

HEALTH REPORT

I, Dr Ezequiel Boretto, certify that, after physical examination, testicular palpation and semen collection (by electro-ejaculation) carried out on the 11th of July 2019, that black wagyu bull ID **SWSFJ0030**, at this point in time is of good health and did not present any reproductive or physical abnormalities of any kind. The bull's weight is 680kg and he is in body condition score 3 (scale 1 skinny to 5 overweight).

Details from testicular palpation and semen analysis are listed below:

SWSFJ0030	
Scrotal Circumference	36 cm
Testicular Tone	3 (scale 1-5)
Sperm concentration	1210 mill sperm cells per ml of semen
Alive	70%
Sperm motility	Very good
Abnormalities	< 10%

A handwritten signature in blue ink, consisting of several loops and a long horizontal stroke, positioned above a dotted line.
