Our goal is to provide our clients with superior genetics to help them achieve a sound investment and bottom-line

*Achmea Schadeverzekeringen N.V. ABN 86 158 237 702 AFSL 433984 (Achmea) is the insurer of Stud Stock Insurance. Please refer to the policy wording for full terms and conditions.

Welcome

We invite you to attend our 16th Annual Spring on property auction and are pleased to offer you 120 performance recorded two year old bulls.

The sale offering is made up of sons of industry leading sires namely, Landfall Keystone, VAR Discovery, Bartel E7, EF Complement, Rennylea Edmund, VAR Foreman and Matauri Reality. A number of the bulls on offer are sired by Landfall sires, in particular Hank H68 and other high performance young Landfall sires used as yearling bulls.

At Landfall we are continually looking for ways in which we can add value to breeders who choose Landfall genetics. Over the last six years we have sought an insurance provider to collaborate with us to create a package to cover each and every purchase from our auctions with a comprehensive insurance policy. We are now excited to announce that we have collaborated with Achmea to offer an automatic cover on all bulls sold at this coming Spring Sale. All bulls will be covered for 3 months from the date of sale by Achmea's 3 star product for mortality including accidental loss of use, sickness and disease and transit. We have arranged and paid for this insurance so is no cost to you. If you consent to at the end of the 3 months period Achmea will make contact to offer a new insurance contract at their very competitive rates

In our quest to source the most appropriate genetics to continue to take the Landfall program forward and provide our clients with the best value genetics in Australia, we have recently undertaken an extensive trip to the USA. This is one of many trips we have been on in the last decade. Genetics sourced from the USA are not the silver bullet that everyone is looking for, however there are a number of progressive breeders who have an intricate understanding of carcass improvement through genetic selection. This is largely driven by the US carcass grids offering a more incremental value based payment for carcasses that meet particular target specifications.

It is important for us and our program to understand the breeding objectives of the herds that we look

to source genetics from. What is critically important when sourcing genetics from the US is to look beyond the bulls in the collection centres and visit herds to inspect parents, siblings and/or progeny of a potential sire for the Landfall breeding program. This helps us to maintain structural integrity in the Landfall genetic package. We are also wanting to develop relationships with the people behind the herds in an effort to build trust and a mutually beneficial arrangement. This year was a very valuable experience shared with a small group of cattlemen from Australia. We covered over 4000 miles in 12 days in amongst our visits inspecting cattle discovering some new genetics that we feel will add value and improvement to the Landfall program.

We maintain our ethos of breeding cattle in a commercially orientated production system to prove the performance, identify the outliers, multiply the higher performers and cull the under performers. Our commitment is to create a genetic package that is continually improving and offering value to our client's breeding programs. We believe the true measure of our success is what you as our client's can achieve by partnering with us to drive forward your genetic improvement.

Whether you are a long time or potential new client we thank you for your interest in the Landfall program. We are tremendously proud of the Landfall herd and are passionate about what we do. We extend an invitation to anyone who would like to visit us outside of sale day to get a behind the scenes look at what Landfall is about. In addition to this, if you would like us to become more involved in what you do with your breeding program, we would appreciate the opportunity to visit with you to better understand what you want to achieve in your operation.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.

The Archer Family.

About Landfall Angus

ABOUT LANDFALL

Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 1800 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is highly fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd in Australia.

HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females.

In 2004 a spring sale was introduced and is held annually on property offering bulls.

TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 4000 registered animals running over two main production centres in the Tamar Valley, calving 1800 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs. A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional

female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, with in excess of 500 bulls being sold annually.

OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.

Sale Notes

1. LOCATION

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 80 for map and travel information.

2. LUNCH

Please join us for lunch on sale day.

3. REBATES

4% rebate commission offered on all bulls and stud females to agents settling within 7 days of invoice.

All purchasers must nominate their agent 24hrs prior to the sale with Roberts Ltd.

Please email studstock@robertsltd.com.au or frank@landfall.com.au

4. FREIGHT

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

5. EBVS

Angus Group Breedplan Figures are used throughout the catalogue.

6. NUTRITION

All bulls have been grass fed with supplement silage.

7. ANIMAL HEALTH

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been ear notched and tested as BVD P.I. negative.
- All bulls have been vaccinated in March with Vibrovax, Pestigard and Ultravac 7 in 1.

8. RECESSIVE GENETIC CONDITIONS

All lots are clearly marked with their respective genetic status.

9. BULL GUARANTEE

All bulls covered by the Landfall Bull Guarantee (see details on page 76 of this catalogue).

10. SIRE BULLS

Lots 1-33 with the exception of Lots 15, 19, 23, 24 and 32 have been used for joining in the Landfall herd in the Spring of 2018. Please take this into account when assessing these bulls.

11. PHOTOS AND VIDEOS

Ben Hooper from Clear Vision Imaging will be capturing photos and videos of individual lots in August. They will be made available for viewing at www.landfall.com.au.

12. REGISTRATIONS

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

13. INSPECTION

All bulls will be available for inspection at Landfall on the morning of the sale from 10am. Inspection any other time is welcome by appointment.

PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

You will note we have not included lot images of our bulls selling this Spring. Images and videos of most lots will be available on our recently updated website site closer to sale date.

Thank you for your co-operation.

DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

DISCLAIMER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Special stud stock insurance rate for the Landfall Angus Spring Sale

Achmea, one of Australia's specialist farm insurers, is delighted to attend the Landfall Angus Spring Sale and provide 3 star cover for 3 months for all bulls sold in this catalogue. This cover has been paid for by Landfall Angus for your convenience.

If you wish to purchase cover at the end of the 3 month period please contact Achmea Risk Specialists Michelle Stevens 0437 249 682 or Peter Wilkinson 0408 746 254 or see them at the sale.

Achmea offers Stud Stock insurance, designed to protect the stud bull from the moment the hammer falls. With our Stud Stock insurance, you decide what you need, when you need it and how you need it.

Our flexible options include:

- **1 Star** Mortality only (including transit)
- **2 Star** Mortality including accidental loss of use
- **3 Star** Mortality including accidental loss of use, sickness and disease.

	12 months	6 months	3 months
★ Mortality only (including transit)	5%	3%	2%
★★ Mortality including accidental loss of use	10%	6%	3%
★★★ Mortality including accidental loss of use, sickness and disease.	8%	7%	4%

NOTES

Keystone is now in the top 1% of the breed for 5 traits or indices, the top 5% for 6 traits and the top 10% for a further 3 traits. Keystone is continuing to see heavy use at both seedstock and commercial level across the country being the highest selling sire for ABS in the spring of 2018. An Edmund son with added frame and length but maintains the ease of doing ability. A grandson of the great X9 cow and his dam H807 has joined the donor team at Landfall this year. Exceptional foot and leg structure with a really smooth shoulder. Progeny are displaying above average frame and length with docility a strong point. Twenty sons sold in our Autumn Sale to strong demand. A total of 19 sons on offer in this sale.

NOTES

Selected for use in the Landfall herd for his curve bending growth and carcass performance. Progeny possess high growth and great body length with a moderate maturity pattern. Sire of Landfall New Ground, the top selling bull from our Autumn Sale at \$75,000. Discovery progeny continue to perform well in the Landfall program with above average growth.

NOTES

Another good line of E7 sons in this sale offering. A heavy use sire in the breed, E7 has been used at Landfall in more recent years, he excels in a number of performance traits. A genetic package that is well suited to grass fed beef productions systems with good fertility, calving ease, growth, moderate maturity pattern and carcass quality. His first drop of daughters in the Landfall herd are near to dropping their second calves and continue to display the attributes of fertile and functional females with above average performance.

Traits Observed: Genomics(CE,S-Step)

NOTES

EF Complement possesses a very well-balanced data set. His progeny are medium frame cattle with good eye appeal and well covered with good muscle and width behind. Progeny performance to date suggest that Complement offspring are a good fit for grass fed beef production systems. His sons attracted strong interest in our 2018 and 2019 sales. Inspected again recently in the US as a now 11 and a half year old bull, we were once again pleased with his phenotype.

NOTES

Edmund still breeds progeny that can rise to the top. There is a line of really nice sons in this sale that were used in the Landfall program in the Spring of 2018. A high carcase merit bull that breeds progeny with a functional and attractive phenotype. Edmund daughters are now onto their fourth calf in the Landfall herd and are some of our best middle age cows.

Traits Observed: Genomics(CE,S-Step)

NOTES

The third Ten X son used in the Landfall program, Foreman possesses a well-balanced EBV profile, with positive calving ease, short gestation and curve bending growth. A large muscle bull with well above average IMF suggests a genetic package that will add value at the processing end of the value chain.

NOTES

A super calving ease sire with short gestation and light birth weight. His progeny possess extremely docile temperament and impeccable structural soundness. Another sire with a genetic package well suited to grass fed systems. An outcross sire for a number of breeding programs, his daughters possess maternal strength with good fertility and mothering ability. Sired both top priced bulls from our 2018 sales.

NOTES

An impressive individual when inspected in the USA at Baldridge Angus. A healthy birth to growth ratio in a moderate maturity pattern. His progeny are moderate in stature with thickness and depth of body. We inspected his dam recently in the US and she is one of the highest volume cows ever seen in the Angus breed.

NOTES

Used in seven registered herds with over 300 progeny. Hank has been well proven as a moderate birth weight sire with good growth and earlier maturity pattern. His progeny are very sound phenotypically and possess a strong Angus type. Hank was retained in the Landfall herd for his calving ease, low birth weight, improved early growth and early maturity pattern. Out of a high capacity, moderate framed Infinity daughter still active in the Landfall herd.

Caring for Your Bulls

- more calves, more years

Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.

1. ARRIVAL ON FARM

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

2. PRE-JOINING

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

3. JOINING

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.

- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

4. POST JOINING

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

Understanding Angus Breedplan EBVs

WHAT IS ANGUS BREEDPLAN?

Angus BREEDPLAN is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. Angus BREEDPLAN uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

Angus BREEDPLAN includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

Angus BREEDPLAN analyses are conducted by the Agricultural Business Research Institute (ABRI), using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England. Ongoing BREEDPLAN research and development is supported by Meat and Livestock Australia.

WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to:

- the breed average EBV
- the percentile table

The current breed average EBV and percentile table is provided in these explanatory notes.

CONSIDERING ACCURACY

An accuracy value is published in association with each EBV, which is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

DESCRIPTION OF ANGUS BREEDPLAN EBVS

EBVs are calculated for a range of traits within Angus BREEDPLAN, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this sale catalogue is provided on the following page.

BIRTH

Calving Ease Direct	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

GROWTH

200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

FERTILITY

Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

CARCASE

Carcase Weight	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
Eye Muscle Area	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.

FEED EFFICIENCY

Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
---------------------------	--------	--	---

TEMPERAMENT

Docity	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
--------	---	---	--

STRUCTURE

Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.

SELECTION INDEXES

Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

Bull Guarantee

At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian

chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

FIRST YEAR (12 MONTH PERIOD FROM DATE OF PURCHASE)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

SECOND YEAR (12 TO 24 MONTH PERIOD AFTER PURCHASE DATE)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

LANDFALL WILL NOT BE HELD LIABLE AND DOES NOT OFFER COMPENSATION FOR LOSS OF INCOME IN THE EVENT OF INFERTILITY RESULTING IN NON PREGNANT FEMALES.

LANDFALL
— ANGUS —

THE OBLIGATION OF THE PURCHASER

The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

IF THERE WAS EVER A LUNCH....

A LITTLE BACKGROUND TO LANDFALL FARM FRESH....

Landfall Farm Fresh is our specialist butcher and fresh food business in Launceston, providing our very own Landfall Angus Beef and Prime Lamb direct to our loyal and wide-ranging customers.

Our fully integrated, true paddock to plate supply chain, delivers a transparent and trusted red meat choice. Customers appreciate knowing the provenance, story and integrity of our free range and grass-fed beef and lamb. We credit this largely to the success of our primary production business and the work and dedication of previous generations. Our grandfather, Robbie Archer, always held the vision of having a butcher shop in the family business.

We strive to build positive relationships with our customers and create positive eating experiences. We are passionate and proud to provide locally grown, consistent, premium quality produce, and exceptional customer service.

We welcome you to visit us in store Wednesday to Saturday at 49 Balfour Street Launceston, and to follow us on Facebook and Instagram.

Three week dry-aged Landfall Angus steaks

...that you didn't want to miss it would be the on-property Landfall bull sale lunch. For the past 40+ years the ladies (and gents) at Landfall have put on a spread that brings people together. From the moment you step foot into the grain shed you feel right at home. The old church pews, the basket of fresh apples in autumn and the posies of flowers in spring seem to bring a smile to almost everyone's face.

Over the years the lunch has stayed much the same - healthy, hearty, warm and home-made. Those who have been loyal Landfall comers will have noticed some slight changes, such as the fairly recent addition of the coffee van, but all-in-all the hospitality and quality of the lunch has stayed the same.

In 2009 the Archer family started their butchering venture, Landfall Farm Fresh. The beauty of the link between the butcher shop and Landfall Angus has resulted in the offering of Landfall roast meats on sale day. Whether it's a rolled lamb leg or a full porterhouse roast, everyone seems to love the roast rolls. Lou's eye for a thinly sliced coleslaw has been passed down to the next generation (or some might say forced down) and this coupled with a good smearing of mustard in a soft white roll seems to be a real crowd pleaser. The array of sweets is always endless and many ladies with all sorts of connections to the Archer family can be thanked for these. In more recent years the Landfall sausage rolls have become a hit along with a cold beer following the auction. The late

REVERSE SEARING YOUR LANDFALL STEAK

This is the reverse of what we've always done but my word it's worth doing some things backwards! This method works by slowly and gently cooking your steak evenly and right the way through before hitting the heat and creating a perfect crust.

Medium-rare: 55°C

Medium: 60°C

Below is the method for cooking a medium-rare or medium steak. You'll need a decent thermometer and a steak at least 1.5 inches thick, we recommend a piece of Landfall porterhouse or one of Gerald's favourites - a rib-eye on the bone.

1. Pre-heat your oven to 135°C.
2. Rub your steak with a little olive oil.
3. Put your steak on a rack over a baking pan and place in the oven.
4. Cook the steak until it reaches an internal temperature of 52°C for medium-rare or just under your desired doneness - remembering your steak will continue to cook whilst resting and searing.
5. Remove and cover loosely with foil - allow to rest for 10 minutes.
6. Heat a pan or grilled skillet to very high heat on your stove top and rub your steak with salt and pepper to taste.
7. Sear your steak for 60-90 seconds on each side.

The beauty of this method is that the steak has already rested and been cooked so gently that it doesn't need to be rested again - simply serve and enjoy!

Watch: www.youtube.com/watch?v=Smgk1Xw7fWQ

nights and shed after-parties have died a slow death with the introduction of strict drink-driving laws however most visitors and staff still enjoy a beverage or two as a celebration following the bidding.

The ladies behind the long lunch bar tell us that the days leading up to the sale are spent in the kitchen baking cakes with the kids. Zara and Kate are now the primary organisers of the lunch and have taken on the role with great success. For the butcher shop team and in particular Ellie, it's about ensuring enough primal roasts are put aside for the day. The preference is to supply both porterhouse and rump given the generous size of the cuts and their ease of roasting. Let's face it, nothing beats a few slices of medium rare porterhouse with just enough fat to really soak up the salt.

The Archer family take great pride in offering quality produce and this really goes to show on sale day. The support they receive from extended family and friends doesn't go unnoticed. Whether it's a cake made by 97-year-old Nanny (Heather Archer) or the generosity of the hours volunteered by the ladies' friends, everyone plays their important part.

“A transparent and trusted red meat choice...”

The younger generation has been lucky to have strength in numbers with multiple families involved. Everyone contributes in their own special way to make sale day what it is today.

'loyal Landfall Angus supporters - the King Island Graham brothers - enjoying a lunch many years ago'

Responsibility builds a passion

As the eldest of 5 children to Lou and Gerald, Ed who was born in 1977 was born into farming and its lifestyle right from the beginning.

Growing up at Landfall and having the extended employee family at Landfall looking out for you as a youngster meant you spent many hours 'helping' and learning from some of the most dedicated and passionate people you could imagine.

Ed's school years began at a small community run school at Mt Arthur not far from the farm, before venturing into Launceston to attend Launceston Church Grammar School. Regardless of his age, Ed recalls counting down the time to get home to the farm and to be able to get outside helping with whatever job was happening at the time. Ed like most farm kids, was never overly keen on school, with it often getting in the way of something exciting happening at home and he rarely had time for homework! Ed openly admits his favourite subjects were the practical ones, spending many hours in the Technology Centre.

Growing up Ed enjoyed working with machinery more so than livestock. After completing Year 12 in Launceston, Ed spent time involved in the family business doing machinery work on the properties and contracting. Ed also became involved in seasonal work such as harvesting until 1998 when he attended Marcus Oldham College in Geelong and completed an Advanced Diploma in Agri-Business Administration.

After attending Marcus Oldham, Ed spent time working on a rice operation around Hay in NSW and in construction in Melbourne. Ed then returned to Tasmania to continue with the contracting he had started prior to Ag college. This continued until 2003 when the opportunity to take on the management of the 'Greenhythe' property 20mins north of Landfall came up. With some deliberation knowing livestock hadn't been his first interest, Ed & partner Kate moved to the property in mid 2003 and have remained at the property since.

It was soon learnt that the decision to take on this opportunity was the right one, as Ed had great satisfaction watching the property improve through the work he and his team put in.

Ed also found a new appreciation of the genetic asset that the generation before him had managed to build. Ed also enjoys the relationships developed over time as a result of connections with selling cattle.

“Ed quickly grew an increased appreciation for breeding productive cattle and sheep, being responsible for their management and productivity.”

The early years for Ed at Greenhythe saw many kilometers of new and replacement fencing, pasture and infrastructure

improvement with a focus on grazing management and increasing stocking rate.

Changes also saw a move away from a merino flock into a composite ewe flock and an ever increasing cow herd to fit in with the development of irrigation at Landfall and the growing demand for bulls.

It's Ed's nature to see everything in its place and in a tidy well presented state.

In more recent years Ed and family have been fortunate enough to add neighbouring land to Greenhythe with the purchase of several titles that made up the Bayview property and Ed now has the challenge that he enjoys of improving them and their productivity.

Ed and Kate have two children, Isabel 10 years and Robbie 8 years. Robbie has a keen interest in sheep and particularly likes when lambing time arrives. Isabel enjoys helping out and is happy to be chief driver of the 'Gator' or calving records keeper whenever the chance arises. Isabel can also be seen at our sales intent on recording auction results.

Ed's main off farm interests are fishing and recreational flying, hoping to soon complete the drawn-out training he has undertaken to gain his Recreational Pilots License.

Ed also still enjoys using the skills he learnt during his schooling years in the Technology Centre, with the odd creation coming out of the workshop.
