WELCOME TO OUR 42ND ANNUAL AUTUMN ON PROPERTY AUCTION.

We appreciate your interest in the Landfall program this year and to say thanks the Archer Family and staff invite you to join them for drinks following the bull auction on Monday 23rd March 2020.

Buyers Instruction Slip page 115

Welcome

We invite you to attend our 42nd Annual Autumn on property auction and are pleased to offer you 182 performance recorded rising two-year old bulls.

The past 12 months has been a particularly trying time for our friends and colleagues across many parts of Australia. Whether experiencing drought, flood or the recent widespread bushfires there are so many stories of hardship and devastation. However despite the hardship, the consistent message that is evident throughout these stories is that of resilience and determination. The agricultural community is brimming with people who will offer their help and support to others when often facing adversity themselves. We feel privileged to have developed relationships with so many people across Australia through our common interest in the Angus breed and cattle industry.

We are proud of this offering of bulls that represent our desire to produce a high performance genetic package in a functional and attractive phenotype. The main sire lines represented in this offering include Landfall Keystone, Bartel E7, VAR Discovery, EF Complement and Landfall Leonardo. This sale sees our first offering of Landfall Mojo sons along with new sire LD Capitalist.

We have further lifted our female numbers within our existing land base as we further develop our resources and improve our management practices. The strategy behind our continual increase in numbers is two-fold. Firstly, it is to ensure our genetic production takes place in an environment that places sufficient pressure on our animals to be able to identify the outliers on both the top and bottom end. Once identified we look to

remove the under performers and multiply the high performers. A stocking rate increase mirrors that of what many of our clients are striving to achieve and we see it as being important to maintain relevance with the commercial sector. Secondly, it allows us to further expand our bull marketing program, helping us to drive value in the Angus genetics market.

We have once again partnered with Achmea Insurance to offer an automatic insurance cover on all bulls sold at this coming Autumn sale. All bulls will be covered for 3 months from the date of sale by Achmea's 2 star product for mortality including accidental loss of use and transit. We have arranged and paid for this insurance, so it is no cost to you. This is a unique offering in the market place and we thank Achmea for their continued support of the Landfall program.

It is important to note some changes that have been implemented by Angus Australia. What was called Angus Group Breedplan is now known as the Trans-Tasman Angus Cattle Evaluation (TACE). Some considerable modifications were implemented into the software that is used to calculate the Calving Ease Direct and Calving Ease Daughters EBVs in December 2019. It is important to be aware that the modifications that have been implemented have resulted in a considerable increase in the standard deviation, or spread of Calving Ease EBVs, when viewing the Calving Ease EBVs for animals in this catalogue. This is illustrated by an increase in the

“We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program.”

- Ed and Frank Archer

1% percentile band for the Calving Ease Direct EBV increasing from +5.0 to +12.2. Similarly, the 99% percentile band for the Calving Ease Direct EBV has decreased from -7.6 to -13.9. Importantly, the new Calving Ease EBVs now provide a better estimate of each animal's breeding value.

In the short to medium term we are making plans for further expansion of the Landfall herd. This has brought into review the annual marketing of our PTIC females. This will see some changes to our marketing program that we will make you aware of.

The Landfall reputation and integrity of the brand is of the utmost importance to us. We strive to deliver on expectation so any feedback that helps achieve continual improvement is appreciated.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.

The Archer Family.

About Landfall Angus

Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 1800 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is highly fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd in Australia.

HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females.

In 2004 a spring sale was introduced and is held annually on property offering bulls.

We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.

TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 4000 registered animals running over two main production centres in the Tamar Valley, calving 1800 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs.

A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, with in excess of 500 bulls being sold annually.

OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

Stud stock insurance with all bulls purchased at the Landfall Angus Autumn Sale

Achmea, one of Australia's specialist farm insurers, is delighted to attend the Landfall Angus Autumn Sale and provide 2 star cover for 3 months for all bulls sold in this catalogue. This cover has been paid for by Landfall Angus for your convenience.

If you wish to purchase cover at the end of the 3 month period please contact Achmea Risk Specialists Chris Schmidt 0429 978 913 or Peter Wilkinson 0408 746 254, who will be attending the sale.

Achmea offers Stud Stock insurance, designed to protect the stud bull from the moment the hammer falls. With our Stud Stock insurance, you decide what you need, when you need it and how you need it.

	12 months	6 months	3 months

Notes

Mojo was the second high selling bull from our Autumn sale in 2018 at \$32,000 to Kansas Angus in NSW. Used heavily as a yearling bull in our artificial breeding programs in the Spring of 2017 he currently has 219 progeny on TACE across 5 herds. A sire that puts plenty of muscle and capacity into his progeny with exceptional 200 and 400 day weight. His progeny have proven to be very sound in their foot and leg structure. A total of 28 sons on offer in this sale.

Notes

Our first large group of Keystone daughters have just weaned their first calves in the Landfall herd. These young cows have done a good job on their calves at the same time as achieving an above average conception rate on their second joining. Keystone is continuing to see heavy use at both seedstock and commercial level across the country. An Edmund son with added frame and length, we are experiencing good foot and leg structure with a really smooth shoulder. Progeny are displaying above average frame and length with docility a strong point. In excess of 40 sons sold in our 2019 sales to strong demand. A total of 25 sons on offer in this sale.

Notes

A genetic package that is well suited to grass fed beef productions systems with good fertility, calving ease, growth, moderate maturity pattern and carcass quality. His first drop of daughters in the Landfall herd have just weaned their second calves and continue to display the attributes of fertile and functional females with above average performance. We have been pleased with the structural integrity that Bartel progeny possess. A total of 25 sons on offer in this sale with a number in the first 50 bulls that were used as yearlings in the Landfall herd.

Notes

Selected for use in the Landfall herd for his curve bending growth and carcass performance. Progeny possess high growth and great body length with a moderate maturity pattern. His first daughters in the Landfall herd have just weaned first calves. We are happy with the early growth and moderate maturity pattern of these young females. Discovery is the sire of Landfall New Ground, the top selling bull from our Autumn Sale at \$75,000. Our first N90 calves have just been weaned and are looking very smart. A total of 19 Discovery sons on offer in this sale.

Notes

EF Complement possesses a well balanced data set. His progeny are medium frame cattle with good eye appeal and well covered with good muscle and width behind. His daughters are functional with good udders and maternal characteristics. Progeny performance to date suggest that Complement offspring are a good fit for grass fed beef production systems. His sons attracted strong interest in our 2018 and 2019 sales with a further 16 on offer in this sale.

Notes

A calving ease specialist, selected for AI use in the Landfall herd as a yearling for his well-balanced phenotype. A really unique data set with calving ease, gestation length and birth weight in the top 1% of the breed whilst maintaining 400 day growth in the top 13%. Above average EMA and positive fat, progeny are moderately framed with an earlier maturity pattern. They possess thickness, ease of doing ability and sound structure. The perfect sire line to use over those bigger birth and later maturity pattern females that need an improvement in fat cover. A total of 14 sons on offer in this sale.

Notes

Another sire that has daughters just weaning their first calf in the Landfall herd with good results. The third Ten X son used in the Landfall program, Foreman possesses a well balanced EBV profile, with positive calving ease, short gestation and curve bending growth. A large muscle bull with well above average IMF suggests a genetic package that will add value at the processing end of the value chain. Six sons on offer in this sale.

Caring For Your Bulls

More calves, more years

Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.

1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

Sale Notes

1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 112 for map and travel information.

2. Lunch

Please join us for lunch on sale day.

3. Rebates

4% rebate commission offered on all bulls and stud females to agents settling within 7 days of invoice.

All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email studstock@robertsltd.com.au or frank@landfall.com.au

4. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

5. EBVs

Angus Group Breedplan Figures are used throughout the catalogue.

6. Nutrition

All bulls have been grass fed with supplement silage.

7. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been ear notched and tested as BVD P.I. negative.
- All bulls have been vaccinated in March with Vibrovax, Pestigard and Ultravac 7 in 1.

8. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

9. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 104 of this catalogue).

10. Sire Bulls

Lots 1 through to 52 have been used for joining in the Landfall herd in the Spring of 2019. Please take this into account when assessing these bulls.

11. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They are available at www.landfall.com.au

12. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

13. Inspection

All bulls will be available for inspection at Landfall on the morning of the sale from 10am. Inspection any other time is welcome by appointment.

PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

You will note we have not included lot images of our bulls selling this Spring. Images and videos of most lots will be available on our recently updated website site closer to sale date.

Thank you for your co-operation.

DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

DISCLAIMER: Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Understanding the TransTasman Angus Cattle Evaluation (TACE)

WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

USING EBVs TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

USING EBVs TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

DESCRIPTION OF TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following pages.

BIRTH			
Calving Ease Direct	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

GROWTH			
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

FERTILITY			
Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

CARCASS			
Carcass Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

FEED EFFICIENCY			
Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.

TEMPERAMENT			
Dociility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.

STRUCTURE			
Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.

SELECTION INDEXES			
Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

Bull Guarantee

At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

FIRST YEAR

(12 month period from date of purchase)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

SECOND YEAR

(12 to 24 month period after purchase date)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.

The Obligation of the Purchaser

The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

FREIGHT

- Free sea freight to Melbourne to Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

A LITTLE BACKGROUND TO LANDFALL FARM FRESH....

Landfall Farm Fresh is our specialist butcher and fresh food business in Launceston, providing our very own Landfall Angus Beef and Prime Lamb direct from our farm to our loyal and wide-ranging customers.

Our fully integrated, true paddock to plate supply chain, delivers a transparent and trusted red meat choice. Customers appreciate knowing the provenance, story and integrity of our free range and grass-fed beef and lamb. We credit this largely to the success of our primary production business and the work and dedication of previous generations. Our grandfather, Robbie Archer, always held the vision of having a butcher shop in the family business.

We strive to build positive relationships with our customers and create positive eating experiences. We are passionate and proud to provide locally grown, consistent premium quality produce, and exceptional customer service.

We welcome you to visit us in store Wednesday to Saturday at 49 Balfour Street Launceston, and to follow us on Facebook and Instagram.

49 Balfour St, Launceston
www.landfallfarmfresh.com.au
(03) 6334 5751

Whether Launceston is home or you're visiting for the Landfall bull sale...

... this is well worth knowing. Landfall Farm Fresh supplies many of Launceston's local restaurants, stores and take-away food vans. Since opening our shop front in 2009 our wholesale customer network has grown and our knowledge of the entire food chain has naturally expanded.

From fine dining scenes to local produce stores to the best burger hang-out in town, we have a great network of businesses surrounding us. One of the most enjoyable things about offering our own produce has been the relationship building that comes with it. Telling our story and knowing our produce is being appreciated on a whole new level has been extremely rewarding for us. The organic growth of our business and the notable shift in our population's desire to support local businesses is extremely positive.

Simply nothing better. Local, friendly, delicious, helpful, sustainable, environmentally responsible, did I say delicious, and strangely enough, great value.

Our primary production business has given us the ability to offer knowledgeable information regarding the front end of the food chain. The breeding, birthing and raising of our own sheep and cattle has resulted in our shop being

branded as Launceston's trusted, specialty butcher shop. Our regular shoppers are those who care about where their food comes from and what exactly they're eating. Recent months have seen a growth in young families coming through the door, mostly enjoying the fact that our produce is gluten and preservative free. People often comment on their desire to purchase meat that is fresh, local and unprocessed.

We encourage you to pick up a burger that showcases our Landfall Angus Beef or sit down at a table to enjoy a fancy feast of Landfall Prime Lamb. Supporting local businesses is essentially supporting our kids and the environment which surrounds us.

A short list of where you can find select cuts of our produce:

- Burger Junkie
- Geronimo
- Alps and Amici Foodstore
- The Pizza Pub
- Turkish Tukka
- Maple Cafe
- The Star Bar
- Aromas Cafe

BUTTERFLIED LAMB IS A FANTASTIC WAY TO COOK THIS DELICIOUS MEAT.

Splitting the joint and 'unrolling' it means the meat has a fairly uniform thickness, ensuring it cooks evenly and quickly.

The recipe link below gives an example of a leg cooked on the open barbecue. Jamie has chosen a Mexican-inspired marinade, but, once you've mastered the butchery, you can take this any direction you like! Serve your lamb with a fresh salad and some smashed roast Kennebec potatoes - It's a surefire winner.

If you're time poor or simply not up for the challenge then pop in to our shop and grab a pre-prepared leg. We have honey and rosemary, mint and garlic, spicy BBQ rub or a plain one to marinate yourself.

 Full recipe:

<https://www.jamieoliver.com/features/how-to-butterfly-a-leg-of-lamb/>

 Watch:

<https://m.youtube.com/watch?v=wUeyANygb3I>

HOW TO BUTTERFLY A LEG OF LAMB

1. If you can, prepare your lamb the day before you want to cook it. Using a sharp knife, carefully cut down the lamb leg to expose the bone.
2. Keeping your knife as close to the bone as possible, cut along one edge to completely reveal it.
3. Cut right around the bone, then remove it.
4. Lay the lamb flat on a chopping board, skin-side down. With your knife, make an incision halfway into the flesh on each side, where the meat is thicker, then open it out like a book.
5. You should now have a flat piece of lamb of more or less even thickness.

PICTURED STEPS OF BUTTERFLYING YOUR LEG OF LAMB

Pictured above is Scott Parker, our Senior Butcher since 2013. Also pictured is his butterfly lamb leg recipe which recently won him a Heston Blumenthal Everdue Cube BBQ through a Meat and Livestock Australia Campaign.

Passionate about people and relationships

The people behind the bulls: Frank Archer

Born in July of 1982, Frank is the middle child and third son to Gerald and Lou. Having two older brothers, Ed and Will, Frank's opportunities to spend time on the farm with Gerald were limited, with him spending more of his younger years with his two younger sisters, Ellie and Mimi.

He was often seen kitted out in his Demons footy gear complete with his red gumboots, kicking the ball to himself or dressed up in army attire stalking his brothers around the farmyard in stealth mode. When Ed and Will left home in their late teen years to work interstate, Frank's opportunities to work alongside his father grew and it was during this time his passion for agriculture and livestock grew. Frank's skills with a computer meant he was often helping Gerald with the record keeping for the stud as technology became a greater part of the data management or with the collaboration of sale catalogues from an early age. Growing up at Landfall in a supportive family environment along with the example of a sound set of values and beliefs from his parents and siblings laid a solid foundation for Frank's future.

Frank's education comes with somewhat of a chequered history. After completing his early years of schooling at the Mount Arthur Family school, Frank started at Launceston Church Grammar School in year 3 and left a marked impression receiving an academic excellence award at the end of year assembly. During his senior years, Frank very much enjoyed his school sport playing footy and cricket and spent plenty of time in the woodwork and metalwork sheds. By the time he left school at the end of year 12 his academic achievements had somewhat declined to the point where the teachers were often quoted as saying "so much potential, yet so little application". In Frank's opinion school was not a complete waste of time as he developed a strong network of lifelong friends during his school days and it was also where he met his wife Zara.

After finishing school Frank followed in his brother's footsteps and joined a couple of mates in venturing to the Riverina in NSW to work with his uncle harvesting rice. The next couple of years were spent either working in the family business or interstate working to fund his extracurricular activities.

It was in 2005 that Frank decided it was time to get serious about his future career and set off to Lincoln University in the South Island of New Zealand to study a Diploma of Agriculture. In what was a pleasant surprise for Gerald and Lou, Frank reported back with his first semester results as a straight "A" student. Whilst in New Zealand Frank spent time with the Wilding Family and manager John Harrington at the Te Mania Angus seedstock operation in North Canterbury. It was these relationships along with the mentorship of his lecturers and the support and camaraderie of

his new found friends that helped Frank develop into the person he is today. New Zealand provided both a valuable education and enriching life experience for Frank of which he is eternally grateful for. It was during this time that Frank developed a keen interest in pasture management and the economics of farm business management. Frank completed his Diploma of Farm Management at Lincoln in 2006 but much to his mother's frustration is still yet to formally graduate as he still has some homework to complete. He returned from New Zealand with no doubt in his mind that agriculture would be his career of choice and was ready to sink his teeth into things back in Tasmania.

"Above all else Frank's most passionate about people and relationships. He very much enjoys his interactions with clients of Landfall and colleagues in the industry."

Frank re-joined the family business in late 2006 and from that time his role has grown and developed in the organisation. As all the family members matured and formed different priorities, the Archer's set about formalising a robust plan for the

future. Frank took a keen interest in this and still now, one of his key focuses is to work towards achieving a smooth transition of management of the business form one generation to the next. Frank also has had a huge involvement with the development of Landfall Farm Fresh and continues to offer support to Ellie in her management role.

In 2013 Frank and Zara were married on the farm at Landfall with a reception in the shearing shed. In 2014 the first of their three children Hedley arrived followed by a second son Joe in 2016 and a daughter Winnie in 2018. They say behind every good man is a better woman and this is no exception in Frank's case. Zara is a great support for Frank with his role at Landfall and when she is not working in her role with Youth Justice in Launceston is helping to accommodate clients or service providers to Landfall. Zara is also a keen gardener and manages to find the time to keep the expansive garden at their home looking fantastic.

In 2015 Frank and his eldest brother Ed formed a partnership with the trading arm of the business and they are now the Co-Principals of Landfall Angus. Frank manages the day to day operations at Landfall whilst Ed takes care of the operations on the properties further north at Greenhythe. Frank's interest and

enthusiasm for the improved pasture management and the economics of farm management have grown stronger over the years and he spends much of his time working in these areas in the business as well as the breeding and marketing programs with the seedstock operation. Frank is extremely grateful to the team of people that work with him. A number of family members along with valued employees make up what in Frank's opinion is the most important asset in the business, the people.

Outside of work Frank has taken an active role over the years at the Old Launcestonians Football Club as a player, senior captain, reserves coach, President and currently Vice President. He played last year at the ripe old age of 37 and when asked if he will playing on again this year, he replies with "why not". Frank is still a passionate and long-suffering Melbourne Demons supporter and hopes that the taste of success is not too far away.

Above all else Frank is most passionate about people and relationships. He very much enjoys his interactions with clients of Landfall and colleagues in the industry. He is humbled by the opportunity to be involved in a business that has given him so much exposure to so many wonderful people across Australia and the rest of the globe.
