GEMINI GUARANTEE ALL FLOCK RAMS FOR ONE BREEDING SEASON TO BE FREE OF STRUCTURAL DEFECT OR GENETIC ISSUES.

The guarantee does not cover external or environmental factors. A replacement ram of similar quality shall be provided if issue is found.

INTRODUCTION PAGE 8

Gemini White Suffolk stud was established in 1993 by introducing White Suffolk rams to put over ewes from our previously registered Suffolk stud. We have always maintained a strong focus on commercial attributes relevant to industry demands and client profitability.

Selection for higher growth and carcase yield through increased muscling improves productivity, while selection for easy care shape and sound structure results in lower costs and more live lambs on the ground.

We use a combination of visual classing and high performance selection through Lambplan to produce some of the highest quality and performing prime lamb genetics available in today's meat sheep industry.

Semen: Stud ram purchasers please note that Gemini maintains semen rights in all stud rams sold. This is for our possible within flock use only. Any semen that has not already been collected will be collected at our expense and the purchaser's convenience. Please contact us if you need further clarification.

Registration: In relation to rams purchased for stud breeding and registration, to protect our genetic integrity we will only be transferring and registering rams at our discretion, subject to price and quality. Please consult prior to making any such purchasing decisions.

Ram lambs: it is our recommendation that on removing ram lambs from ewes you supplementary feed them for the following six to eight weeks for a quick recovery and to insure the longevity of your rams.

In 2011 we commenced DNA testing for Hypotrichosis (Hr), a simple recessive gene disorder which has been present in the sheep industry in very low numbers since the early 1900s. This is only of limited concern in a situation where stock from a known carrier animal are retained for breeding as the gene may then be passed on, but both parents must be carriers before you have any chance of expression, and then only 1 in 4. That said though, we are determined to eliminate it from our flock. With a recently discovered DNA marker, producers are now able to identify the status of rams. All sheep in this catalogue are DNA tested free, or both the sire and dam have been DNA tested free for Hypotrichosis.

SUPERWHITES PAGE 9

Gemini White Suffolk stud is a member of the Superwhites genetic improvement group of breeders who are focused on producing White Suffolk rams that contain the best genetics for prime lamb production.

The group has been in operation across Australia since 1995 and collectively the produces around 3,000 rams annually.

Superwhites uses LAMBPLAN as a tool to aid in comparison of sheep across flocks as well as identifying the best genetics in Australia for use within the group.

The group foster excellent data quality with most members achieving Gold status, the highest data quality standard within Lambplan.

By using link sires and progeny testing a young sire team each year, Superwhites flocks have strong across flock links, meaning that the LAMBPLAN evaluation within Superwhite flocks is more accurate.

Superwhites members are improving their genetics faster than the average of all terminal sire breeds for all commercially important traits.

WHITE SUFFOLK SIRES

G 170066 - A great son of G 160103, a tremendous carcass.

G 170051 – A top son of BD 122261.

W 173980 – Used in our AI program. A ram with exceptional performance figures backed up with great structure.

G 160103 – A F 140188 son. Our pick of the 2016 drop rams. Used as a ram lamb, a very correct ram with outstanding figures and meat eating traits.

G 160070 – A F 140188 son used as a ram lamb. A very correct ram with great balanced figures.

G 160044 – A F 140188 son used as a ram lamb. A low BWT and High PEMD ram with great meat eating traits.

G 160016 - A GP 120367 son used as a ram lamb with great meat eating traits.

EM 160277 - Super Whites Allocation.

BD 122261 - A low BWT with high PWWT and PEMD and outstanding meat eating traits.

G 150094 - A GP 120367 son with exceptional growth and meat eating traits.

G 150048 - A GP 120367 son with Low BWT good growth, muscle and meat eating traits.

FE 150721 - Super Whites Allocation Link sire.

G 140077– A G120006 son with moderate BWT good growth, Muscle and meat eating traits. Winner of the lamb production class Hamilton Sheepvention 2015.

F 140188 - Used in our Al program for low BWT and high muscle.

WA 140834 - Used as an out cross sire. A low BWT ram with good balanced figures.

G 130066 - A son of G120207 with good growth and muscle.

G 130168 – A G120006 son with good growth and LMY, +2 muscle.

G 120006 – 6 Has had a big influence on our stud a ram with good growth, muscle and positive fat. Winner of the lamb production class at Hamilton Sheepvention 2013

G 120150 - A G110287 son With exceptional growth.

G 120207 – A G110287 son sold to Wheetelande stud for \$10,000. 120207 sons are having a positive impacted on our breed. G 120207 Won the Lamb production class at Hamilton Sheepvention 2013.

G 120191 – A G110287 son used as a ram lamb with good growth.

G 120048 – Used as a ram lamb with well-balanced figures.

GP 120367 – Purchased as a young ram GP120367 is at the top of the tree for meat eating traits, He is having a big influence on our stud.

G 110055 - A AV08367 son used as a ram lamb with good balanced figures.

G 110287 - A G090298 son has breed very well for us. With good balanced figures.

G 100043 - A G060158 son sold to Bundara Downs and Illoura studs.

G 090298 – A G06158 son Winner of all breeds at Hamilton Sheepvention 2010 with exceptional ASBVs and meat eating traits for his time.

L 090111 - Purchased as a young sire as an out cross with great structure and breed type.

BD 097626 – Used in our Al program as an out cross sire. A ram with exceptional ASBVs for his time.

AV 080367 – Used in our Al program as an out cross sire Reserve Junior Champion Adelaide Royal 2009 G 060158 – Winner of Lamb production class Hamilton Sheepvention 2007 a very correct ram with

G 060158 – Winner of Lamb production class Hamilton Sheepvention 2007 a very correct ram with exceptional ASBVs for his time.

LE 150003 – Purchased for low BWT high growth positive fat with great muscle a very clean ram that stands up well.

LE 150828 – Purchased for low BWT, positive fat with tremendous muscle 828 is breeding very well.

LE 160613 – Used in our AI program an out cross sire with exigent balanced figures. One son retained. LE 160247 – Used in our AI program Low Bwt +Fat. Two sons retained.

100247 - Osed in our Ar program Low DWL +Fat. TWO Sons retained.

F 170174 - Purchased for low Bwt high growth with great muscle and outstanding meat eating traits. An exceptional ram.

F 170211 - Used for low birth weight and exceptional growth.

WA 170614 - Used in Superwhite program. Exceptional meat eating traits.
