HICKS BEEF BULL SALE

Wednesday 4th September 2019

Sale Commences: 1.00 pm
Inspections from 10.00 am

48 Australian Beef Composite Bulls
14 Hicks Red Angus Bulls

Andrew Hicks
M: 0427 147 258

Tom Hicks
M: 0448 796 124

Email: tom@hicksbeef.com.au or aahicks@bigpond.com
Website: www.hicksbeef.com.au (visit for link to video of sale bulls)

This sale is interfaced with AuctionsPlus

Our sale is conducted live on line in real time; remote bidders can bid on computers at their location. The remote bid is immediately transferred to the auction ring.

Bidding is only available to registered AuctionsPlus users

You must register at least 24 hours prior to sale with AuctionsPlus.

Phone: 02 9262 4222 W: www.auctionsplus.com.au

Phil Gledhill 0407 078 094
Jenni O'Sullivan 0428 222 080

**2% REBATE
to Outside Agents**

We have poor mobile phone reception at our sale ring. Please call Phil from Elders to organise phone bidding.

Sale Details

SALE DETAILS: All bulls will be yarded by 10.30am on the morning of the sale. Inspections prior to the sale can be arranged by calling Tom Hicks on 0448 796 124.

HEALTH: All bulls have been vaccinated with "7 in 1" which includes leptospirosis. They have been drenched with Evermectin. All bulls vaccinated - vibrio, and pesti virus tested.

DELIVERY: Stock awaiting delivery will be held free of charge for up to 14 days of the sale at the buyer's risk. **CATERING:** Lunch and refreshments will be available.

GUARANTEE: We have always provided full replacement guarantee against fertility and genetic faults. It is important that we are contacted as soon as possible to rectify any problem.

FEEDING POLICY: We believe that overfeeding can cause many problems to bulls long and short term. All our cattle are run in large paddocks under commercial cattle conditions. All Breedplan figures are assessed under these conditions usually from mobs of over 100 cows and calves.

As we sell our bulls younger than most studs we feel it is important that they are in suitable condition to withstand the rigours of their first season. The bulls are given a supplementary ration for 10 weeks, out in the paddock still in their calving groups.

All bulls are treated identically with no preferential treatment for the top bulls. We have sold bulls to many areas of Australia and have had no complaints about their mobility or fertility.

Terms and Conditions of Sale

1. Subject to reserve prices, the highest bidder shall be the purchaser, and in the event of any dispute arising it shall be settled by the Auctioneer, unless one of the claimants will advance the bidding above the disputed bid, in which case the lot or lots shall be put up again.
2. The purchaser shall deposit the whole or any part of the purchase money if required at any time during the sale.
3. All stock shall be paid for in cash immediately on conclusion of sale, and prior to delivery, but, in the event of delivery being made, or possession obtained by the purchaser or his representative prior to the payment of the purchase money, or any cheque given on account of same, the purchaser shall hold the stock as trustee only for the vendor.
4. All stock shall be at the risk of the purchaser upon the fall of the hammer.
5. No warranty is given by the Auctioneers with any lot, and, as all lots are available for inspection previous to the commencement of the sale, the same are sold with all faults, if any.

The Auctioneers shall not be responsible for any errors or omissions in any particular appearing in the description or pedigrees of any lot for sale, and no error, omission, or misdescription in such particulars or pedigrees shall invalidate the sale or be made the subject of any claim for compensation.

Directions from the South

Take the Woomargama exit to the Old Hume Highway. If you miss this exit, turn right at the Holden dealers in Holbrook.

Directions from the North

From Holbrook turn east down the Jingellic Road, travel 8.1kms then turn right into Annandayle Road and we are 2.8kms on the left.

RED ANGUS GROUP BREEDPLAN

ESTIMATED BREEDING VALUES (EBVs) The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY: Accuracy is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcase Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13- rib site and the P8 rump site and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

For further information please contact the Red Angus Society or Red Angus BREEDPLAN.

Beef Class Structural Assessment System

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry.

Over the past decade, use of the Beef Class Structural Assessment System in the seedstock industry has produced a marked improvement in herds which have shown commitment to using the information appropriately. Through these dedicated breeders, there has been a flow on affect of structural improvement through out all sectors of the beef cattle industry.

Jim Green and Liam Cardile of 'BEEFXCEL' service many of the leading seedstock herds in Australia. 'BEEFXCEL' is not involved in any genetic marketing or specific breeding advice and therefore has no conflict of interests to influence their stock appraisal. The integrity of the structural data provided by 'BEEFXCEL' is recognised throughout the industry as Jim and Liam are fully INDEPENDENT assessors.

HICKS BEEF STRUCTURAL PROGRAM: Since 2003 Hicks Beef have used the services of BEEFXCEL to assess the structure of all sale bulls. The SPRING 2019, HICKS BEEF Sale Bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft. The Hicks Beef sale bulls were assessed by **Liam Cardile** of LRC Livestock on 28/05/2019. The composite bulls scrotal circumference measurement was taken on 08/07/2019.

How to Use The Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system;

- A score of **5** is ideal (Note: Except for Temperament where a Score of 1 is ideal);
- A score of **4 or 6** shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of **3 or 7** shows greater variation but would be acceptable in most commercial programs.

However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;

- A score of **2 or 8** are low scoring animals and should be looked at closely before purchasing;
- A score of **1 or 9** should not be catalogued and are considered culls.

Liam Cardile on 0409 572 570

API – Profit Based on Fertility

API – the profit index that shows us where our priorities should be. The All Purpose Index weighs up the \$ inputs and outputs of beef production.

The big drivers of profit are stayability (a measure of how long a cow remains in the herd) a measure of fertility and soundness. Followed by cow herd intake (mature cow size), calf survival and heifer pregnancy. Yes, fertility, soundness and live calves make up the priority for breeders chasing higher returns, before weaning weight, carcass weight and feedlot intake.

HICKS BEEF GUARANTEE - Nothing left to chance

- All bulls are assessed on one of the world's most advanced performance programs in the world with IGS - International Genetic Solutions
- All figures; both dams, sires and individuals are genomically enhanced, with DNA verifying parentage and improving the accuracy of the performance figures.
The DNA test is like knowing
 - 15 calving ease scores
 - 21 birth weights
 - 22 weaning weights
 - 25 stayability records
- Independent veterinarian breeding soundness checks by the industry leading Holbrook Veterinary Clinic.
- Independently assessed for structural soundness by Liam Cardile, LRC Livestock, one of Australia's most experienced stock assessors.
- All bulls measured for all traits, birth, weaning, yearling, carcass scanned, temperament.
- All females on Total Herd Enrolment, all measurable traits recorded.

- Producing bulls in optimum condition for their first joining season is our priority. We keep our bulls on a steady plane of nutrition, with a high roughage, silage based ration.
- All bulls vaccinated for vibrio
- All bulls tested for pesti virus
- Backed by Hicks guarantee

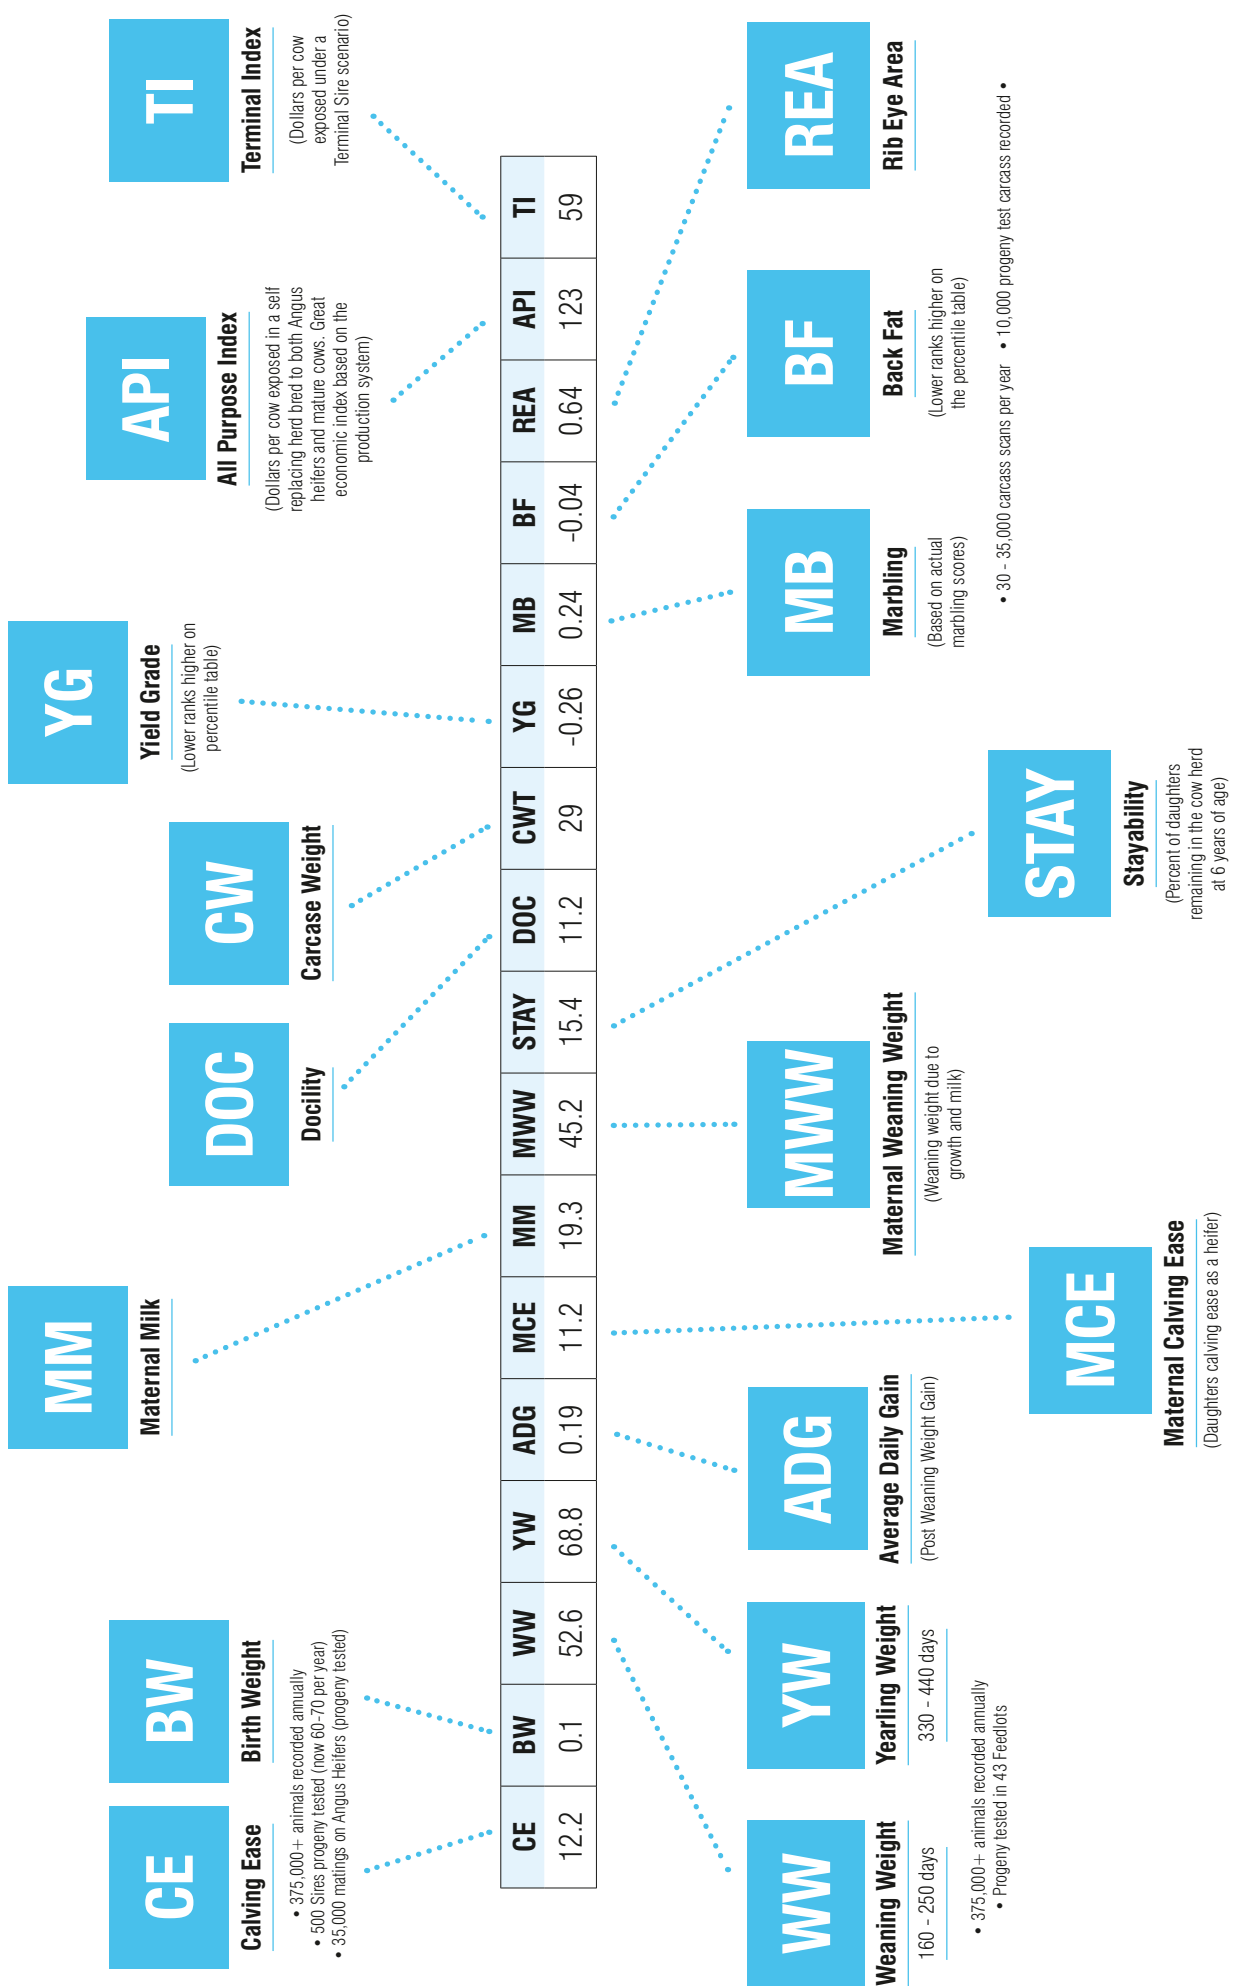

Vet Check Information

All bulls presented in the auction have been fertility tested by the Holbrook Veterinary Centre. They have passed an examination of their reproductive tract, which includes a testicular palpation, internal reproductive organ palpation and penis check.

General health and structure are part of the course for this veterinary examination. Service ability testing and semen assessment have not been performed and we encourage all purchases to integrate their new bulls into the risk mitigation strategy that they employ back home.

Black / Poll Test: **Homozygous Black** **Homozygous Polled**

An eye catching, heavy bull, backed by great yearling weight and average daily gain figures. He is thick, with good structural assessment. His top 5% stayability calculates that his daughters will stay in the herd longer with their fertility. An essential ingredient to a profitable cow herd. His pedigree combines two Simmental bulls - Boulder & Wolfpack, that are at the top of the profit index.

A stunning Beacon son with great balanced numbers. His sire is the number one pure bred Simmental bull for the All Purpose Index (profit index). This attractive son combines sensible calving ease with great growth and carcass. Most importantly he is backed by a high stayability index, indicating his daughters will stay in the herd, getting in calf easy. He has plenty of thickness and red meat (top 4%)

This is a bull with volume and grunt. Sired by our new Balancer (Gelbvieh X Angus) sire, Apollo, who combines the leading Angus performance of Gardiner Progress with Bennett's great Gelbvieh lines. N1015 combines top 10% calving ease with top 34% yearling growth. No surprise that his All Purpose Index is top 15% and Terminal Index top 10%, indicating a profitable young sire offering a Gelbvieh outcross pedigree. An attractive bull backed by good data.

Here is a bull sired by GAR Prophet, one of the most proven Angus performance sires world wide. N857 shows plenty of stretch and performance. His dam is by the Australian record priced bull we bought from Webb Simmentals. She is our leading pure bred Simmental cow, extensively used in our embryo transplant program. We have used several of his full brothers in our program. N857 ranks in the top 25% for 10 traits and indexes.

Black / Poll Test: **Homozygous Black** **Homozygous Polled**

We have already given this bull our stamp of approval, we have used him in the bull breeding herd. This does impede their growth a little from their contemporary group, but he is catching up daily. This embryo transplant bull is a SimAngus from one of the best Simmental cows sired by a bull regarded as a cornerstone bull in one of the world's best performance Angus herds, Gardiner Ranch. N840 is a curve bender - low birth and good yearling weights. His direct calving ease is top 4% so he is ideal for heifers. His weaning weight is top 35% and he has a top 3% marbling figure. No surprise that his profit API figure is top 3% as is his terminal index. Attractive, docile and a real good bull. Hicks Beef retain the right to collect semen at our cost at a mutually agreeable time.

Black / Poll Test: **Homozygous Black** **Homozygous Polled**

This is one of the great pedigrees of the catalogue, combining Rennylea J138 and the maternal sire GW Predestined 701T. This young sire ranks at the top of the profit index API. This calculates the profit of using the bull over an Angus cow & heifer herd and keeping replacement females. A big part of the API figures focus on fertility traits, mature cow size, calving ease and carcass. It doesn't always favour the type of bull we have in our minds as being profitable, but it does a more thorough, complex equation of putting real values on traits, inputs and outputs and doing the sums. Ignore them at your own peril. N988 has one of our best marbling scans, good growth, good stayability and has one of the best profit API world wide.

Poll Test: **Homozygous Polled**

This bull is sired by one of my favourite home bred sires J661, who has the numbers and is a very attractive bull with a great pedigree. This son combines J661 with a Leachman Cadillac daughter, bringing two good lines together. N737 is thick and wide topped with a bit of carcass to him. He should be very suited to heifer joinings with a top 2% calving ease. His API of 148.8 puts him in the top 10%.

Another good son of Beacon, moderate and thick, that has to be suited to Australia's variable climate. It is these soft easy doing types that will keep going through tough seasons. This is expressed by a top 1% stayability figure. He is also very suitable for heifer joining, but he would also be good for cows with a top 3% Terminal Index and an API top 1%, probably one of the highest index bulls to be offered for sale in Australia. This bull is certainly one of the best carcass bulls anywhere, in that he combines muscle (top 2%) and marbling (top 4%) together. His final trick is to get perfect structural scores for feet and legs.

BLACK COMPOSITE SALE BULLS

Hicks Beef Bulls Checklist

- ✓ **Moderate Birth** - we aim to have birth weights lighter than breed average
- ✓ **Specialist Heifer Bulls** - in all our breeds, top 20% calving ease
- ✓ **Weight Gains** - up in the top 20% of breed for 200 & 400 day weights
- ✓ **Mature Weights Less** than breed average, large cows need more maintenance
- ✓ **Carcase** - we believe muscle and yield will be demanded by industry and that marbling is an important trait
- ✓ **Temperament** - is important, we cull heavily on temperament, sale bulls and cows
- ✓ **Structurally Correct** - we feel that we are competent enough to structurally assess bulls, but we know you want an independent professional. We use Liam Cardile from CTC to assess all our sale bulls for feet, legs, sheath and testicles
- ✓ **Tested** - for known genetic abnormalities, results will be available on sale day.
- ✓ **Tested negative** - Pesti-virus carriers.

An attractive, thick, square based bull by the new sire Milwillah Marble Bar J53, a sire bred from a black outcross pedigree, with strong growth and carcass and profit index figures. N69's dam is from our strong Patricia family. His figures describe him as about breed average for calving, top 10% for 200day, 400day, 600day, scrotal, carcass weight, eye muscle, IMF and positive fat. An elite performance bull with indexes near the top of the breed.

At cataloguing, this bull was one of the heaviest bulls in the sale. He is attractive, thick and meaty with a little more frame. His dam is by our great Split Ear bull, E566, and has been a great cow for us. N131 has better than average calving ease with top 10% growth, 200day, 400day, 600day, carcass weight, muscle and all indexes. His sire Henry K82 has been extensively used in our herd. A real sound, red meat bull.

N181 is a thick bull with plenty of depth and capacity. He is sired by one of our favourite bulls of all time Henry H61. We have had limited use of him due to injury, but he is a bull we could have used over the entire herd. He is sound, attractive and has some of the best figures in the breed. N181 has very complete, balanced figures and indexes all above top 5%.

HICKS RED DESIRE L148
 HICKS RED DESIRE F617

This bull was used by us in the herd, and six weeks out with the cows, plus getting beaten up by your mates when you get back checks these bulls from their contemporaries. Not that he shows it too much. We used him because he is one of the top bulls of his group for joining on heifers. His calving ease figure of +3.9 puts him up the top of the breed. Plus he is backed by high selection index values. We also like to have more thick, attractive sons and daughters running around the herd.

A Marble Bar son who is thick and meaty and backed by a beautiful set of data. Most of these bulls have excellent data. We select and mate to optimise the traits. N3 is out of one of our good growth heifers. This bull really has most things balanced in his figures. He has positive calving ease, top 10% growth for 200day, 400day, and 600day, dropping back for mature cow weight and about breed average for milk, then his carcass data is great. His indexes are near the top of the breed. A bull that does most things very well

 HICKS RED PATRICIA E559

This is an attractive Marble Bar son that ranks near the top for calving ease and low birth weight. He should be ideal for heifers and leave high IMF in his progeny.

 HICKS RED F525

Here is a moderate, thick Red Label son with plenty of calving ease and excellent carcass. Another bull that should be very suited to heifers and still with very good Supermarket and Vealer Indexes. It is worth noting that the related sire, Hicks Red Label E567, ranks extremely well under the International Multi Breed figures for profitability.
