21ST ANNUAL On Property Bull & Female Sale

Superior Charolais Genetics

LOT 15
Mount William Pando (BS P22E)

1pm Friday 14th of February 2020

On Property near Willaura Victoria AND via ActionsPlus

CONSISTENCY | PREDICTABILITY | POWER | PERFORMANCE

Welcome to our 21st Annual on property Sale. We are blessed to have had a fantastic season in Western Victoria, in far contrast to our farming cousins in the north and east of the state and NSW. After celebrating our 50 years since establishment of the stud and 20th on property sale in 2019, we transition to a modern era for Mount William Charolais.

We are really proud of the line up of bulls and heifers this year. They are typical of the Mount William type; modern, balanced Australian type Charolais, powerful and performance based.

The bloodlines coming through the herd now are very exciting. Careful selection and access to elite Charolais genetics have resulted in a real boost in the overall consistency of quality. This is evident in not only the bulls on offer but the breeding base of females. As far as Charolais bulls go, for impact on profitability, Mount William bulls offer an exceptional opportunity to super-charge your breeding herd. We have a very strong base of females, with good constitution, power and frame. All Sires used in both our AI and natural program are polled pure Charolais. Our powerful female base allows us to introduce homozygous polled genetics without compromising on constitution and performance. We have invested in a new homozygous polled Sire from Canada via Agri gene ('Turnbulls Duty Free') which will form part of our AI program this year. We also made a considerable investment in genetics in September 2018 purchasing Palgrove Moderator for \$23,000 and Palgrove Nitro for \$13,000.

The calving season in 2018 went well. I was excited back then when these calves were hitting the ground and that excitement has continued through with this sale group. The bulls came through a tough summer/autumn and start of winter in 2019. But in typical Charolais fashion, once the spring hit, this group of bulls took off. There will be some good weight in them on Sale day and we expect they will scan well. They have been prepared on clover pastures with a small grain ration and silage once the pasture dried off. The bulls are in good shape, sound, semen tested and all health checks done. Pestiguard, Pesti Virus tested negative, Vibrio vaccinated, 7 in 1, drenched with Eprinex, ready to go.

As far as blood lines are concerned, Hannibal has been nothing short of outstanding. Hannibal's phenotype, growth and softness have been evident since we first used him in 2015. His results have been outstanding; sons averaging \$10,850 in our 2018 Sale. Sale topping progeny include Mount William Monolith selling to Rosedale for \$26,000 in 2018 and Palgrove Legend selling for \$40,000 in 2017. Recently the New Zealand semen rights for Hannibal were sold to Sam and Viki Holland of Hemingford Charolais, New Zealand. Sam visited Mount William in May 2019 to view Hannibal and his progeny. Hemingford Charolais have used Hannibal in an embryo program and we wish them success after their record-breaking Sale in New Zealand in 2018 (their top priced bull sold for \$31,000 and sale averaged \$8,615).

Powerful New Zealand outcross Silverstream Geddes has been used for the past 3 years in our AI program. Geddes in combination with the constitution of the Mount William cows have produced some ripping progeny with great volume and capacity. We have retained one of his sons from this year's draft. Waterford Loyal and Mount William Lizard are two walking Sires with progeny in this year's Sale. We are happy with how both of these bulls are breeding and there are some good examples of their bloodlines throughout the Sale. Rangan Roundup sons are featured throughout the Sale with a few standouts, they have certainly got plenty of growth and muscle. Dover and Gifford also feature and are good consistent performers for the Stud.

The select group of PTIC Heifers display plenty of volume, softness and frame. They are feminine types with good structure and backed up by really sound breeding bloodlines. The Sire group represented include Rangan Roundup, Mount William Lizard, Talgoona Lanky and Waterford Loyal. All have been joined to Palgrove Nitro whose first drop of calves last Spring were very impressive polled, smooth, growthy calves with good structure. Joining dates were November 4th 2019 to December 23rd 2019, giving an August 14th calving date.

We hope you enjoy this line up of bulls and heifers. If we can be of any assistance in your selection, or if you require any further information on a particular animal, please do not hesitate to ask.

We trust in our product and look forward meeting you on Sale Day or the Field Day on Monday 3rd February. I wish to thank Terry Dove, Ross Milne, Bryce Galvin and Mum (Anne Cochran) for their ongoing support. In addition, Shelby Howard, Mark Facy, Andy Hay, James Grubb and Kristin Iverson the Danish Drover for their input enabling us to present the cattle in the manner they are on Sale Day. Thanks to Lucy Main and Ben Hooper for their work in preparing this sale catalogue.

Thank you also to my wife Victoria for her support and my two future cattleman Hugo Rupert Charles (2 years old) and Rupert Harry Nicholas Abbott who we welcomed to the family on the 27th December 2019. Thank you to all our clients past and present for your continued support and faith in the Mount William product. Good luck this year!

Rob Abbott, Principal Mount William Charolais

ON PROPERTY PRODUCTION SALE

COMMENCING AT 1.00PM, FRIDAY 14TH FEBRUARY 2020

The sale will also be interfaced with AuctionsPlus.

ACCOMMODATION

SHEARERS QUARTERS

On Property accommodation:

There are 8 refurbished rooms available to rent thru Air BnB. Hot showers and communal breakfast room. Please visit Air BnB for details or contact William Abbott on 0448 886 258 or email willabb@gmail.com

RED GUM COTTAGE

On Property accommodation:

Stunning country style modern 2 bedroom cottage fully furnished available to rent. Continental breakfast provided. Please visit Airbnb for details or contact Victoria Abbott on 0499 039 090 or email firetrap22@hotmail.com

ALTERNATIVELY, Ararat is approx 30 minutes away and **Halls Gap in the Grampians** is approximately 40 minutes away. Both have a wide variety of accommodation. Well worth a visit.

CONDITIONS OF SALE

- All animals will be offered at auction. If not sold, they will be retained by the stud.
- Inspection any time before the sale can be arranged with Rob Abbott.
- Telephone bidding available by contacting Agents Ross Milne or Shelby Howard, prior to sale.
- Registration transfer fees are the responsibility of the vendor.

AUCTIONSPLUS: The sale will be interfaced with AuctionsPlus. Before you can bid in an auction, you MUST be registered. Registration and connection to an auction over the internet is completely FREE! Please ensure you register at least 2 business days prior to the sale. Visit the AuctionsPlus website for more information – <http://auctionsplus.com.au/>

FERTILITY GUARANTEE: Bulls are sold as fertile and capable of natural service. All bulls are semen tested and reproductively structurally assessed by AB Nationwide. Any claim on a bull must be made within 12 months after sale date and be accompanied by a Veterinary Certificate. The Veterinary report must state that, the bull has not suffered any injury or maltreatment which could have affected his breeding ability since delivery to the purchaser. Bulls which do not breed will be replaced by an animal of equal value or a credit less salvage value at the next sale. This clause will be strictly adhered to. Strictly no cash refunds. Please select your stock carefully. We are only too happy to assist you with your selection. 2020 Sale heifers are due to calve August / September 2020.

All females are sold as guaranteed breeders. Where a Purchaser submits a Veterinary Certificate to the Vendor within 12 months of the date of sale, that a female of joinable age is infertile and in his/her opinion has not suffered any injury or maltreatment which could have affected her breeding ability, the Female will be replaced by an animal of equal value or a credit less salvage value at the next sale. This will not apply where an attempt has been made to transfer embryos from the female. All Heifers will be pregested via a scan prior to sale day. Certificates available. PTIC does not guarantee a live calf. A small percentage of heifers will absorb a pregnancy and Mount William Charolais are not liable in the event this occurs. An arbitrator appointed by the Auctioneers will settle any dispute.

HEALTH: The Mount William Herd is J-Bas 8. All Animals have been drenched and vaccinated with 7 in 1, Pestiguard and Vibrio in accordance with the Pfizer STAR BREEDER program. All sale Bull have been tested negative for Pesti Virus. The Mount William Herd has been tested negative for Pesti Virus. If you are concerned about the presence of Pesti Virus in your herd we suggest you consult a vet regarding a vaccination programme. All animals derive from an accredited Free T.B. and Brucellosis Herd. Any test required by interstate purchasers will be done at Mount William, at costs to the Vendor.

DELIVERY: Transport will be the responsibility of the Purchaser. Mount William will work in conjunction with McEwan's Livestock Transport to reduce transport costs to purchasers. Please speak to us or our Agents about your transport requirements.

INSURANCE: Insurance is available. We encourage you to consider insuring your purchase. Please speak with either Elders or Charles Stewart Dove Agents.

REBATE: The Vendors agree to a rebate of 3% to outside agents who attend the sale or buy on behalf of their clients and settle within 7 days. A rebate of 1% to outside agents introducing approved buyers to the vendor prior to the sale and settling on their behalf within 7 days. Phone call, text message or email must be received prior to the sale.

PLEASE NOTE: This catalogue has been compiled with all due care and attention, however we or our agents cannot be held liable for the accuracy, use or interpretation of the information in this catalogue. People entering the property for the purpose of the sale do so at their own risk.

YOUR LOCAL TEAM

Estimated Breeding Values (EBVs)

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

- **CE % Direct = Direct Calving Ease** - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

- **CE % Daughters = Daughters' Calving Ease** - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcass Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Domestic Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430 kg (240 kg HSCW and 6 mm P8 fat depth) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Export Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700 kg (380 kg HSCW and 9 mm P8 fat depth) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

- **less than 50%: Low accuracy.** EBVs are preliminary and could change substantially as more performance information becomes available.

- **50-74%: Medium accuracy.** Usually based on the animal's own records and pedigree.

- **75-90%: Medium-high accuracy.** Some progeny information included. EBVs may change with addition of more progeny data.

- **more than 90%: High accuracy** estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact the Charolais Society or Charolais BREEDPLAN.

COMMENTS: Hannibal was one of the sale features in Palgrove's 2014 sale. He is a polled red factor ET bull by Canadian National Champion PCC Sudden Impact. His donor Dam produced 6 sons, sold to Australian Studs for a \$23,000 average. He has an exceptional pedigree, is a sensible mature size with natural thickness, plenty of softness and a sleek coat. His growth and carcase EBV's are outstanding. Hannibal's notoriety has grown significantly in the past two bull selling seasons. 20 of his sons averaged \$10,850 last year at Mt William and in 2017 six sons averaged \$19,000 and topped the sale at \$40,000 at Palgrove. Hannibal is one of those bulls who simply breeds true to form, above expectation, and has proven to be a standout for the modern Charolais breed. Hannibal's genetics are sought after and made their way to New Zealand last year.

Top 1% EMA, Top 10% RBV, Top 15% Carcase Wt/ Milk, Top 25% BW, Top 30% GL, Top 35% CE DIR. Carcase and Calving ease.

COMMENTS: We retained Kakadu from our 2014 drop of bulls. His Sire Digger produced our top selling bull in 2016 at \$17,000. He was chosen for his conformation, clean front end, power and muscle content. His Dam E107 is a beautiful polled Boss female who delivers consistent quality progeny. Kakadu has three drops of calves on the ground and we have been suitably impressed with his progeny. He is a very powerful bull with substance who moves well and has always had a good temperament.

DAM: SILVERSTREAM DOLLY V5 083040005C (OAN Z5C)

SILVERSTREAM T89 083020089B (OAN T89B)

COMMENTS: Geddes has proved to be very successful export sire for the NZ stud Silverstream Charolais. His semen was exported to Canada following in the footsteps of Silverstream Evolution. Geddes sired two of the highest priced bulls in Canada in 2015-16 Sos Chuckwagon and High Bluff Casanova. Geddes continues to be a major seller for Semex. We used Geddes in our AI programme for his bone and thickness and have been very impressed by his progeny, heifers and bulls.

TATTOO: RAN K36E

COMMENTS: Roundup's first drop of bulls and heifers hit the sale ring in our anniversary sale last year. He was the standout and top priced bull in Rangans 2016 bull sale. We purchased him originally to go over heifers but he has developed into a formidably powerful sire. 48cm scrotal at 22 months an incredible set of EBV's he has a number of grunt'y sons in this years draft. An exciting sire who is leaving a great drop of females in the herd.

TATTOO: PK D191E

COMMENTS: Dover continues to find a place in our AI programme. In 2018 Dover semen sold to Conquest Charolais and Chalambar Charolais studs for \$85 and \$95 per straw. Dover is a structurally correct Polled Bull with some fairly handy Palgrove Bloodlines in his pedigree. Dover has good length, muscling and doing ability coupled with a fantastic temperament. He has a classy set of EBV's being at the top end for most traits.

TATTOO: BS L9E

COMMENTS: Lizard was retained from our 2015 drop of calves. He formed part of the show team we took to Royal Melbourne for the Charolais feature Show placing second in the 18-20-month-old class. Lizard's Sire Advanced Domino was Supreme Champion interbreed bull in 2010 at Brisbane Royal Show. Lizard has an excellent temperament, good structure and plenty of grunt. His calves are moderately framed, well-muscled and docile.

TATTOO: WET L52E

COMMENTS: Loyal was purchased as a top priced bull in the 2017 Southern Breeders Sale. His Sire Palgrove Hermes has bred exceptionally well for Waterford and Loyal's half-brother Waterford Neon Lights was crowned Supreme Charolais exhibit at the 2019 Royal Melbourne Show and went onto to win Interbreed Senior Champion Bull. Loyal has a good frame, clean front end, good skin and a good temperament. He is breeding well, producing both quality bulls and females for Mount William. His first sons sell in this year's Sale.

TATTOO: CG L33E

COMMENTS: Lanky was purchased from the Galvins Talgoona Stud, NSW in 2017. He was initially used over heifers with success and has developed into a powerful, smooth, polled Sire with great structure and softness.

TATTOO: PK N142E

COMMENTS: Nitro was purchased as a yearling from Palgrove in 2018 for \$13,000. His Sire Palgrove Justice was retained by Palgrove as one of the best Silverstream Evolution sons they had bred. Nitro has plenty of substance, good polled Sire appeal and structure. We have used Nitro over heifers successfully and really happy with his progeny. You will see more of Nitro's progeny in future sales.

Red Gum Cottage

A cosy, country cottage on a stunning Estate in the heart of the Grampians

WILLURA VIC

4 Guests | 2 Bedrooms | 2 Beds | 1 Bath

You'll have the whole cottage to yourself!

This lovely, cosy old Overseers cottage has been completely refurbished, keeping as much of the charm and 'country' feel as possible whilst having the modern touches where necessary. Red Gum Cottage is located at Mount William Station, an old family farm specialising in breeding Charolais Cattle.

Only 25 minutes drive to Dunkeld, 15 minutes to Grampians National Park and 35 minutes to some of the best wineries in Victoria. Set amidst stunning, Australian countryside of scattered red gums and wildlife.

FOR CATTLE ENTHUSIASTS:

A personal tour of the Mount William Charolais Stud is available on request for guests of Red Gum Cottage.

We look forward to welcoming you to Red Gum Cottage

Available to rent through Airbnb: www.airbnb.com.au/rooms/39035644

COMMENTS: Payback is a neat bull. A polled Roundup son, he is early maturing, well muscled and easy doing.

Top 35% 20 day/top 1% SS.

46 10 STRAWS x PALGROVE HANNIBAL (PK H1312E) (AI) (ET) (P) (R/F)

COMMENTS: Hannibal needs no introduction. Last year his semen sold to Challambi Charolais (Tooma NSW) and J & S Charolais (Currency Creek SA) for \$260 and \$290 per straw respectively. This was a reflection of the demand for high quality Charolais Genetics throughout Australia. Hannibal's New Zealand Semen Rights were sold last year to Hemingford Charolais at Culven Christchurch New Zealand. This is a limited opportunity for one breeder to secure some of the most sought-after semen in the Charolais breed. Hannibal will have impact on your herd. This is not to be repeated, the last chance to secure Hannibal Semen. A no fuss herd improving proven breeding bull.

EBV data for Palgrove Hannibal can be found in the Reference Sire Section.

Purchaser / \$: _____

47 10 STRAWS x RANGAN ROUNDUP K36 (RAN K36E) (P)

COMMENTS: This is the first time Roundup semen has been offered. We believe he is a very commercially focused and relevant sire in the current climate. Good fertility and Growth, Roundup is a big strong, long bull, with a good frame, who carries his weight well. He had a scrotal circumference of 46cm at 16 months of age and good raw data. He weighed 856kg at 19 months scanning 5/4/ 129cm² EMA and 4.2 IMF. Semen was retained by Rangan. Producing Quality Females and Bulls for Mt William. This is a limited release, an opportunity not to be missed.

EBV data for Rangan Roundup can be found in the Reference Sire Section.

*Thank you for attending
the Mount William 2020
Annual On Property Sale.*

*We look forward to seeing
you again next year.*

NOTES

We're here when you need us.

The business of farming is not for everyone.
But like you that's the business we're in.

With 170 years experience, Elders has the livestock knowledge to support your business. We market over 2.3 million cattle and 13.5 million sheep each year. But there's so much more we can offer. Our specialist animal health services and exclusive ELMS protocols improve the health, weight and quality of your cattle and sheep, whether they're on the farm, in transit or in the yard. And through traditional or online auctions, forward contracts or direct to processor, we ensure more options for buyers and sellers. So, when you're looking for the best livestock partner, we're here when you need us.
