WELCOME

On behalf of all vendors we welcome you all to the 13th annual Blue Ribbon Invitation Limousin Sale.

The past years have been difficult for most enduring consistent drought and this year throwing us all a curve ball with Covid-19. Hopefully, you have found yourself a better season than last- at least we have something on our side with cattle prices at an all-time high.

We wish to thank our loyal vendors for entering cattle into this year's sale & welcome a few new vendors also. It was difficult to round up numbers for this year's sale, with cow numbers at an all time low & studs having to dramatically reduce numbers last year.

The vendors are proud to put forward a top quality line up for your inspection – 32 lots comprising of 2x Cows & Calves, 16x Heifers, 1x Bull & 13x Steers. We believe there is something in this sale for every operation and some of the best genetics you would find anywhere in the country. The Blue Ribbon sale is renowned for selling Blue Ribbon worthy cattle, & progeny of with champions popping up all around the country. All lots will be broken in, taking some of the hard work out of getting them ready for the show ring.

We are excited to announce the change of venue back to Pittsworth Showgrounds. Presale inspections welcome from 3pm Friday 13th. Please note the start time of 12:00 pm (Qld time). Sat 14th Nov. A parade of cattle will be held at approximately 10:00 am to give you the opportunity to view before the sale.

Once again buyers can attend with confidence in the knowledge that all cattle will be on the market after the first bid at the nominated start price, with no cattle being passed in. The nominated start prices (GST exclusive) will be as follows- \$2000 for heifers, \$ 2500 PTIC heifers, \$3000 for Cow & Calves. Led steers will be for sale upon reaching market value.

We would like to welcome Neil & Rachel from Goetsch & Sons back to run the sale & we thank you for your ongoing support. Due the uncertainty with Covid 19 and border closures etc- This year we are excited to announce the sale will also be affiliated with Auctions Plus giving all potential buyers the opportunity to secure their selected lots. (Please Note: If you have not used AuctionsPlus before, you will need to complete the buyer's induction which takes about 30 minutes). Please give yourself plenty of time to register to bid prior to the sale.

The Blue Ribbon Facebook page will keep you up to date on what's happening regarding the sale & heaps of photos. Please get on and check it out.

We would like to thank Hollis Rural Trading, Dorrroughby Stockfeeds, Ken Mills Machinery & Goetsch & Sons for your generous support- please go and check out these businesses and see what they can offer you.

We thank you for your support & look forward to your attendance at the sale. We wish everyone great success with their new purchases.

EXPLANATION OF EBVs

ANIMAL NAMES

Horn Status: (HP*) Homozygous Polled by DNA test (which has an accuracy of 92%), (HP) Homozygous Polled by progeny test, (2P) Homozygous Polled by Pedigree, (P) Polled, (S) Scurred.

Colour: (HB) DNA tested Homozygous Black, (2B) Homozygous Black by pedigree, (B) Black, (R) Red (not Apricot)

Protoporphyrin Status: (PN) Proto Normal, (PF) Proto free by pedigree, (PC) the animal is a carrier of the abnormal gene for Protoporphyrin, (PS) Proto Suspect (parent of diseased animal), (PU) the animal has not been tested for Protoporphyrin or have parents which have been tested normal or are free by pedigree.

Homozygous: Is the term where an animal has two copies of the particular gene (tested or pedigree) for a trait (colour, polled). An example is Homozygous Polled where all progeny will be polled from that particular animal or Homozygous Black where all progeny will be black.

F94L: (AA) 2 copies, (AC) 1 copy, (2A) 2 copies by pedigree, (CC) no copies.

BREEDING VALUES

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs.

Calving Ease Direct: indicates the ability of a sires' calves to be born unassisted from 2 year old heifers. Higher, more positive Calving Ease EBVs are more favourable.

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

Comparing EBVs

The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

Breed Average EBVs for 2018 Born Calves								
GL	CED	BWT	200	400	600	MILK	SS	DOC
-2.0	+0.5	+1.5	+20	+33	+45	+7	+1.0	+40

Accuracies: Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer: The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.
