

**2020 SALE: 12PM FRIDAY, FEBRUARY 14**AVENUE RANGE ROAD, AVENUE RANGE SA
FIELD DAY: MONDAY, FEBRUARY 10

# Welcome to the 13th on-property sale

Our family has built and operates a large broiler chicken growing complex at Murray Bridge. The broiler chicken industry exists and flourishes, despite low unit margins, due to its efficiency in converting kilos of feed to kilos of meat in as short a time as possible and it does this by providing the right climatic environment for the birds' comfort including unlimited access to feed and water.

During our time in chickens we have observed a large improvement in feed efficiency conversion rates from 1.8:1 and above to current day 1.6's:1 and below with chicken processing weights reached in around 10 percent less time as well. These large gains in productivity are all attributable to selective breeding for the right growth traits/genetics over time.

As a sideline to chickens we also run some beef cattle on a separate property at Murray Bridge and as a logical extension to further business diversification we purchased the Granite Ridge Angus Stud as a going concern in June 2019 and have been very pleased with our acquisition.

Our new herd contains many quality females of outstanding phenotype with good growth potential and we look forward to the challenge of selecting the right sires to suit and provide many quality bulls for your selection in future sales.

Our future focus will remain on exceptional growth potential, feed efficiency, excellent fertility, carcase weight/quality and structural correctness. In our bull selection we are committed to maintaining the high calibre standard of sires that Granite Ridge is known for.

Our 2020 sale bulls are stacking up with some powerful sire prospects. We have many sires featured in the group and we believe that the high standard and consistency of the team is due to the outstanding maternal power in the Granite Ridge cow herd.

Some of the sires featured this year include: Ayrvale Jagger, whose sons have sold well in previous sales, as did the Rennylea K447, whose sons are long, smoothsided and correct. MM Doc has some power-house bulls with tremendous growth and sire appeal, as does Granite Ridge Jurassic with their depth and thickness.

Each one of these sires is of sound phenotype, with good legs and feet. They all have high growth and carcase weight which equates to more dollars in your pocket sooner.

We look forward to seeing you around the sale yard at our open day on Monday the 10th of February and sale day, Friday the 14th of February.

## ATTENTION BUYER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

### **Parent Verification Suffixes**

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name are as follows:

PV: both parents have been verified by DNA; SV: the sire has been verified by DNA; DV: the dam has been verified by DNA; #: DNA verification has not yet been conducted: E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

### **Commissions and Rebates**

A commission of 6% will be paid to any external agent attending the sale with or on behalf of their client and settling within 7 days.

A 2% commission will be paid to any non attending agent and settling within 7 days.

# Agents – please note:

All introductions to be made to Scott Finlay either via phone: 0407 184 062 or email: sfinlay@ graniteridgeangus.com.au

Email: sfinlay@graniteridgeangus.com.au

Scott Finlay: 0407 184 062

Granite Ridge is in the lucky country, with many parts of Australia being in long term drought, we have had a good winter and spring, the cattle are doing well and the Sale Bulls are looking exceptional.

The home of Granite Ridge Angus at 849 Avenue Range Road, Avenue Range SA is JBAS 8 which allows cattle from this property to be sent to all states of Australia, including WA.

# **CHECKLIST**

### Sale Date and Prior Inspection Time

Selling will commence at 12pm on Friday 14th February 2020. All Sale Lots can be inspected on the Field Day which is Monday 10th February or on the morning of the sale from 10am. At any other time by arrangement with Scott Finlay - 0407 184 062.

### **Phone Bidding**

Phone bidding can be arranged prior to the sale by contacting either Elders – Laryn Gogel on 0436 020 245; or Scott Finlay on 0407 184 062.

### **Selling System**

Sale of animals will be conducted under normal auction conditions. All animals are sold exclusive of GST.

BULLS: Each bull will be sold as a separate Lot.

### **Bull Rebate**

A commission of 6% will be paid to any external agent attending the sale with or on behalf of their client and settling within 7 days. A 2% commission will be paid to any non attending agent and settling within 7 days.

All introductions to be made to Scott Finlay either via phone: 0407 184 062 or email: sfinlay@graniteridgeangus.com.au This will be strictly policed.

### Insurance

All cattle are at the purchasers' risk from the fall of the hammer. Insurance Agent will be available on sale day to organise any insurance requirements.

## **Delivery**

Granite Ridge offers free delivery for all bulls within a 200km radius. Arrangements must be made on the day of the sale by filling in the Buyer's Instruction sheet and handing it to an Agent.

### Registration

All Bulls are HBR Registered with Angus Australia. The vendor will transfer each bull to the new owner, so please supply the correct information on the Buyer's Instruction sheet.

## **Scanning**

Bulls were scanned by Max Bowman Livestock (Accreditation No. 1026) on the 1/11/2019.

### Health

- Granite Ridge Angus is LPA Accredited and J BAS 8.
- Our herd has been Faeces tested free for Johnes.
- Bulls have been 7 in 1 Vaccinated.
- Bulls have been Vibrax vaccinated.
- Bulls have been vaccinated for Pestivirus.
- Bulls have been ear notch tested free of Pestivirus.
- Bulls have been treated with Eprinex Pour on.

### **Breeding Soundness**

All bulls have undergone a thorough examination by Drew Pickford of Nationwide AB on the 28/1/2020, including semen testing.

### **Contempory Groups and their Feed**

The bulls have been run in contemporary groups on dry and irrigated pastures, including Lucerne, rye grass and grazing oats during the winter, being subsidised with hay & straw. The bulls have been finished off with a supplementary feed.

### **Recessive Genetic Conditions**

All Sale bulls are free from AM, NH, CA, & DD either by pedigree or by testing.

### Catering

Refreshments available on sale day with the compliments of Granite Ridge Angus. All are invited to remain for a bbq and drinks following the sale.

### Accommodation

Kingston SE has various accommodation options, both Motel and Hotel. Naracoorte and Millicent are other options within easy driving distance. Kingston 20 minutes, Naracoorte 40 minutes and Millicent an hour and 10 minutes.

### Caring for your New Bull

On arrival at their new home it is important that you have a suitable mob of animals to greet the bull to minimize the bulls stress. Remember they are leaving the security of a large mob and will be arriving in unfamiliar surroundings. Steers or pregnant cows would be suitable, certainly not other bulls.

Bulls are in good working condition at point of sale, but good nutrition for the bull during the joining period is imperative as this equates to good joining results. Check regularly that the bulls are working to detect any problems early, therefore minimizing damage to the bull and to conception rates.

### Warranty

All bulls have been independently evaluated for structural soundness and fertility. To the best of our knowledge the bulls are all in sound working condition at the time of sale.

If, during the next 12 months, a bull becomes infertile or breaks down, provided it is not caused by injury or disease contracted after leaving Granite Ridge, (a veterinary certificate may be required) we will:

- a) replace the bull with as close a match as possible (excluding any costs and expenses of the purchaser taking delivery); or
- b) grant a full credit (less any salvage value) for any purchase at Granite Ridge's next sale.

### **Health & Safety of Visitors**

Our bulls are bred to work not for showing so they need to be shown respect.

Under normal conditions they are quiet to handle, however even the quietest bull is in fact an unpredictable animal so be

Do not crowd the bulls or loiter inside pens unneccessarily.

Please call on an escort through the bulls if required.

# VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. NO CHILDREN ALLOWED IN PENS.

# THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

### What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility). TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand. TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

### What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values). EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

### Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would

be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics). Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics). Using EBVs to Benchmark an Animal's Genetics with the Breed EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

### **Considering Accuracy**

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV. The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV. EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

### **Description of TACE EBVs**

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following pages.

												BRE	ED A	/ERA	GE EE	3Vs

<sup>\*</sup> The percentile bands represent the distribution of EBVs across the 2018 drop Australian Angus and Angus-influenced seedstock animals analysed in the January 2020 TransTasman Angus Cattle Evaluation .

# **UNDERSTANDING EBVS**

		ВІКТН				FEED EFFICIENCY	
Calving Ease Direct	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.	Net Feed Intake (Post Weaning)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a growing phase.	Lower EBVs indicate more feed efficiency.
Calving Ease Daughters	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.		kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are	Lower EBVs indicate more feed efficiency.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.	(Feedlot)		in a feedlot finishing phase.	
Birth Weight	y Ø	Genetic differences between animals in calf weight at	Lower EBVs indicate lighter birth weight.	41110	В	Constitution of the control of the c	Lichou EDVc indicate hottor
		birth.		Docillity	%	Genetic differences between animals in temperament.	rigner Ebvs Indicate better temperament.
		GROWIH				STRUCTURE	
200 Day Growth	N N	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.	Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
400 Day Weight	y Ø	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.	Front Feet Claw	Ь%	Genetic differences between animals in desirable front foot claw cet etructure (change and evenness of claw)	Higher EBVs indicate more desirable
600 Day Weight	D Y	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.	Rear Feet Angle	<i>b</i> %	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Mature Cow Weight	D)	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.	Rear Leg Hind	8%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Milk	D N	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.	Rear Leg Side View	8%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.
		FERTILITY				SELECTION INDEXES	
Days to Calving	Ď)	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.	Angus Breeding Index	₩	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using	Higher selection index values indicate greater profitability.
Scrotal Size	CB	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.		<b>4 Ω </b> ω	Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority	
		CARCASE			0 %	of commercial grass and grain finishing beef production systems.	
Carcase Weight	δ	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.	Domestic Index	<b>Θ</b> ο τ	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domastic supermarket trade	Higher selection index values indicate greater profitability.
Eye Muscle Area	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.	Heavy Grain	↔	Genetic differences between animals in net profitability per	Higher selection index values indicate
Rib Fat	E E	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.	S ) )	0.5	bow joined in a confined can sent epiagning need angeling pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Bleater promability.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.	Heavy Grass Index	<i>⊕</i>	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting	Higher selection index values indicate greater profitability.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.		۵.	pasture finished steers.	
Intramuscular Fat	Ь%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.

# **CATALOGUE DISCLAIMER AND LOCATION MAP**

### SALE CATALOGUE DISCLAIMER

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

### **DNA PATERNITY VERIFICATION**

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in. or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

### **PRIVACY INFORMATION**

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the following form and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

### BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.
