

**HILLCROFT FARMS**

# **Ultra Whites**

## **The Easycare Performers**

**Bred and selected for Easycare,  
Do-ability and Hardiness**

*The UltraWhite is a fusion of the best genetics of the Dorper and Poll Dorset breeds, developed to suit a wide range of Australian conditions.*

*Suitable for self-replacing flocks and as terminal sires.*

*Easy-care and low maintenance along with hardiness (ability to function under hard grazing conditions) and do-ability (the ability to respond quickly to good grazing conditions) have been the central focus for selection.*

*Selection is done on both structure and LambPlan ASBV performance to ensure the best possible results are achieved over a wide range of environments across Australia.*

- No shearing ● No crutching ● No flies ● No lice
- Easy lambing ● Hardy and good doers ● Great mothers

### KEY BREEDING OBJECTIVES

- ▶ Sound body structure
- ▶ Strong feet and legs
- ▶ Good balance of growth, muscle and fat EBVs
