* ALL EBV's IN THIS CATALOGUE ARE JANUARY 2020 GROUP BREEDPLAN.

"Either you run the day or the day runs you."

Dear Fellow Cattle Producers,

Welcome to our 38th Angus Bull Sale, being held on property at "Dunoon" on Monday 2nd March, 2020, starting at 1.00pm.

After a torrid few months of devastating fires right up and down the eastern states, it is beginning to rain in many places, and long may it continue!!

We have catalogued 102 bulls in this sale, who represent a range of fresh genetics, with several new sires having sons in this sale.

All of the bulls have been sire verified, tested for genomics, plus they've all had their two shots of Vibriomax, Pestiguard, Bovilis MH+IBR and 7 in 1, to ensure these bulls are as ready to go as we can make them.

It has been our practice over the last 11 years to use our own yearlings on our heifers and cows. Last spring, we used 21 of the bulls in this sale, they are catalogued from Lot 33 to Lot 53. These young bulls were selected on genetics, type, birth weight and carcase data. They work well for us, and whilst sometimes they are a big behind the other bulls in condition score, they have been highly sought after in our past sales!

This sale is to be interfaced on Auctions Plus, which may be helpful for anyone wishing to bid on the bulls but can't make it to "Dunoon" on sale day.

Please make yourself aware of the information in the front of the catalogue, it's a little different to most catalogues, and can make a big difference to the profitability of your herd!

As always, please contact Jock on 0429 369 299 if you have any questions about the bulls, or to inspect the bulls prior to the sale.

Kind regards,
The Harbisons

* Please note: (HFR) indicates bulls that Jock would use on heifers.

INSPECTION:
All lots catalogued for sale are available for inspection anytime prior to sale by appointment, and from 9.00a.m. on Sale Day – Monday, 2nd March.

TERMS:
We are offering the option of "Buyer Friendly" terms to all buyers.

The option terms are as follows:-

(A)   Normal Settlement Terms:
               OR
(B)   One half of purchase price to be paid on receipt of invoice, with balance payable on July 6th, 2020 interest free.

If you wish to take "Buyer Friendly" terms, you must nominate this clearly to the sale office at the completion of the sale. Late decisions will not be accepted.

HEALTH:
See 1/2 page on Health (page 6).
Scrotal Measurements were taken on the 19/09/2019.
JBAS – Dunoon is a JBAS 6 Herd.

"THE DUNOON 2 YEAR GUARANTEE"
All breeding cattle sold by Dunoon are fertile and structurally sound to the best of our knowledge. If an animal becomes infertile or breaksdown due to reasons other than injury or misadventure, at any time in the next 24 months, we will:–
1.   Provide you with a satisfactory replacement if available, or
2.   Issue you with a credit equal to the purchase price less the salvage value that may be used to purchase any animal in future Dunoon sales.

This is not a Life Insurance Policy. Normal care needs to be taken as we cannot replace an animal that is injured or dies for any reason.

We recommend you insure all animals purchased against injury and death. An insurance representative will be available on sale day.

Any claims are to be accompanied by a certificate from a registered veterinarian. All vet costs are the responsibility of the purchaser.

SEMEN COLLECTION
Each bull is being sold with 100% possession, marketing and ownership. Dunoon is reserving the right, (if desired in the future), to collect semen in any bull, for our own inherd use only. All costs associated with the collecting of semen would be met by Dunoon, and collection would be done at a time suitable to the purchaser. The purchaser would have total control of the bull, including any marketing of the physical bull or semen.

If you have any concerns about this, please contact Jock.

"I'm a greater believer in luck, and I find the harder I work the more I have of it."

A Quick Guide to Angus Selection Indexes

There are four selection indexes calculated for animals within the Angus BREEDPLAN analysis.

• Angus Breeding Index
• Domestic Index
• Heavy Grain Index
• Heavy Grass Index

The Angus Breeding Index is a general purpose selection index that is suitable for use in the majority of commercial beef operations, whereas the Domestic, Heavy Grain and Heavy Grass selection indexes are specific to beef operations targeting a defined production system and market endpoint.

Angus Breeding Index - estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls.

This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.

The Angus Breeding Index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

Domestic Index - estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.

Steers are assumed to be finished using either grass, grass supplemented by grain or grain (eg. 50 – 70 days) with steers slaughtered at 490 kg live weight (270 kg carcase weight with 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to
favour animals that are suited to MSA requirements.

Heavy Grain Index - estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

Steers are assumed to be slaughtered at 760 kg live weight (420 kg carcase weight with 30 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. There is a significant premium for steers that exhibit superior marbling.

Table 1 : Selection Index Descriptions

Angus Breeding Index	• Self replacing herd • Daughters are retained for breeding • Identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing production systems
Domestic Index	• Self replacing herd • Daughters are retained for breeding • Steer progeny finished on either pasture, pasture supplemented with grain, or grain targeting the domestic supermarket trade • Steer progeny slaughtered at a carcase weight of 270 kg at 16 months of age • Eating quality traits important to suit MSA program
Heavy Grain Index	• Self replacing herd • Daughters are retained for breeding • Steer progeny pasture grown with a 200 day feedlot finishing period • Steer progeny slaughtered at a carcase weight of 420 kg at 24 months of age • Targeting high quality, highly marbled markets with a significant premium for superior marbling
Heavy Grass Index	• Self replacing herd • Daughters are retained for breeding • Steer progeny finished on pasture • Steer progeny slaughtered at a carcase weight of 340 kg at 22 months of age • Eating quality traits important to suit MSA program

Heavy Grass Index - estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.

Steers are assumed to be slaughtered at 620 kg live weight (340 kg carcase weight with 12 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

"Opportunity is missed by most people because it is dressed in overalls and looks like work."

SALE DAY SAFETY

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are inherent risks associated with cattle handling.

Visitors Enter the cattle pens at their own risk. <u>Children must not enter the yards.</u>

People entering the yards are at risk of injury. Be especially alert for bulls fighting. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens.

Don't enter the pens unnecessarily.

CHILDREN UNDER 16 YEARS OF AGE <u>ARE NOT</u> PERMITTED IN PENS.

An Explanation of the Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure;
- A score of **5** is ideal;
- A score of **4 or 6** shows slight variation from ideal, <u>but this includes most sound animals</u>. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of **3 or 7** shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;
- A score of **2 or 8** are low scoring animals and should be looked at cautiously and inspected very closely before purchasing;
- A score of **1 or 9** should not be catalogued and are considered immediate culls.

TEMPERAMENT
The temperament or docility score separates animals from the same contemporary on their calmness in a confined area. Animals which are extremely quiet (touchable) score '1'. Animals that are aggressive or extremely agitated in the crush are scored as '5'.

SHEATH
The sheath score indicates the "tightness" of the sheath. '5' is tight, '1' is loose.

www.c2cbeef.com.au

FOR MORE INFORMATION PLEASE CONTACT:
JIM GREEN 0402 003 137 OR LIAM CARDILE 0409 572 570 or visit the C2C web page.

"You've got to get up every morning with determination if you're going to go to bed with satisfaction."

NOTICE TO ALL **<u>AGENTS</u>** & **<u>BUYERS</u>**

SALE REBATES

1. A rebate of 2% will be paid to all outside agents who attend this sale with or on behalf of their client(s) **and settle within 7 days**.

2. A discount of 2% will be given to all buyers who do not settle through an agent, and pay in full on sale day. Dunoon's 'Buyer Friendly Terms' cannot be used if discount is given.

3. If you are not using an agent, or not paying on sale day, an invoice will be sent to you, and you can pay after receiving this invoice.

***<u>PLEASE NOTE:</u>** ONLY **<u>ONE</u>** OF THE ABOVE **<u>THREE</u>** CLAUSES CAN BE USED ON ANY ONE LOT.*

INSURANCE   We recommend insuring your new bulls - we insure all new bulls we buy for the first 12 months - you are best to insure the bulls with your own insurance company or a company you are happy with.

NLIS   All NLIS transfers are the responsibility of the purchaser.

TRANSPORT   If you have your own transport, please tell the office staff at time of settlement, otherwise Jock will organise the transport of your bulls for you. They will be transported efficiently, safely and at a time that suits you - the buyer. All buyers will be contacted <u>before</u> the bulls are loaded at "Dunoon".

"Don't judge each day by the harvest you reap but by the seeds that you plant."

HEALTH

DRENCH: All bulls were drenched with **Dectomax Pour On** on the 20th Januay, 2020.

This year all of our bulls have had the following vaccinations:

2 x Ultravac 7 in 1:   Used for the routine immunisation of cattle for the prevention of pulpy kidney, tetanus, black disease, malignant oedema, blackleg and leptospirosis.

2 x Pestigard: Is a vaccine used for the prevention of BDV - otherwise known as bovine pesivirus in cattle.

2 x Vibrovax   A vaccine used for the prevention of infertility and abortion in cattle caused by vibriosis.

2 x Bovilis MH + IBR: Our initial trials have shown that the vaccine is aiding in the prevention of penile infections in bulls.

NOTICE TO BUYERS

Our bulls are run in large contemporary groups until two months before the sale, when they are split up into smaller mobs. Listed below is how the bulls have been running in the lead up to the sale.

LOTS 1 - 15 are mates

LOTS 16 - 32 are mates

LOTS 33 - 38 are mates

LOTS 39 - 47 are mates

LOTS 48 - 53 are mates

LOTS 54 - 70 are mates

LOTS 71 - 87 are mates

LOTS 88 - 102 are mates

This may help some buyers to try and reduce or eliminate bulls fighting when they arrive at their new home.

"Just one small positive thought in the morning can change your whole day."

Penile Infections in Bulls

[Balanoposthitis, Granular Posthitis]
_____

Penile infections are a common disorder in young bulls in their first joining season following introduction to a new breed.

A range of bacterial, viral and other organisms ("bugs") cause these infections with the most common being the genital form of infectious bovine rhinotracheitis [IBR] virus.

Any given property has its own population of "bugs" and if the new bulls have had no exposure previously to these "bugs" they will likely develop a penile infection early on in the joining.

These penile infections can be severe with the bulls developing a reddened inflamed penis, often with pustules or ulceration on the surface, and will stop the bull serving due to pain.

If bulls with active infection are detected (red and inflamed penis) they should be isolated from females and treated with antibiotics and anti inflammatory medication.

Oxytetracycline antibiotic therapy is the treatment of choice.

In some cases penile infections can cause extensive swelling in the prepuce and the condition can look like the bull has a broken penis or sheath injury. These bulls if treated promptly may regain normal function.

Penile infections are transient and bulls usually recover after 3-4 weeks. If undetected this type of disorder can cause a huge decrease in conception rate and possible permanent infertility in the bull in a small percentage of cases.

Affected bulls may continually mount cows without serving. A sound healthy bull should serve on every 1 or 2 mounts.

Pre exposure of the bulls by joining them to a small number of females well before the normal joining is one method of ensuring young bulls have maximum immunity to the "bugs" on a property.

Achieving satisfactory pregnancy rates is essential in running a profitable beef enterprise.

For this reason the joining period is one of the most critical periods of the year.

The bulls and cows need to be observed regularly in this period to identify any problems and address them as soon as possible.

It is also advisable to pregnancy test 6 to 8 weeks following joining to ensure satisfactory pregnancy rates have been reached.

"Whether you think you can, or you think you can't – you're right."

How Dunoon's Sale Bulls compare to the breed average

PLEASE NOTE:

The bulls catalogued from Lot 54 to Lot 70 are younger bulls - they are spring drop, 2018.

They give away a little bit of age to the other bulls, however, we regard these young bulls highly. They are well grown, and are ready for use!

1 Have any of the cattle in this consignment ever in their lives been treated with a
hormonal growth promotant (HGP)? (Use a second document for mixed consignments.)
Yes ☐   No ☑   (See Explanatory Notes)

2 Have the cattle in this consignment ever in their lives been fed feed containing animal fats?
Yes ☐   No ☑

3 Has the owner stated above owned these cattle since their birth?
Yes ☑   No ☐   If No, how long ago were the cattle obtained or purchased?
(If purchased at different times, tick the box corresponding to the time of the most recent purchase.)
A. Less than 2 months ☐   B. 2-6 months ☐   C. 6-12 months ☐   D. more than 12 months ☐

4 In the past 60 days, have any of these cattle been fed by-product stockfeeds?
Yes ☐   No ☑   If Yes, attach a list of the by-product stockfeeds, date when last fed
and a copy of an analyst's report if available.

5 In the past 6 months have any of these animals been on a property listed on the ERP
database or placed under any restrictions because of chemical residues?
Yes ☐   No ☑   If Yes, give details:

---

6 Are any of the cattle in this consignment still within a Withholding Period (WHP) or Export Slaughter
Interval (ESI) as set by APVMA or SAFEMEAT, following treatment with any veterinary drug or chemical?
Yes ☑   No ☐   If Yes, give details: (Record additional details in question 9)

CHEMICAL PRODUCT	TREATMENT DATE	WHP	ESI (IF SET)
DECTOMAX POUR ON	20/01/2020	42	42

7 In the past 60 days, have any of the cattle in this consignment consumed any material that
was still within a withholding period when harvested, collected or first grazed?
Yes ☐   No ☑   If Yes, give details:

CHEMICAL PRODUCT	DATE APPLIED	DATE FIRST FED/GRAZED	GRAZING WHP	DATE FIRST FED/GRAZED	DATE FEEDING/GRAZING CEASED
	/ /20	/ /20		/ /20	/ /20

8 In the past 42 days, were any of these cattle:
a) grazed in a spray risk area; or
b) fed fodders cut from a spray drift risk area?   (See Explanatory Notes for definition of spray drift risk area.)
Yes ☐   No ☑   If Yes Date sprayed: ___ / ___ /20
                              DAY   MONTH   YEAR

9 Additional Information: see requirements in Explanatory Notes for completing this document.

Declaration

I ___ JOCK HARBISON ___

"DUNOON"

To JINGELLIC

ALBURY

TAKING DELIVERY OF YOUR NEW BULL

To help your new bull or bulls settle into their new home as well as possible, the following points may be of some help.

•All Dunoon bulls are run in large mobs all their life, so they've always had plenty of mates around, and have "<u>never</u>" been alone.

•It's a good idea to have some of your own cattle in the yards when your new bull/s arrive, a handful of steers, or PTIC cows or even an old bull; just something to keep them company, whilst they survey their new surroundings.

•At Dunoon, we handle our cattle quietly and confidently, we always give our cattle respect, and our cattle respect us. We use gators and a ute, with <u>controlled</u> use of <u>obedient</u> dogs. The bulls have <u>not</u> been handled with horses.

•Handle your new bull/s quietly and with respect and he'll settle into his new home well, and will be easy to handle whenever the need arises.

"A clay pot sitting in the sun will always be a clay pot. It has to go through the white heat of the furnace to become porcelain."
