# Welcome to Leawood Angus

Welcome to our 2020 Autumn bull sale.

After a devastating couple of months in the east Gippsland area from fires on the back of consecutive years of drought. It's great to see things are looking up with late summer rains and a cooler autumn feel about the environment.

We have catalogued 34 bulls, with a large influence of fresh New Zealand genetics in the sale line up, An extensive fixed time AI program was undertaken to fast track these sires including Stern 15815 who sold to Tangihaua Stud for \$48,000 in 2017, we are extremely pleased with 15815 progeny, Rangatira Mack was the standout bull on visit in New Zealand three years ago and was the highest priced bull in NZ that year, Mack was bought back by Rangatira last year. Kaharau Class 790 is a highly used and proven sire threw out the NZ Angus industry, Class is best suited to go over cows.

All Sale bulls have had two shots of Vibrovax and Pestiguard with annual booster required in 12mths time along with 7in1. This year at Leawood we conducted semen morphology tests on all sale bulls which required each bull to be collected and semen sent off to a laboratory to be analyzed, this backs up our full confidence on the fertility of each bull.

We look forward to talking to you on the day!

## Leawood Angus Bull Registration

Many hours have been spent on the computer in the past few years, due to clients request for Leawood bulls to be registered. The registration process hasn't been easy and not finished yet. All bulls have their current registration status included, HBR and APR Registered bulls progeny are able to be sold into the ever expanding export industry.

Bulls with COM are not currently eligible. We ask our clients to let the Nutrien office staff know on sale day if you wish to have your new bull transferred. If you have any enquires on registrations please don't hesitate to talk to us on sale day or earlier by phone.

Adam Sutton – 0407 714 689

# LEAWOOD ANGUS History

Leawood Angus was established in 1944 at its current location Princes Highway, Flynn. By Roy and Joan who purchased registered females from various herds including Martinadale Beauty-Lavender, Sarum Kay (QLD), Bontharambo, Booroomooka, Hazeldean, Pine Grove, and a 15-month-old heifer Valley Pacis Vanilla from Kahlua Stud dispersal of Sir Kinsley Newell of Shorham. Vanilla developed into a top cow producing many heifer calves and today her descendants comprise approximately 80% of the herd.

Leawood was one of the first studs to import cattle from New Zealand in 1969 when the embargo on imports was lifted. This began a long connection with New Zealand comprising fourteen bulls and three cows imported and semen rights from twenty other bulls over the years. It is our belief that a herd is only as good as its females and these New Zealand cattle have established a very strong herd for us. Leawood now comprises of four generations and has continued its high standards in sourcing sires and semen from the best available progeny throughout the Angus industry, concentrating on cattle that are fertile, quiet, moderate mature cow weight, good milking, easy calving, high weight gain, and carcass traits that enable us to convert grass into meat on a dry land commercially based program.

We are calving down more than 700 females this year. With the introduction of Luke's youth and enthusiasm over the past few years, we have been travelling around a lot more and finding new progeny to complement our herd with many exciting bull purchases and undergoing extensive AI programs, using outstanding sires from New Zealand and Australia.

The Agricultural industry has many positives at this stage, however conditions continue to challenge us but we believe in our cattle and that they are as easy care as you can get, which they need to be for us and our clients. We invite you to inspect our cattle on property and wish all purchasers much financial return, pleasure and success and under bidder's better luck next time.

Regards the Stuckey family.
