

# HICKS BEEF BULL SALE

**Thursday 5th March, 2020**

**1.00pm HOLBROOK**

**SALE BULL VIDEO**

**[www.hicksbeef.com.au](http://www.hicksbeef.com.au)**

# Sale Details

**SALE DETAILS:** All bulls will be yarded by 10.30am on the morning of the sale. Inspections prior to the sale can be arranged by calling Tom Hicks on 0448 796 124.

**HEALTH:** All bulls have been vaccinated with "7 in 1" which includes leptospirosis. They have been drenched with Evermectin. All bulls vaccinated - vibrio, and pesti virus tested.

**DELIVERY:** Stock awaiting delivery will be held free of charge for up to 14 days of the sale at the buyer's risk. **CATERING:** Lunch and refreshments will be available.

**GUARANTEE:** We have always provided full replacement guarantee against fertility and genetic faults. It is important that we are contacted as soon as possible to rectify any problem.

**FEEDING POLICY:** We believe that overfeeding can cause many problems to bulls long and short term. All our cattle are run in large paddocks under commercial cattle conditions. All Breedplan figures are assessed under these conditions usually from mobs of over 100 cows and calves.

As we sell our bulls younger than most studs we feel it is important that they are in suitable condition to withstand the rigours of their first season. The bulls are given a supplementary ration for 10 weeks, out in the paddock still in their calving groups.

All bulls are treated identically with no preferential treatment for the top bulls. We have sold bulls to many areas of Australia and have had no complaints about their mobility or fertility.

# Terms and Conditions of Sale

1. Subject to reserve prices, the highest bidder shall be the purchaser, and in the event of any dispute arising it shall be settled by the Auctioneer, unless one of the claimants will advance the bidding above the disputed bid, in which case the lot or lots shall be put up again.
2. The purchaser shall deposit the whole or any part of the purchase money if required at any time during the sale.
3. All stock shall be paid for in cash immediately on conclusion of sale, and prior to delivery, but, in the event of delivery being made, or possession obtained by the purchaser or his representative prior to the payment of the purchase money, or any cheque given on account of same, the purchaser shall hold the stock as trustee only for the vendor.
4. All stock shall be at the risk of the purchaser upon the fall of the hammer.
5. No warranty is given by the Auctioneers with any lot, and, as all lots are available for inspection previous to the commencement of the sale, the same are sold with all faults, if any.

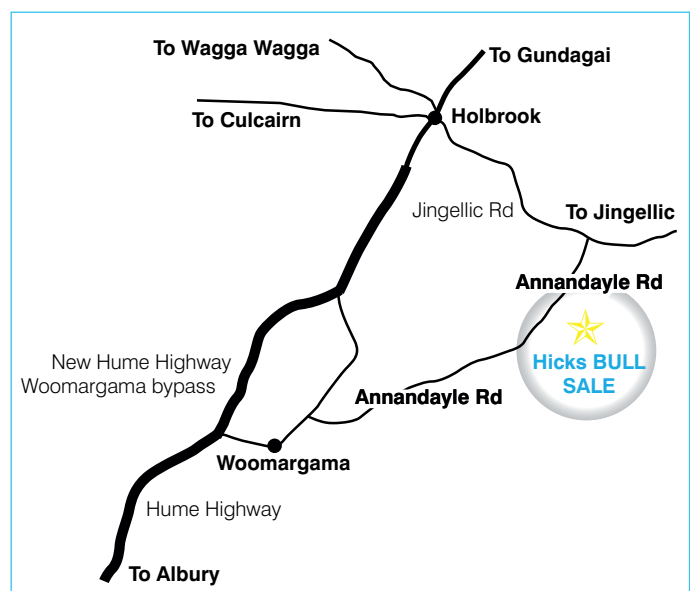

The Auctioneers shall not be responsible for any errors or omissions in any particular appearing in the description or pedigrees of any lot for sale, and no error, omission, or misdescription in such particulars or pedigrees shall invalidate the sale or be made the subject of any claim for compensation.

## Directions from the South

Take the Woomargama exit to the Old Hume Highway. If you miss this exit, turn right at the Holden dealers in Holbrook.

## Directions from the North

From Holbrook turn east down the Jingellic Road, travel 8.1kms then turn right into Annandayle Road and we are 2.8kms on the left.

# HICKS BEEF BULL SALE

**Thursday 5th March, 2020**

**Sale Commences: 1.00 pm**  
**Inspections from 10.00 am**

**38 Australian Beef Composite Bulls**  
**10 Hicks Red Angus Bulls**

**Andrew Hicks**  
**M: 0427 147 258**

**Tom Hicks**  
**M: 0448 796 124**

**Email:** tom@hicksbeef.com.au or aahicks@bigpond.com  
**Website:** www.hicksbeef.com.au (visit for link to video of sale bulls)

**This sale is interfaced with AuctionsPlus**

Our sale is conducted live on line in real time; remote bidders can bid on computers at their location. The remote bid is immediately transferred to the auction ring.

**Bidding is only available to registered AuctionsPlus users**

You must register at least 24 hours prior to sale with AuctionsPlus.

**Phone: 02 9262 4222 W: www.auctionsplus.com.au**

**Phil Gledhill 0407 078 094**  
**Jenni O'Sullivan 0428 222 080**

**2% REBATE**  
**to Outside Agents**

**We have poor mobile phone reception at our sale ring. Please call Phil from Elders to organise phone bidding.**

# RED ANGUS GROUP BREEDPLAN

**ESTIMATED BREEDING VALUES (EBVs)** The EBV is the best estimate of an animal's genetic merit for that trait.

**ACCURACY:** Accuracy is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait.

**Gestation Length EBV (days)** is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

**Birth Weight EBV (kg)** is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**200-Day Growth EBV (kg)** is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight EBV (kg)** is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight EBV (kg)** is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**Mature Cow Weight EBV (kg)** is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

**Milk EBV (kg)** is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

**Scrotal Size EBV (cm)** This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

**Carcase Weight EBV (kg)** is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

**Eye Muscle Area EBV (sq cm)** This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

**Rib Fat and Rump Fat EBVs (mm)** are calculated from measurements of subcutaneous fat depth at the 12/13- rib site and the P8 rump site and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

**Retail Beef Yield EBV (%)** indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

**Intramuscular Fat EBV (%)** is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

*For further information please contact the Red Angus Society or Red Angus BREEDPLAN.*

# Beef Class Structural Assessment System

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry.

Over the past decade, use of the Beef Class Structural Assessment System in the seedstock industry has produced a marked improvement in herds which have shown commitment to using the information appropriately. Through these dedicated breeders, there has been a flow on affect of structural improvement through out all sectors of the beef cattle industry.

Jim Green and Liam Cardile of 'BEEFXCEL' service many of the leading seedstock herds in Australia. 'BEEFXCEL' is not involved in any genetic marketing or specific breeding advice and therefore has no conflict of interests to influence their stock appraisal. The integrity of the structural data provided by 'BEEFXCEL' is recognised throughout the industry as Jim and Liam are fully INDEPENDENT assessors.

**HICKS BEEF STRUCTURAL PROGRAM:** Since 2003 Hicks Beef have used the services of BEEFXCEL to assess the structure of all sale bulls. The AUTUMN 2020, HICKS BEEF Sale Bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft. The Hicks Beef sale bulls were assessed by **Liam Cardile** of LRC Livestock on 13/09/2019. The composite bulls scrotal circumference measurement was taken on 13/09/2019.

## How to Use The Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system;

- A score of **5** is ideal (Note: Except for Temperament where a Score of 1 is ideal);
- A score of **4 or 6** shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of **3 or 7** shows greater variation but would be acceptable in most commercial programs.

However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;

- A score of **2 or 8** are low scoring animals and should be looked at closely before purchasing;
- A score of **1 or 9** should not be catalogued and are considered culls.

**Liam Cardile** on 0409 572 570

# FIRES

We would like to thank the many clients who have been so considerate to offer us such wonderful support through the fires which have impacted us at Jingellic and Walwa. It is very uplifting to have the support of friends through this difficult period.

We would also like to thank the volunteer firefighters for their outstanding efforts. There are also so many other volunteers who helped in many ways before, during and after the fires. Many of these great people had farms that were burnt out. We thank you all for showing such a wonderful community spirit of helping each other through a very difficult time.

We apologise if you rang us through this period and we didn't get back to you. Our phone service has been out for over 5 weeks, which makes communication difficult.

Our farms, like many others, have been burnt with the loss of pasture, infrastructure and stock. We believe it is all part of farming and are positive that with some good planning and hard work we will be back enjoying all the benefits of beef cattle farming. We would like to especially mention our sorrow for Sam McPaul who was killed fighting the fire on our farm when a pyrocumulus tornado flipped the fire truck he was on. Our thoughts are with his wife Megan and family.

Deputy Captain of the Jingellic Fire Brigade Dave Daly and Wok Vinge volunteer firefighter, taking a break at the Jingellic Showgrounds, with rescued wildlife, all in a day's work.

## STEER TRIAL CONSISTENCY

Hicks Beef had another successful steer trial year. We were half a percentage point off equal third place out of 90 teams. We had two teams entered but unfortunately a death from bloat hit our A team. But again for the second year a Hicks Beef steer topped the competition for individual overall points.

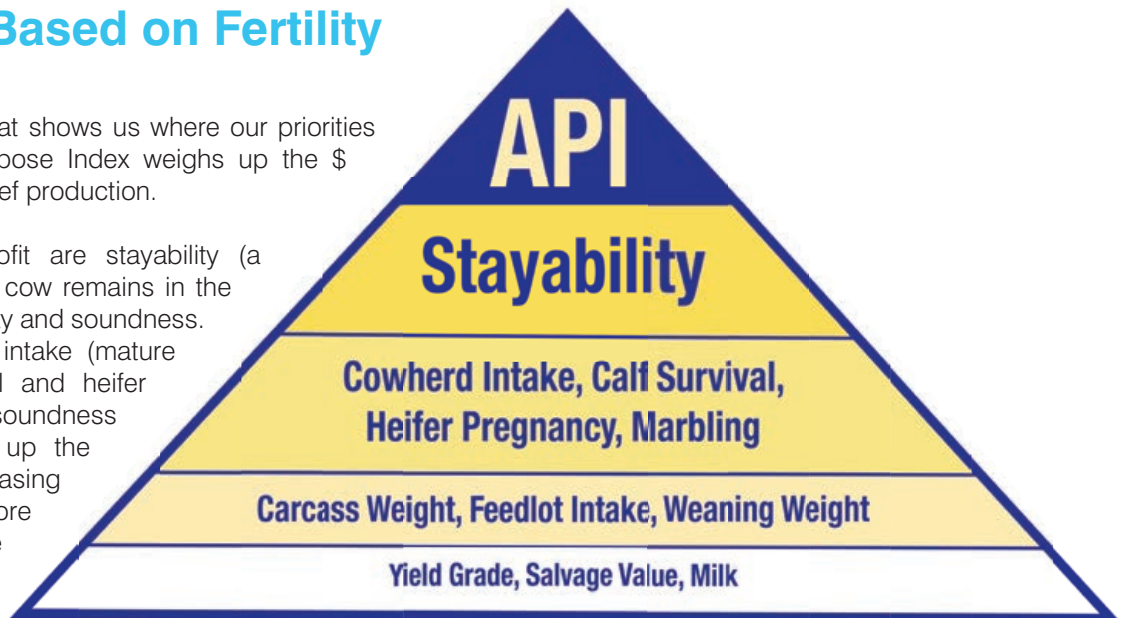

If it is consistent results you are looking for, over 11 years Hicks Beef has shown it is no fluke that we consistently rank near the top for cattle that gain weight and produce quality carcasses for the feedlots.

# API – Profit Based on Fertility

API – the profit index that shows us where our priorities should be. The All Purpose Index weighs up the \$ inputs and outputs of beef production.

The big drivers of profit are stayability (a measure of how long a cow remains in the herd) a measure of fertility and soundness. Followed by cow herd intake (mature cow size), calf survival and heifer pregnancy. Yes, fertility, soundness and live calves make up the priority for breeders chasing higher returns, before weaning weight, carcass weight and feedlot intake.

## HICKS BEEF GUARANTEE - Nothing left to chance Genomically Enhanced EPDs

- All sale bulls and females are assessed on one of the world's most advanced performance programs in the world with IGS - International Genetic Solutions
- All figures; both dams, sires and individuals are genomically enhanced, with DNA verifying parentage and improving the accuracy of the performance figures.

The DNA test is like knowing

- 15 Calving Ease Scores
- 21 Birth Weights
- 22 Weaning Weights
- 24 Yearling Weights
- 25 Daughters Records for Stayability
- 6 Carcass Weights
- 8 Marbling Scores
- 5 Rib Eye Measurements

- Independent veterinarian breeding soundness checks by the industry leading Holbrook Veterinary Clinic.
- Independently assessed for structural soundness by Liam Cardile, LRC Livestock, one of Australia's most experienced stock assessors.

- All bulls measured for all traits, birth, weaning, yearling, carcass scanned, temperament.
- All females on Total Herd Enrolment, all measurable traits recorded.
- Producing bulls in optimum condition for their first joining season is our priority. We keep our bulls on a steady plane of nutrition, with a high roughage, silage based ration.
- All bulls vaccinated for vibrio
- All bulls tested for pesti virus
- Backed by Hicks guarantee

### Vet Check Information

All bulls presented in the auction have been fertility tested by the Holbrook Veterinary Centre. They have passed an examination of their reproductive tract, which includes a testicular palpation, internal reproductive organ palpation and penis check.

General health and structure are part of the course for this veterinary examination. Service ability testing and semen assessment have not been performed and we encourage all purchases to integrate their new bulls into the risk mitigation strategy that they employ back home.

# QUICK GUIDE TO EPDS

**CE**  
**Calving Ease**

- 375,000+ animals recorded annually
- 500 Sires progeny tested (now 60-70 per year)
- 35,000 matings on Angus Heifers (progeny tested)

**BW**  
**Birth Weight**

**MM**  
**Maternal Milk**

(Lower ranks higher on percentile table)

**DOC**  
**Docility**

**CW**  
**Carcass Weight**

**YG**  
**Yield Grade**

(Lower ranks higher on percentile table)

**API**  
**All Purpose Index**

(Dollars per cow exposed in a self replacing herd bred to both Angus heifers and mature cows. Great economic index based on the production system)

**TI**  
**Terminal Index**

(Dollars per cow exposed under a Terminal Sire scenario)

 G A R OBJECTIVE 1885                      ABC K1097

We have high confidence in these figures generated from the analysis of 15 million animals world wide and genomically enhanced. P606 ranks at the very top of the figures for profit. Can we see profit? Not necessarily, when calving ease, maternal calving ease, stayability and marbling help drive these figures. This bull ranks for All Purpose Profit and Terminal Profit well above the top 1% of the data base. With world leading geneticists weighting the profit figures on real world measured data - we believe them.

# RED COMPOSITE SALE BULLS

## LOT 15 ABC P1260

Born: 27/9/18 Color: Red Brand: P1260

**Homozygous Poll**

GW PREDESTINED 701T ABC B1071  
**ABC K576** HICKS E1003  
 ABC H874 ABC X152

P1260 is by the great K576, as are our two leading red lots. He is strong on stayability, the figure that estimates how long his daughters will stay in the herd, indicating fertility. This bull does it well and stacks in a bit of marbling (hopefully when we get paid on carcass produced you will attract premiums for his progeny)

# Hicks Beef Bulls Checklist

- ✓ **Moderate Birth** - we aim to have birth weights lighter than breed average
- ✓ **Specialist Heifer Bulls** - in all our breeds, top 20% calving ease
- ✓ **Weight Gains** - up in the top 20% of breed for 200 & 400 day weights
- ✓ **Mature Weights Less** than breed average, large cows need more maintenance
- ✓ **Carcase** - we believe muscle and yield will be demanded by industry and that marbling is an important trait
- ✓ **Temperament** - is important, we cull heavily on temperament, sale bulls and cows
- ✓ **Structurally Correct** - we feel that we are competent enough to structurally assess bulls, but we know you want an independent professional. We use Liam Cardile from CTC to assess all our sale bulls for feet, legs, sheath and testicles
- ✓ **Tested** - for known genetic abnormalities, results will be available on sale day.
- ✓ **Tested negative** - Pesti-virus carriers.

# RED ANGUS SALE BULLS

## LOT 39 HICKS MARBLE BAR P90

Born: **16/8/18** Reg. Number: **HRA P90** Tattoo: **P90**

MILWILLAH FEVOLA F37  
**MILWILLAH MARBLE BAR J53**  
 MILWILLAH LOWAN G291

HICKS RED LABEL E567  
**HICKS BEEAC H1271**  
 TE MANIA BEEAC F354 BLACK

This bull is an outcross to most Red Angus pedigrees. His dam is 3/4 Te Mania bloodlines and his sire line is all black Angus. P90 is a thick growthy bull with plenty of weght. His growth pattern shows top 10% 400 day and 600 day weight with a lower mature cow weight, ideal for profitable production. His carcasse shows top 5% marbling and positive fat, again ideal for profiable production.

## LOT 40 HICKS HENRY P174

Born: **19/09/208** Reg. Number: **HRA P174** Tattoo: **P174**

HICKS HENRY K82  
**HICKS HENRY M179**  
 HICKS RED PATRICIA Z614

HICKS HENRY H61  
**HICKS RED PATRICIA K143**  
 HICKS RED PATRICIA H129

This bull has a double cross of Hicks Henry H61, the curve bending sire that leads the breed's selection indexes. This son replicates his figures with a little under breed average calving ease and top 5% 200 day and 400 day growth, with lower mature cow weight. Yes you can have top calf production from more moderate cows.
