# WELCOME

## Welcome to Barana Simmentals 20th Annual On-Farm Bull Sale

**Stud principal, Peter Cook has worked hard for 40 years breeding Simmentals that reinforce Barana's long held reputation with both commercial & stud cattle producers. We have sold bulls nationwide and secured a solid client base over many decades. We are a 'hands on' family business. We live & work on our farm so we understand the hardships & challenges our clients face because we are exposed to those same challenges. We extend our sincere thanks to our valued clients for their continued & solid support.**

As our catalogue goes to print the world is feeling the restrictions brought on by the Coronavirus pandemic. This year's Barana sale will still be conducted on farm following strict COVID19 protocols and livestreamed via AuctionsPlus.

We aim to offer 30 bulls at our 2020 sale, predominantly polled and 11 specially selected registered stud heifers, joined & PTIC. Of this year's Barana sale draft, the majority are soft, early maturing, middle-of-the-road type bulls. This style of bull will introduce cattle into your herd that will eat less, have the ability to finish with a higher yield & put more dollars in your pocket. Use purebred Simmental bulls to gain the advantages of hybrid vigour for added performance, weight gain, carcass, fertility, softness & longevity. The females to be offered exhibit the superior maternal traits for which traditional Simmentals are renowned. It is rewarding to see Barana pedigrees in many successful stud programmes and Barana genetics breeding on for our clients. The benefits of Barana breeding are evident

Throughout the drought weaner bulls were fed a ration of barley straw, wheaten hay, barley hay chopped up with Molafos. From early April they were put on a ration of barley straw, wheaten hay & barley hay chopped up with Molafos & a light grain mix plus protein lick blocks. From the 25th May the sale bulls were prepared solely on forage winter wheat crop with access to barley straw & wheaten hay. No grain. Bulls will present in good, strong condition on sale day. Barana bulls are not overdone on feed as we value longevity in the bulls we breed & no foot trimming has been performed on any of the cattle presented.

As in past sales, objective data will be available for each bull & all inspections & guarantees will be provided. All bulls must pass stringent veterinary tests for breeding & soundness. These bulls will be semen tested, including morphology, Breedplan recorded and scanned for EMA, FAT & IMF. Barana maintains a Level 7 J-BAS [Johnes Beef Assurance Score] status.

Each Zoetis STAR certified bull in this catalogue has been tested to show that they are not a BVDV Persistently Infected (PI) animal. All sale bulls have been vaccinated against BVDV with Pestigard®, against Leptospirosis with Ultravac® 7in1 and Vibriosis with Vibrovax®. All sale bulls have been given 2 vaccinations of each product to ensure they have full immunity which is valid for 12 months. This is your assurance that we have taken all available steps to protect our animals against introducing disease into your herd and to ensure their continued performance. We recommend that you continue with annual vaccination to help protect the health of your herd and maximise the productivity of your business. All sale bulls have also been vaccinated against 3 day sickness & tick fever [3 germ blood] to suit our Queensland clients.

Free cartage will be offered to bull buyers within a 300 km radius of Barana and for interstate bull buyers, free cartage along the major route from Coolah to Goondiwindi & from Coolah to Wodonga. Queensland bull buyers will also be offered free cartage to Roma. Conditions apply. Please contact Peter Cook to enquire.

Please note that free cartage does not apply to the female lots.

The sale is interfaced with AuctionsPlus & will be conducted live online in real time.

The catalogue will be available for preview on our website [www.baranasimmentals.com](http://www.baranasimmentals.com). You can also follow us on Facebook, Twitter & Instagram or subscribe to our Newsletter via our website.

Barana Simmentals offer quality, guarantees, reputation, performance & results. We look forward to seeing you on sale day or to arrange inspection prior to the sale please contact Peter Cook or the selling agents.

# STUD HISTORY

**Barana Simmentals was founded by Stud Principal, Peter Cook in 1980 on traditional European and New Zealand bloodlines. Peter began showing at major Royal Shows in 1986, securing many Champion awards and earning a name for breeding good, sound, functional cattle. He ceased showing cattle in 2001 after 15 years exhibiting & achieving success at all major shows. Peter has worked hard for almost 40 years through good & bad seasons to secure Barana's long held reputation with both commercial & stud cattle producers around Australia.**

Barana is one of the largest Simmental breeders in NSW with the stud herd including 150 registered & commercial breeders. Great importance is placed on breeding for ease of calving, milk production & fertility and females must be able to rear a calf under natural conditions. Barana has endeavoured to breed bulls that produce steers that are quick growing with good carcass characteristics and the ability to finish. We have enjoyed success in the Australian National Field Days Grass-fed Steer and the RAS NSW Feedlot JapOx Competitions & the Scone Beef Bonanza where we secured the Champion Purebred Carcass with a total point score of 90.867.

Barana bulls get results with clients reporting Simmental Cross Vealers straight off their mothers consistently dressing out at 58% & outdoing other breeds in weight for age. Barana clients have succeeded in gaining a rare Championship/Reserve double in the heavyweight division steer carcass judging at Brisbane Royal with a Simmental Cross Steer sire by a Barana bull. Our clients have topped the annual Bindaree Beef Weaner Sale with a pen of Simmental Cross Steers & won best pen of Euro or Euro Cross Steers in the competition section. Barana clients have topped the Casino Weaner & Grower Sale with 10-11 month old Simmental Cross Weaner Steers consecutively and secured top pen of Euro bred steers at the sale. Our bull buyers report that the introduction of Simmental bulls in their herd has significantly lifted weights in the weaner steers they turn off.

Peter purchased Karewa Jester, a polled son of German sire Eizenherz from New Zealand in 2000. This bull bred well in Barana's polling programme. German genetics were utilised with Zimbo and Gowrie Yankee [P] producing excellent progeny. In 2007 we purchased Bullock Hills Buster [P] and Corinda Downs Buckshot [AI] [ET] [P] – both by South African bred bulls.

At Beef 09 in Rockhampton, eight of the broad ribbon winners were sired by Barana bulls and the top priced bull at the 2010 Woonallee Simmental sale in South Australia was sired by Barana Yeardleigh.

At the Queensland Royal in 2011 Barana secured Senior & Grand Champion Bull & Reserve Champion Female. At the Upper Hunter Beef Bonanza in Scone in November 2011 Barana took out the Champion Purebred Carcass with a total point score of 90.867. Our success continued at the Dubbo Beef Spectacular in March 2012 where we won Senior & Grand Champion Female, Res Senior Champion Female, Junior Champion Female, Senior Champion Bull & Most Successful Exhibitor of all Breeds.

Callendale Jasper [P] and Woonallee Jumbo were purchased in 2015 & have produced low birthweight, easy calving, early maturing offspring. We purchased the homozygous polled Woonallee Looking Glass in 2017. In February 2020 Barana purchased our new outcross stud sire Willandra Panama [P] from the Cowcher family's Willandra Simmental stud in WA.

Barana genetics have been ongoing proven performers for us & our clients over many decades earning champion awards in both the show ring & carcass competitions. It is rewarding to see Barana pedigrees in many successful stud breeding programmes and Barana genetics breeding on for our clients. The benefits of reliable Barana breeding are evident.

We acknowledge our friend John Horne's place in our stud history. He was a great promoter of our cattle & offered genuine support to our family & to our stud cattle operation.

The Barana Sale is the premier sale in NSW for consistent quality & value for money. We hope to continue with the pleasing results achieved in the past at our 20th Annual On-Farm Sale.

# SALE INFORMATION

**As our catalogue goes to print restrictions are in place due to the Coronavirus pandemic. This year's Barana sale will be conducted on farm following strict COVID19 protocols and livestreamed via AuctionsPlus.**

**Attendance at this year's sale is limited to genuine buyers with a true intention to purchase & essential staff & accredited livestock agents. Buyers are encouraged to utilise AuctionsPlus, phone bidding or to place an order with your preferred livestock agent.**

## **Location**

Barana is located 14 km north of Coolah, NSW, on the Black Stump Way. Refer to map on inside back cover.

## **Inspection**

COVID19 protocols will be in place. Bulls can be inspected from 9am on the day of the sale with appropriate social distancing observed or pre-sale inspection by appointment. Inspections prior to the sale are recommended & can be arranged through Peter Cook on 0427 775 233 or the selling agents.

## **DNA Testing**

All registered animals offered for sale have been DNA tested & sire verified.

## **Rebate**

Selling agents are Elders and Davidson Cameron & Co with 2% rebate to outside agents introducing their clients in writing by fax or email at least 24 hours prior to the sale and settling within 7 days. The agent must attend the sale with the client or on the client's behalf. The rebate will not be paid outside these conditions.

## **Phone Bidding**

Please contact the selling agents 24 hours prior to the sale to arrange phone bidding. Barana has very good Telstra mobile phone reception.

## **No Verbal Instructions**

Please complete a buyer's instruction sheet available on sale day from the agents ensuring your phone number is provided. To assist us with delivery of your bull please draw up a map of your property or delivery point indicating nearest roads, towns or prominent landmarks and include your contact phone number.

## **AuctionsPlus**

The sale is interfaced with AuctionsPlus & will be conducted live online in real time. For those not able to attend the sale, new users must register 24 hours prior to the sale to bid.

## **GST**

All lots are sold GST exclusive i.e. if the bull is knocked down for \$5,000 you will be charged \$5,500.

# SALE INFORMATION

## Insurance

There is no vendor insurance on sale bulls. It is the responsibility of the buyers to insure their purchases.

## Luncheon

Complimentary pre-packaged sandwiches & soft drink only will be supplied. In accordance with latest social gathering guidelines we are unable to extend an invitation for post-sale refreshments.

## Accommodation

If required, you are advised to make your own enquiries regarding availability of accommodation in Coolah.

## Transport

NEW SOUTH WALES BULL BUYERS will be offered free cartage within a 300 km radius of Barana.  
INTERSTATE BULL BUYERS will be offered free cartage along the major route from Coolah to Goondiwindi and from Coolah to Wodonga.  
QUEENSLAND BULL BUYERS will also be offered free cartage to Roma. Conditions Apply. Please contact Peter Cook to enquire.

Please note that free cartage does not apply to the female lots.

All care will be taken but no responsibility will be accepted for lots waiting for delivery or during delivery. Formal possession, risk & expense passes to the buyer at the fall of the hammer.

or [www.auctionsplus.com.au](http://www.auctionsplus.com.au)*

# VETERINARY NOTES

## General Health

- All cattle are TB & Brucellosis free. All bulls in this catalogue have been tested to show they are not a BVDV Persistently Infected [PI] animal. All sale bulls have been vaccinated against BVDV with Pestigard, against Leptospirosis with Ultravac 7in1 and Vibriosis with Vibrovax. All sale bulls have been given two vaccinations of each product to ensure they have full immunity which is valid for 12 months. The sale bulls have also been vaccinated against 3-day sickness & tick fever [3 germ blood].
- Barana maintains a Level 7 J-BAS [Johnes Beef Assurance Score] status.

## The Barana Sale Bull Breeding Soundness Evaluation

The sale bulls have been subjected to a number of strict assessments by our Vet to ensure they will be physically and reproductively sound.

## Structural Soundness Examination

All animals have been closely examined paying particular attention to the following: feet, legs, back, jaws, teeth & walking ability. They have been deemed to be within normal parameters.

## Semen Examination

Just prior to the sale all bulls have been electro-ejaculated. At this time, the testes have been palpated and measured. The external genitalia are thoroughly examined, and a gross and microscopic assessment of the semen is made. This suite of tests is very comprehensive. We have carried out these assessments to ensure that the bull performs satisfactorily.

## Carcase Information

Scan measurements and daily weight gain figures will be available on sale day.

CONDITIONS FOR SALE BY AUCTION IN NEW SOUTH WALES WILL APPLY

# Bull Fertility Testing - Degrees of Confidence

Chris Hallett BVSc MVSt

**Many aspects of Veterinary Science are cut and dry. Pregnancy testing for example is either pregnant or not pregnant. Unfortunately, Bull Fertility Testing is not as cut and dry.**

We like to tell our clients that Bull Fertility Testing is all about Degrees of Confidence. The greater the range of bull fertility tests that we look at, the greater the degree of confidence we have that your bull is fertile.

If we look at the bull in a paddock and see he is not lame and has testicles we could say we have 50% confidence he is going to do the job.

We start to improve our confidence level by doing some fertility examinations. We firstly feel and measure his testicles, eliminating undersize or abnormal testicles.

We perform an examination of the internal sex organs removing congenital abnormalities or acquired conditions such as seminal vesiculitis.

Electro-ejaculation examination is utilised for visualisation of the penis and semen. Penile examination is to identify normal appearance and exteriorisation of the penis. Penile abnormalities include such conditions as trauma, warts, adhesions, infections or retained frenulums.

Semen examination under the microscope is utilised to check motility, crush-side morphology and ensuring it is free of infection.

Crush side semen analysis is a screening test for semen morphology analysis. At this stage one can make an educated assessment that the bull is fertile or for greater confidence we can submit a sample to a Semen Morphology Laboratory. A Sperm Morphology Laboratory assesses the semen under higher magnification identifying possible intra sperm-head problems that may not be as identified in a crush-side morphology assessment.

Semen morphological abnormalities may have genotypic (genetic) and phenotypic (environmental) influences hence repeated morphological tests are required to truly assess the true fertility assessment of a bull if morphological abnormalities are present. The timing between morphological assessments is ideally 70-days apart.

Semen assessment and visualisation of the penis are not necessarily an indication of the serving ability of a bull ie the ability of the bull to gain intromission to the cow. So, a satisfactory serving ability test would further increase our confidence and this test needs to be repeatable and the frequency may give us an additional indication of the bull's libido. Often this test is done by the buyer at the start of joining (if just an observation).

A fertility test is potentially only good for the day that it is performed. Semen production works on a 70-day cycle if anything upsets the bull it may take a full semen cycle for normal semen to be produced again. In this time the bull may go through a transient period of sub or infertility.

Events that upset the semen cycle and production can include disease, stress, transport, environment and nutritional changes. So, if you purchase a bull and move the bull to a completely different environment, we strongly recommend you do your own fertility examination prior to use.

During the joining period we strongly recommend regular bull inspections to ensure bull is in good health, suffering no lameness, penile or fighting injury and that he is still achieving intromission.

## BARANA'S TOP PRICE BULLS 2019

We are offering Woonalle Jumbo for sale only due to being heavily used throughout the stud. He's bred exceptionally well here as you can see by his progeny. A bull displaying tremendous length & capacity on a moderate frame. Has a fine coat like a Brahman all year round. Has been used over heifers successfully. His pedigree goes back to Woonallee's best breeding cow Woonallee Kathie B111.
