A RURALCO PARTNER

Invitation

Welcome to the 2019 Greenup Eidsvold Station Sale Catalogue.

The sale is on **Thursday** September 19, 2019, commencing at 12 pm at the Eidsvold Saleyards. Note: This is a change to the usual Friday.

This year's team is jam-packed with muscle, fertility, growth and the renowned Greenup Eidsvold Station easy-doing constitution.

The country our bulls are bred on, underpins the doing ability of this line and the reason the bulls thrive north of the Flinders, and across arid rangelands of Australia, and also excel in feedlots and fertile scrub.

Most of these bulls and their dams, were bred in rough, Ironbark forest country and weaned around 200 kgs, learning how to walk the steep slopes of the Great Dividing Range, while surviving on low protein, native pasture.

Our bulls have had a tough start, but this is the foundation of a long, productive working life, and it forms the substance of a female cattle herd with exceptional constitution and doing ability.

We take pride in the standards we set for preparation, fertility and structure. These standards result in bull returns/breakdowns that are well below 0.5% over the last decade.

As well as placing the highest standards on our bulls, we offer a 100% money back guarantee for fertility and temperament to ensure our clients are 100% satisfied and confident with their purchases.

Our bulls' soundness and fertility is sacred. This is one of the ways we can maximise the returns for your investment!

Our preparation regime does mean that our adolescent bulls are not the largest and the fattest in the Spring sale circuit. Inevitably we get the calls after summer exclaiming how well the bulls have continued to grow and thrive, while working.

Most importantly, our preparation program ensures our bulls' fertility and structure is preserved, and they are fit to walk and travel distances and will provide a long working life for our clients.

This 2019 team offers 100 bulls, of which 78 are poll/pollscur and 87 are Classified 'S' bulls.

This team offers several exceptional trait leaders and the usual exciting standouts. However, what pleases us most is the consistency and standard of the draft, which average in the top 15-20% of all Santa Gertrudis Breedplan Cattle.

Genetics pays a handsome return for the well-considered investment. Desirable genetics have true value in the market place every day of the year, whatever the market conditions. Genetics make money through premiums, market access, feed conversions and weight for age, as well as using reducing costs of production where soundness and fertility are preserved through a healthy preparation program.

The current market provides an excellent opportunity to turn over older bulls with cull bulls achieving around \$2,000. On a \$7,000 bull bought five years ago, that is a cost of approximately \$15 per calf. This is a tiny sum, especially when compared to the hundreds of dollars variation between a high and low value beast through its lifetime.

This year's sale team is selected from the largest registered Santa herd and draws from a pool of over 100 sires, but as always, the cream rises to the top and thirty sires are represented in this year's draft. One quarter of the draft are by New Release Sires including Greenup Legacy, Dangarfield Yabberwocki and Rosevale Gallipoli.

The sale will be livestreamed and interfaced with AuctionsPlus. Bulls may be inspected any time. Full catalogues are available at www.greenup.com.au or contact us or your agent for a hard copy. Free delivery is offered to major selling centres and on-property wherever feasible.

We look forward to seeing you at the sale.

Rick, Alice, Ruby, James & Rory

GREENUP GUARANTEE

Our objective is to produce reliable seedstock that have predictable performance and proven fertility.

A simple philosophy “to breed profitable cattle for self-replacing commercial herds, which perform in all environments and within all major markets” remains at the heart of Greenup Eidsvold Station values.

We stand behind our bulls and all bulls are backed with the Greenup Guarantee for fertility and temperament.

Greenup Eidsvold Station bulls and their progeny are thriving across the arid rangelands of northern Australia, from the Pilbara, to the Kimberley, the Gulf, outback Northern Territory and the far western reaches of Queensland.

The way the bulls handle the heat, the distances to water and the work, reaffirms that the tough environment in which the 1800 stud females are run - the native pasture, the steep hills and granite Ironbark country - enables selection for superior constitution.

Greenup Eidsvold Station runs in excess of 6000 head of Santa Gertrudis cattle, in the Burnett region of Queensland.

Greenup Eidsvold Station supplies hundreds of bulls annually to the Northern Australian Beef Industry to repeat clientele, over 95%.

KEEPING IT SIMPLE

The beef industry is demanding & requires reliable bulls that perform predictably.

The Greenup Eidsvold Station breeding program is underpinned by six decades of selection and the longest running objectively performance recorded herds.

Greenup Eidsvold Station are Breedplan herds.

We measure thousands of data records each year and use this data for ground-truthing subjective appraisals and to ensure we produce seedstock that is demonstrably improving commercially relevant traits.

Our bulls are bred on Ironbark forest country of the Great Dividing Range, under demanding, low-protein conditions. This environmental pressure ensures we select for easy-doing cattle with exceptionally high constitution.

All bulls must pass our criteria for conformation, temperament, semen morphology, scrotal size, growth and muscling, while retaining softness.

So whether you are a numbers person, or just want bulls that you can trust to do a job for you in any environment; you can be assured that they've passed the Greenup standard.

BULLS DONE RIGHT

Greenup Eidsvold Station Bulls are bred and prepared for a long & productive life.

Our business success hinges on our clients' outcomes and their success, measured by:

1. Calves weaned and total kg produced per mated cow per year
2. Females re-breeding annually in arid, low-protein environments
3. Less costs by using fit, fertile bulls that walk far, work hard and last a long time.

4. Turning off cattle earlier with more weight
5. Premium prices.
6. High weight gains and feed conversions
7. Carcase and eating quality traits
8. Improving c/kg by expanding market options

The outcome is functional, fertile herds that perform well in tough country, and provide the supply chain with rapid growth & ability to finish export or domestic cattle between 12 and 24 months of age.

THE DIFFERENCE

Industry relevance lies at the heart of our breeding values.

We understand what's important to the bottom line and we embed those priorities into our breeding objectives to produce low cost, high-return, self-replacing herds, that serve the whole supply chain for major domestic and export markets.

Greenup Eidsvold Station Studs enjoy regular success in commercial competitions.

All-Breeds Performance.

In 2017 Greenup Eidsvold Station won the prestigious RNA Paddock to Palate Trade Champion Carcase.

In 2017 Greenup Eidsvold Station took third overall winner in the Paddock to Palate, 70-Day with an aggregate score for the pen of six in Average Daily Weight Gain, Carcase

and MSA Eating Quality, and seventh overall in 2018.

Breedplan Explained

Estimated Breeding Values (EBVs)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

Accuracy

An accuracy value is presented with every EBV and indicates the amount of information used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

Fertility

Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

Growth

200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Carcase

Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Selection Indices

Breed Society Index have been compiled based on common breeding objectives and some assumptions of breeding criteria. However not all operations are the same so it is wise to consider weighting that suit your business, land type, markets and herd.

Domestic Index

Estimates the genetic differences between animals in net profitability per cow joined for a self-replacing commercial herd producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding.

Export Index

Estimates the genetic differences between animals in net profitability per cow joined producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding.

Breedplan figures cannot be compared between breeds

Only Santa Gertrudis GROUP BREEDPLAN EBVs with Accuracy (Acc) can be validly compared between herds.

Rosevale Hilda U124

This sire is incredibly consistent and continues to be a breed leader. His longevity speaks for itself!

Fitzgerald offers growth with easy doing ability and he handles our tough forest country like it's scrub country. Fitzgerald's EBVs place him in the Top 1% for growth and scrotal size and Top 5% for Eye Muscle Area (EMA).

He provides a rare combination of the attributes of fertility, growth and most of all, constitution - this package is wrapped up with an incredibly docile temperament.

Sons sold to date include: Greenup Newton N22 (P), sold to S Kidman & Co for \$26,000 in 2018; Greenup Normandy N16 (PS) to J & C Ianna for \$11,000; Greenup Noble N268 (PS) to T & T Patterson's BTD Stud for \$10,000; Maximus M66 (P) to J & K McLoughlin for \$13,000; Moama M30 (PS) to J & S Cruikshank for \$14,000; Mirage M74 (PS) to T & S Hoare for \$11,000; Lacey L174 (PP) to Jensco Grazing for \$12,000 and Justice J20 (PP) to Dunlop Stud for \$12,000

As well as his many sons sold, we have retained a number for stud use.

Eidsvold Station Restoration

We are delighted to have come a long way in the past 12 months, restoring Eidsvold Station. For lovers of heritage and Queensland history, enjoy some before and after pictures of the journey.

We still have a long way to go, but no-one ever ate an elephant in one bite!

Lot 30 Greenup Pedro P168 (PS)

'S' Pollscur 28/11/17 21 mths GUP18MP168

Dangarfield Tycoon (P)

S: Greenup Krypton K220 (P)

Greenup Dixie H19 (P)

Greenup Exceptional E294 (P)

D: Greenup J107

Eidsvold Station D89

Pedro is a quiet natured, poll-scur bull with early finishing ability and a strong hindquarter. This is a well balanced, young sire that has a lighter coloured coat.

Juno J107 calved first as a two year old, was brought in sync with cow herd and had another three calves in three years. One son, Greenup Atom N126 sold to the Sharpe family in 2018. Pedro is her second bull calf.

ES D89 had six calves in seven years - 4 heifers, 2 bulls. She is the granddam of Lot 32 P116. One son, Greenup M62 (P) sold to Dalco Co. Another son, Neptune N58 (P) sold to T & L Jensen in 2018 for \$9,500.

Use this table as a guide to compare individual animals with the current genetic level of the Santa Gertrudis breed.

SALE INFORMATION

Auctions Plus

Online bidding is available only to registered users. Registration is free - visit www.auctionsplus.com.au to register. Please register at least 48 hours prior to the sale. Microsoft Silverlight is required to connect to AuctionsPlus sales; first time users are advised to visit the Downloads section of the AuctionsPlus website to ensure Silverlight is installed. Contact us or our agents to discuss how to make your AuctionsPlus bidding fast and effective.

Breeding Soundness All bulls have passed a breeding soundness examination by veterinarians Stacey Rae / Ced Wise.

Semen morphology All bulls have passed a semen morphology test

Health All bulls have been vaccinated with PestiGuard, 7 in 1, Vibrio, 3-day and 3-Germ blood for tick fever. Annual booster shots recommended next July.

All Sale cattle have been pre-treated for ticks and are ready for tick-free country.

Buyers Inspections Cattle may be inspected any time prior to the sale by arrangement with the vendor or selling agents. All sale lots will be on display at sale venues on morning of sale from 7.00 am.

Supplementary Sheets Supplementary sheets will be on our website: www.greenup.com.au and also available at the sales with semen morphology results, scrotal sizes, raw weights, daily weight gains and scan data for eye muscle area, rib fat and rump fat.

Brands Symbol Brands:

All Greenup cattle and Quarter Horses are branded with Wings over Nought.

Eidsvold Station cattle are branded with Half Circle J

Number Brands: Greenup Eidsvold Station bulls are branded with even numbers and heifers with odd numbers.

Guarantee Our bulls are guaranteed as breeders at time of purchase, however we accept no responsibility in the following circumstances:

- Injury or disease that occurs to animal after the sale;
 - Gross negligence or willful misconduct on the part of the purchaser;
- In the event of an animal failing to breed, we agree that;
- The animal may be replaced with an animal of comparable value;
 - Credit shall be given in the sum of the full purchase price, less salvage value;
 - The vendor shall refund the money paid for the bulls.

These options shall be at the Vendors' election and the Vendor shall not be liable for any direct or indirect loss (including consequential loss) whatsoever.

Insurance Insurance representatives will be at the sales and if requested will arrange insurance on the fall of the hammer.

Outside Agents The vendors will pay a 3% rebate to outside agents who introduce genuine "new" buyers in writing at least 24 hours prior to the sale, and is continued to be paid on previous eligible introductions. Rebate will not apply to existing Greenup Eidsvold Station clients. Settlement by the outside agent on the purchaser's behalf must occur within fourteen days of the sale.

Delivery Delivery will be given and taken on the day of the sale. Cattle waiting for trucking will be held free of charge for one week. Every care will be taken, however no responsibility will be accepted.

Risk & Responsibility Any person attending the sale do so at their own risk and the vendor assumes no liability, legal or otherwise, for any injury, accident, loss or damage to any person or property.

Disclaimer The vendors and agents have produced this catalogue with every effort to ensure the accuracy of the information, however will not be responsible for any errors or omissions.

PRE- SALE INSPECTIONS

Prior to sale day, all bulls are depastured on oats at 'Belvedere' and can be inspected anytime.

Belvedere is situated on the Kerwee-Mt Perry Road, 10 minutes north of Eidsvold township.

To arrange inspection, contact Rick on 4164 4260 or his mobile 0427 644 260.
