— ANGUS —

LANDFALL ANGUS AUTUMN SALE 2019

SUPPLEMENTARY SHEET

Lot 3- Landfall New Ground N90

Unfortunately, Lot 3 sustained an injury on Wednesday the 20th March resulting in a large hematoma on his near side behind his shoulder. He has been inspected by our local vet and had treatment over the last few days (which has resulted in some aggravation and swelling to his off-side rump). He does present now a little stiff and sore and his weight has suffered as a result. When weighed on the 5th of March he was 700kg and is now 692kg. In the same time frame his contemporary group has averaged 1.5kg so over 20 days we estimate he would have weighed approximately 730kg injury free. He is now running separate to his mob to aid in his recovery.

The advice of our local vet and our veterinary adviser is that he will make a full recovery, but it may take 4 to 5 weeks for the swelling to fully subside. The injury is not expected to impact on the bull's fertility or his ability to produce processable semen. Given he is expected to make a full recovery and the interest in the bull from the industry, we have made the decision to proceed with the sale under the following conditions:

1. Order of sale- Lot 3 will be offered prior to Lot 1 at the beginning of the sale. The decision to present the bull in the ring for sale will be made on the day depending on his condition. He will be penned separately to the other bulls on offer.
2. Delayed settlement terms:
 - a. 50% at which time the bull is fit and healthy and able to travel to his new home.
 - b. 25% at which time the bull can produce industry quality fertile semen.
 - c. 25% at which time the bull can carry out a full natural mating load.
3. Insurance- full comprehensive insurance is unattainable at this stage but it is a requirement that insurance is taken out by the purchaser at the fall of the hammer to cover mortality only.

N.B. Landfall's retained semen interest on this bull is for breeder access only. The semen is for in herd use and is to be collected at Landfall's cost at the convenience of the purchaser. Landfall semen is purely for within herd use and will not be sold to a third party.

Lot 9- Landfall Keystone N805

Due to an administrative error, this bull has incorrectly marked as parent verified in the catalogue. His hair sample was sent for DNA testing but the sample was compromised and unable to obtain a SNP. We are confident his pedigree is correct as printed in the catalogue but it has not been verified by DNA.

Withdrawn Lots

Lots- 15, 22, 52, 61, 70, 80, 83, 96, 102, 120, 126, 150, 163.
