

The Cattleman's Choice

Outwest Angus

36 BULLS

OUTWEST ANGUS
8th ON PROPERTY SALE

THURSDAY 28th MAY 2020

'Wombalano' Coonamble NSW 2829

WELCOME TO OUTWEST ANGUS

Welcome to our 8th On property bull sale & thank you for your support & continuing interest in our program.

Fortunately there has been a big turn around in the season for many but we realise there are still people struggling with the drought.

Presentation of our bulls this year will be exceptional. Outwest bulls give our clients the opportunity to market their progeny at the top end of the market.

Our selection puts emphasis on economic traits that are important, calving ease, birth weight, growth, fertility, maternal function, carcase & temperament.

We source the top proven genetics available world wide for AI & use our own top young bulls by these AI sires.

AI sires represented in this years sale include, Discovery, Traction, LD Capitalist, Connealy Capitalist, Baldridge Bronc, Deer Valley Patriot & Te Mania Emperor, complemented by the pick of our own Outwest bred sires.

The majority of bulls in the sale are low birth & calving ease bulls suitable for heifer joinings.

All our weaner cattle are weaned into runs & fed pellets & hay. They are handled quietly with horses & dogs, quad bikes & John Deere side by side.

Coola Downs, 28km east of Walcha, has enabled us to spread our climatic risk. 21 inches so far this year. This will significantly complement our Quambone country.

The past few years have been particularly difficult for all of us. We still have 250 registered cows to calve in 2020 to take advantage of markets requiring well bred angus performance genetics.

On the home front, we welcomed our 7th grandchild William John Marshall born to Bindi & Sam in September.

Please contact anytime for further information or to arrange an inspection.

We look forward to seeing you sale day

OUTWEST ANGUS

8th ON PROPERTY SALE

36 BULLS

THURSDAY 28th MAY 2020 at 1pm

On property at

'Wombalano' Coonamble NSW 2829

& interfaced & livestreamed with AuctionsPlus

Disclaimer: Whilst all due care has been paid to accuracy in the compilation of this catalogue, neither the vendor or the selling agents or representative(s) thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

SALE INFORMATION

Inspection: From 10.00 am on sale day Thursday 28th May 2020. Prior inspection welcomed by appointment.

Health: All bulls have been semen tested. Vaccinations for 7 in 1 & Pestigard plus Dectomax on 11th March 2020. Please do not hesitate to contact Outwest if you would like to discuss our breeding & health program including the genetic defect issue.

Breeding Information: Further animal information is available by visiting the online sale catalogue at www.angusaustralia.com.au. Updated supplementary information will be available sale day.

Transfers: All are eligible for transfer by the Angus Society into the buyers name. Please provide name & address details so transfers can be completed.

Delivery: Bulls will be available for delivery immediately after the sale.

Transport: Assistance for buyers will be available, please talk to us to discuss arrangements.

NLIS: Our PIC is NH170610. Please provide your PIC number on registration to facilitate transfers on the NLIS database.

Rebate: 2% rebate will be paid to any agent who introduces a purchaser to Outwest Angus prior to the sale in writing & settles on their behalf in 7 days.

Insurance: There is no vendor insurance on the cattle sold. Buyers are reminded that it is their responsibility from the fall of the hammer to organise insurance. We recommend insurance and will have an agent to organise arrangements on the day.

Selling System: Sale of animals will be conducted under normal auction conditions. We will be using a bid card registration system.

Please note: selling conditions may change on advice from the government with regards to Covid-19.

AuctionsPlus: This sale will be interfaced & live streamed with AuctionsPlus. Please visit www.auctionsplus.com.au for more information.

GST: Will be added at the fall of the hammer to the purchase price. You will be invoiced for purchase price plus GST.

Phone bids: Mobile service is available at Outwest Angus, so phone bids can be accepted please contact us or your agent to arrange this.

Catering: Lunch & refreshments will be available on sale day with compliments of the McLeish family. Please note: selling this may change on advice from the government with regards to Covid-19

Travel Times: from - Coonamble 30 mins - Dubbo 2 hrs - Coonabarabran 2 hrs

Accommodation:

Castlereagh Lodge Motel 02 6822 1999

Coonamble Motel 02 6822 1400

Cypress Motel 02 6822 1788

Public Liability: Any person attending the sale does so at their own risk. All persons attending the sale release the vendor from all actions or demands due to any loss, death, damage or injury occurring on the premises. The vendor is not responsible and has no liability for any death or injury to any person or any loss or, or damages to any person attending the sale, their property or otherwise.

Indemnity: All persons attending the sale agree to indemnify the vendor from and against any liability, loss, damage, expense or claim which the vendor may incur, including to a third party, before, during or after the sale in all respects.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

Estimated Breeding Values (EBVs) are predictions of an animal's genetic merit, based on available performance data on the individual and its relatives.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences from the breed base. As the breed base is set to a historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic change within the breed. The current breed averages are shown below. These averages provide a useful benchmark for comparing EBVs for animals.

CALVING EASE TRAITS

Calving Ease (DIR): estimate of genetic differences among animals in the ability of their calves from 2 year old heifers to be born unassisted. Higher, more +ive, Calving Ease (DIR) EBVs are more favourable.

Calving Ease (DTRS): estimates of genetic differences among animals in the ability of their 2 year old daughters to calve without assistance. Higher, more +ive, Calving Ease (DTRS) EBVs are more favourable.

Gestation Length: estimate of genetic differences among animals in the number of days from the date of conception until the calf birth date. Lower, or more -ive, Gestation Length EBVs are generally more favourable.

Birth Wt: estimate of genetic differences between animals in kg of calf birth weight. Calf birth weight is the biggest contributing factor causing calving difficulty in heifers. While low Birth Wt EBVs are favoured for calving ease they are also often associated with lower growth potential. Small, or moderate, Birth Wt EBVs are more favourable.

FERTILITY TRAITS

Days to Calving (DC): estimate of genetic differences among in female fertility, expressed as the number of days from the start of the joining period until subsequent calving. Females with shorter DC EBVs tend to commence cycling earlier after calving and conceive earlier in the joining period. They also tend to attain puberty at a younger age as heifers. Lower, or more -ive, Days to Calving EBVs are more favourable.

Scrotal Size: estimate of the genetic differences among animals in scrotal circumference at 400 days of age. Increased scrotal size is associated with increased semen production in bulls, and earlier age at puberty of bull and heifer progeny. Larger, or more +ive, Scrotal Size EBVs are more favourable.

GROWTH TRAITS

200-Day Wt: estimate of the genetic differences among animals in weight at 200 days of age. This is a measure of an animal's early growth to weaning. It is an important trait for breeders turning off animals as vealers or weaners.

400-Day Wt: estimate of the genetic differences among animals in weight at 400 days of age. This is an important trait for breeders turning off animals as yearlings.

600-Day Wt: estimate of the genetic differences among animals in live-weight at 600 days of age. This is an important trait for breeders targeting the production of animals suited for heavy weight grass finished or grain fed market

MATERNAL TRAITS

Milk: estimate of the genetic differences among animals in milk production potential, expressed through variation in calf growth performance. Larger, more +ive, or moderate, Milk EBVs can be more favourable, depending on the environment.

Mature Cow Wt: estimate of the genetic differences among animals in cow weight at 5 years of age.

CARCASE TRAITS

Carcase Wt: estimate of the genetic differences among animals in hot standard carcass weight at 750 days of age. Larger, more +ive, Carcass Weight EBVs are more favourable.

EMA: estimate of the genetic differences among animals in eye muscle area (cm²) at the 12/13th rib site on a 400kg carcass. Larger, more +ive, EMA EBVs are generally more favourable.

Rib Fat: estimate of the genetic differences among animals in fat depth (mm) at the 12/13th rib site, measures on a 400kg carcass. More positive (+ive), or more negative (-ive), Rib Fat EBVs may be more favourable, depending on your breeding goals.

Rump Fat: estimate of genetic differences among animals in fat depth at the P8 rump site on a standard 400kg carcass. More positive (+ive), or more negative (-ive), Rib Fat EBVs may be more favourable, depending on your breeding goals.

IMF%: estimate of genetic differences among animals in percentage intra-muscular fat (marbling) in a 400kg carcass.

INDEX VALUES

Angus Breeding: estimates the genetic differences between animals in net profitability per cow, joined in a typical commercial self-replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. The index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

Domestic: estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic supermarket trade, with progeny finished using either grass, grass supplemented by grain or grain finishing systems.

Heavy Grain: estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

Heavy Grass: estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting pasture finished heavy steers.

UNDERSTANDING ACCURACIES

The accuracy associated with an EBV gives an indication of its reliability, and the likely extent of its possible change as more information becomes available. As more data becomes available on animals (or its progeny, or relatives) then the accuracy of its EBVs for particular traits will increase.

Accuracies are influenced by the heritability of traits and the genetic associations existing between them. For lowly heritable traits, more information is required to achieve a similar accuracy to that of highly heritable traits.

Accuracies are expressed as percentages. The higher the percentage, the greater the chance that the EBV is a close estimate of the animal's true genetic merit, and the less likelihood that the EBV will change as more information becomes available.

DISCLAIMER AND PRIVACY INFORMATION

IMPORTANT NOTICES FOR PURCHASERS

ATTENTION BUYER: *Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.*

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name are as follows:

PV: both parents have been verified by DNA

SV: the sire has been verified by DNA

DV: the dam has been verified by DNA

#: DNA verification has not yet been conducted

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following ids.....

.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600

Guarantee:

All bulls sold by Outwest are fertile and structurally sound to the best of our knowledge. If an animal becomes infertile or breaks down due to reasons other than injury or misadventure at any time in the next 12 months, we will:

1. Provide you with a satisfactory replacement if available or;

2. Issue you with a credit equal to the purchase price less the salvage value, that can be used to purchase available animals in future from Outwest Angus.

Normal care needs to be taken, as we cannot replace an animal that is injured or dies for any reason. Any claims must be accompanied by a certificate from a registered veterinarian. All vet costs are the responsibility of the purchasers.

Licensed Semen Collection Service

Collecting semen from your bulls is not only an investment in your own breeding program, it is a very affordable form of insurance. Should something unforeseen ever happen and your bull dies unexpectedly, or gets injured, you will have the peace of mind that you have semen stored from your bull for future use in your breeding program.

Situated at Bacchus Marsh, Victoria, Genetics Australia is an ideal location for consigning your bulls for licensed semen collection. All bulls are housed outdoors in clean, open runs giving your bull ample room to move whilst on centre.

When seeking an organisation to collect, process, ship or store cattle semen, count on the professional, knowledgeable staff at Genetics Australia to provide you with first class service. Genetics Australia can perform the necessary testing required to enable semen to be exported to most countries.

Genetics Australia is accredited to produce semen eligible for export to the European Union and China. Other countries we can qualify semen for are South America, Canada, USA, New Zealand and Russia. Contact Genetics Australia to discuss your requirements for domestic and export semen.
