Comment: BW **41kg**; A real stand out sire, maybe the best Carbine son to date. Soft, dark, big hiped and super correct. He has been a favourite of anyone who has seen this draft of bulls. His mother H126 is fast becoming one of the most popular herd females.

Comment: BW **35kg**; A really impressive young sire with a great data set. We used Kingkade N069 to join our first calvers last spring with a 100% conception rate. He was the highest IMF scanned bull and second highest EMA scanned in the Spring 2017 drop.

Comment: BW 39kg; An outcross pedigree for most, Prospector 145y has left us with some great females. This guy crosses with the Joybelle family who are amongst my personal favourites. His mother L116 will be moving into our donor pen this Spring with her next calf already another standout. This bull is a real modern sire with a heap of capacity and cosmetically spot on.

Comment: BW **35kg**; The first of the Kickstarts to be sold. We used Kickstart for his calving ease and extra dimension and style, then we backed him with one of our favourite Autumn females and got P012. We used this bull with heifers from June until mid July. He has a great amount of growth and length with still being high CE and lower BW. A heifers first calf.

Comment: BW **043kg**; A really interesting one. We sold Full Bottle to Harvie Ranching in Canada in our 2014 sale, and when the opportunity came up to get a flush from one of their leading cow families we jumped on it, and I think the result is just what we were hoping for. This guy is heavy set, correct, cosmetically perfect and has a real sire appeal, one not to miss.
