29 Special Flock Rams

View individual videos: www.valma.com.au

These are the rams that just missed out on making our show team. They have excellent Lambplan figures, and structural soundness.

The rams are currently at home in Tasmania, but upon purchase, delivery will be organised free of charge to Vic, into SA, southern NSW.

Our aim is to produce a consistent product to all our stud and commercial producers. We aim to try new relevant sires so will always be offering our clients the most options available. By running 550 stud ewes this gives us the opportunity to test our own sires against the best in Aust via AI. We are very pleased that the flock rams we are offering are by a number of our own sires.

Eating Quality Index (EQ): is targeted at producers interested in improving the meat eating quality of their prime lambs. It is based on the same production targets as Carcase+ with the added emphasis on eating quality traits, including shear force (SF5) and intramuscular fat (IMF).

The **figures in Red** show traits that are in the top 10% of all terminals born in 2019
