SALE INFORMATION

VENUE:

This Bull Sale will be held at Banquet, 420 Fosters Lane, Mortlake, Victoria.

INSPECTION:

We encourage buyers to inspect the bulls prior to sale day. It allows us to assist you select the sire best suited to your needs. Phone us on 0419 884 839 and advise us of your intending visit.

Lots catalogued are available for inspection from 1.00pm, Thursday 21st February.

FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood of Terang Mortlake Veterinary Clinic including –

examination for structural soundness
examination of reproductive organs
measurement of scrotal circumference
SEMEN MOTILITY tested
SEMEN MORPHOLOGY tested

Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf.

Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on sale day.

ANIMAL HEALTH

NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We will remain at J-BAS 8 which is consistent with last years BJDMAP at MN2 level. See page 81 for our National Cattle Health Declaration.

STOCK HEALTH:

All bulls have been ear notched tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Paramectin. Any bulls purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

RECESSIVE GENETIC CONDITIONS (see pages 74 & 75)

All bulls in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

NO CARRIER BULLS ARE BEING OFFERED FOR SALE

REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after sales service. If in doubt, speak with us or with any one of our many satisfied clients.

FURTHER INFORMATION:

Contact Stephen or Noeleen Branson by phoning 0419 884 839 or 0437 029 992
or Email banquetangus@westvic.com.au

OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

WELCOME

Welcome to our 20th Annual Autumn Bull Sale.

For me milestones just sneak up, certainly not a focus. But when they arrive they do prompt moments of reflection. It is hard to believe just how fit, strong and mobile I was just 20 short years ago. And how much more hair I had!

Most importantly Banquet is stronger and more focussed than ever. Because for the next generation, Banquet is just getting started. I am proud of the energy, passion and belief they have. Just like I was forty years ago.

As a user of Banquet Genetics you can be assured that the team will be here to work with you for at least another generation. To share the successes, understand the challenges and strive to constantly improve the product which is 'Banquet'. Noeleen and I would like to take this opportunity to thank everyone who has supported Banquet in any way since its humble beginnings in 1991. We thank you for helping us to our 20th Annual Autumn Bull Sale.

140 COMMERCIAL HEIFERS RISING TWO YEARS - PTIC A/C Robbie & Marg Patterson

Sourced from leading Banquet Clients
Cremona, French, Lewillah, Norman,
Stony Rises, Webb and Winniburn

Lascelles L022 was purchased by Robbie Patterson at 11 months of age for \$16,000. Semen was used at Banquet and calves born in Autumn '17 from maidens confirm him as an elite calving ease bull. They were born quickly and without assistance. As an individual, L022, shows excellent fleshing and smoothness. He is fine shouldered with soft skin and hair. His dam featured in our Belles of Banquet Female Sale and sold for \$17,000.

BANQUET FEATURE SIRES

BANQUET JHETT J426

Banquet Collective C351
Sire: BANQUET FADDIST F238
 Banquet Lass C219

Hingaia 469 (NZ)
Dam: BANQUET DREAM G489
 Vermont Dream Y301

Jhett J426 is one of the most exciting young sires at Banquet. He is moderate framed with excellent muscularity. He is easy doing with exceptional structure. He gives us confidence that he could thrive with high work loads in any conditions. J426 supersedes his sire as our choice of sires descending from Right Time 24J. His dam, Dream G489, may be our most valuable donor at present. She has enormous capacity and her progeny are exceptional. Another son, L352, is also in use at Banquet. G489 is a daughter of Hingaia 469 and Vermont Dream Y301, the greatest cow to come from Vermont.

BANQUET FAITH F369

BR Midland
Sire: RAFF MIDLAND Z204
 Raff Doris W10

Banquet Zappa Z236
Dam: BANQUET QUIET D348
 Banquet Quiet B172

Faith F369 was a standout young bull when he was selected by the James Family. He developed into a stunning sire. Deep and thick with great mobility. His daughters are deep bodied and very maternal. The first progeny of F369 were born in 2013 and we continue to use him for his proven traits.

BANQUET FEATURE SIRES

BANQUET HARMAN H261

Hingaia 469 (NZ)
Sire: BANQUET XPLANATION X060
 Banquet Dream V104

Atahua Legacy 26-90 (NZ)
Dam: VERMONT IRENE W47
 Banquet Irene L143+91

Harman H261 topped our 2014 Sale at \$32,000 when he was purchased by the Blyth Family, Fernleigh Stud. H261 replaced his sire, X060, in our sire team. We expected H261 to produce excellent females as X060 had and our faith has been rewarded. The line of H261 daughters at Fernleigh are exceptional and our Champion Heifer at the 2019 Angus Roundup is a daughter. Lots 6, 29 and 30 should do the same for you.

BANQUET KYNETON K081

Banquet Ballis B017
Sire: BANQUET FORTUNE F710
 Banquet Dream C074

Banquet Zappa Z236
Dam: BANQUET WIVEM F587
 Banquet Wivem C234

K081 has a magnificent skin, softness and muscularity. His shoulder structure and neck extension is excellent and he has a strong head and jaw. K081 was selected by Fernleigh Stud at our 2016 Sale and his progeny there are standouts. Thankfully we retained semen and the bulls on offer in this Sale are his first. His sire, Fortune F710, was our most powerful son of Ballis B017. F710 daughters feature as the dams of some very good bulls in this Sale. Be sure to inspect Lots 9, 10 and 13. K081 will certainly see more use at Banquet.

BANQUET FEATURE SIRE

BANQUET KODAK K346

Coonamble Z3
Sire: BANQUET FREDERICK F683
 Vermont Dream B272

Banquet Xplanation X060
Dam: BANQUET CHAMPAGNE C154
 Black Gold Champagne J031+89

K346 is a large framed sire with extra length of neck and body and a smooth shoulder. He has proved to have exceptional calving ease traits. Scan data has shown his progeny to have extra marbling. K346, who is still in service at Banquet, is a son of C154 who topped our Belles of Banquet Sale at \$30,000 to Bannaby Angus. K346 sons will add length to their progeny and are expected to have excellent calving ease. He has some very promising sons in this Sale. The features are Lots 4, 14, 15, 16, 17, 23 and 26.

ABERDEEN ESTATE HOMER H70

Te Mania Berkley B1
Sire: TE MANIA EMPEROR E343
 Te Mania Lowan Z74

Ardrossan Equator A241
Dam: ABERDEEN ESTATE DREAM F21
 Vermont Dream Y301

Homer H70 was purchased at the Aberdeen Dispersal in partnership with Anvil Stud. His pedigree is a "who's who" of record price Angus cattle. His sire Emperor E343 was the Australian record holder at \$91,000. His dam Dream F21 was the record holder at \$48,000. Her half sisters have sold for \$45,000 and \$38,000. Homer has matured into a long bodied, fine shouldered sire with tremendous width of loin and a soft coat. His sons have met with instant demand. Leigh L010 at \$30,000 to Toora West and Nixon N099 at \$32,000 to Pheasant Creek. We expect Homer's daughters to make a major contribution to Banquet.

BANQUET FEATURE SIRE

BANQUET JUPITER J263

Sire: BANQUET FORBIDABULL F485 **Dam: BANQUET DREAM A356**

This outstanding sire prospect topped our 2015 Autumn Bull Sale at \$40,000. He was purchased by Richard and Sandra Retallack, Glengowan Stud, NSW. Jupiter J263 is strong headed with a well hooded eye. He is long, thick and muscular, recording our highest EMA scan. Jupiter's foot structure and temperament are exceptional. He was our first son of Forbidabull F485 to be offered for sale. Forbidabull F485 topped our 2012 Sale to Doug and Barb Tozer, Onslow Stud, NSW. A son of F485 topped the 2015 Onslow Sale at \$16,000. The first draft of J263 sons were offered in our 2018 Sale and averaged \$13,000. This catalogue has some excellent prospects.

BANQUET LASCELLES L022

Sire: PRIME JUGGERNAUT J15 **Dam: BANQUET IRENE D546**

L022 was purchased by Robbie Patterson at 11 months of age for \$16,000. Semen was used at Banquet and calves born in Autumn 2017 from maidens confirm him as an elite calving ease bull. They were born quickly and without assistance. We have been excited by the growth and muscle of these small born calves. L022 sons feature as Lots 1 and 7. An outstanding performance. As an individual, L022, shows excellent fleshing and smoothness. He is fine shouldered with soft skin and hair. His dam, D546, is an outstanding donor at Banquet and Waterlilli.

EF COMPLEMENT 8088

Sire: BASIN FRANCHISE P142 (USA) **Dam: EF EVERALDA ENTENSE 6117 (USA)**

After viewing Complement progeny we chose to include him in our program. He is a proven calving ease bull with an earlier maturity pattern. His progeny display thickness, muscularity and are moderate in their frame size. So far they have adequate soundness and structural integrity. The daughters we have witnessed in production have good udder attachment and teat size. If these are the traits you are seeking we recommend you inspect the Complement progeny.

BANQUET IRENE D546

BANQUET FORTUNE F710
VONK435 BANQUET LUCY K435
BANQUET LUCY F659

Considered by some astute judges to be the best bull we have presented for Sale. A big call, but I can understand their thoughts. He is sired by our calving ease specialist, Lascelles L022. N033's dam K435, shows great promise and her dam, F659, is very good. Both sons of F659 have made our sales selling to the Gull and Hay families. The dam of Lascelles, D546, is exceptional and now is the top donor at Waterlilli Stud. N033 has strong data set and his phenotype, structural soundness and temperament are exceptional. His soundness is evident with his foot structure, shoulder set and mobility. The length of body, strong loin, thickness through the hip and pin, fill in to the lower thigh, tight sheath and overall cover make N033 a very attractive prospect. N033 saw light service at Banquet in 2018 and semen retained.

Now for some serious "grunt". N091 is a power house with length of body, extra depth and extra thickness. A young bull who will add bone and weight to his calves. At over \$3/kg that extra weight is worth a lot of money. K084, sire of N091, is a favourite son of G306. G306 was also a power bull who was purchased by Barry Pitt. K084 stands at Cleveland Past. in Tasmania who purchased him for \$15,000. N092 was used at Banquet over our first calvers. Semen retained.

Lot 20, National N278 and Lot 21, Nationwide N301, are exceptional. From the tip of his nose to his tail N278 is one of the longest young bulls I have witnessed. He has a long, powerful head and huge depth of rib and flank. His hip to pin is enormous, long and wide. He is heavy boned and a very smooth mover. His weight at every stage has been exceptional. N301 is a very strong headed young bull. He is deep bodied with excellent cover and his tight sheath is much admired. Julie W164, the dam of N278 and N301 was one of our all time favourite and successful donors. When she died sitting up in the paddock on 6/09/2018 she had just had her 18th Birthday. She had produced 50 calves for us. Her top 9 sons to date have averaged \$13,500. N278 and N301 have been entered for The Angus Feature Show at the 2019 Sydney Royal. With the purchasers permission we would like to exhibit these bulls. There will be no cost to the purchaser.

Banquet retains semen from both bulls.

 BANQUET VICKY F361

When we joined Astron to a special Time Frame daughter, A337, we produced a top sire, K255. His progeny have been in the top echelon of calves. With N019 we have combined K255 with yet another daughter of F710. The result is a bull with great volume and depth of body whilst maintaining a smooth shoulder. Make sure you inspect this bull from behind. He has a massive ass.

I find these H261 bulls very attractive to produce very good daughters. I predict that in the next five years we will talk a lot about how well his daughters are breeding at Fernleigh and Banquet. N184 has that classic long body but we can see the indications that he will develop extra muscularity.

N475 starts a run of J426 sons. They impress us in so many ways. Phenotype, pedigree and survivability. N475 ticks these boxes. He has a powerful head, length and depth which gives him extra capacity. All this is wrapped in the typical J426 clean, shiny skin. E019, grand dam of N475 was selected by Brad and Nicole Saunders at our 2015 Belles of Banquet.

In the previous lot I referred to the dangers of incorrect structure. Well this youngster certainly doesn't suffer from that. He is long and wide through his hip and pin so his progeny will have excellent pelvic area. Maintaining the pelvic area allows the heifers to calve quickly and easily and the steers some where to hang muscle from. Of course bulls with the structure have strong tops and powerful heads.

BANQUET DREAM F253

Another exciting son of K084. This time from the old favourite but now deceased donor V112. N132 is her eighteenth and last calf. Four of her six daughters are still in the herd. N132 has excellent type. He has a long powerful head, strong jaw and is muscular. He has great depth of body and length from hip to pin.

N056 has an incredible muscle pattern. He is powerful through out with extra loin. N056 also offers a special pedigree. His sire, J507, is a favourite at Banquet for the extra depth of body, thickness and weight that his calves express. The two half brothers of N056 have both made our February Sale. His two sisters have been retained.

Breakwater

Insurance Brokers

FARM INSURANCE

Protect your farm business and your assets with an insurance policy tailored to meet your needs.

Breakwater Insurance can arrange competitive premiums and cover for commercial dairy, beef, sheep and cropping enterprises.

We offer professional, on-farm advice relating to:

- Livestock mortality
- Farm buildings and contents
- Home and contents
- Farm machinery and machinery breakdowns
- Livestock, hay, fencing and farm trees
- Liability
- Motor vehicles (all types)
- Theft
- Business interruption.

RECESSIVE GENETIC CONDITIONS

INFORMATION FOR BULL BUYERS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or “broken” genes. In single copy form, these undesirable alleles usually cause no harm to the individual. But when animals carry 2 copies of certain undesirable or “broken” alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or “broken” genes. Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

Key point: With today’s DNA tools undesirable genetic conditions can be managed!

What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by “broken” alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

Key point: The number of reported observations of AM, NH, CA and DD calves is very low and there is certainly no need for panic.

How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition. For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as “carriers”.

What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele), and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

Key point: For the condition to be expressed the undesirable gene needs to be present on both sides of the pedigree and both the sire and dam need to be a carrier.

How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on pedigree AM free – Animal has not been tested
AM__%	__% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an “Animal Search” from the Angus Australia website or looking up individual animals listed in a sale catalogue.

Key point: The genetic status of an animal is subject to change and will be re-analysed and adjusted each week as DNA test results of relatives are received.

Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia’s Breed Development and Innovation Manager at (02) 6773 4602.

IMPORTANT NOTICES FOR PURCHASERS

~ SALE CATALOGUE DISCLAIMER ~

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

~ DNA PATERNITY VERIFICATION ~

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

~ PRIVACY INFORMATION ~

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.

I, the buyer of animals with the following registration numbers from member (name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.

Signature:

Date:

Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail office@angusaustralia.com.au.

BRINGING A NEW BULL HOME

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

Arrival

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

Mating new bulls

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as "expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining". This expectation would apply to 2 year old bulls, but not to younger bulls.

During mating

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like "corkscrew penis" or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

You can count on us.

Across the country, our people work hard to know livestock best. We've been in the business for more than 150 years and we're committed to provide the best marketing options for every season. That's why you can rely on Landmark.

NATIONAL CATTLE HEALTH DECLARATION

Version 18/10/17

Owner of cattle **S & N Branson** (Full trading name)
 Property/place where the journey commenced
420 Fosters Lane (Address) **Mortlake** (Town/suburb) **Vic** (State) **3272** (Postcode)
 (Address continued)
 Property Identification Code (PIC) of this property **3 M Y N L 0 4 3**
 This MUST be the PIC of the property that the stock is being moved from
 Details of other statutory documents relating to this movement e.g. NVD
 (Document type) (Document number) (Office of issue) (Expiry date)
 Note: If NVD accompanying this declaration then you may go straight to question 1
 Description of cattle

Number	Description (Breed, sex e.g. Hereford Cross Steers)	Brands or Earmarks
105	Angus Bulls	
105	Total	

 Consigned to **Various Buyers** (Name of person or business)
 (Address) (Town/suburb) (State) (Postcode)
 Destination (if different) of cattle (Location address)

1. Has the owner stated above owned these cattle since birth?
 Yes No

2. On the property stated above, has an on-farm biosecurity plan been implemented?
 Yes No
 If yes, which plan (e.g. Farm Biosecurity, LBN, BioCheck) Farm Bio Security

3a. Have these cattle been tested for the presence of pestivirus antigen?
 Yes No
 If tested, were any cattle found to be persistently infected?
 Yes No

3b. Have these cattle been tested for the presence of pestivirus antibody?
 Yes No
 If tested what percentage of the tested cattle were antibody positive?

4. Enzootic Bovine Leucosis (EBL) test result for animals being moved:
 Date of test/...../.....

5. Are the cattle from an EBL accredited or certified free herd: Yes No

6. Are these cattle from a herd or property with an occurrence of Johne's disease (JD) in any susceptible species within the last five years?
 Yes No Don't know J-BAS of EIGHT (optional)

7. On the property stated above, have cattle been co-grazed with dairy cattle and/or sheep?
 Yes No Don't know Sample Test

8. Source herd has a negative JD test result: Check Test Date of test **26 06 18**

9. If dairy cattle, the consignment has a Dairy Assurance Score of:
 Part A (herd base score) Part B (calf credits) Part C (total Dairy Score)

10. Treatments

Treatments	Product	Date of treatment within last 6 months
Drench	Paramectin	10/11/2018
Liver fluke treatment		
Other treatments (type)	AD&E, 7 in 1	10/11/2018

11. Current vaccinations for the cattle being moved (see explanatory note)
 Clostridial vaccination (e.g. 5 in 1): Yes Clostridial vaccination (Botulism): Yes
 Pestivirus vaccination: Yes Bovine ephemeral fever vaccination: Yes
 Leptospira vaccination: Yes Vibrio vaccination: Yes
 JD (Sillurum) vaccination: Yes
 Other vaccinations (specify):

12. Any other relevant health information

DECLARATION (see explanatory notes for further information)
 I, **Noeleen Elizabeth Branson** (Full name) (Full address)
184 Steeles Lane (Address continued) **Mortlake** (Town/suburb) **Vic** (State) **3272** (Postcode)
 declare that I am the owner or the person responsible for the husbandry of the cattle and that all the information in this document is true and correct. I also declare that I have read and understood all the questions that I have answered, that I have read and understood the explanatory notes, and that I have inspected the animals and deem them to be healthy, free of signs of disease and fit to travel.
 Signature* *Noelen Branson* Date **25 01 19**
 *Only the person whose name appears above may sign this declaration, or make amendments which must be initialed.
