## REPORT ON EXAMINATION

**Owner:** Gooree Park Pastoral  
**Signalment:** Black Wagyu Bull  
**ID:** Ear Tags and Brand N21

At the request of Tony McManus I visited the Wagyu bull identified by ear tag and brand N21 at "Gooree Park", Mudgee, NSW 2850, today 2<sup>nd</sup> of March 2020.

I performed a physical examination of the bull's external reproductive tract & his general physical health and conformation. His Scrotal circumference was measured at 31.5 cm  
Semen was collected by electro ejaculator and examined under the microscope. A milky sample was collected which had progressive motility 65%. I found the bull's reproductive tract normal. I found him to be healthy.

On the basis of this examination it is my opinion that this bull is a satisfactory breeding bull, at the time of examination.

Yours sincerely,

Dr Steve Slack-Smith NSW V5842
