

**2020 ANNUAL
ON PROPERTY SALE**

Friday 20th March 2020

Rangan
CHAROLAIS

RANGAN WELCOMES 2020

Dear Clients,

Welcome to our 11th on-property sale. The year has certainly got off to a devastating start for a lot of farmers and other businesses. It is very hard to explain just how destructive a fire can be unless you witness it first hand, but we hope that for those who haven't you never do and for those of you that did, our thoughts are with you. Our local CFA truck spent many days attending fires in our region.

The drought continues to affect a lot of communities around our great land, but as I write this there has been quite a bit of rain in the north, with a good prospect of more to come. BRING IT ON!

The January weaner sales have been completed and again we are very proud to see the great runs of Rangan sired calves at many selling centres around the country that are demanding strong competition from grass fatteners and feedlots. There were plenty of pens of quality calves weighing in at over 400kg straight off their dams. Congratulations to our very good clients the Kohlhagen Family for taking out the award for the best pen of Charolais sired weaners at NVLX Barnawatha as well as Anthony & Katrina Bailey of Tatong for winning the award at Wangaratta, both in extremely good yardings.

2019 has seen plenty of highlights for our stud. Junior Champion Charolais bull at the 2019 Royal Melbourne show, a bull that sells as lot 5 in this sale, and placing 1st & 2nd in the biggest classes of Junior Charolais Heifers and Bulls in that showing. Again, we also made the final of the Beefweek Heifer Challenge. These achievements are a nice recognition for our herd, but it is our client's achievements that give us the greater satisfaction.

An exciting program that our herd has had bulls and females included in is the Southern Multi Breed Project. This is a project led by the NSW Department of Primary Industries and includes a base female herd of 2000 head consisting of 6 different breeds of cattle. One of the outcomes of this project will be multi-breed Ebv's which will allow the comparison of differing breeds run under the same conditions. We are extremely pleased to have had a number of animals included in this project stemming from our meticulous recording of information over many years. We record and enter to Breedplan on every possible calf.

- Birthweight
- Calving ease
- Weaning & Yearling weights
- All carcass scans including eye muscle, fat cover & IMF
- Scrotal on all bulls

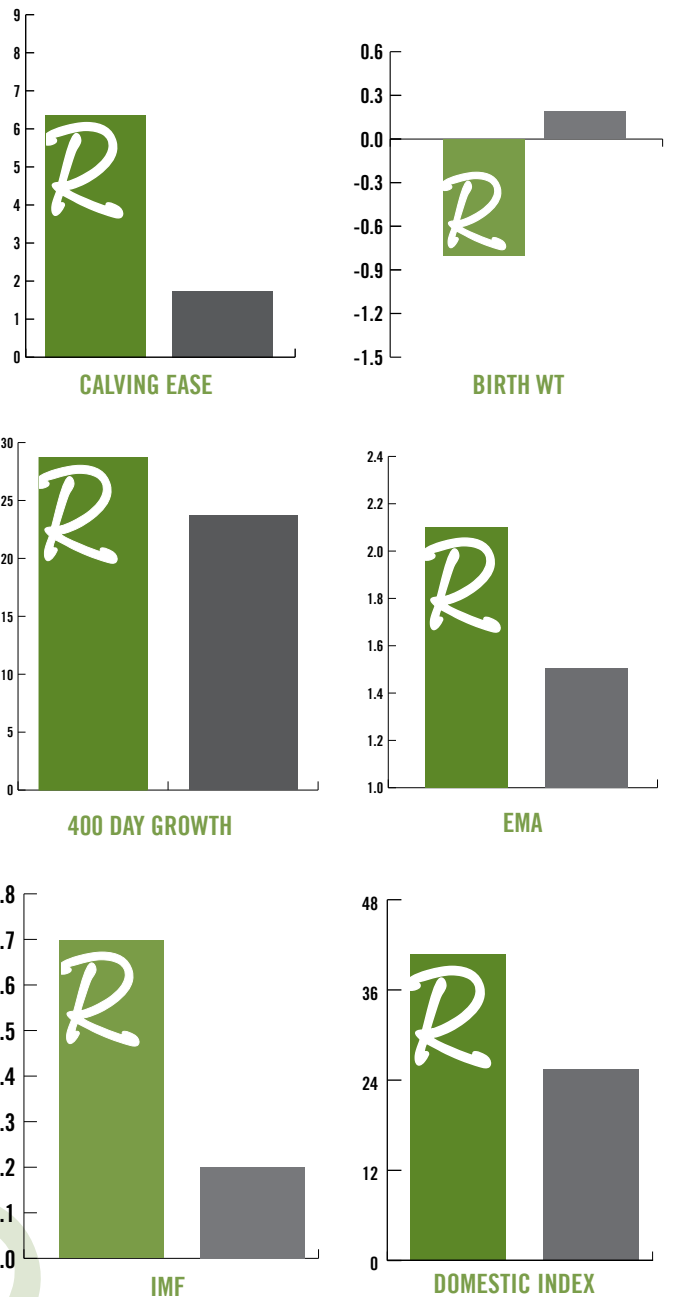

We are extremely proud of this year's bull draft, this is as even a drop of bulls as we have ever presented. Years of tough selection and recording is really paying off. Every cow in our herd of over 200 registered females is selectively mated by AI to bulls from around the world as well our own proven sires. This allows us to also get accurate gestation length information which is just so important to calving ease as well as allowing dams to get back into calf as early as possible.

To all clients we wish a happy and prosperous year to come.

Thank you

Graeme, Liz, Ellen, Claire, Jess & Laura

2018 BORN CALVES Rangan vs Charolais Breed Average

the PERFECT colour combination

Rangan
CHAROLAIS

ANNUAL ON PROPERTY SALE

FRIDAY 20TH MARCH 2020

44 CHAROLAIS BULLS

Auction Sale commences 11am - Inspections from 9am sale day or by appointment
"Rangan Park" Miller Lane Charleroi Victoria

AuctionsPlus

Buy and Sell stock nationally

Sale to be interfaced with Auctions Plus.

Go to auctionsplus.com.au

Directions: Take Tallangatta exit from Hume Freeway, follow directions to Mt Beauty (C531), 14km from Wodonga turn left through Tangambalanga, stay on this road for 12km & you will pass a football ground on your right, 1km further take Miller Lane to your right. (30 minutes travel time from Albury/Wodonga).

Accommodation: Comfort Inn & Suites Blazing Stump Wodonga Ph: 02 6056 3433

Health Information

- All sale animals tested negative for pestivirus
- Fully vaccinated Pestiguard 7in1 & Vibrio
- Ivomec Plus March 2020
- All bulls have been independently vet checked by Shane Thomson BVSc of the Holbrook Veterinary Centre. They have all passed an examination of the reproductive organs and structural assessment.
- Semen Tested
- J-BAS 6

Sale Preparation

Bulls have been prepared for sale on Pasture, Silage and Hay with no grain supplementation or hoof trimming.

Sire Verification

Any bull requiring transfer on the Charolais database will have a sire verification done at no cost to the purchaser.

Agents Rebate

All agents are entitled to a 3% rebate. To qualify they must introduce their client to Rangan Charolais no later than 5pm on the day prior to sale by text or email (preferred) and must settle within 7 days of date of invoice. This clause will be strictly adhered to.

Disclaimer: Any persons entering this property for any purpose what so ever including the attendance at cattle auctions do so at their own risk. We are not liable to you for any personal injury or death suffered by you and for the theft, loss or damage to any property caused or contributed to by us or by negligence deliberate act or unlawful conduct. "We" or "us" or "our" refer to the owners their employees contractors or agents and each of them. Whilst all care and attention has been paid to the accuracy in the compilation of this catalogue, neither the vendor nor the agents or representatives thereof assume any responsibility whatsoever for the correctness use or interpretation of the information included in this sale catalogue.

Rangan Charolais Guarantee

In the event of a bull proving to be infertile or incapable of natural service in the 12 months from sale date, the vendor will offer to supply a suitable replacement if available, or credit the purchase price to be used at the next sale, less any salvage value of the bull provided the problem is not caused by injury or disease contracted since delivery. Any claim must be accompanied by a relevant Veterinary Certificate. We also offer a two year structural warranty, please see Graeme Cook for details.

Transport

Bulls will be transported free of charge to major selling centre's within 300km of Rangan Park and where possible delivered direct on farm.

For all your cattle transport requirements please contact:

- Joe Wilton: 0408 739 559

Remember it is extremely important on arrival at your property to have a few steers or cows in the yards to help your new investment settle in.

Catering

Complimentary morning tea and light lunch will be provided.

Insurance

We recommend that you insure your new investment for transit and loss of use insurance for the first breeding season. Please see selling agents for any insurance requirements.

Independent Assessment

As part of our quality assurance programme, Rangan Charolais has contracted Liam Cardile of **BEEFXCEL** to carry out independent structural and temperament assessments of all our sale lots.

BEEFXCEL's assessments will be available on sale day.

BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry.

Over the past decade, use of the Beef Class Structural Assessment System in the seedstock industry has produced a marked improvement in herds which have shown commitment to using the information appropriately. Through these dedicated breeders, there has been a flow on affect of structural improvement through out all sectors of the beef cattle industry.

Liam Cardile of **BEEFXCEL** service many of the leading seedstock herds in Australia. **BEEFXCEL** is not involved in any genetic marketing or specific breeding advice and therefore has no conflict of interests to influence their stock appraisal. The integrity of the structural data provided by **BEEFXCEL** is recognised throughout the industry as Liam is a fully INDEPENDENT assessor.

Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system;

- A score of 5 is ideal. (Note: Temperament Score of 1 is preferable)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal.
- A score of 2 or 8 are low scoring animals and should be looked closely before purchasing.
- A score of 1 or 9 should not be catalogued and are considered culls.

Or Call **Liam Cardile** on 0409 572 570 (*Pictured below left*)

Rangan Charolais STRUCTURAL PROGRAM:

The 2020 'Rangan Charolais' Sale Bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft.

Liam Cardile - BEEFXCEL Assessor

The Beef Class Structural Assessment System - scoring diagram

Estimated Breeding Values (EBVs)

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

CE % Dir = Direct Calving Ease - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination & hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length & therefore easier calving & increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic

differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Domestic Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430 kg (240 kg HSCW and 6 mm P8 fat depth) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Export Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (eg Angus) targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700 kg (380 kg HSCW and 9 mm P8 fat depth) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

For further information, contact the Charolais Society (02 6771 1666)

or Charolais BREEDPLAN (02 6773 3059).

Traits Observed: GL, CE, BWT, 200WT, 400WT, SS, FAT, EMA, IMF

Notes: **Breed top 1% milk, top 5% calving ease, domestic & export index, top 10% low birthweight, scrotal & IMF.** P138 is a very nice bull to start our 2020 sale. A quiet bull that has a bit of extra frame to carry those extra kilograms to sale day. Plenty of growth in a very attractive bull that does catch your eye in the bull pens.

Purchaser Price \$

Traits Observed: BWT, 200WT, 400WT, SS, F AT, EMA, IMF

Notes: **Breed top 5% IMF, top 10% 400d weight & top 20% 200d weight.** Polled and red, just a very good bull. A bull whose full sibling's achievements are worth looking into. A full ET brother, E42 after selling for \$15000 in our 2011 on-property sale went on to win equal Champion of Champions at the 2011 EKKA and has bred fantastically well for the Liberty stud in WA who purchased a semen share in the bull. Redemption E42 has bred Perth Royal champions, record sale topping bulls and now his sons and daughters are featuring heavily in Liberty's genetics. Two of his full sisters have been awarded Supreme Charolais Exhibit at the Royal Melbourne show including G84 who took out the award in the Charolais Feature breed show. This bull Redemption P117 is well worth a close inspection and we wish the purchaser as much success as we have had with this genetic line.

Notes: **Breed top 10% 400d weight, carcass weight, EMA & retail yield.** Percy would be one of the most eye-appealing bulls we have ever bred. The way he stands on a great set of feet & legs, to the way he carries his head. Plenty of muscle with a very good topline. Percy was the Junior Champion Charolais Bull at the 2019 Royal Melbourne Show and you will probably be able to quickly see why. His dam is one of our very best young matrons who herself is sired by the super consistent Pinay/Showgirl F21 bull. She is a cow we are hoping to send to represent our stud at the 2020 Brisbane Ekka, which is hosting the Charolais World Congress.

Traits Observed: GL, CE, BWT, 200WT, 400WT, SS, FAT, EMA, IMF

Notes: **Breed top 1% IMF, top 5% milk, domestic & export index, top 10% calving ease, low birthweight, 400d weight & carcass weight.** Again one of those curve bending low birthweight bulls that make it to breed top 10% yearling weight. Light calves born easily & then grow & finish are what make commercial producers money. P125 is a thick made bull with a strong topline.

Traits Observed: GL, CE, BWT, 200WT, 400WT, SS, FAT, EMA, IMF

Notes: **Breed top 1% IMF, top 2% gestation length, EMA, domestic & export index, top 5% low birthweight.** Again great calving ease with above average growth, big eye muscle & IMF scans. We used Rangan L84 over stud heifers to calve at 2yo with great results, it was interesting that all the L84's had finished hitting the ground before another bull had even started, this information has led to him having breed leading gestation length EBV's which are important not only for calving ease but allowing females to re-breed quicker.

Traits Observed: GL, CE, BWT, 200WT, 400WT, SS, FAT, EMA, IMF

Notes: **Breed top 2% calving ease & milk, top 5% gestation length, low birthweight & domestic index, top 10% rump fat & IMF.** What a lovely stylish front paddock bull to be the last bull in this year's sale. You can see from his image that he is quite an impressive young bull. Smooth made on a medium frame with nice clean shoulders and a great neck extension.
