Guidance:

This sale will not close out before 45 minutes have elapsed. There are quite a number of lots for buyers to keep track of so I have 2 suggestions that may help.

1) Utilise the limit bid function by selecting your lots and entering your upper limit price. The auction will only take you one bid over the opposing bidder and only hits your limit if the underbidder takes you there. It does not automatically take you to your maximum.

2) you can select your favourite lots and just concentrate on those. If you feel you are being confused or distracted by lots that you have no interest in. Please register with Auctions Plus <https://auctionsplus.com.au/register> if you intend to bid on your own computer/device.
