POLL DORSET STUD

43 YEARS OF BREEDING

Sixteenth Ram Sale

FRIDAY 4th OCTOBER 2019

INSPECTIONS: 10.00am - SALE 1.30pm

Breeding sheep with
"LENGTH AND MUSCLE"

INTRODUCTION

The Scott family would like to welcome you to our 16th on-property Valley Vista Poll Dorset ram sale.

- Inspection:** Rams can be inspected on sale day from 10.00am.
Sale: 1.30 pm.
Delivery: On completion of sale.
Rams may stay until transport is arranged-please notify selling agents after the sale on Buyer's instruction slip. In the event of any stock remaining for late delivery, all care and no responsibility is taken by vendor.
- Selling Agents:** Elders – Gundagai/Tumut.
Landmark - Wagga Wagga.
- Rebate:** 2% to outside Agents following introduction prior to sale.
- Health:** OJD Vaccinated.
Accredited Brucellosis Free – Y.303.
Footrot free.
Drenched with Zolvix 3/09/2019.
Vaccinated with-Glanvac 6in1 & B12 3/09/2019.

Groups of rams will be sold under a 2 & 3 hammer system.

Luncheon: BBQ lunch and refreshments provided before the sale. Drinks to follow.

The Vendors accept no responsibility for the accuracy nor the responsibility of the information supplied in this catalogue. Entry into property is taken at your own risk.

ASBVS and Indexes explained

What are ASBVs?

ASBVs (and Indexes) are the units of measurement LAMBPLAN, MERINOSELECT and KIDPLAN use to analyse animals. **Australian Sheep Breeding Values** are an estimate of an animal's true breeding value based on pedigree and performance recorded information. They are essentially a projection of how that animal's progeny will perform for a range of traits.

ASBV types

- *Birth Weight (BW)*
ASBV is based on measured birth weight of lambs adjusted for age of dam. Where birth weights are not available it is estimated as a correlated trait from weight measurements taken as the lamb matures. The lower the ASBV the lighter is the estimated progeny birth weight potential.
- *Weight (WWT) (PWWT)*
ASBVs describe the animals' genetic merit for growth rate. A positive ASBV means the animal is genetically faster growing. Weight ASBVs are available for weaning (100 days), post-weaning (200 days), and yearling, hogget and adult ages.
- *Fat Depth (PFAT)*
ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal.
- *Eye Muscle Depth (PEMD)*
ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.
- *Carcass + -* Selecting animals involves balancing several key traits. To make selection easier traits can be combined into a selection index.

Ultrasonic Rib Eye Muscle Scanning In Live Sheep

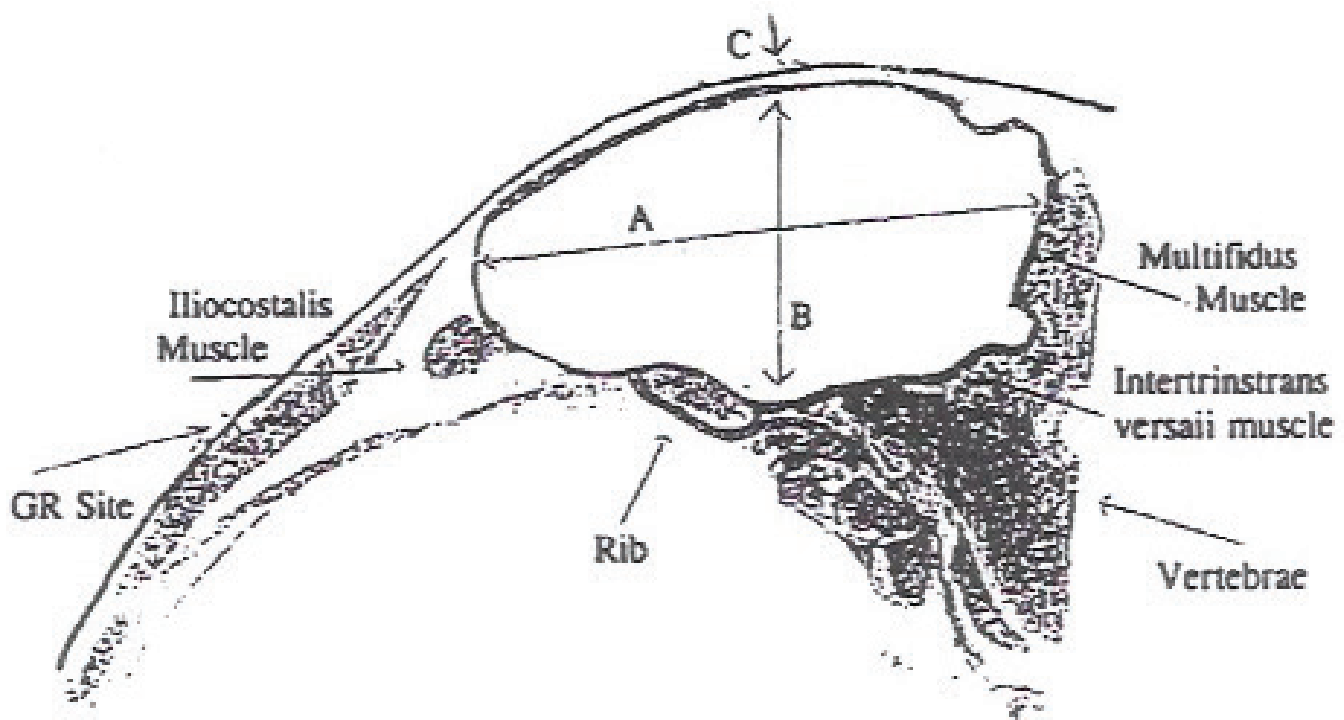

Fig 1 - Exposed 12th rib on the carcass cut through the last thoracic and first lumbar vertebrae

MEAT INDEX

The meat index formula is based on the eye muscle width (A), eye muscle depth (B) and fat (C) measurements. A higher weighting is given to eye muscle width (A) because it is more heritable while eye muscle depth (B) is influenced by environmental factors. Fat (C) is penalised slightly. The resulting number is then adjusted for the age of the sheep to get an index.

NOTE:

- Current Live Weight = C/LW
- Eye Muscle Area (EMA) is calculated using the eye muscle width and eye muscle depth measurements.

LOOK NO FURTHER THAN VALLEY VISTA

IF you are looking for Poll Dorset rams which will produce lambs for the domestic and export markets then you should look no further than the Valley Vista stud. The Valley Vista Poll Dorset stud was founded in 1976 and moved from its original home at Burrumbuttock, New South Wales, to Coolac, NSW in 1990. The stud was expanded in 1991 when Valley Vista stud principals Andrew and Donna Scott purchased the entire Meadow Creek stud from the late Ernie Britt. There was further expansion for the stud in November 2006 when the Scotts purchased 550 ewes and stud sires from the Gererdan stud, which at the time was among the top studs in Australia. In 2008 Joe, James and Luke Scott founded the Valley Vista Park stud with the purchase of 18 stud ewes at the Kismet dispersal sale. The Scotts have continued to add to their genetic base over the years with purchases of genetics from the Armdale, Armdale Park, Tattykeel, Hillden, Kurralea and Graythorn studs. Combined the studs have built the numbers up to approximately 1000 stud ewes. This provides good numbers to select from, allowing the stud to cull heavily.

When selecting rams for their stud's breeding program the Scott's have placed emphasis on traits such as ease of lambing and high growth rates. They also place emphasis on producing a well-muscled and structurally correct sheep. One of the main selection criteria is selecting for high growth rate. All lambs are weighed at weaning and then twice more at thirty day intervals. These weights are converted to grams/day. Lower than 300 to 350 grams/day are culled. The lambs doing better than 300 to 350 grams/day (depending on the season) are retained in the stud. The stud also scans all rams, using Stockscan, for muscle area and individual data on each animal. This information is sent to SIL (a New Zealand based recording outfit) along with the weight information. This data is processed and comes back with a ranking for ram and ewe lambs. A ranking is also received on the stud ewes which enables for a culling of any ewes that are not producing quality lambs. The stud has now entered the SIL information into Lambplan, and combined with further data recorded on farm has produced up-to-date Lambplan figures. Both studs produce stud and flock rams that produce quick maturing, well-muscled lambs for the domestic market as well as lambs that will go on to the export market. Many of the Scott's clients are benefitting from the great prices received at market with those using Poll Dorset rams over Merino, first-cross or composite ewes being able to sell suckers straight off mum for more than 800c/kg.

The Scotts started showing at major shows in 2000 and in that year exhibited the reserve champion ewe at the NSW Cowra Dorset Fair. The stud has had continuing success over the years in the show ring, consistently bringing home blue ribbons as well as the much sort after broad ribbons. The early growth and maturity, as well as structural correctness of their rams was on show at the NSW Dorset Championship in Cowra earlier this year, where their sires won the junior champion and reserve junior champion awards.

At the Australasian Dorset Championships in Bendigo last month, Valley Vista continued to prove the strength of their female flock, when they were awarded Champion Poll Dorset Ewe, with Valley Vista 334-18. The ewe was also supreme short wool exhibit at the Canberra Royal Show and reserve champion Poll Dorset ewe at the Sydney Royal Show this year.

SIRE SUMMARY 2019

VV61-12 'ABLETT': Sired by Arm465-07. 1st Shorn Ram Gundagai 2013.

VV110-13: Sired by VV115-10. Grandson of Tattykeel Topgun. Great bone and top line.

VV206-13: Sired by Huntingdon Wombat. Heavy muscled ram with a great carcass, very similar to his sire.

VV422-13 'PRIDDIS': Sired by VV25-11 and continues on from a great family line. Brilliant structure. Reserve Senior Champion Ram at Australian Sheep & Wool Show (AS&WS).

VV713-13: Sired by VV126-11. Very muscular ram with great structure.

VV138-14 'FYFE': Another Son of the great VV38-09. Producing a very exceptional line of progeny. Supreme Poll Dorset Ram at AS&WS 2015.

Tattykeel 90-14: Purchased to continue our Tattykeel family. Was an outstanding ram lamb weighing 85kg at 5 months old. Champion Ram Lamb Australasian Dorset Champs, 2014.

Hillden 145-10: Used In AI program. Purchased in 2011 and has crossed so well with our ewes we have used him again.

Kurralea 809-04 'PHOENIX': Used in AI program. Was heavily used at Valley Vista in the past.

Ivadene 89-14: Used in AI program. Complete outside blood used for outcross genetics. High indexing Lambplan ram.

Aberdeen 16-12: Used in AI program. Another complete outside blood used for phenotype and high Lambplan indexes.

VV108-16: Champion ram Canberra Royal. Retained for his clean points and impressive structure.

VV69-16: Son of Tat90-14. Reserve senior ram ASW&S. A ram packed full of meat and muscle.

Tattykeel 222-03 'TOP GUN': Purchased for \$22,000 in 2004. Used in AI program to revisit proven genetics in our flock.

Ohio 11-03: New Zealand blood ram used in AI program. Very similar to Huntingdon Wombat sire.

Goorama 37-16: Purchased also for his similarities to the Huntingdon Wombat sire. Produces high growth rate, heavy boned sons.

VV 173-16: A full ET brother to Valley Vista 'FYFE' (138-14). Was used for a month before being sold and has left an impressive stamp on the stud.

VVP41-09 'UNIT': Used lightly in our program to revisit old genetic, and has stamped himself on a limited selection of sons.

Valley Vista 334-18

Supreme interbreed exhibit at the Canberra Royal Show, Res Champion Poll Dorset Ewe at the Sydney Royal Show and Champion Ewe at the Australasian Dorset Championships.

Valley Vista 43-18

First shorn ewe, Australasian Dorset Championships

Valley Vista Charolais

TUBELINE WRAPPER

Looking for a cost effective way of wrapping silage?

- 40% cheaper than individually wrapped bales
- Easier to feed out and less plastic used
- Stores silage effectively for at least two years
- Wraps up to 80 bales of silage an hour
- Bales can still be transported with plastic on

SCOTT'S SCANNING

PREGNANCY SCANNING OF SHEEP

ULTRASONIC SCANNING ALLOWS YOU TO

- Identify singles, twins & drys
- Manage mob by ageing lambs to split early and lates
- Increase twin survival
- Manage twin bearing ewes to rejoin in good condition
- Select twins as replacement stock
- Sell dry sheep early and free up feed
- Reduce deaths from Pregnancy Toxaemia

"IMPROVE PROFITABILITY"

Andrew Scott: 0419208272

Joe Scott: 0429220492

James Scott: 0488711882

Valley Vista Park 116-18:

- 1st Shorn Spring Drop Ram, Gundagai and Canberra Shows.
- 1st Shorn Spring Drop and Reserve Junior Champion NSW Dorset Championships.
- 1st Production Class, Australasian Dorset Championships.

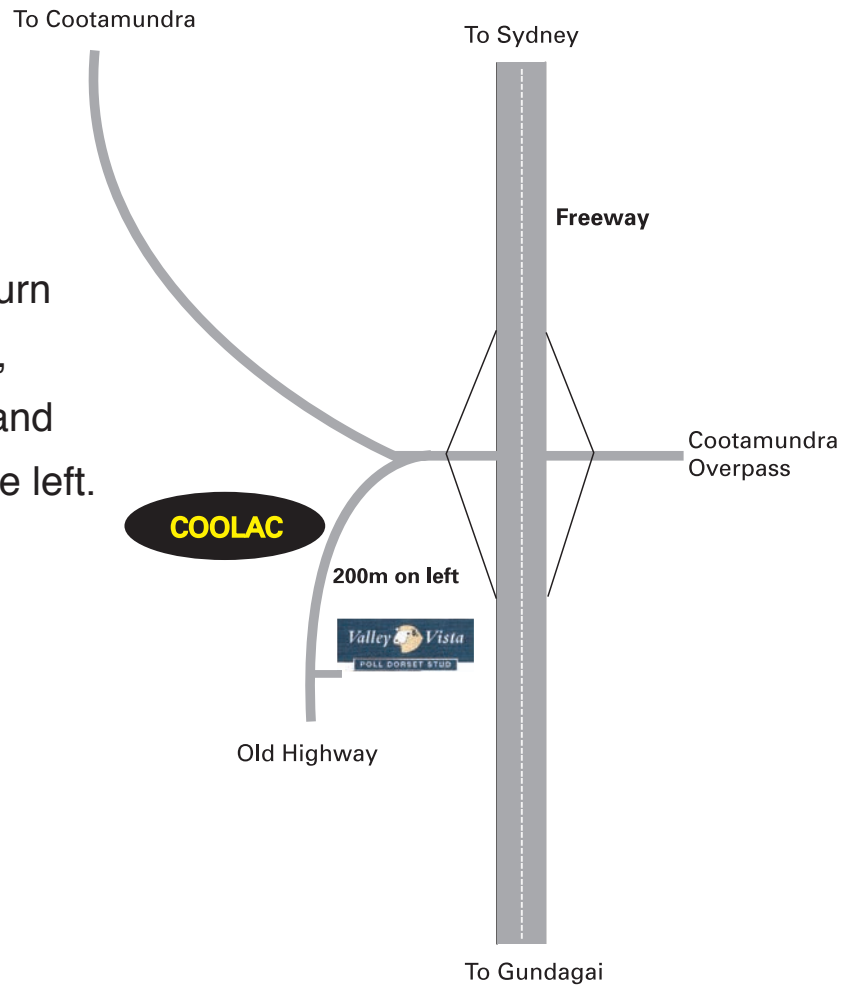

Valley Vista 344-18:

- 2nd Shorn Ram Gundagai, Canberra and NSW Dorset Champions.
- Reserve Senior Champion Australasian Dorset Championships

HOW TO FIND VALLEY VISTA

Take the Coolac/Cootamundra turn off from the new Hume Freeway,
And turn left at the Coolac Pub and
Valley Vista is about 200m on the left.

One has been retained as a sire - the other is for sale
