5000 EWES

2019 Cashmore Oaklea Ewe and Lamb Sale
Tuesday December 3rd, 12 Noon - Auctions Plus

CASHMORE OAKLEA

SELF REPLACING MATERNALS
5000 EWES

Auctions Plus Tuesday 3rd December 12 noon

Australia's leading Maternal Composite flock and long term clients are pleased to offer our annual surplus females. Sired by top 10% performance recorded rams for high growth and outstanding fertility these sound, moderate framed ewes offer great opportunity for establishing new flocks or use as prime lamb dams. The flexibility of self replacing lamb systems is becoming increasingly important as an alternative to purchasing high priced replacements annually.

John Keiller – 0409 804 638 Don Pegler – 0417 851 466 www.cashmoreoaklea.com.au

Vendor	Drop	#	Class	Area	Agent Company

Cashmore Park	Aug-14	100	Ewes	Hamilton	Landmark
Don Pegler	Jul-14	550	Ewes	Mt Gambier	RWK

With the continuing move to self replacing prime lamb systems Cashmore Oaklea and our clients are pleased to offer 5000 of these purpose bred ewes to the market via the Auctions Plus selling platform this year.

At the stud level selection pressure applied to the profitable performance drivers for prime lambs, primarily fertility and growth, coupled with the easy care traits of mothering ability and worm resistance, sees these animals' genetic performance increase \$4.50 per ewe mated per year.

At the commercial level the use of top 10% rams, condition scoring of ewes, pregnancy scanning and wet and dry at marking further produces high performing flocks under good management conditions.

The following information offers some background about the vendors and ewes in the sale and will assist your selections.

All the best with your purchases.

Don and Anne Pegler, Oaklea, Mt Gambier, SA

Don and Anne Pegler farm south of Mt Gambier right on the coast with free draining limestone and flint based soils, but are prone to very wet and windy conditions during lambing. Their commercial maternal wether lambs are sold as suckers at heavy trade weights through the Mt Gambier saleyards with the sister portion offered each year in the Cashmore Oaklea ewe sale.

These are June/ July drop giving clients a little more weight and age and allowing an earlier mating from these well grown ewe lambs.

These lambs are all bred from sound CFA ex stud ewes that have been pushed from the flock by higher performing daughters.

An entire drop of ex Stud ewes is also offered.

John and Brigita Keiller, Cashmore Park, Cashmore, VIC

Cashmore Park is a 1400 ha grazing property located 10km West of Portland, VIC, in a 830 mm rainfall zone. It runs 25,000 DSE with a 90; 10 sheep cattle mix.

The commercial flock consists of self replacing Performance Maternal ewes producing heavy trade carcasses, feeder lambs and breeding ewes. All ewes are pregnancy scanned with dries and wet/drys at marking sold.

This action has produced fertile, free lambing easily managed sheep with adult ewes regularly pregnancy scanning 180%.

We offer August/September drop ewe lambs, some middle aged commercial ewes at client's request and a run of mostly ex Stud, sound mouth CFA ewes each year.

Jim, Andrea and Tom Pegler, Pegler Pastoral, Thornlea, SA

Pegler Pastoral Co have been breeding self replacing Cashmore Oaklea sheep since 2006. We farm at Thornlea and Kalangadoo in the south east of south Australia.

We lamb down in June July with a lambing percentage this year of 145% after a hard start to the season. Only twin ewe lambs are retained as future breeders and all rams purchased are in the top 1% ebvs.

Our long term goals are to further increase our lambing percentages even with earlier lambing and improve survival rates through genetic selection and improved management practices.

Ken and Carmen Varcoe, Terenga, Kalangadoo, SA

Terenga is located 40km south of Mt Gambier, 30 km East of Millicent near Kalangadoo in 800 mm rainfall zone

Terenga runs 2300 Cashmore Oakley Bld composite ewes. Initially purchasing ewes from Cashmore Park in 2006, subsequently purchasing Cashmore Oakley rams in the top 10% (recently 5%) of the Maternal Index.

The focus at Terenga has been to produce hardy highly fertile ewes (140 - 150%) with good early growth and worm resistance that perform under high stocking rates.

Terenga's program has been centred on producing large numbers of quality breeders for those seeking replacements.
