# Welcome

Welcome to the 8th annual Rosskin Angus bull sale, we have 32 bulls on offer including 10 yearling bulls. Rosskin stud is proud to present a quality line of Angus bulls.

We endeavour to supply our clients with high quality genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcase performance.

Two year old bulls comprise of some leading edge sires that represent good inspection. Pathfinder Genesis G357 bulls have really stood out as a benchmark progeny after a long process to find the right Berkley / Emperor son that has the structural integrity with growth. Among the Earnan, Regents and Edmund sons we have a great line up of heifer bulls, power bulls and all-rounder bulls with many of our home bred bulls leading the pack.

Our young bulls in particular are some of the best we have offered. With many producers increasing cattle numbers on the Monaro, these outcross yearlings will give producers extra joining seasons and make our clients more profitable through the bulls progeny having good weight gains and eating quality.

Lastly we would like to take the opportunity to thank everyone who helps on sale day. Rosskin bulls can be viewed online at our website [www.rosskin.com.au](http://www.rosskin.com.au), prior to our annual open day held 14 August 2019 or sale day. In addition we will again interface with Auctions Plus.

If we can be of any assistance we are only too happy to help. So please speak either to us or Monaro Livestock and Property. We look forward to seeing you on sale day the **2nd of September 2019**.

***Martin, Liz and Adam Walters***

---

## LOCATION:

*Rosskin Stud is situated at "Boundary Creek" 2432 Jimenbuen Road approximately 25kms from Dalgety and has 8kms of dirt.*

**LOT 14 – NROP58 – KANSAS ABERDEEN F84 son**

**LOT 15 – NROP70 – CONNEALY EARNAN son**

**LOT 19 – NROP40 – SYDGEN BLACK PEARL 2006 son**

**LOT 20 – NROP73 – MILLAH MURRAH LOCH UP son**

**LOT 12 – NRON45 – PATHFINDER GENESIS G357 son**

**LOT 31 – NRON59 – TUWHARETOA REGENT D145 son**

# SALE INFORMATION

## INSPECTION:

Prior inspections welcome by appointment or from 10.00am on sale day and sale starts 1pm.

## HEALTH:

- ✓ 7 in 1 Vaccinations
- ✓ Vibrio Vaccinations
- ✓ Pestivirus Vaccinations
- ✓ Drenched

## GUARANTEE:

### BULLS:

Rosskin guarantee all bulls for structural soundness and fertility. If during the next 6 months any bull proves infertile or breaks down due to reasons other than injury, negligence or disease contracted since sale day we may: replace the bull with a satisfactory substitute if available, or issue you with a credit equal to the purchase price minus salvage value that may be used to purchase any animal in future Rosskin sales.

Any claims are to be accompanied by an appropriate veterinarian certificate. All vet costs are the responsibility of the purchaser.

## INSURANCE:

Facilities for insurance will be available at the sale.

## AUCTIONSPLUS:

This sale is interfaced with Auctionsplus and will be streamed live on their website. All potential buyers must register prior to the sale and we recommend that you make these arrangements at least one week prior to sale day. Should you have any queries or problems on sale day regarding the Auctionsplus process, please call (02) 9262 4222. Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to complete registration and receive your password.

## SALE CONDITIONS:

All lots will be sold subject to the usual terms and conditions governing auction sales.

Responsibility passes to the purchaser at the fall of the hammer. All lots are sold exclusive of GST.

## REBATE:

2% rebate is offered to outside agents introducing their clients in writing prior to the sale and in attendance on day of sale also settling on their behalf within 7 days of sale.

## CATERING:

Lunch will be provided by Numbla Vale Bushfire Brigade.

## SUPPLEMENTARY SHEET:

The bulls will have sale weights and other updated information available on sale day.

## PHONE COVERAGE:

There is NO mobile phone service.

## TRANSPORT:

Should you require delivery a local stock carrier will be in attendance.

Cattle waiting delivery are at the purchaser's own risk. *FREE DELIVERY up to 500km*

## INJURY TO PERSON or PROPERTY:

All persons who attend the sale do so at their own risk and the vendor therefore assumes no liability, legal or otherwise. All persons entering pen's do so at their own risk and please No children allowed in pens at the Rosskin sale complex.

## DISCLAIMER:

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendor, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this catalogue.

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

***PLEASE BRING THIS CATALOGUE ON SALE DAY***

## BULLS STRUCTURALLY ASSESSED ON 12<sup>th</sup> JUNE 2019 BY LIAM CARDILE - BEEFXCEL

### How to use The Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system;

- A score of 5 is ideal. - Note: Temperament Score of 1 is preferable
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal.
- A score of 2 or 8 are low scoring animals and should be looked closely before purchasing.
- A score of 1 or 9 should not be catalogued and are considered culls.

# UNDERSTANDING ANGUS BREEDPLAN

## What is Angus BREEDPLAN

Angus BREEDPLAN is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. Angus BREEDPLAN uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

Angus BREEDPLAN includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

Angus BREEDPLAN analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the Angus BREEDPLAN genetic evaluation, and are reported in the units in which the measurements are taken.

## Using EBVs to Compare the Genetics of Two Animals

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## Description of Angus BREEDPLAN EBVs

EBVs are calculated for a range of traits within Angus BREEDPLAN, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following pages.

# UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

BIRTH			
<b>Calving Ease Direct</b>	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
<b>Calving Ease Daughters</b>	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
<b>Gestation Length</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
<b>Birth Weight</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
GROWTH			
<b>200 Day Growth</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
<b>400 Day Weight</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
<b>600 Day Weight</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
<b>Mature Cow Weight</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
FERTILITY			
<b>Days to Calving</b>	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
<b>Scrotal Size</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
CARCASE			
<b>Carcase Weight</b>	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
<b>Eye Muscle Area</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
<b>Rump Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
<b>Retail Beef Yield</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
<b>Intramuscular Fat</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

As a ProWater Nationwide partner we can provide a complete water solution, from products and advice through to design and planning, installation, service and maintenance.

# CARING FOR YOUR NEW BULL

Respect your bulls, handle them quietly and with kindness, walk them rather than rushing them. Treat them with care and in a gentle manner and they will reciprocate, he is your investment for future years.

A bull leaving the property is leaving the security of a mob and will arrive at unfamiliar territory. If you cannot put him into a mob straight away, unload him and make sure he has steers or cows as a companion.

Treat the bulls kindly as your behaviour (impatience, nervousness etc.) is easily transmitted to the bull that is unfamiliar to you and their new environment.

A young bull can move in with older bulls and settle in well, but remember being the youngest he will get the last of the feed because of the pecking order. The paddock needs to be reasonably large so he can stay away from the others and find adequate feed.

Young bulls are still growing fast and need enough feed to maintain their growth pattern and to be able to settle in with the cows quickly and efficiently. The bulls are in good joining condition at point of sale, but is imperative to ensure good nutrition for the bull during joining. Keep a regular watch over the bull when he is out with cows. Our sale bulls will handle approximately 35 to 50 cows on their own and are accustomed to electric fences and motorbikes. Accidents can happen and every day he is not working will cost you money. Observing is vital!

After mating, look after your bulls by drenching and place them on good feed to get back into 1st grade health without being allowed to get overfat or too poor condition. Good feed will help stop fighting and help bulls settle in their groups.
