# WELCOME TO OUR 2020 JOANNA PLAINS SALE

THIS YEAR'S 3RD ANNUAL JOANNA PLAINS SALE IS ONCE AGAIN HELD ON-FARM AT JOANNA PLAINS, CATABY AT THE MARIANAS BACKGROUNDING COMPLEX, WITH THE ENTRANCE OFF MIMEGARRA ROAD (SEE MAP ON PAGE 27) AT 11AM WEDNESDAY 29TH JANUARY 2019.

Brian Leslie and Scott Lord in action at Joanna Plains Sale.

**Nutrien Ag Solutions, which incorporates Primaries, Landmark and DLS are the selling agents. The sale is interfaced with Auctions Plus so anyone can view the bulls beforehand by appointment and bid on-line. Please note 94% of this year's Sale bulls are rock-solid calving ease bulls suitable for heifers!**

These Sale bulls are totally unique in the Angus breed and unmatched in their genetic potential for multi-trait excellence. No other Angus bulls in Australia come close to the unique balance of calving ease, high growth, maternal efficiency and elite carcass that these boys have in their DNA. They are incredibly consistent from start to finish, with large sire groups from the breeds best balanced performance sires. It's not only their EBVs, these bulls are the right type and maturity pattern to produce fertile, highly productive cows and steers that will rise to the top of any grid off grass or in the feedlot. They are structurally sound, excellent disposition and have been semen tested to ensure you can put them to work with confidence they will do the job.

These Joanna Plains bulls are the best value genetics in WA, we are offering 50 elite bulls, including some ET bred bulls from our elite donors. Bulls were either bred at Joanna Plains or Hopetoun WA. The Sale bulls had a tough year so please consider and compare the genetic merit of these bulls and don't compare actual weights on these bulls compared to other heavier two year old Angus bulls. You can see by the Breedplan comparison of bulls the Hopetoun and Joanna Plains Sales are equal in generic merit and mix of sires, we split these bulls on contemporary groups only.

**“MOST SEEDSTOCK PRODUCERS SELL PARIS HILTON BULLS. THEY ARE GOOD TO LOOK AT – BUT GOOD FOR NOTHING.”**

David Hawrysh, courtesy of Pharo Cattle Company

### IMPORTANT CHANGES TO BREEDPLAN IN DECEMBER 2019 HAVE CONSIDERABLE IMPACT ON CALVING EASE PREDICTIONS

The modifications that have been implemented in Breedplan December 2019 analysis has resulted in considerable changes to the Calving Ease EBVs, and subsequently to the selection index values, for a large number of animals.

Of particular note is the considerable increase that has been observed in the standard deviation, or spread of Calving Ease EBVs. This is illustrated by an increase in the 1% percentile band for the Calving Ease Direct EBV increasing from +5.0 to +12.2. Similarly, the 99% percentile band for the Calving Ease Direct EBV has decreased from -7.6 to -13.9.

The increase that has been observed in the spread of EBVs has meant that while the Calving Ease EBVs for individual animals has changed considerably, their ranking by comparison to other Angus animals is very similar.

Importantly, the new Calving Ease EBVs provide a better estimate of each animal's breeding value. (Source Angus Australia, December 2019)

#### Comment from Lawsons Angus

Calving Ease EBVs are incredibly accurate so if you are mating heifers please take particular notice of the DIR EBV and in our catalogue only use bulls with a red calving ease tick (✓), which is based around bulls being above breed average for DIR and below breed average for birth weight EBV. We know this criteria works because it has been proven over matings with 120,000 commercial Angus heifers.

The new values also show with more accuracy the genetic superiority of Lawsons Angus bulls for Calving Ease Direct (DIR), which explains why Lawsons Angus clients can sleep well during calving time. This also makes it easier for commercial herds to retain more heifers and accelerate genetic progress across the herd. This year 75/84 (89%) of Hopetoun Sale bulls are suitable for mating heifers but still have lots of growth so are equally suitable for mating mature cows. The Sale bulls average in the top 13% of the breed for Calving ease Direct!

With 50 years of performance recording behind these bulls and many with over 10 generations of AI sires since the early 1970's we can guarantee once you see the difference in progeny of these calves you will wish you had switched earlier!

#### HIGHLIGHTS OF 2019 JOANNA PLAINS SALE BULLS:

- Bulls average in the Top 5 % of the breed for Domestic (DOM) and Heavy Grain (GRN) Indexes
- Top 20% of breed for 400D Growth, around breed average Mature Cow Weight (MCW)
- Rock-solid calving ease bulls with 50/53 (94%) of bulls are rock-solid calving ease bulls (✓) suitable for heifers and average in top 13% of the breed for Calving Ease Direct
- Elite proven carcass genetics - bulls average in top 5% for marbling (IMF) and top 20% for Eye Muscle Area (EMA)

We are extremely proud of our line-up of our WA Sale bulls this year for a number of reasons, firstly from a genetic perspective these bulls are truly unique in their combination of calving ease, high growth, moderate maturity patterns with the ability to hit the top end of any markets, particularly anything that involves MSA and eating quality these boys are in a league of their own.

This Judd 24-month old steer was over 400kg carcass, marble score 6 and only 17mm subcutaneous (waste) fat with only 150 days on feed (high roughage ration). Lawsons Angus genetics average in the top 5% of the breed for marbling but importantly they are also high yielding and extremely feed efficient.

Secondly, these bulls have pulled through with very little feed for most of the year and run in large contemporary groups where they had to battle hard for a feed and compete against their mates.

It's been one of the toughest years on record at Jerdacuttup again this year and Joanna Plains was also tough this year with a late break and short breeding season, but as we say these tough years not only test us out they also test the resilience and fertility of our nucleus cow herd. It has been also extremely rewarding to hear the well above average preg testing results of Lawsons Angus clients compared to district averages.

#### THE BOUNCE-BACK AND HIGH FERTILITY OF LAWSONS ANGUS GENETICS AND THE EASY CALVING ATTRIBUTES OF OUR BULLS ARE THE BACKBONE OF ANY BREEDING OPERATION.

The late rains in southern WA were a massive relief for our cows and everyone that worked so tirelessly during the drought for a second year in a row.

To achieve an 85% preg test result with 1001% AI (no follow-up bulls) and 45 day joining period, including over 300 two-year-old "N" drop first calving cows, was a fantastic reward for our team and a great testament to the fertility of our herd.

The way these two year old N-drop heifers stood up in 2020 is testament to the fertility of our herd and the ability of Lawsons Angus cows to rebreed quickly in tough years. Seedstock breeders are notorious for talking about the maximums instead of focusing on optimal levels in a multi-trait balanced approach.

#### WE LEARN SO MUCH ABOUT OUR CATTLE IN THESE YEARS AND IT REMINDS US WHAT ARE THE MOST IMPORTANT TRAITS IN BEEF CATTLE PRODUCTION – FEED COSTS AND FERTILITY – BOTH HIGHLY CORRELATED WITH COW SIZE.

Lawsons Angus cows and heifer calves at Blue River Grazing, Northcliffe. These cows have bounced back from a tough autumn and look an absolute picture. Look at the job they are doing on their calves. With many clients in WA weaning calves over 400kg, I am not sure why the industry thinks we need bigger cows?

We are not quite sure why cow size is still such a hotly debated and emotional topic among seedstock herds trying to justify large cows and most still not even submitting cow weights to Breedplan to improve the accuracy of Mature Cow weight (MCW). Where is the commercial accountability of the seedstock industry? Big cows are not only costly but high risk in terms of reproductive failure, which self-evident in years like 2018. Yet, many breeders still fail to see the link.

#### MODERATE, EFFICIENT COWS ARE LOWER COST, MORE FERTILE AND LOWER RISK IN GOOD AND BAD YEARS.

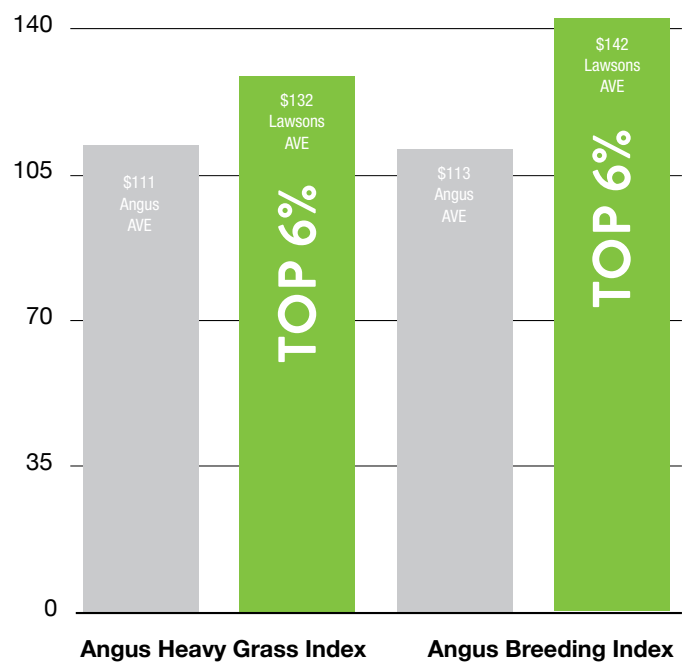

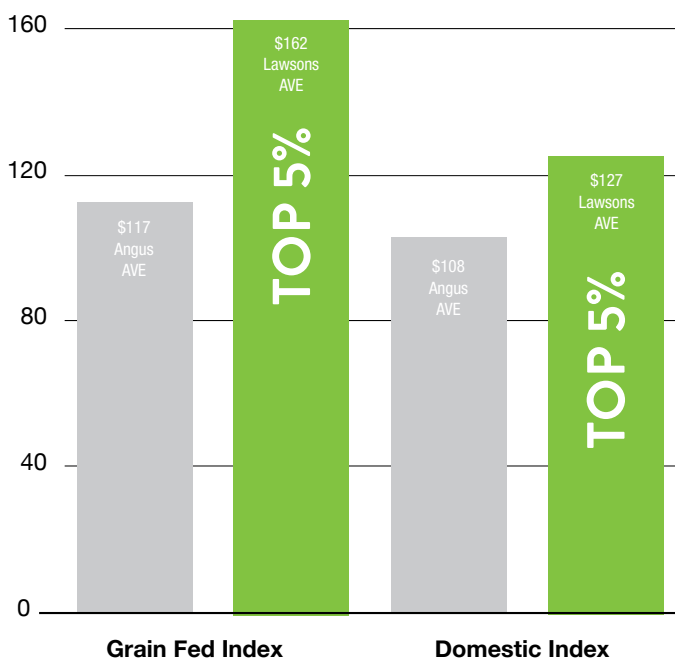

Once again, special thanks to Johnnie Dechiera and the Central Agri Group (CAG) team for their strong industry leadership and support for this Sale.

Hope to see you at Joanna Plains, Cataby on Wednesday 29th January 2020. Sale starts at 11am.

An exceptionally good looking ET Judd son, again out of an elite Bartel E7 daughter. Two of the best looking and best balanced performance bulls in the Angus breed. P443 ranks in the top 5% of the breed for Domestic Index (DOM) and marbling (IMF), Heavy Grain Index (GRN) and Calving Ease Direct (DIR), top 10% for EMA.

Different pedigree here with this Kodak ET son out of an elite GAR Prophet daughter. Lots of marbling here, which is the key underlying driver of MSA Index and meat quality. Top 5% of the breed for Domestic Index (DOM), Heavy Grain Index (GRN), marbling (IMF) and Calving Ease Direct (DIR).

Attractive, high growth LinkedIn son. Not surprising as LinkedIn and Novak are two of the finest looking beasts you will see and both rose to the top of their respective contemporary groups. Unlike most studs we only select very few elite sons of our own to progeny test each year and both LinkedIn and Novak were the champions of their respective years that went on to prove they could compete with the best performance bulls in the world across all key economic traits. P804 ranks in the top 10% of the breed for marbling (IMF).

These bulls have jumped through many hoops to get to the Sale. P801 is a deep bodied, thick set bull with exceptional disposition. We are tough on structure, tough on temperament and tough on selecting cattle that thrive under tough conditions that rebreed quickly even in the hard years. No other seedstock business in Australia runs the same disciplined systems as Lawsons Angus. P801 is a great example of a double curve-bender, with easy calving, high growth and moderate cow size in the same genetic package.

P879 is another attractive LinkedIn son, he ranks in the top 5% of the breed for marbling (IMF). Both Cataby and Hopetoun Sale bulls average in the top 5% of the breed for marbling, the key driver of MSA Index and meat quality. No other WA Sale comes close to the unique balance these bulls have in terms of performance, maternal efficiency and carcass traits.

P800 ranks in the top 5% of the breed for marbling (IMF). Both Cataby and Hopetoun Sale bulls average in the top 5% of the breed for marbling, the key driver of MSA Index and meat quality. No other WA Sale comes close to the unique balance these bulls have in terms of performance, maternal efficiency and carcass traits.

Ed Lawson and Greg Gardiner farm touring at Gardiner Angus Ranch, Kansas. Prophet in the background enjoying his retirement at 11 years, having sold 130,000 units of semen and produced 1100 calves at Lawsons Angus.
