## SHORTHORNS

**ANNUAL BULL SALE • 2020**

Lot 7 Belmore Quinn P64

**47 Performance Recorded Shorthorn Bulls  
With Bayview and Carlton**

**Thursday 30th April 2020**

**Sale commencing at 12.30pm (SA time)**

at Stoney Point Sale Complex

11 kms west of Naracoorte on the Lucindale Road

**Lot 15** Belmore Drover P294

**Lot 16** Belmore Drover P316

**Lot 20** Belmore Quantum P254

**Lot 21** Belmore Larrikin P342

**Lot 23** Belmore Juggler P248

**Lot 25** Bayview Austin P104

**Lot 26** Bayview Wagner P75

**Lot 27** Bayview Commissioner P89

## S H O R T H O R N S

## Belmore's 7th Annual Bull Sale

### 47 Performance Recorded Shorthorn Bulls

Including:

39 Belmore bulls (EXMOOR GRAZING CO.)

5 Bayview bulls (H G THOMPSON & SONS)

3 Carlton bulls (CARLTON NITSCHKE INVESTMENTS P/L)

**Thursday 30th April 2020**

**Sale commencing at 12.30pm (ACST)**

SALE LOCATION:

**Stoney Point Sale Complex**

11 kms west of Naracoorte, SA, on the Lucindale Road  
(see page 28 for map)

Please bring this catalogue with you to the sale.

## Welcome

As I write this welcome letter we are wondering what form our 7th Annual Bull Sale will take. We're booked in with AuctionsPlus to alleviate some of the uncertainty surrounding travel at this time. We welcome inspections of our bulls at home leading up to our sale or at the sale complex on the day. We will do everything we can to video bulls and have already photographed every bull, please see insert.

This year's draft of bulls are very even in type and considering the hard year they had as weaners have done exceptionally well. Except for the 3 bulls shown at RAS 2019 they have all been raised purely on average pasture until January this year. They received no supplementary feed at all during last Autumn/Winter. All the bulls are prepared under the Zoetis Star Program and tested BVDV free. They've recently received 2 Pestiguard and Vibriovax vaccinations plus their 7in1 booster. All bulls are being semen tested and checked for soundness by Dr Tony Tully BVSc. All bulls are J-BAS 8+ and are free to travel to Western Australia.

The bulls for sale this year have several new bloodlines representing the first sons of 3 sires; Eloora Fortress L19 purchased for \$17,000 at Naracoorte, Wynyard Larrikin L114 purchased for \$14,000 at Dubbo and Royalla Tsar M27 equal top-price as a yearling at Royalla. We have some of the best sons to date from two retired sires Belmore Patriarch F102 and SPJ E-Cup E05 in their last season.

JBS have gone from strength to strength with their Thousand Guineas brand which due to incredible demand in Japan and Korea has seen domestic supply limited for the restaurant market. Restaurants such as the Pink Pig in North Adelaide just love the product, its flavour, texture and tenderness and are a wonderful example of how this specially branded Shorthorn beef is experienced by customers.

We have always strived to breed functional, structurally sound cattle with a good muscle pattern and even fat cover. A good percentage of our bulls this year have positive figures for fat cover. We believe this draft of bulls phenotypically match these breeding principles.

Our agents are well acquainted with our cattle and placed to advise on any bulls. We recommend you contact Nutrien's Naracoorte Manager Richard Jennings or Stud Stock's Richard Miller and Gordon Wood, and from Elders auctioneer Tony Weatherall, Stud Stock's Tom Penna or Naracoorte Manager Tom Dennis.

We will do our very best to help with any further information you may require. The beef market is at near record levels and there has never been a better time to trade in old bulls and invest in sound industry leading genetics backed by our guarantee.

Welcome to our 2020 Bull Sale in whichever way you may choose to participate; AuctionsPlus, phone or in person.

Yours sincerely,  
**Andy Withers**

# Carlton Shorthorns

Carlton Shorthorns is an extensive seed stock and backgrounding operation owned by John and Lyn Nitschke. Carlton spans over three properties from Hahndorf in the Adelaide Hills to Padthaway in the South East of South Australia.

At Carlton we aim to produce moderately framed, production-efficient bulls and females that are fertile, structurally sound and docile with market appeal. We have had many successes over the years in the show ring and carcass competitions, with highlights such as the 2015 and 2016 Supreme Champion Shorthorn Exhibit at the Royal Adelaide Show in succession.

Our commercial cattle operation in the south east of South Australia allows us to benchmark our sire within the herd. Through this benchmarking of our own bred sires we can see how our product is performing with the use of valuable tools such as ema and fat scanning, steer and heifer carcass feedback reports. We are proud supporters of the Shorthorn Branded Beef product "Thousand Guineas". Selling over 200 purebred commercial steers annually. Through direct contact with our purchaser we gain valuable feedback about our product which allows us to monitor our progression and performance of our herd.

Carlton cattle both commercial and stud are put through strict visual assessment annually, classing from 200 days through to 600 days of age allowing us to maintain a high level of consistency and performance within our herd. Carlton females are selected upon maternal abilities as well as structure and temperament. Carlton pregnancy tests annually on all breeding females to ensure fertility and maternal consistency is maintained. Carlton bulls are the backbone to our operation. A high level of importance is placed upon breeding bulls that have mobility, structure and overall performance that can increase profit drivers for the operation including muscle, fat cover and yield. Carlton is also a proud supporter of livestock biosecurity with a current JBAS status of 8 points.

We welcome you to inspect the fine line up of production efficient bulls for the 2020 Annual Belmore Sale.

# Bayview

Bayview will once again be offering a selection of genetics that are a cross section of our breeding program. Our cattle operation is run by Chris and Anissa Thompson and consists of 150 breeding cows on the Yorke Peninsula with a vast array of different soil types ranging from limestone flats to grey rises. These conditions allow us to maintain a herd that is self-sufficient and productive even during the harshest times which we have experienced over the last few years.

Our focus is to produce moderately framed cattle with mid maturity patterns that are efficient and fertile. All our cattle are subject to fertility and scan testing along with visual assessment for soundness. Our success is second to none in the Show and Sale ring with numerous Champion ribbons and Sale toppers produced year in year out, and commercial clients that become repeat buyers of our cattle.

Our genetics are now being sought overseas with semen being exported to NZ, UK and Canada as well as throughout every state in Australia. The majority of our team we have presented at Belmore are by new sires Glengyron Legacy & Nagol Park ELMT Logo L227. Both these sires have stamped their authority at Bayview and we are very pleased to offer their genetics for sale. I have always been a strong believer that the decisions you make now will influence your profitability in the future.

We would like to thank the Belmore family for allowing us to offer our genetics at this Sale. Information on these bulls can be viewed on our website or feel free to contact me for more information. We wish you all the best with your purchases.

Bayview is JBAS 8.

## Sale Terms and Conditions and Freight

Elders and Landmark are the selling agents. The sale will operate under the usual terms and conditions of livestock auction sales. All lots will be sold exclusive of GST. Bulls are at the purchaser's risk from the fall of the hammer. We recommend all bulls be insured.

**Inspection:** Bulls can be inspected prior to sale, by arrangement with the Vendor or Selling Agents or on sale day from 10am. All inspections will be in line with up to date COVID19 Government regulations. Please contact the Vendor or Selling Agents for video footage of Lots prior to the sale.

**Rebate:** An outside agent rebate of 3% will be offered to agents introducing buyers in writing to the selling agent within 24 hours prior to the sale and settling within 7 days.

**AuctionsPlus:** This sale is interfaced with AuctionsPlus. This will allow remote bidders to operate in the sale from their location via a smart phone, tablet or computer. Prospective bidders must register at least 24 hours prior to the sale with AuctionsPlus at [www.auctionsplus.com.au](http://www.auctionsplus.com.au).

**Phone orders:** Mobile phones operate successfully at the sale venue. If you are unable to attend the auction we encourage you to make arrangements with the Selling Agents or Vendor if you wish to be contacted during the sale to place bids. Please make arrangements at least 48 hours before the sale.

**Health:** All herds have a J-BAS 8+ score. All bulls have been vet and semen checked. Bulls have been vaccinated with 7in1, Vibriovax & Pestiguard as per Zoetis STAR program.

**Bull guarantee:** All bulls are guaranteed to be breeders with the exception of:

- a) In the event of injury or disease that occurs to the animal after the sale
- b) Gross negligence or wilful misconduct on the part of the purchaser.

Any complaint must be lodged in writing with a relevant Veterinary Certificate within 6 months of the Sale direct to the vendor.

**Transport:** The vendors will provide free delivery of all bulls sold in to SA, Vic, South Western NSW and to Finley NSW. Where vendor considers sufficient numbers, delivery will be provided to Dubbo. We recommend Dick Smith or Falls Transport for connections from these locations.

**Accommodation:** For recommendations please contact the selling agents or vendors.

Country Roads Motor Inn: 08 8762 3900

Naracoorte Hotel-Motel: 08 8762 0022

Bushman's Arms Hotel: 08 8762 2100

William McIntosh Motor Lodge: 08 8762 1644

**Catering:** A decision on catering will be made 24 hours before the sale in line with up to date COVID19 Government regulations. Please ensure strict hygiene practices and social distancing guidelines are adhered to at all times.

**Safety Disclaimer:** The owners, employees & representatives of the Vendors accept no liability for any accidents that may occur at the Stoney Point Sale Complex. Although such occurrences are rare, any persons attending Belmore's Annual Bull Sale do so at their own risk.

Animals offered for sale are known to be of quiet temperament under normal conditions, but sale day is not considered to be 'normal conditions'. Please do not crowd the animals. Please use common sense and be alert, taking note of your surroundings and safety at all times.

**Sale catalogue disclaimer:** Age is listed as at time of printing. All reasonable care has been taken by the vendors to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendors, selling agents or publisher make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in the catalogue.

# EBV Reference Guide

Estimated Breeding Values (EBVs) are the best estimate of an animal's genetic merit, for that trait, half of which will be passed on to its progeny.

## CALVING EASE

Calving Ease is based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**CE DIR (%):** Direct Calving Ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

**CE DTRS (%):** Daughters' Calving Ease indicates how easily that sire's daughters will calve at two years of age.

## BIRTH

**GL (days):** Gestation Length is based on AI records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

**BWT (kg):** Birth Weight is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

## GROWTH

**200 (kg):** 200 Day Weight is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400 (kg):** 400 Day Weight is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600 (kg):** 600 Day Weight is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**MWT (kg):** Mature Cow Weight is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

**Milk (kg):** Milk is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves.

## FERTILITY

**Scrotal Size (cm):** is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. SS is positively associated with female fertility.

**DC (days):** Days to Calving EBVs estimates genetic differences between animals in the time from the start of the joining period until subsequent calving. DC EBVs are expressed in days and calculated from the joining records submitted for both heifers and mature cows. Lower, or more negative, DC EBVs are generally more favourable. Eg. a bull with a DC EBV of -5 days would be expected to produce daughters that conceive earlier in the joining period than those of a bull with a DC EBV of +5 days. Females with shorter DC EBVs also tend to show early puberty and return to oestrous earlier after calving.

## CARCASE

**CWT (kg):** Carcase Weight is an indicator of the genetic differences in carcase weight at the standard age of 650 days.

**EMA (sq cm):** Eye Muscle estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcase. More positive EBVs indicate better muscling on animals.

**RIB & RUMP (mm):** Rib and Rump fat estimates the genetic differences in fat cover at the 12/13th rib & P8 rump sites in a 300kg dressed carcase. More positive EBV's indicate more positive subcutaneous fat and earlier maturity.

**RBV (%):** Retail Beef Yield indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcase. Larger EBVs are expected to produce progeny with higher yielding carcasses.

**IMF (%):** Intramuscular Fat is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcase. Depending on market targets, larger more positive values are generally more favourable.

## SELECTION INDICES

**DOM \$:** Domestic Maternal Index estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in a temperate environment targeting pasture grown and finished steers for the domestic trade (eg. supermarket). Steers are marketed at 480 kg live weight (260 kg HSCW and 10 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding.

**EXP \$:** Export Maternal Index estimates genetic differences between animals in net profitability per cow joined (eg. self-replacing commercial herd in a temperate environment targeting steers for the Japanese B3 market). Steers are assumed to be pasture grown to feedlot entry then feedlot finished for 150 days. Steers are assumed to be marketed to the feedlot at 450 kg live weight, and then slaughtered after finishing at 675 kg live weight (370kg HSCW).

**NM \$:** Northern Maternal Index estimates the genetic differences between animals in net profitability per cow joined eg. commercial herd in northern Australia (eg Brahman, Droughtmaster or Santa Gertrudis cows) targeting the export trade. Steers are finished on grass and marketed at 600 kg live weight (320 kg HSCW and 10 mm P8fat depth) at 28 months of age. Daughters are retained for breeding.

## ACCURACY

**ACC (%):** is based on the amount of performance information available on the animal and its close relatives. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

**Less than 50%:** Low accuracy

**50-74%:** Medium accuracy. Usually based on the animal's own records & pedigree.

**75-90%:** Medium-high accuracy. Some progeny information included.

**More than 90%:** High accuracy. Estimate of animal's true breeding value.

**For further information on EBV's visit:**

# STAR BREEDER PROGRAM

## BUY WITH CONFIDENCE

### Belmore Shorthorns Annual Bull Sale

Stoney Point Sale Complex, Naracoorte, SA  
Thursday April 30<sup>th</sup> 2020

All bulls at the sale will be STAR BREEDER program accredited. This program aims to maximise the reproductive integrity and health of stud stock.

### 39 Shorthorn Bulls

Each STAR BREEDER certified animal at the sale has been:

J-BAS 8+  
Vet Checked  
Semen Tested  
Group Breedplan  
Zoetis Star Certified

- ✓ Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals
- ✓ **Vaccinated against Pestivirus (BVDV)** to ensure they are protected from the effects of this infection
- ✓ **Vaccinated against Leptospirosis**, a reproductive disease and potential WH&S risk for cattle handlers
- ✓ **Vaccinated against Vibriosis**, a sexually transmitted cattle disease

You can be confident that every step has been taken to ensure these animals presented for sale will not introduce preventable reproductive diseases into your herd.

Your Zoetis Cattle Representative is:

For more information talk to your Zoetis Cattle Representative, call **1800 963 847** or visit [starprogram.com.au](http://starprogram.com.au)
