- ▶ All bodyweights, fat and muscle scans, and scrotal measurements were collected on March 19, 2020, by Roger Evans, Bovine Scanning Services Pty Ltd.
- ▶ All pregnancy tested in calf (PTIC) heifers were scanned on February 17, 2020, by Damien Sotter, Beef Genetics, with Lot 34 (JAD P59) scanned pregnant on March 19, 2020, by Dr Hennie Strydom, Wellington Veterinary Hospital.
- ▶ The following animals have slight pinkeye scarring, not deemed to be detrimental to their ability as breeders: JAD P35, JAD P74, JAD P67.

Purebred Heifers

Mostly ET-bred Purebred Registered Speckle Park Heifers, with joining details:

^^^ LOT 29 (JAD P1), LOT 33 (JAD P12), and LOT 38 (JAD P67), are not yet detectable as being pregnant (PTE). We will hold them at our property ("Greenvale", Yeoval) and continue their natural joining to Minnamurra Montezuma M25 (MPC M25). They will be pregnant within six months of sale and payment for these heifers is not due until pregnancy has been confirmed. If for some reason pregnancy cannot be achieved, zero payment will be due. This process worked seamlessly with two heifers sold PTE at our 2019 sale.
