These production figures are an indication of the relative performance of the individual animal in relation to the rest of his drop at the time of measurement.

Rebate: 2% to agents introducing buyers in writing prior to sale or accompany buyers to the sale and settling within 7 days.

Delivery: Immediate or by arrangement

Welcome

Our 37th annual Egelabra Ram Sale will be held at the Warren Racecourse, Canonbar Road, on Wednesday the 7th of October, 2020. We welcome all visitors, returning clients, interested merino breeders and new clients.

For the first time in 3 years the rams, since shearing in April, have made it to the natural pasture paddocks of Eenaweena to walk and grow out. 'Grass Fed Bred' has always been the motto at Egelabra producing rams on natural inputs which we believe breeds a more robust flock sire for our clients. This year we have received our annual rainfall by the end of August and our bright white heavy cutting fleeces have handled these conditions exceptionally.

This year we are offering 8 specially selected March shorn rams and 150 April shorn grass fed rams averaging 81.8kg.

The rams have been visually scrutinised and indexed both for merino production and merino dual purpose through Ram Power, allowing you to see our top performers within the group.

Rams will be penned on the day from 9.30am for inspection.

Covid-19 is an ever changing matter and we will adapt to whatever situation presents at sale time; be assured that the health of visitors is our priority.

This year we will be interfaced with Auctions Plus for those wishing to operate remotely (on-line or by phone). Catalogue and image of the rams will be available for viewing online 10 days prior to sale to enable you to follow the sale and bid online.

Egelabra's gates are open 24/7 and you are welcome to arrange a pre-sale inspection at any time prior to the sale by appointment.

Our open day will be held on the 25th of September at the Eenaweena Wool Shed, Canonbar Road, Warren. On display will be the 2020 Catalogued Sale Rams, 19 drop Stud Sires, Ewe Hoggets, and Stud Ewes and Lambs. Stuart Hodgson from AWI will be running a workshop from 9am and David Motley; Motleys Kelpies will conduct a working dog presentation.

Despite the 'new normal', it is business as usual at 'Egelabra'. Thank you to all our clients and we look forward to catching up on the 7th.

Special note:

It is with great sadness this year we lost our past sheep Classer Bill Bailey.

Bill classed millions of sheep for Egelabra and our client's from 1970 up until his retirement in 2000. Bill was unique, with his ability of understanding and identifying a certain type of sheep to suit different environments along with the breeding direction of every client. He was not only a sheep Classer, but also a mentor, counsellor and friend. Our thoughts are with Joan and family.

Cam Munro

JULY/AUGUST 2019 DROP – SIRE DESCRIPTION

All Sire Tests are taken at 18 months of age.

GFW (Greasy Fleece Weight) is 8 months of wool growth at 18 months of age.

SPECIAL NOTE TO BUYERS

In the interest of buyers, and to prevent the occurrence of mistakes, all instructions concerning the delivery and trucking of stock, must be given in writing and be signed by the buyer or his representative.

MEASUREMENTS & SELECTION

MEASUREMENTS

Fibre Diameter (Micron): Fibre diameter is presented as the actual micron on each individual ram. Test were taken from the mid-side on the 10th August 2020.

Standard Deviation (SD): A measure (in microns) either side of the mean fibre diameter in which 68% of fibres lie.

Co-efficient of Variation (CV): Measures the spread of fibre diameter variation relative to the average. It is calculated by dividing the standard deviation (SD) by the mean fibre diameter then multiplying by 100.

Comfort Factor (CF): The percentage of fibres less than 30 microns in a sample. i.e. 100% Comfort Factor = 0% of fibres greater than 30 microns

Greasy Fleece Weight (GFW%): This is the yearling fleece weight (8mth wool growth from birth) measured as a percentage.

Eye Muscle Depth (EMD): This is the depth of the eye muscle, measured at the C site (45mm from centre of the spine).

Fat Depth: This is the measurement of fat depth at the C Depth. A deeper measurement indicates a fatter carcass.

Weight: Body Weight recorded 2/9/20

SELECTION PROCEDURE

It is to be remembered that measurements provided are only one part of ram selection.

Rams must be visually acceptable for characteristics which the buyer is seeking. They must be suitable for the environment in which they are going to be used. Buyers must ensure that they are satisfied with the conformation, size, and wool type of the ram.

Having obtained the correct visual ram type the buyer can then use the measurement information as an aid in the selection of rams.

RAM POWER INDEXES

The Rampower indexes displayed rank the male progeny of the 2019 drop at Egelabra for the two indexes described below. These are within flock rankings based on measured trait performance including, Yearling and Hogget Body Weight, Fleece Weight, Fibre Diameter, FD CV and FD SD. Visual assessment and individual trait performance must be considered in conjunction with the index.

A value of 100 is the median or middle of the drop. A value of 120 is 20% better, while 80 is 20% below the median.

Ram Power Merino MP+ Index: This index is suited to a self-replacing Merino production system. Surplus progeny are sold as hoggets after shearing. Expected responses to MP selection are moderate increases in body weight and fleece weight and reduction of fibre diameter.

Ram Power Merino DP+ index: This index suites a meat focused or Dual Purpose operation. Surplus progeny are sold as lambs and a portion of ewes are joined to terminal sires. Expected responses to DP selection are large increases in body weight, while maintaining fibre diameter

DISCLAIMER

Fleece, EMD & Fat depth information has been measured independently of Egelabra Merino Stud and prior to the auction. Such information is provided as a guide only. Egelabra Merino Stud accepts no responsibility for the accuracy nor the repeatability of the information supplied in this catalogue.
