15TH ANNUAL SALE AT
“BIARA” NORTHAMPTON

BIARA

SANTA GERTRUDIS

Stud Sire
Rosevale Monty
M482 (PP)

BIARA SANTA GERTRUDIS

Biara was established in 1976 with the purchase of bulls from Orleans Farms in Esperance. These classified bulls went over an Angus/Hereford/AIS cross herd. Herd grading up was a slow business so cows were purchased from Mt Ty in Queensland, Orleans Farm, Koorabup, Bahloo and Gundamain in WA to hasten the process.

Quality classified bulls have since been purchased from Rosevale, Gylanda, Eidsvold Stn, Yarrawonga, Wave Hill and Kelly Wallah.

Poll cattle have played an important part in our herd with at least 75% of the cows being polled. Future plans will involve these numbers of polled cattle increasing.

Biara's breeding objectives have always been to produce moderate sized cattle with good doing ability, lots of muscle, are fertile and with good early growth figures but are able to grow on as steers. These objectives have enabled our cattle to fit into the export, local and the Jap ox markets and are as important today as the day we started. Our breeding herd is run as a commercial herd with hay the only supplementary feeding during the break of the season. Heifers calve at 2 years of age and cows should calve every year. They are allowed to miss one pregnancy during their life if seasons go against them.

Bull calves are weaned onto stubbles then grazed on oats before being finished on grain for 40 days pre-sale.

We are well aware that too much feed shortens a bulls working life and we are looking for a balance between presentation and presenting fit, fertile and quiet young bulls for sale.

EBVs have been used extensively in our herd and over the last few years and we have come to trust these figures in selecting replacements along with **our strict visual assessment for structural soundness, fertility, doing ability and temperament.** We are now focusing on producing polled bulls for sale by using mostly (PP) sires.

The Hasleby family wish to extend an invitation to attend our on farm bull sale on Tuesday **9 April, 2020.**

We very much look forward to seeing you here.

BIARA

SANTA GERTRUDIS

15th Annual Sale

7 April 2020

Sale commences at 2.30pm

The **Hasleby family** will offer for public auction:

68 Santa Gertrudis bulls (66 polls or scurs)

10 Sangus (Black Santa / Angus)

25 Santa Gertrudis Heifers

12 Sangus Heifers

Wendalla Stud

5 Santa Gertrudis bulls (5 polls)

Pre-sale inspections welcome any time. For further information ring:

Outside Agents:

A 3% rebate will be paid to any outside Agent who introduces **new** clients to the stud. New clients must be notified to Landmark 48 hours before the sale on Biara bulls only. The Agent must accompany and assist their client on the sale day.

NOTES TO BUYERS

Auction Plus - Sale will be streamed on Auction Plus

Semen Test - All bulls will have undergone a motility and morphology semen test. Results on sale day.

Poll Horn Test - Selected bulls have undergone **PP** test

Pic No. - Buyers, please present your Pic No at registration on the day.

Delivery instruction sheet - At the back of the catalogue must be filled in prior to taking delivery of bulls

Sale supplementary sheet

Provided on sale day

Transport

Bulls can be delivered to Coolina if required

Inspection

Bulls will be yarded for inspection by 12.30pm on the day of the sale. Inspection welcomed prior to the sale by appointment.

Health

All bulls receive Vibrio, 7 in 1 and Pestigard vaccinations and tested BVDV negative, prior to sale and as weaners.

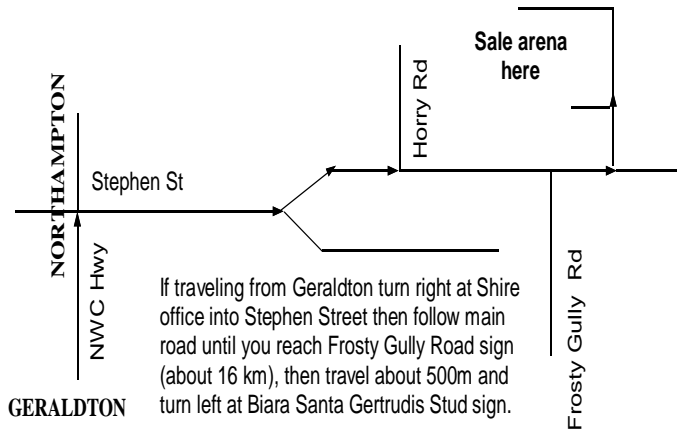

Biara is J-BAS 8 accredited.

Airstrip

Northampton Airstrip is approx 5 kms from Biara farm. Contact John for more details on 9934 1156.

All care is taken that information is correct to the best of our knowledge.

Biara is situated 16km east of Northampton. Map below.

GROUP PLAN EBV'S How to Interpret Them

Notes on Group Breedplan EBVs: BREEDPLAN is a genetic evaluation system for beef cattle that uses all pedigree and performance information known about an animal and its relatives to calculate Estimate breeding Values (EBVs). EBVs are the best estimate of the genetic merit of an animal for each trait measured. **EBVs are free from environmental influences that play a significant part of the observed performance of an animal.** Units of measurement for EBVs depend on the trait; for example, growth traits are in kilograms and fat depth in millimetres.

The GROUP analysis for Santa Gertrudis BREEDPLAN is processed by ABRI (agricultural Business Research Institute) from the integrated pedigree/performance database of the Santa Gertrudis Breeder's (Australia) Association.

NB: GROUP BREEDPLAN EBVs can be compared with animals in other Santa Gertrudis Herds but not with animals in other breeds. It is important when assessing GROUP EBVs of a particular animal, to compare them with the average of the breed. The average of 2013 drop calves is used as the measurement of the current genetic level of the breed.

CURRENT GROUP BREEDPLAN AVERAGE EBVs 2017 CALVES								
200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat
0	+10	+16	+22	+27	+0.9	+2.0	+0.1	-0.2

HOW TO USE EBVs

The first step is to decide what characteristics are important in your breeding program, then select EBVs which fit the bill for your herd. For example, if you are selling 14 month old steers and the last draft you sold could have been heavier without prejudicing your market, then you should look for a bull with a high EBV for 400 day weight.

ARE BULLS WITH NEGATIVE EBVs WORTH BUYING?

Yes. They can be. EBVs are a guide to help in selection – not the only selection criteria you should use.

200 DAY MILK AND GROWTH: The vealer producer should place emphasis on the 200 day growth and milk genes. If the bull is to be used as a terminal sire, growth is most important. If the bull is to be used to breed replacement heifers and superior milking and mothering ability is required, then pay close attention to the EBVs for milk (kg). The estimate in kg milk is not the yield of milk of the dam, but the growth of the calf due to more milk and better mothering in the dam.

400 DAY WEIGHT:

400 Day Weight EBVs are a measure of the animal's ability to grow to 400 days of age (can be measured from 301-500 days). It should be used by producers who wish to turn off yearling cattle.

600 DAY WEIGHT:

600 Day Weight EBVs are computed for growth to 600 days of age (can be measured at 501-900 days of age). In production systems for heavy steers, this is important. It is the best prediction of an animal's ability to grow on to maturity.

ACCURACY:

An accuracy on EBVs gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the less the animal's EBV are likely to change as more information is analysed for that animal and its relatives.

SEMEN TESTED BULLS

Biara is focused on presenting functional, fertile bulls so all bulls have been assessed for semen **morphology** quality and results will be on our supplementary sheets on sale day. We believe that morphology plays a major part of overall herd fertility. Morphology of the sperm cell is now recognised as the most important measure of fertility in a bull. Results of the Bull Power Project showed that higher percent normal sperm of a bull was the trait most correlated to higher calf output. In addition, research is showing that percent normal sperm is correlated to the future reproduction performance of both male and female progeny.

HORN- POLL TEST

In our quest to produce polled bulls, we are now using 6 (PP) bulls as sires as well as 25 sale bulls that have passed a homozygous **(PP)** test this year, meaning that it is likely that 98% of their offspring will be polled. These will be recognised with a **(PP)** behind their name in this catalogue.

SIRES OF SALE BULLS

Biara 8102 (P)

Sire: Tyndale Noddy (P)
Rosevale Noddy 588 (P)
Rosevale Jade

Dam: Eidsvold Stn T104
Biara 5040 (P)
Biara 830 (P)

GROUP BREEDPLAN FIGURES

200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat

58%	90%	89%	86%	77%	89%	55%	47%	44%

\$ index value - Domestic +14 Export +17

Remarks: 8102 was used over commercial hfrs then injured himself, but has fully recovered and grown into a massive bull as his figures suggest. He has great fleshing with the ability to lay down fat and is a very good doer. His calves are impressing us with their growth, coat type, softness and mostly polled.

Rosevale Crackerjack F334 (P)

Sire: Gyranada Crackerjack
Whightfields Crackerjack C75 (PS)
Whitefields N40 (P)

Dam: Kelly Wallah Commodus
Rosevale Freda A325
Rosevale Freda V203(P)

\$ index value - Domestic +12 Export +13

Remarks: Rosevale Crackerjack provides us with a complete package, muscle, very correct, good constitution, quiet, good coat type, finishing ability and good sheath.

**BIARA SANTA GERTRUDIS
EASYDOING, FERTILE FUNCTIONING
BULLS THAT PERFORM**

Gyranda Kenny K 592 (PS)

Sire: Raytek Democrat (P)
Rosevale Democrat (P)
 Rosevale Honey Y165 (P)

Dam: Strathmore Warden(P)
Gyranda F445 (P)
 Gyranda Z 303

GROUP BREEDPLAN FIGURES								
200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat
-4	+18	+18	+27	+35	+2.0	+3.9	+0.3	-0.2
43%	62%	60%	60%	63%	50%	45%	47%	47%
\$ index value - Domestic +21						Export + 24		

Remarks: Gyranda Kenny (P) was purchased in 2015 for \$13000. He is the bull we were hoping to find - moderate frame, very thick and wide, very good sheath & testes, good slick coat and very quiet. He is the bull we feel we can put over any cow we have to get a worthwhile progeny that fits our criteria We have weaners now, and can see that they are a carbon copy of Kenny, **very impressive.**

Rosevale Monty M 482 (PP)

Sire: Strathmore F672 (P)
Rosevale Jackaroo (P)
 Rosevale Harmony (P)
 Rosevale Bullion (P)

Dam: **Rosevale Swan (P)**
 Rosevale Swan(P)

GROUP BREEDPLAN FIGURES								
200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat
-3	+19	+35	+47	+40	+3.6	+3.8	+1.1	+0.9
33%	66%	67%	68%	63%	86%	50%	59%	57%
\$ index value - Domestic +24						Export +27		

Remarks: Rosevale Monty (P) was purchased in 2017 for \$42000 and is a PP bull meaning 98% of his progeny will be polled, a trait we were looking for, alongside of 85% morphology semen and a perfect sheath. Monty is a slightly later maturing bull as his figures suggest but comes in a package that suits us, dark red colour and shiny coat, lots of breed character, perfect feet and legs and is very thick with the ability to finish or to lay down fat. A bull we think will leave a lot of good females as well as many good sale bulls.

Biara 9104 (P)

Biara 9104 was sold to the Della Gola family in the 2011 Biara sale but they thought so much of him they convinced us to buy him back as an older bull. He gives us a package of a dark red polled animal that has lots of volume, real good doing ability and is a soft well muscled bull.

BIARA SALE BULLS

*Having our own on property sale has allowed us to **not** target a sale weight or compete for the heaviest bulls in a multi sale, so our sale bulls are not pushed with grain and if seasons are not good then bulls will be lighter but will have enough finish on them to show their attributes. Biara is all about breeding functional, fertile bulls that are treated much the same as any commercial animal. We are very aware that a big grain ration will shorten a bulls working life and we want our bulls capable of lasting 2-3 times more than the average working life of a bull.*

FUTURE SIRES

Greenup Mandate M330 (P)

Sire: Danderfield Patrol Chief
Dangerfield Tycoon (P)
Dangerfield 5337 (P)
Warenda D656(P)
Dam: Greenup Hindu (P)
Greenup E 131

GROUP BREEDPLAN FIGURES

200D Milk	200D Wgt	400D Wgt	600D Wgt	Mat Wgt	SS	EMA	Rib Fat	Rump Fat
+1	+17	+31	+32	+38	+0.6	+4.1	-0.1	-0.1
43%	57%	55%	53%		53%	40%	44%	43%

\$ index value - Domestic +27 Export +23

Remarks: Greenup Mandate (P) Purchased for \$13500 in 2017 is a son of Dangerfield Tycoon (P), a bull with tremendous constitution, temperament, volume and muscle and we feel he has passed it onto Mandate. His sheath is a little larger than we like but it comes with looseness all over (breed character) that we think will enhance our herd if we mate him to our extreme navelled cows plus having perfect feet, lots of muscle, doing ability and 85% morphology he will be at home in the Biara herd.

Rosevale Nautical N20 (PP)

Sire: Strathmore F672 (P)
 Rosevale Jackaroo J566 (P)
 Rosevale Harmony F219 (P)

Dam: Rosevale Frontier F584 (P)
 Rosevale Wahoo K201 (P)
 Rosevale Wahoo A403 (P)

GROUP BREEDPLAN FIGURES

200D Milk	200D Wgt	400D Wgt	600D W	Mat Wgt	SS	EMA	Rib Fat	Rump Fat

41%	67%	68%	69%		69%	53%	60%	59%

\$ index value - Domestic +18 Export +24

Remarks: **Nautical** was purchased for \$34000 in 2018 from Rosevale o upgrade our sire battery to (PP) bulls. He is a very deceptively heavy bull, very well balanced, soft, very quiet, dark red, with a sheath to improve any herd and is a bull who is always fat. He is a very good doing bull as evidenced by his fat figures. All this in a moderate frame with EBV's to back up his raw data and very good fertility data. Looking forward to progeny from this impressive tropical young sire.

\$ index value - Domestic +15 Export +11

Remarks: Rosevale Ontario (PP) appealed to us for his very correct structure, homozygous poll, docile nature, sire appeal, neat sheath, softness and moderate frame. Even though his figures are a little behind we feel certain he will make an impact in our quest to add more doing ability, quietness and softness into our herd.

Rowenlea Atomic A02 (P)

Thickset, dark sleek coated, good sheathed bull that we have admired for some time.

Rosevale Jethro (P)

A bull that gives us **fertility and temperament plus** ,and still has a body and finishing ability to enhance the herd for years to come.

Rosevale Maverick M102 (P)

A son of Jethro (P) who has DTC ebv of -19.3 in top 1% so potentially one of the most **fertile** bulls going around in a package that every herd should have. Polled, sheath improver, moderate frame, quiet, slick coat, good muscle, good fat cover, morphology of 95% and is a thick compact bull that will meet most markets.

FUTURE AI SIRE

Rosevale Majestic M176 (P)

A son of Jackaroo (P) that gives us a clean coated, clean sheathed, quiet, well muscled, thick animal that has huge growth figures.

Rosevale Jackaroo J566 (P)

Rosevale Jackaroo is one of the most sought after sires, in Australia at the moment. We have used him this year for AI and have 15 embryo's from an ET program with our best cows. Calves are on the ground and they have not disappointed us.

BIARA BLACK SANGUS

Biara has embarked upon a programme to supply the market with a black bull that has some Bos Indicus characteristics. We propose to keep these animals at 50% Santa Gertrudis and 50% Angus. To get to this point we purchased 15 females from Moordalup Stud and use our own stud Santa bulls. The resulting male progeny you can see here today.

Our aim is to breed animals that combine the best qualities of both the Santa and Angus breeds- namely carcass, marbling, market acceptability from the Angus and slick coat, weight gain and structural soundness from the Santa Gertrudis.

If we can get some of these attributes in some of the cattle we will feel that we are on the right track.

★ STAR BREEDER PROGRAM

BUY WITH CONFIDENCE

The STAR BREEDER program aims to maximise the reproductive integrity and health of stud and commercial stock.

A STAR BREEDER certified animal has been:

- ✓ Tested to show that they are not Bovine Viral Diarrhoea Virus (BVDV) Persistently Infected (PI) animals
- ✓ Vaccinated against Pestivirus (BVDV) to ensure they are protected from the effects of this infection
- ✓ Vaccinated against Leptospirosis, a reproductive disease and potential WH&S risk for cattle handlers
- ✓ Vaccinated against Vibriosis, a sexually transmitted cattle disease

You can be confident that every step has been taken to ensure these animals will not introduce preventable reproductive diseases into your herd. For more information talk to your Zoetis Cattle Representative, call **1800 963 847** or visit starprogram.com.au

Zoetis is proud to support Santa Getrudis breeders. We encourage all members to look for and support the Star Breeder Program.

WENDALLA SANTA GERTRUDIS STUD, BOLGART

Wendalla Principal, Wendy Gould, thanks the Hasleby family for the opportunity to again participate in their annual Biara Santa Gertrudis on-property sale and will this year offer a team of five polled, classified S bulls.

All bulls have been semen motility and morphology tested (and tested BVDV negative) through Landmark Breeding Services and vaccinated with Vibrovax, Ultravac 7in1 and Pestigard.

Apart from some hay through the summer dry, the only supplementary feed these Wendalla bulls have had at any stage through their life is pellets for 7 weeks pre-sale.

Wendalla is J-BAS 8 accredited.
