There's Always a First Time

The first half of 2020 brought many “first times” for most people around the world; some good firsts and some, not-so-wonderful, firsts. No question that we've all been reminded that the only thing we can really count on, is change.

So, as always at Burrawang Dorper and White Dorper Stud, we're responding to changes in our industry. This sale is an example of some of the changes we're making.

We're expanding the ways in which we conduct our business to ensure you continue to have access to the best of what Burrawang offers... high quality, sound animals to give you greater stock longevity and improved meat yields that increase your profitability.

But some things won't change. We're still committed to **breed excellence**. We're still “...**all about the meat mate**”. And our animals still deliver outstanding **value for money**.

Welcome to one of our stud's firsts. Burrawang Dorper and White Dorper Stud has never conducted a sale that consists **exclusively of ewes** and we've never conducted an **exclusively online sale**...before now.

Introducing Agents

Introducing livestock agents are entitled to a 5% commission on sales if written notice of introduced client(s) details are provided to dold@brcagents.com.au no later than 4pm on June 16th.

Scanned in-lamb Ewes

We are pleased to offer this selection of high-quality stud ewes; all have been scanned in lamb to a variety of our most recently selected group of Burrawang sires. The ewes are due to lamb between mid-July and mid-September. Please refer to the sire profiles contained in this catalogue and on the Stud Sires tab of our website www.burrawangdorpers.com.au.

Pre-Sale Viewing

You are welcome to come to Burrawang at Ootha, NSW to see the selection of ewes on offer. Please contact Mal Brady on 0428 500 027 by 5pm on Saturday June 13th to arrange a viewing. Viewings can be scheduled for Sunday or Monday, June 14th or 15th between 9am and 4pm.

Post Purchase Pick Up or Delivery Arrangements

Purchases of fewer than 5 lots must be picked up from Burrawang West Station no later than Sunday, June 21st. Purchases of 5 or more lots will be delivered no later than Wednesday, June 24th and free of charge within a 500km radius of Condobolin, NSW. Pick up and delivery arrangements are to be made through Mal Brady, who can be reached on 0428 500 027.

Breeders' Comments

Burrawang's Stud Master, Wicus Cronje, has provided a comment about each ewe. His assessment is contained in Breeder's Comments within the catalogue and as commentary on each Lot's video (available to view online via AuctionsPlus).

His assessment of the stud sires, used to join the ewes on offer in this sale, is included in the Stud Sire Profiles of the catalogue and on the Stud Sire tab of our website at www.burrawangdorpers.com.au.

Wicus is internationally recognised as one of the world's most experienced dorper breeders, inspectors and judges. He is a qualified inspector of The Dorper Breeders Society of South Africa and of Dorper Sheep Society of Australia and has over 40 years of experience as a dorper breeder in both countries.

DNA Parentage Testing

Beginning in 2017, Burrawang has used DNA testing to determine parentage of our stud offspring. Though testing is not 100% foolproof, it is the way of the future to validate pedigrees. Most top livestock breeders around the world use this method to ensure accurate bloodline information while enabling greater natural hybrid vigour to be created through natural joinings with multiple sires than can be created through artificial or single sire matings. The result is an expanded genetic variation in offspring.

Interestingly, for those unfamiliar with multiple sire group joining, lambs born from a single dam, may be sired by different rams in the group joining mob, much as a canine bitch can birth pups to different dogs in the same litter. Nature will have her way.

Parentage Confirmation

For buyers who purchase 5 or more ewes and who need to validate parentage for registration or other purposes, we provide free DNA testing upon written request for this service. Please send the request to mbrady@murraydarlingfoodco.com no later than the date on which purchased ewes are picked up or delivered. Tissue samples will be collected by one of Burrawang's trained staff members by arrangement sometime between marking and weaning of the purchased ewes' progeny and subject to the following conditions:

- 1) the purchaser agrees to ensure the purchased ewes can lamb down and remain apart from other stock for at least 2 weeks after lambing to ensure no "lamb stealing" can take place,
- 2) tissue samples will be collected on-site at the purchaser's place of business/lambing yards no later than when the lamb is weaned, and
- 3) the purchaser accepts that DNA testing results may take up to 8 weeks after tissue samples are collected.

Animal Health

Subject to purchaser's approval, all ewes will receive a weight-appropriate dose of CYDECTIN® EWEGUARD at time of pick up or delivery.

Burrawang flock is Accredited Ovine Brucellosis Free; Certificate OB-TR expiring Feb 28, 2022.

Burrawang's OJD status is MN1; clear of OJD with certificate NS18176

CATALOGUE GUIDE

Lots

All ewes are presented for sale in individual lots.

Scanned In Lamb

All ewes were scanned by a qualified scanner on June 2 2020 and determined to be in lamb. The number of embryos detected at scanning is designated as **SIL** Single or **SIL** Twin for each ewe in the sale.

Type

Ewes were independently classed by experienced, well respected, internationally qualified inspectors; Philip van Schalkwyk on May 29 2020 and on Feb 22 2020, and/or by Raymond Reid on April 1 2019.

Weight

Weights were recorded on June 4 2020 with the result reflected in the history section of each lot listing.

Joining Sires

Dorper ewes offered for sale were joined to the Dorper rams and White Dorper ewes offered for sale were joined to the White Dorper sires listed in the sire section of this catalogue. Photos of the sires in this catalogue show the rams as they appear in their usual working conditions.

Multiple Sire Group Joinings

In 2017, Burrawang began using DNA testing to determine parentage of all progeny. By doing so, multiple sire group joinings became a viable option to include in our breeding programs.

By selectively multiple sires to join with a specific group of ewes, thereby mitigating excessive inbreeding, we are able to

1. leverage the power of natural selection
2. maximise genetic variance in offspring
3. allow ewes to lamb down in a natural setting without interference
4. remove parentage recording errors that result from lamb stealing
5. eliminate human error in recording parentage.

As stud operators with extensive breeding experience, we continue to use modern tracking systems, trait scanning and proven breeding predictors to select our stud breeding animals.

For Burrawang customers to maximise productivity, enhance sustainability and improve profits using our animals, we know that our breeding experience and the power of mother nature must come together to produce animals that can deliver all of the breed benefits in a commercial setting.

BURRAWANG DORPER AND WHITE DORPER SIRE PROFILES

BURRAWANG DORPER 170915 6GUN

An eye-catching, stylish, high quality Dorper ram, 6GUN is big, strong, and amazingly easy moving. He breeds very appealing offspring with good balance, length, and a lot of muscle.

6GUN'S genetics are exceedingly rare outside of South Africa. He has earned extensive use as a sire in our stud breeding programs.

BURRAWANG DORPER 172409 RODEO

RODEO is a good example of how carefully selected genetics pool together. We are excited about this young sire's offspring; they tick all the right boxes for growth and meat production, structural integrity, and free flowing movement.

Photos cannot do justice to this ram...he is even more impressive in the flesh. RODEO is a very well-balanced animal with a great head, extraordinarily strong topline and remarkable outer twist.

BURRAWANG DORPER 172416 RUSSIAN

RUSSIAN, son of BORIS, is long, very deep, and very wide with remarkable muscling. He has been selected and used as a Burrawang sire especially for his muscling qualities. RUSSIAN is an extremely aggressive joiner which complements his fertility and is signalled by his visibly high level of masculinity.

BURRAWANG DORPER 180012 BLACK GOLD

BLACK GOLD's pedigree is like striking gold...the best of Cronje and Mickey Phillips lines coming together in a rare and valuable find. This is a very wet ram with tremendous growth for his age.

True to his breeding, he is extremely strong and masculine with a particularly good topline. His long deep muscling and exceptionally deep rump give him outstanding carcass qualities.

BURRAWANG DORPER 180774 GENERAL

GENERAL is a big masculine ram with a lot of capacity and spring of rib. He is very wide throughout his body.

Born relatively early in 2018, General was one of the first of his year drop to be used as a stud sire. From this first joining, he proved his virility and that he breeds very even quality offspring.

BURRAWANG DORPER 181150 PISTOL

PISTOL (on left in photo) is a unique ram and has been a show off with his remarkable carcass quality since he was a young ram. PISTOL's pedigree is heavy with Cronje bloodlines and it shows.

He is long, wide, and deep with a superior rump and developed loins. With his balance and meat qualities and easy walking style, he is an obvious choice as a sire.

BURRAWANG DORPER 181699 BULLSEYE

His name says it all; we think this ram has what it takes to be "spot on" as a sire. He certainly has the breeding, with a strong Cronje presence throughout his bloodline.

He has the length, a great outer twist, exceptionally good topline, and a remarkable high-quality head. He has the balance and an easy moving style.

BULLSEYE is shown on the right in this photo.

BURRAWANG DORPER 181700 THOROUGHbred

THOROUGHbred was selected at a young age to become a Burrawang sire when he presented himself as a real standout with incredible meat qualities, a remarkable head, long deep and wide body, and a strong masculine shape. He carries a lot of long muscle that comes way down onto his chest and flank and has exceptionally well-developed loins.

This ram is an easy moving animal with outstanding overall quality making him an obvious choice as a stud sire.

Photo unavailable; sire at work in the joining paddock

BURRAWANG DORPER 181719 THRILLER

THRILLER is among the elite group of rams of the breed that has extraordinarily long muscling in the back with a very deep flank.

Shown in the photo at just 10 months old, THRILLER is a big T5 ram of outstanding weight for age with particularly good balance, a good head, and a long, deep body.

THRILLER's pedigree brings together Cronje and Mickey Phillips bloodlines, a combination proven to generate quality offspring. THRILLER'S dam is a MICHAEL JACKSON daughter. Seven of her eight lambs were rams, including four T5/T4 studs and two T3.

BURRAWANG DORPER 181743 STEED

STEED is a full brother of THOROUGHbred and was used in just one joining prior to his death from snakebite. We look forward with great anticipation to his offspring's arrival.

STEED was a T5 stud ram with outstanding structure and breeding. His sire BRUMBY has been extensively used in our stud as he produces reliably consistent quality offspring including several sires and top breeding ewes.

BURRAWANG DORPER 182004 WINK

WINK, with his good topline and structural integrity, is a great example of his sire BLINKI's consistent breeding. WINK also takes after his sire in the joining paddock by wasting no time getting right on the job.

WINK is a remarkably long ram with a great outer twist and well-developed loins. He has an easy, free flowing gait, a high-quality head and, importantly, a safe forequarter. WINK was a sure choice as a stud sire.

BURRAWANG WHITE DORPER 170229 CRUMBLE

CRUMBLE breeds well above average and has produced many of our On-Farm Sale rams. He is very well balanced, has a good head, long body, long muscles, and exceptionally good top-line.

Like his sire, CRUNCHY, CRUMBLE breeds high quality, structurally sound animals; his ram offspring are performing well for our customers and his ewe offspring are performing well for our stud.

Even in his "working clothes" straight from the joining paddock, as shown in the photo, Crumble is an impressive ram.

Photo unavailable

Photo unavailable; sire at work in the joining paddock

BURRAWANG WHITE DORPER 172086 RAPPER

RAPPER comes from one of Burrawang's most successful ewes, Burrawang 120020, who also features in the background of sires PALE ALE and HOMEBREW from different sire lines. RAPPER demonstrates all the quality we came to expect from 120020 which made her a "go to" dam; he is well balanced and has a great masculine head.

Like his sire, EMINEM, distinguishing features of RAPPER's structure are his strong, thick legs and his free-flowing movement. He breeds consistent quality offspring with nice soft, wet coats.

BURRAWANG WHITE DORPER 180435 IRON JACK

This sire has it all and so he should, given the strength of his pedigree. We expect a lot from this young sire as he inherited his sire, KEG's, truly remarkable body depth and muscling, and his dam's balance, length and topline.

IRON JACK's maternal granddam, Burrawang 120190, was an outstanding breeder who consistently produced high quality offspring with several Burrawang sires over her 6 years of breeding.

BURRAWANG WHITE DORPER 180448 PHILL

PHILL is a son of PIET, the 2019 Australian National Supreme Champion. PHILL is an exceptional ram in his own right with remarkable width over his body, an outstanding outer twist, particularly good loins, and a great masculine head. He has immense capacity in his spring of rib and a very deep body.

Not only is PHILL a strikingly muscular ram, he is also a real pleasure to watch as he moves...smooth and easy.

BURRAWANG WHITE DORPER 180469 APE

A son of TARZAN, APE is a well-balanced ram with a very good head. He has an incredibly soft, wet coat and nice thick legs and carries a lot of meat.

We anticipate great things from this ram based on his meat production qualities and balance and on his breeding, which features stars of the meat sheep industry such as Rabie, DOC, Burrawang 111129, and Terraweena Loftus.

Photo unavailable; sire at work in the joining paddock

BURRAWANG WHITE DORPER 181611 BARRIE

BARRIE is a son of PIET, the 2019 Australian National Supreme Champion, and of one of Burrawang's most reliable dams. BARRIE demonstrates all the trademark qualities of his pedigree including a good head, long, wide body and meat.... lots of meat!

BURRAWANG WHITE DORPER 190240 BIG SHOT

He is called BIG SHOT for his noticeably meaty carcass. This ram is long, wide, and deep, carries a lot of meat and has an exceptionally good quality head.

BIG SHOT is still a lamb but that did not stop him from holding his own amongst the older sires while working hard in his first joining. The accompanying picture was taken as he came out of the joining paddock.

BURRAWANG WHITE DORPER 190245 CARLTON

CARLTON has an exceptionally high-quality head. Still a lamb when photographed, this young sire is unusually strong and masculine and shows great balance and quality, especially for his age. CARLTON has a wide, long, and deep body and moves very easily.

CARLTON's pedigree packs a real punch and we are expecting a lot from him and his half-brothers from the same drop, PALE ALE, HOMEBREW and FOSTER. Their sire, LOCO has proven to be one of Burrawang's most successful breeding sires with 7 of 8 rams born in a single drop, achieving Type 5 in independent classing.

BURRAWANG WHITE DORPER 190270 MCGREGOR

MCGREGOR, like his half-brothers, PHILL and BARRIE, is a son of the 2019 Australian National Supreme Champion, PIET. MCGREGOR has a really good head, exceptional balance, and his bloodline's great outer twist and loins.

BURRAWANG WHITE DORPER 190447 PALE ALE

PALE ALE is a special ram for many reasons including his exceptionally sound structure, outstanding carcass qualities and proven pedigree. His forequarter is remarkably safe, and he boasts an outstanding topline. PALE ALE also has an exceptionally long, deep body with great spring of rib, well developed loins, and long muscles.

Like fellow sires, PIET, RAPPER and HOMEBREW, PALE ALE's pedigree features one of Burrawang's most successful ewes, Burrawang 120020, from whom he inherited great balance along with other qualities. His sire, LOCO, is an extraordinary ram who has produced many of our current sires and top-of-the line breeding ewes. LOCO consistently breeds offspring, like PALE ALE, with very deep bodies and immense meat producing capacity.

BURRAWANG WHITE DORPER 190459 HOMEBREW

HOMEBREW has been a performance leader from the beginning with his growth, weight, and quality. He and his half-brothers CARLTON, PALE ALE AND FOSTER are amongst the many stud rams sired by LOCO.

HOMEBREW's dam is one of 2019 Australian National Supreme Champion PIET's daughters; her influence is evident in HOMEBREW's unique head quality. He is very well balanced, has a strong masculine shape and very safe shoulders. In addition, he has good spring of rib and very well-developed loins, all of which made HOMEBREW a sure choice as a stud sire.

Photo unavailable; at work
in the joining paddock

BURRAWANG WHITE DORPER 190507 DUSTY

DUSTY has exceptional growth for his age along with particularly good carcass qualities. His loins are very well developed, and he is long, wide, and deep, especially in the hindquarter. He has a remarkably deep flank. DUSTY is still a lamb and, based on his growth and pedigree, he is going to be a very big boy.

This sire's pedigree varies considerably from many of Burrawang's sires, while including some of our top performing sires and dams. Evident in DUSTY's conformation are the muscle depth of Burrawang 140373 BARREL and the trademark forequarter of DOC. We anticipate this line to continue to develop well within Burrawang's White Dorper range.

BURRAWANG WHITE DORPER 190508 BRADLEY

BRADLEY, like DUSTY, has an unusual mix of strong breeders in his pedigree including three of Burrawang's most reliable dams. BRADLEY's T5 conformation features remarkable outer twist and loins as well as an exceptional spring of rib. He has a nice soft and wet coat and plenty of healthy body fat.

BURRAWANG DORPER 190525 FOSTER

FOSTER is still a lamb, but he has taken well to his role in the joining paddock. Our choice to use FOSTER as a stud sire was an easy one as he has been blessed with the look and the breeding of a champion sire.

FOSTER is extremely well balanced and, from end to end, is a standout. He has a particularly good, high quality head. His body is long, deep, and wide. He has well developed loins with an exceptionally long rump. The depth, quality, and muscle length of his hindquarter along with his ability to walk so easily, are truly impressive.
