

JB ANGUS

Angus

Jock Hislop

The JB Angus herd formed in 2013, ~~and~~ includes breed leading cow families from TeMania, Ardrossan, Coolana, and Anvil studs in Australia, and Woodhill and Springcove studs in the United States. With an unwavering commitment to FULL Breedplan data recording, including independent foot scoring, you can be sure no corner has been cut preparing this draft of bulls. Our strong maternal focus provides premium genetics that can build productive, fertile, easy-care cow herds, the great underlying strength of the Angus breed, and your bottom line. We offer 30 young sires featuring sons of powerhouse new sires Sitz Investment and Coonamble Junior, alongside proven sires A241, Conealy Revenue, Coonamble Hector, Largo Full House, and our top stud sire Alpine Equator L4. All 18 to 20-month-old bulls are structure scored, semen tested, and guaranteed ready for work. Our 3rd annual helmsman bull auction, conducted by Auctions Plus opens Monday, February 10 and concludes Wednesday February 12 at 5pm. For further details please contact myself Jock Hislop, or selling agents PPHS Josh Manser and SAL Alistair Haynes. A BBQ lunch and ice cold refreshments will be available both days.
