcass in his homo polled package. Normally when I see bulls with this much meat and thickness through the hindquarters they really struggle with structural soundness and mobility, but North Bound walks big paddocks well. A cracking K140 son with the flexibility of producing special heavy southern vealers or northern feeder cattle. Kaiser K140 on Westwood seems unbeatable.

Maryvale Pascall is a stunning apricot polled heifer by Wulfs Accumulator (half bro to Zane), one of the only three registered in Australia at this point in time. Her phenotype is as outstanding as her EBV's. Here is an awesome opportunity to kick off the 12 young potential show heifers that we have for sale. Don't let this unique package of DNA pass you by without a bid.

Well if we could make a perfect cow mould at Maryvale then Meringue M645 is fresh out of it. A simply stunning phenotype in this young cow. So smooth and sound, agile and functional. Her EBV data set is well on the way to perfection as well. The first female we have offered by the elite sale topping Jupiter J15 from a Westwood daughter out of the hugely successful Palmdale Shantal cow. The good news is she has just had our first Summit Blueprint M20 heifer calf. Blueprint M20 is by Wulf s Zane from the Miss World cow in Summit Meadow Grass H39. Grand Champion female at Sydney Feature Show 2017. The EBV potential of this calf is just outstanding. World class melt in your mouth magnificence at its best.

Bull Management

& Taking Delivery of your New Bull

Taking Delivery of your New Bull

To help your new bull or bulls settle into their new home as quickly as possible, the following points may be of some help.

- All Maryvale bulls have been run in large mobs most of their lives, so they've always had plenty of mates around, and have "never" been alone.
- It's a good idea to **have some of your own cattle in the yards** when your new bull/s arrive, a handful of steers, or PTIC cows or even an old bull; just something to keep them company, whilst they survey their new surroundings.
- At Maryvale, we handle our cattle quietly and confidently, we always show our cattle respect, and our cattle respect us. We generally use a motorbikes to yard and handle the bulls. The bulls have not been handled with horses or dogs.
- Handle your new bull/s quietly and with respect and he'll settle into his new home well, and will be easy to handle whenever the need arises.

Bull Management

Maryvale would like to make some suggestions to assist your newly purchased bull to settle into his new environment and also provide some general bull management tips.

SETTLING IN:

- The majority of bulls have been running in a large mob.
- Once unloaded, ensure he has company (eg cow or steer) and plenty of food in front of him, until he is able to be placed into his mob.
- Don't box bulls up too much – the majority of breakdowns are caused in the bull paddock when new bulls are directly added to an existing group of bulls.
- Be aware that it is a new environment to them and some time in the yards may be required.
- Remember the pecking order scenario with other bulls – the newest addition may receive a hard time for a little while. Perhaps run bulls alongside each other for a while before running them together.
- They are used to being treated in a gentle manner and will respond accordingly and should be treated with respect and kindness.

JOINING TIME

- All bulls should be serving ability tested each year to ensure they are sound, prior to going out for mating.
- Once they are out working, please check them regularly to make sure they have not had a breakdown or moved paddocks etc. This practice is essential!
- Always put a back up bull in for a couple of weeks in single mating situations to cover yourself against bull failure.
- Don't mate bulls with horns and polled/dehorned bulls together. Single mating is preferred. If multiple joining, put in bulls that have been together prior to joining and ensure they are roughly the same age, weight, and size.

AFTER JOINING

- Try and split bulls up, particularly if you have a large number of bulls. If finding suitable paddocks is a problem, consider running mature bulls with sheep to allow this split up.
- After taking them out of their joining mobs, provide plenty of feed in front of them. This will ensure minimum fighting.

DELIVERY

Matt 0407 959 837 will work with you on bull purchases to arrange suitable and safe delivery.
