

PARINGA BIG RED P619

SELLS ON AUCTIONS PLUS
Friday 30th October 10am

[CLICK HERE TO VIEW VIDEO](#)

P619 is a magnificent Red Stabilizer bull that at 28 months weighs 1080kg off grass. The bull has successfully completed 2 Autumn joining's and 2 Spring joining seasons in both our stud and commercial programs. Because Big Red has been used widely across our Stabilizer herd, and he is in his prime, we want to share his success in siring great calves at a new home.

Visually P619 moves like a cat; he has good feet and a beautiful nature with extremely fine hair with lovely soft skin and slick coated even in winter.

We regard his dam J924 as one of the greatest achievements in breeding cattle over the last 30 years. His Pilbara Stabilizer sire L805 has been a consistent breeder and left us with some terrific females who have produced some outstanding sons in our recent Spring Yearling sale at Paringa.

Big Red's breed composition makes him the PERFECT true Stabilizer Bull, with the best of his 5 breeds making for maximum retained heterosis and hence sustained retained profitability.

Big Red ranks in the top 30% on \$Profit globally, however we predict his data to improve as more phenotypes and genotypes come into the system. Big Red is very strong in traits that are always highly desired with his beautiful nature, free movement, strong feet and ability to produce both ripper steers and replacement females.
