Brian Kennedy 0427 844 047

Tamworth Office 02 6765 3900

Sale Information

1. OUTSIDE AGENT REBATE

A rebate commission of 3% will be payable to outside agents who introduce prospective clients in person and in writing at the time of buyer registration prior to the Sale, attend the sale and settle on behalf of their clients within seven (7) working days of receipt of invoice.

2. SOCIETY REGISTRATION

All cattle entered in this sale are registered with the Red Angus Society of Australia. Vendors will transfer to purchasers, please indicate your Red Angus Society ident on the Buyers Instruction Sheet. Transfer fees will be the responsibility of the Vendor in accordance with the Red Angus Society of Australia Regulations.

3. HEALTH

Goonoo, GK, Goondoola and Yallambie are J-BAS Score 7. Intending purchasers should make their own investigation for entry of cattle from this sale into their locality.

All animals are tested Pestivirus Negative with written confirmation supporting this.

4. DELIVERY AND TRANSPORT

Delivery will be from each vendors property. Please talk to vendors for freight coordination.

5. CONDITIONS OF SALE FOR INTERSTATE PURCHASE

a. Any animal, purchased for interstate movement, which requires further tests will be forwarded to an approved Quarantine area where appropriate tests will be carried out in compliance with the entry requirements into the destination state. The costs of agistment, transport and health tests are to be borne by the Purchaser of all cattle passing such tests, or by the Vendor should they fail to pass such tests. Payment for cattle to the Vendor will be made within the normal terms of sale whether or not the cattle have been tested for entry into the nominated state.

b. In the event of the cattle failing health tests and sale being cancelled, the Vendor will refund all monies, paid as settlement, for the Purchaser.

6. FERTILITY GUARANTEE

All female animals are to be sold as guaranteed breeders. Where a Purchaser submits a Veterinary Certificate to a Vendor within twelve (12) months of the date of sale stating that a female of joinable age is infertile, and in the Veterinary Surgeon's opinion, she has not suffered since the delivery to the Purchaser, any injury or maltreatment which could have affected its breeding ability, the Vendor is liable to refund the purchase price of the animal in full. This will not apply where an attempt has been made to transfer embryos from the female.

7. SALE INSPECTION

All vendors welcome inspection on farm prior to the sale by appointment.

8. SALE CATALOGUE DISCLAIMER

All reasonable care has been taken by the vendors to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendors or the selling agents make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in
Australia and "Happy Bidding"

-  1 Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
-  2 Click on the "Sign Up" page / link
-  3 Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
-  4 Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
-  5 Click "Register"
-  6 You will then be notified by email that an account has been created

-  7 Once an account has been created you are all "Set to Bid"
-  8 Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
-  9 Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
-  10 The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
-  11 On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.
(There is no need for software download)
-  12 At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

GOONOO RED ANGUS

Ten years ago we calved out our first Goonoo Red Angus calf. A decade on, we can reflect back on the satisfaction of developing a herd that offers predictability, performance and pedigree strength to the Red Angus breed. Although we are relatively newcomers to the Red Angus breed our family has an extensive association with the cattle industry.

The Goonoo Creek Simmental stud achieved considerable success at major industry events and a loyal clientele. Our Simmental dispersal will be remembered as one of the strongest Simmental herd dispersals with lots selling Australia wide at outstanding prices.

The Jordan family was and continues to be involved in the dairy industry although now as a genetic supplier through Peel Valley Genetics. This dairy association forms a strong component of our breeding philosophy on the value of proven female families and maternal attributes.

Extensive research identified the high performance maternal families that we based our herd on. Legendary families such as the GK Dina, Trevone Park Kite and Snoopy, RRA Imp, BST Tullatoola Dutchess and Kansas Goldmine to name a few.

These females have formed a solid foundation for our future development. To ensure we continue to offer industry leading genetics to the Red Angus breed we have recently purchased a half share in an outstanding Canadian female Red Redrich Lexie 133E.

These maternal lines have been individually matched to the best sire lines available. We have invested in securing outcross North American sires such as Red Northline Chuck Norris 305X as well as recognised outstanding local genetics such as walking sire K5X Jackpot J20.

Breed leaders such as Red Fine Line Mulberry 26P are selected to complement our program and animals such as Goonoo Jose Carreras, the grand champion bull at the 2016 Sydney Red Angus Feature show are testament to this.

We use the showing as a promotion window to our program and have achieved tremendous success including Brisbane, Adelaide and Sydney champions as well as at the National Show and Sale. However the driving focus of the Goonoo breeding philosophy will always be the production of Red Angus genetics to enhance and develop profitability for breeders that invest in our breeding program.

We have confidence in the genetics that bear the Goonoo "brand". We are equally as proud of a commercial producer increasing his financial return with progeny of a Goonoo sire as we are winning a Royal show. With a long family involvement in agriculture and the next generation showing interest we are committed to the long haul. We look forward to seeing you at this special sale and if you have any questions please do not hesitate to contact us.

GOONOO RED Magnolia (GSJM16)

Sire: K5X Jackpot J20

“ The question isn't who's going to stop me, it's who is going to stop me? ”
Ayn Rand

Goonoo are proud of the achievements of the youth that have worked with our team over the years.

GK Livestock

The GK Prefix was registered in 1996 with the goal of establishing a quality herd of Red Angus Cattle. Based just outside Dalby on Queensland's Darling Downs, Kirrily's aim remains to breed a select herd of performance red cattle, while retaining the calving ease, meat quality and maternal attributes for which the Angus breed is renowned.

GK is a limited number cow herd that has consistently bred and produced many sale toppers and show winners over the years. Some of the highlights of our herd include breeding the Australian Record priced Red Angus Female in 2016 for GK Red Maple 26 H33 (\$20,500) and the triple Royal Show Interbreed winner in 2012 and trait leader GK 26 Federer F23. Also other major highlights for the stud, included winning the Hordern Trophy in 2012, 2013, 2014 and 2017 and topping it off by winning the Urquhart Trophy in 2017 with GK Red Ruba 26 G40

As emotional and exciting as these wins were for the stud and the breed, I look forward to stepping back a little from the show ring in the future and I will enjoy watching the next wave of keen Red Angus breeders promote this breed like GK has done for the last decade or more.

The last year or so has been very testing for the GK herd, myself and family from both an environmental and personal perspective, but it is with great pride that Jake, Brooke and I present our very select group of female and genetic lots in this sale to fellow Australian Red Angus Breeders.

These lots represent some new and relatively unique genetics and combine years of dedication and an unwavering passion for producing top quality Red Angus seed stock that remain commercially relevant.

I would like to take the opportunity to thank the Jordan family for inviting me to be a guest vendor in The Red Reflections Sale and ask you to join us alongside Goondoola and Yallambee Red Angus for this exciting event on April the 18th.

Regards,
Kirrily

Health & Info on GK lots:

All GK lots are J-Bas 7.

GK has had an annual check test again in March 2020 so cattle are eligible for entry to all states including W.A

Vaccinations include: 7in1, 3 day vacc, Vibrio, Scourshield Pestiguard, and bulls are blooded for Tickfever.

All live lots are PI tested for BVDV

GOONDOOLA RED ANGUS

Goondoola Livestock is a family run operation owned by Paul and Sue Powe along with their daughters Nicole, Hannah and their families. Since its establishment in the early 1980s breeding solely Murray Grey cattle, Goondoola diversified into Red Angus in 2009 and hasn't looked back since.

Goondoola purchased their first Red Angus female, RRA Miss Rumba D2, out of the Sydney Royal All Breeds Sale from RRA Red Angus. Two more females, BST Tullatoola Robin's Doll C104 & BST Tullatoola Gold C13, were purchased privately from BST Tullatoola. At the time we thought these females were pretty special but never thought they would have the huge impact they have had on our breeding program producing numerous champions across the country, including a number of interbreed winners.

Over the years we have sourced outcross genetics from North America to introduce to our breeding program which included purchasing two females from Blairs.Ag in Canada, Red JCC Roxie 20S and Red Blair's Monique 175A. More recently we secured the Australian semen rights in KJHT Power Take Off (PTO).

With small numbers, we aim to produce a quality line up of cattle year in, year out with capacity, performance and longevity, while ensuring our cattle are moderate, easy doing and perform well within both the paddock and the show ring.

YALLAMBEE RED ANGUS

Yallambee Red Angus (YRA) is a progressive new stud in the picturesque Highlands, backing on to the Balanglo State Forest.

YRA is owned by Richard and Lynne Crookes, who purchased the stud, previously known as Wollumbi, in 2015, with a passion for breeding Red Angus cattle.

Our herd is carefully selected by David Croker, who came on board as Stud Manager, with an aim for breeding structurally sound, easy care cattle with an emphasis on phenotype that will meet all market criteria.

The newest addition to the YRA bloodline is Red Northline Revival 122C. Revival combines the genetics of two of Canada's best bloodlines, Red Northline Roby Roy 122K and Red Bar-E-L Kassie 3P. He is a big free moving bull that is structurally correct. We believe he will take the breed forward into the future. YRA has the exclusive semen rights to Revival in Australia and New Zealand.

YRA has carefully selected the top of the P & Q drop heifers for this sale. We are excited to have them on offer today, they truly are females that will have an impact in this industry.

We extend a warm welcome to everybody to visit YRA in the picturesque Southern Highlands. Yallambee has bulls, females, semen and embryos available throughout the year.

For more information please visit our website or contact David Croker.

YOUR *LOCAL* FUEL CO.  

BREEDPLAN

Red Angus GROUP BREEDPLAN EBVs cannot be validly compared to the GROUP BREEDPLAN EBVs for other breeds (including Angus). Only GROUP BREEDPLAN EBVs with Accuracy (Acc) from the same analysis (eg. Red Angus) can be validly compared.

Estimated Breeding Values (EBVs)

An Estimated Breeding Value EBV is an estimate of the genetic value of that particular animal for each trait measured.

Accuracy

An accuracy is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Accuracy below 75% should be considered low.

TRAITS

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

CE % Dir = Direct Calving Ease - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination & hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length & therefore easier calving & increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Red Angus Breed Average EBVs for 2018 Born Calves

	CE DIR	CE DTR	GL	BW	200	400	600	MAT	MILK	SS	CW	EMA	RIB	RUMP	RBY	IMF	\$ INDEX VALUES		
EBV	-1.3	-0.8	-0.7	+2.8	+26	+40	+54	+54	+11	+0.9	+34	+1.2	-0.2	-0.4	+0.6	+0.1	SUP	VLR	NSI
Acc																	+\$35	+\$35	+\$39

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcasse. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcasse. Depending on market targets, larger more positive values are generally more favourable.

Australian Red Angus Selection Indexes

There are currently three different selection indexes calculated by the Red Angus Society of Australia. These are:

Supermarket Index (SUP)

Vealer Index (VLR)

Northern Steer Index (NTH)

Each selection index describes a different production/market scenario and relates to a typical commercial herd in Australia that is targeting the following specifications.

Supermarket Index (SUP) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting the domestic supermarket trade. Steers are either finished on grass or grain (e.g. 70 days). Steers are marketed at 450 kg live weight (250 kg HSCW and 12 mm P8 fat depth) at 15 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.

Vealer Index (VLR) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting vealer production. Vealers are finished on grass and are marketed at 320 kg live weight (180 kg HSCW and 4 mm P8 fat depth) at 9 months of age. Daughters are retained for breeding. No marbling is required.

Northern Steer Index (NTH) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Northern Australia with Bos Indicus cows targeting grass finished steers for export. Steers are marketed at 600 kg live weight (330 kg HSCW and 10 mm P8 fat depth) at 27 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.

All selection indexes are reported as an EBV, in units of relative earning capacity (\$) for a given production/market scenario. They reflect both the short term profit generated by a sire through the sale of his progeny, and the longer term profit generated by his daughters in a self replacing cow herd

32%	51%	31%	49%	49%	43%	40%	+\$47	+\$42	+\$42

Comments: N23 is probably the first Bullseye daughter to come into production in Australia and she is also the last daughter of the magnificent old V116 cow. V116 was the founder of the GK Red Foxy Lady cow family. N23 exhibits superb udder quality, length of body and femininity combined with a very kind temperament. The GK first calvers went through a terribly rough time as pregnant yearlings, but N23 is coming along nicely now that we've got a good seasonal break in Southern Queensland. She sells with a January bull calf at side Sired by Red Lazy Tradition 111C

 WATERFRONT DESIGN
 RED TOWAW INDEED 104H (OSF)
 Dam: GOONOO RED DUTCHESS D7 (AI) GSJD7
 BST TULLATOOLA DUTCHESS X57

Comments: Red Paradise is the heifer that I have selected to be our lead female for the 2020 EKKa. She is smart, and a very good mover. From the Dutchess line of cows from BST that have been a huge success at Goonoo. She was Reserve Junior Champion at both Glen Innes and Guyra Shows 2020. We would love to show her at the 2020 EKKa if her new owners would like that; she is that good. She is unmated, but if she remains with us, we can manage that, our semen tank is available for this purpose.

 Dam: GK RED DINA 240 M29 (AI) (AMF) (NHF) GK M29
 GK RED DINA 23 K29

Comments: At only 6 months on Sale day, Q9 is the first daughter of Assassin to sell in Australia. Q9's dam is from the well known Dina cow family and is a perfect uddered, easy doing daughter of Andras New Direction. This young heifer will hold her own in the show ring and would also make an excellent foundation female to add to your herd. She is typical of the Assassin calves, easy born, plenty of length and capacity, with a lovely temperament.

Comments: Red Fine Line Mulberry 26P (4 Straws each package). One of only two packages of the triple trait leader to be offered by GK in 2020. Mulberry is a breed legend, renowned around the globe for his amazing daughters and consistent producing sons. He is the sire of the Australian record priced female, Maple H33 [\$20,500], triple Royal Interbreed winner and trait leader GK Federer and Urquhart Trophy winner, Ruba 26 G40, along with many other well known progeny.

Comments: Red Cockburn Assassin 624D (6 Straws) Six units of semen in the new outstanding Sire, Assassin 624D. Assassin is a young sire that is breeding well in North America and now in Australia. His progeny are attractive, easy born calves with plenty of power and growth, combined with superb temperament. Assassin is not available on the open market in Australia and semen is very limited.

Comments: Red Lazy MC Tradition 111C (4 Straws each package) Tradition was the Canadian Show bull of the year in 2017 and has gone on to be an excellent producing Sire. GK have some outstanding calves on the ground that will be out and about later in the year. Tradition is proving succesful to use on heifers, but still adds that power and performance required by todays industry. Only 3 packages will be offered in 2020

Hazells
