CHAROLAIS BULLS

CHAROLAIS HEIFERS

Mount William is J-BAS 8. All cattle are tested negative to pestivirus. Bulls are semen tested by Nationwide AB.

www.mtwilliamcharolais.com.au

WELCOME to all in the Charolais Family, we hope 2019 is a prosperous year for all in the Agricultural Industry. The beef market is showing good early signs with early weaner sales seeing Charolais Cross steers drawing a circle around \$3 per Kilo live weight. Congratulations to Corangamite Park for winning the best presented Pen at Colac with their Charolais/Red Angus Composite cross calves \$2.99 per kg. And to B & K Kershaw who topped the sale with 10/11-Month-old Charolais Angus Cross steers 388kg making \$1,260 per head, \$3.25per kg. Both runs were sired by Mt William Bulls.

2019 marks a year of milestones for us at Mt William. It is our 20th annual on property sale. And 50 years since my Grandfather RM Barr Smith began inseminating Friesian and Shorthorn cows, with the first batch of Charolais semen to arrive in Australia. The year was 1969 and many of you know the story, but RM had seen Charolais preforming well in arid parts of Mexico and thought the breed would fare well in Australian Conditions. In the early days the majority of our bulls were sold privately to northern producers. My mother Anne Cochran (nee Abbott), with the support of Bryce Galvin, conducted the first on property sale in 1999 with around 20 bulls. Now a days the majority of our bulls are sold to southern breeders, with some stud sires heading north and a few sold internationally.

The third milestone 2019 brings is it marks 100 years of ownership of Mount William Station by the Barr Smith Family and their descendants. The property was purchased in 1919 after the first world war and has undergone many transformations and survived succession, drought, fire and flood. Our Son Hugo along with his cousins Scarlett, Floyd and Sinclair are the 6th Generation of Barr Smith descendants to occupy the property. The Charolais have been here for half of that time.

As I was mustering on my oldest horse the other day it occurred to me this 17-year-old gelding had given my 14 years of service. Longevity. The qualities of Longevity, reliability, consistency and predictability are harder to find these days in an age of instant gratification. These are the quality's we need; solid sustainable quality in a product time after time. The cattle in the Mt William Breeding herd have been grazing under these six-hundred-year-old redgums for five decades. The herd has played its role in the Australian Charolais Story. This is by no means an overnight operation and it takes generations to build in consistency.

There is no doubt our investment in quality genetics has helped to accelerate the herd and we now have a very strong base of quality Charolais females to compliment the top Charolais sires of today. Last year this was evident with our record-breaking sale. Top priced bull sold in Victoria \$26,000 to Rosedale Charolais, and record sale average for Victoria of \$8,202. We were also awarded runner up in the 2018 RASV Heifer Challenge for our group of 10 PTIC Charolais Heifers. This was great for the breed and a great honour for us.

So, it goes without saying that the base we are breeding from contains all those qualities of consistency, predictability fertility good conformation good feet and legs and excellent temperaments. We have a good spread of sires in this year's draft and Represented by Palgrove Hannibal, Silverstream Geddes, Mont William Kakadu, Rangan Roundup, Mount William Gifford and Dash, Palgrove Dover and Rosedale E-Tag.

This year's draft have been prepared on pasture, oaten hay and a light grain ration. They are probably a few kilos lighter than last years draft due to the late autumn break and not getting quiet as good a start. However, they are in good nick, present well and contain all the genetic ingredients to further your commercial or stud enterprise.

We have selected 10 heifers to be sold in this year's sale. They have been prepared on pasture. And with the late rains we received in November December helping to maintain them with a small amount of green pick in the paddocks. They represent a number of sire lines including our first drop of Rangan Roundup and Mount William Kakadu daughters. They have been joined to Palgrove Nitro an exciting young Yearling sire we purchased at Palgrove this year.

We are offering a select amount of Palgrove Hannibul semen for the first time in this year's sale. Hannibal semen will be exported to New Zealand this year to a well-known stud. We are offering stud breeders an exclusive opportunity to access this elite sire. Two lots of 5 straws will be offered in this year's sale. Hannibal has and continues to breed exceptionally well for Mt William and Palgrove. Palgrove Legend equal topping the 2017 Palgrove sale at \$40,000 and Mt William Monolith topping the 2018 Mt William Sale at \$26,000 both Hannibal sons.

We would like to take this opportunity to thank those who have contributed to the preparation of the sale bulls and catalogue this year. Thank you to Lucy Main, Bryce Galvin, Terry Dove, Ross Milne, Mark Facy to Thomas the Frenchman and Kristin the Danish Drover. Special thanks to my wife Victoria and son Hugo for all their support over the past year without which we would not have been able to achieve what we have. Most importantly I would like to thank all our clients, past and present, for your continued support and faith in our product.

Even if you do not require a bull this year, we would still love you to join us for a drink and a bite after the sale to help us celebrate these milestones.

ON PROPERTY PRODUCTION SALE

COMMENCING AT 1.00PM, FRIDAY 8TH FEBRUARY 2018

The sale will also be interfaced with AuctionsPlus. Go to http://auctionsplus.com.au/

51 Charolais Bulls

10 Charolais Heifers (PTIC)

Participating in the 2019 RASV Heifer Challenge.

Preview Sale Cattle at our Beef Week Field Day on Saturday the 2nd of February OR Inspect at any time by appointment.

Mount William is J-Bas 8.

All cattle are tested negative to pestivirus. Bulls are semen tested by Nationwide AB.

ACCOMMODATION

SHEARERS QUARTERS

On Property accommodation:

There are 8 refurbished rooms available to rent thru Air BnB. Hot showers and communal breakfast room. Please visit Air BnB for details or contact William Abbott on 0448 886 258 or email willabb@gmail.com

LOCAL ACCOMMODATION

Royal Mail Hotel Dunkeld - (03) 5577 2241 Best Western Statesman Motor Inn Ararat - (03) 5352 4111 Ararat Colonial Lodge - (03) 5352 4644 Ararat Motor Inn (4 Star) - (03) 5352 2521

Alternatively, Halls Gap in the Grampians is approximately 40 minutes away and has a wide variety of accommodation. Well worth a visit. For more information got to www.visithallsgap.com.au

CONDITIONS OF SALE

- All animals will be offered at auction. If not sold, they will be retained by the stud.
- Inspection any time before the sale can be arranged with Rob Abbott.
- Telephone bidding available by contacting Ross Milne or Terry Dove, prior to sale.
- Registration transfer fees are the responsibility of the vendor.

AUCTIONSPLUS: The sale will be interfaced with AuctionsPlus. Before you can bid in an auction, you MUST be registered. Registration and connection to an auction over the internet is completely FREE! Please ensure you register at least 2 business days prior to the sale. Visit the AuctionsPlus website for more information – http://auctionsplus.com.au/

FERTILITY GUARANTEE: Bulls are sold as fertile and capable of natural service. All bulls are semen tested and reproductively structurally assessed by AB Nationwide. Any claim on a bull must be made within 12 months after sale date and be accompanied by a Veterinary Certificate. The Veterinary report must state that, the bull has not suffered any injury or maltreatment which could have affected his breeding ability since delivery to the purchaser. Bulls which do not breed will be replaced by an animal of equal value or a credit less salvage value at the next sale. This clause will be strictly adhered to. Strictly no cash refunds. Please select your stock carefully. We are only too happy to assist you with your selection. 2019 Sale heifers are due to calve August / September 2019.

All females are sold as guaranteed breeders. Where a Purchaser submits a Veterinary Certificate to the Vendor within 12 months of the date of sale, that a female of joinable age is infertile and in his/her opinion has not suffered any injury or maltreatment which could have affected her breeding ability, the Female will be replaced by an animal of equal value or a credit less salvage value at the next sale. This will not apply where an attempt has been made to transfer embryos from the female. All Heifers will be pregtested via a scan prior to sale day. Certificates available.

HEALTH: The Mount William Herd is J-Bas 8. All Animals have been drenched and vaccinated with 7 in 1. All sale animals have been tested negative for Pesti Virus. The Mount William Herd has been tested negative for Pesti Virus. If you are concerned about the presence of Pesti Virus in your herd we suggest you consult a vet regarding a vaccination programme. All animals derive from an accredited Free T.B. and Brucellosis Herd. Any test required by interstate purchasers will be done at Mount William, at costs to the Vendor.

DELIVERY: Transport will be the responsibility of the Purchaser. Mount William will work in conjunction with McEwan's Livestock Transport to reduce transport costs to purchasers. Please speak to us or our Agents about your transport requirements.

INSURANCE: Insurance is available. We encourage you to consider insuring your purchase. Please speak with either Elders or Charles Stewart Dove Agents.

REBATE: The Vendors agree to a rebate of 3% to outside agents who attend the sale or buy on behalf of their clients and settle within 7 days. A rebate of 1% to outside agents introducing approved buyers to the vendor prior to the sale and settling on their behalf within 7 days. Phone call, text message or email must be received prior to the sale.

PLEASE NOTE: This catalogue has been compiled with all due care and attention, however we or our agents cannot be held liable for the accuracy, use or interpretation of the information in this catalogue. People entering the property for the purpose of the sale do so at their own risk.

Understanding BREEDPLAN

Estimated Breeding Values (EBVs)

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

- **CE** % **Direct** = **Direct Calving Ease** The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.
- **CE** % **Daughters** = **Daughters**' **Calving Ease** The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcase Weight EBV (kg) is based on abattoir carcase records and is an indicator of the genetic differences in carcase weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcase data, adjusted to a standard 300 kg carcase. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcase. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcase weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcases) and are adjusted to a standard 300 kg carcase. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcase. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcase weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcase. Sires with larger EBVs are expected to produce progeny with higher yielding carcases.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcase. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Domestic Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430 kg (240 kg HSCW and 6 mm P8 fat depth) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Export Index (\$) – Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700 kg (380 kg HSCW and 9 mm P8 fat depth) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy: **- less than 50%: Low accuracy.** EBVs are preliminary and could change substantially as more performance information becomes available.

- **50-74%: Medium accuracy.** Usually based on the animal's own records and pedigree. **-75-90%: Medium-high accuracy.** Some progeny information included. EBVs may
- more than 90%: High accuracy estimate of the animal's true breeding value.

change with addition of more progeny data.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact the Charolais Society or Charolais BREEDPLAN.

CELEBRATING 50 YEARS OF MT WILLIAM CHAROLAIS

"Charolais breed celebrates 50 years of success"

By Kylie Nicholls, Stock and Land www.stockandland.com.au

This year marks 50 years since Charolais genetics were introduced to Australia and the breed continues to grow in popularity, mainly due to its success in crossbreeding programs.

According to Mt William stud principal and chair of the Victorian Charolais Society, Rob Abbott, during this time breeders have focused their efforts on producing a distinct Australian type of Charolais.

"The modern Australian Charolais is a refined, soft, moderately muscled animal with quality carcase traits, improved mobility and calving ease which is comparable with other popular cattle breeds," he said.

"Breeders have also been careful to maintain their temperament, constitution and ability to add extra weight on their progeny, which makes them the ideal terminal sire for a range of cross-breeding operations."

Mr Abbott also highlighted the versatility of Charolais, which are being used successfully in both northern breeding programs as well as throughout south-east Australia.

"They suit a range of markets from the domestic to the export trade.

"You regularly see good lines of Charolais-cross calves and they are generally always 20-30 kilograms heavier than the other weaners on offer."

He said a focus on performance recording during the past 10 years has resulted in significant improvement in Estimated Breeding Values measurements and accuracy.

Charolais have also been performing very well in recent progeny tests.

"It is exciting to think about what will happen in the next 50 years, there is a number of Australian Charolais bulls being marketed overseas and I think we will see more and more genetics exported in the future."

Elizabeth and Bob Barr Smith, founders of Mt William Charolais.

A good line up of bulls in the early years with Drover Rick Oram circa 1975

Talgoona Kansas, a great Sire for Mt William during the 1990's

Charolais females on the fenceline in North Argyle with Major Mitchell Plateau, Sugar Loaf and Mt William in the background circa 1980.

"Sucre"

An extract of the meticulous records kept by my Grandfather, Bob Barr Smith. Here he lists the Charolais sires used, beginning in 1969 with the newly imported semen of the Full French sire Sucre.

My Grandfathers interest in Charolais began in 1960 during a trip to France which led to a lifelong enthusiasm for the breed. An enthusiam he has passed down through 5 generations - so far! Bob and Elizabeth attended many Charolais World Conferences and developed a strong network of friends in the Charolais industry.

Since 1969 Mount William Charolais has continued to use top quality Charolais Sires. In the early years the majority of the bull's were sourced from France and the UK. In later years bulls have been sourced from Canada, the USA, Scotland as well as Australian Studs including Talgoona, Palgrove, Medburn, White Lakes, Temana, Gunadoo, Kadlunga, Rosedale, Silverstream (NZ), Rangan and Waterford.

In 1987 Mount William Charolais used one of our first home bred full French Sires, Mount William E2F. Since then, we have used many home bred Mount William Sires in a herd which has grown to include a solid base of over 300 breeding cows and heifers. We have used over 120 Charolais sires in our breeding programme which has spanned 50 years.

CELEBRATING A GREAT CATTLE MAN - TERRY DOVE

As 2019 is a time for us to reflect on the history of our stud and property it is also timely to reflect on the contribution that certain individuals have made to the success of this enterprise. I'm sure there will be many tributes and kind words written about the contribution Terry Dove has made to the cattle industry down here in Victoria and to the Charolais Breed. To have created demand for what is an excellent product, to encourage people to get into Charolais all the time backing it up with his own Actions. Terry and Marylin run a successful pure Charolais commercial operation selling calves direct to feedlots. The beauty of Terry and Marylin is they make a great team and with the addition of Nugget the Jack Russel are a hard combination to beat.

Terry first started doing business with our family in the 1980's, his first dealings were with my Grandfather RM 'Bob' Barr Smith. Terrys first dealing was on a bull that Grandfather described as: "he's got nuts and he's polled" simple as that. Terry bought the bull and this started a long-term relationship that has spanned three generations. I never had a conversation with Terry where I came out feeling worse off. Straight down the line, solid advice a huge supporter of Mt William Charolais. A career worth celebrating. On farm tours Terry is famous for leaving the gate open and saying "don't worry we will beat them back there" testament to the work his 400,000kms plus Toyota Prado had done.

Terry is a once in a lifetime Agent and you would be hard pressed to find that sort of loyalty in todays climate. He is a great example to other agents of how things can be done. It would be feeble to try and thank Terry for all he has done. The thing is you can't thank someone enough who has made that sort of contribution to your family. As we celebrate 20/50/100-year milestones we also wanted to take the time out to celebrate the career of a great cattle man Terry Dove.

COMMENTS: Hannibal was one of the sale features in Palgrove's 2014 sale. He is a polled red factor ET bull by Canadian National Champion PCC Sudden Impact, His donor Dam produced 6 sons, sold to Australian Studs for a \$23,000 average. He has an exceptional pedigree, is a sensible mature size with natural thickness, plenty of softness and a sleek coat. His growth and carcase EBV's are outstanding. Hannibals notoriety has grown significantly in the past two bull selling seasons. 20 of his sons averaged \$10,850 last year at Mt William and in 2017 six sons averaged \$19,000 and topped the sale at \$40,000 at Palgrove. Hannibal is one of those bulls who simply breeds true to form, above expectation, and has proven to be a standout for the modern Charolais breed. Hannibal's genetics are sought after and will make their way to New Zealand later this year. 18 Hannibal sons are on offer in this year's sale.

COMMENTS: We retained Kakadu from our 2014 drop of bulls. His Sire Digger produced our top selling bull in 2016 at \$17,000. He was chosen for his conformation, clean front end, power and muscle content. His Dam E107 is a beautiful polled Boss female who delivers consistent quality progeny. Kakadu has two drops of calves on the ground and we have been suitably impressed with his progeny. He is a very powerful bull with substance who moves well and has always had a good temperament. 9 sons and 3 daughters sell in this sale.

COMMENTS: Roundups first drop of bulls and heifers hit the sale ring in our anniversary sale this year. He was the standout and top priced bull in Rangans 2016 bull sale. We purchased him originally to go over heifers but he has developed into a formidably powerful sire. 48cm scrotal at 22 months an incredible set of EBV's he has a number of grunt'y sons in this years draft. An exciting sire who is leaving a great drop of females in the herd.

TATTOO: PK D191E

COMMENTS: Dover continues to find a place in our Al programme. Last year Dover semen sold to Conquest Charolais and Chalambar Charolais studs for \$85 and \$95 per straw. Dover is a structurally correct Polled Bull with some fairly handy Palgrove Bloodlines in his pedigree. Dover has good length, muscling and doing ability coupled with a fantastic temperament. He has a classy set of EBV's being at the top end for most traits.

Moderator was purchased in 2018 for \$23,000 a semen share has been sold to Waterford Charolais.

Structurally he is very hard to fault. He will join the breeding programme in 2019 and compliment the existing base of Hannibal females in the herd. His phenotype and disposition are excellent, he has length, width and depth coupled with an ideal maturity pattern and excellent foot and leg structure.

His Sire Jubilee was the High selling bull in Australia in 2015 (\$35,000) and we are very excited about the future of this sire.

Top 15% CE Dir, top 25% GL, top 25% BW, top 15% 200, top 10% 400, top 25% 600 day weights, top 25% MCW, top 30% milk, top 5% SS, top 5% Carc WT, top 15% EMA, top 30% RBY, top 10% for domestic export and N Term Indexes.

We look forward to offering you Moderator's progeny in our 2022 Sale.

COMMENTS: An exclusive opportunity to purchase a limited amount of semen from one of the bulls of the moment Palgrove Hannibal. This herd improving bull produces thick soft clean skinned calves. They grow fast and have both style and substance. For the past three years Hannibal calves have had the top weaning weights at Mt William. His bulls have scanned at the top of the drop for Fat, EMA and IMF. He has sired sale topping progeny at Palgrove in 2017 Palgrove Legend (P) \$40,000 and Holds the Victorian Record for a Charolais sire with Mount William Monolith \$26,000 sold to Rosedale Charolais in 2018. This is an opportunity that may not be repeated and is not to be missed.

Palgrove Legend (PK L564E)
- Son of Palgrove Hannibal

Thank you to Leader and Bruce Dumbrell for their support of the 2019 Mount William Sale.

We're here when you need us.

The business of farming is not for everyone. But like you that's the business we're in.

With 170 years experience, Elders has the livestock knowledge to support your business. We market over 2.3 million cattle and 13.5 million sheep each year. But there's so much more we can offer. Our specialist animal health services and exclusive ELMS protocols improve the health, weight and quality of your cattle and sheep, whether they're on the farm, in transit or in the yard. And through traditional or online auctions, forward contracts or direct to processor, we ensure more options for buyers and sellers. So, when you're looking for the best livestock partner, we're here when you need us.
