If we had sat around and chatted, at last year's sale and predicted what the next 12 months would bring, I doubt any of us would have foreseen the challenges that we, not only in this corner of NSW, but nationally, would face. A drought that never seemed to end, until the fires hit, then finally the rain that created possibly the best summer many of us have ever seen. A shortage of cattle to utilise the extra tucker and a market positively booming in recovery, creating headaches or joy, depending on whether your side of the fence was stocked or not. Let's then throw a worldwide pandemic into the mix and see how resilient we really are. Let's see how we can adapt.

Perhaps you and I both know our day to day lives on the farm actually changed little. Our lifestyles already quite isolated. Our profession as agriculturalists was deemed Essential, (but we knew that already) and so it was largely business as usual. Maybe we are a little more savvy in online cattle marketing. Maybe our communication has evolved, but throughout it all, quality cattle and quality beef continue to be resoundingly appreciated by each other, by processors and by consumers.

May we present to you another exciting draft of quality Murray Grey cattle, covering carcass excellence, MSA compliance, doability, efficiency, adaptability, great temperament. Whatever you're after, it's all here- and now you can even access it on Auctions Plus.

We look forward to seeing you on the day, taking your bids on the phone or the computer. We welcome presale inspections on property and of course our agents are always ready to advise.

Certain Covid 19 restrictions may still apply come sale day, so we do request you abide by any of those necessities, but otherwise it's great beef breeding business as usual.

Kind regards.

The TOTR sale committee.

Sale Information

COVID 19: PLEASE BE AWARE OF AND COMPLY WITH ANY RESTRICTIONS.

Inspections:

We welcome inspection prior to the sale with an appointment. All stock will be penned at Glen Innes Sale yards from 9am Sale Day. Please contact Nathan Purvis on 0427 324 078.

Insurance:

Insurance will be available on Sale Day.

Rebate:

The Vendors agree to allow 2% rebate to outside agents introducing approved buyers in writing to the selling agents 24 hours prior to the sale and settling on their behalf within 7 days.

Phone bidding:

Phone bidding can be arranged by contacting Colin Say & Company on 02 6732 1266 prior to the sale.

Registration:

All registered stock as stated in the catalogue are eligible for transfer. Please ensure correct name, address, stud prefix (CET) and PIC (Property Identification Code) is printed on the buyer's Instruction Slip supplied in this catalogue.

Transport:

Local carriers will be in attendance on Sale Day. Nathan Purvis will be in charge of trucking arrangements on sale day. Please fill out your Buyers Instruction Slip prior to leaving, as NO verbal instructions will be accepted!

Risk and Responsibility Release:

- Any person attending the sale does so at his/her own risk.
- All persons attending the sale release the vendor from all actions or demands due to any loss, death, damage or injury occurring on the premises.
- The Vendor is not responsible and has no liability for any death, or injury to person or any loss of or damages to any person attending the sale, their property or otherwise.
- The risk for cattle passes on the fall of the hammer to the purchaser. Arrangements may be made for cattle to be held for a reasonable period of time to facilitate delivery after the sale.

Indemnity:

All persons attending the sale agree to indemnify the vendor from and against any liability, loss, damage, expense or claim which the vendor may incur, including to a third party, during or after the sale in all respects.

Terms and Conditions:

The sale will be conducted under the usual terms and conditions of the NSW Stud Stock Sales Association and will be displayed at the sale venue.

Accommodation:

Available in Glen Innes. Please support the Rest Point Motor Inn for their sponsorship (see ad in catalogue).

Guarantees:

- The vendors guarantee all animals are sold fertile and capable to breed under normal and natural conditions.
- Any claim relating to fertility must be made within 6 months of the date of sale and accompanied by a veterinary certificate. Infertility resulting from disease or injury occurring after the sale cannot be recognised in any claim.
- If an animal proves infertile, the vendors guarantee to either provide a mutually agreeable replacement, or issue a credit equal to the purchase price of the animal, less salvage value, at the following sale.

Goods and Services Tax (GST):

All sales will be conducted on a GST exclusive basis, and the agents will accordingly add GST of 10% of the purchase price to the invoice.

EBV's Explained

Calving Ease Direct: Calving Ease (DIR) EBVs are estimates of genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.

Calving Ease Daughters: Calving Ease (DTRS) EBVs are estimates of genetic differences in the ability of a sire's daughters to calve at 2 years of age without assistance.

Gestation Length: Gestation Length EBVs are estimates of genetic differences between animals in the number of days from the date of conception to the calf birth date.

Birth Weight: Birth Weight EBVs are estimates of genetic differences between animals in calf birth weight. Calf birth weight is the biggest genetic contributing factor causing calving difficulty in heifers. Please note, whilst low Birth Weight EBVs are favoured for calving ease they are also generally associated with lower overall growth potential. Consequently, birth weight and growth need to be carefully balanced. Fortunately, animals can be found that have both moderate Birth Weight EBVs and above average EBVs for later growth.

200 Day Milk: 200 Day Milk EBVs are estimates an animal's maternal effect on the 200 day weight of its calf. In the case of sires, this estimates the maternal effect that his daughters will have on the 200 day weight of their progeny. Larger, more positive, 200 Day Milk EBVs are generally more favourable, depending on the environment.

Growth: In general, with all other things being equal, higher growth rates will lead to higher profitability. In most economic analyses conducted positive emphasis on growth is warranted. BREEDPLAN calculates three growth EBVs – 200 Day Growth, 400 Day Weight & 600 Day Weight. These EBVs are the best prediction of the animal's ability to grow to weaning (200 day), yearling (400 day) and later ages (600 day). 200 Day Growth EBVs are therefore important to vealer breeders, 400 Day Weight EBVs for yearling breeders and 600 Day Weight EBVs for breeders of heavy steers.

200 Day Growth: EBVs are estimates of the genetic differences between animals in live weight at 200 days of age due to their genetics for growth. Calculated from the weights of calves taken between 80 and 300 days of age.

400 Day Weight: 400 Day Weight EBVs are estimates of the genetic differences between animals in live weight at 400 days of age. Calculated from the weights of calves taken between 301 and 500 days of age.

600 Day Weight: 600 Day Weight EBVs are estimates of the genetic differences between animals in live weight at 600 days of age. Calculated from the weights of calves taken between 501 and 900 days of age.

Mature Cow Weight: Mature Cow Weight EBVs are estimates of the genetic differences between cows in live weight at 5 years of age. Mature Cow Weight EBVs are expressed in kilograms (kg) and are calculated from weights taken on the cow when her calf's 200 day (weaning) weight is being measured.

Scrotal Size: Scrotal Size EBVs are estimates of the genetic differences between animals in scrotal circumference at 400 days of age. Increased scrotal circumference is associated with increased semen production in bulls, and earlier age at puberty of bull and heifer progeny. Increased scrotal circumference also has a favourable relationship with days to calving, such that bulls with larger scrotal circumference tend to have daughters with shorter days to calving.

Days to Calving: Days to Calving EBVs are estimates of genetic differences between animals in time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. Lower, or more negative, Days to Calving EBVs are generally more favourable.

Carcase Weight: Carcase Weight EBVs are estimates of the genetic differences between animals in hot standard carcase weight (as defined by AUSMEAT) at 650 days of age. Larger, more positive, Carcase Weight EBVs are generally more favourable.

Eye Muscle Area (EMA): Eye Muscle Area EBVs are estimates of the genetic differences between animals in eye muscle area at 12/13th rib site in a standard weight steer carcase. Larger, more positive, EMA EBVs are generally more favourable.

Rib Fat: Rib Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib site in a standard weight steer carcase. More positive or more negative Rib Fat EBVs may be more favourable, depending on your breeding goals relating to the finishing ability of your animals. A bull with a Rib Fat EBV of -0.4 mm would be expected to produce leaner calves than a bull with a Rib Fat EBV of +0.4 mm, relative to carcase weight.

Rump Fat: Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the P8 rump site in a standard weight steer carcase. Stock with positive fat EBVs are likely to produce progeny that are fatter, or more earlier maturing, on average than stock with lower or negative fat EBVs. Increasing fat depth leads to a decrease in retail beef yield, however most market specifications require a minimum fat depth. Breeders aiming to breed leaner, higher yielding cattle may select for lower fat EBVs. Breeders wishing to finish their animals earlier may tend to select animals with moderate fat EBVs.

Retail Beef Yield (RBY): Retail Beef Yield (RBY) EBVs are estimates of genetic differences between animals in boned out retail beef yield in a standard weight steer carcase. Larger, more positive, RBY EBVs are generally more favourable.

Intramuscular Fat (IMF): Intramuscular Fat (IMF) EBVs are estimates of genetic differences between animals in intramuscular fat (marbling) at the 12/13 rib site in a standard weight steer carcase. Larger, more positive, IMF EBVs are generally more favourable.

Vealer Terminal Index (\$) – Estimates the genetic differences between animals in net profitability per cow joined for an example crossbred commercial herd (ie. using Murray Grey bulls over British bred females) targeting vealer production. Vealers are finished on grass and marketed at 365 kg live weight (average 200 kg HSCW and 9 mm P8 fat depth) at 10 months of age. Daughters are NOT retained for breeding and so no consideration is given to maternal traits (ie calving ease daughters, female fertility, mature cow weight).

Supermarket Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example Murray Grey commercial herd targeting production of steers for the domestic supermarket trade. Steers are either finished on grass, or grain fed for 70 days, and marketed at 470 kg live weight (average 260kg HSCW and 12mm fat) at 15 months of age. Daughters are retained for breeding.

Heavy Grass Fed Steer Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example Murray Grey commercial herd targeting pasture finished steers for heavier grass fed markets. Steers are assumed marketed at 620 kg live weight (340 kg HSCW and 14 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding.

OPENING LOT

The MIKE TRAYNOR Yardman's Pick

In memory of Mike Traynor and in recognition of his contribution to the beef industry and passion for the Murray Grey breed, a trophy is presented to the best exhibit, as decided by the yardsmen helping out on the day.

This animal sells as the Opening Lot.

The winner of the 2019 Mike Traynor Trophy, Glenview Napoleon, exhibited by the Smith Partners' Glenview Murray Greys, opening the sale and attaining equal top price for the day.

| Acc | 35% | | | 74% | 60% | 56% | 57% | | 41% | | | | | | | | |

Notes: Percival is a structurally very correct young bull with moderate growth & index figures, low birthweight (34kg) & high Milk (+8). Despite his moderate growth figures he continues to grow as he matures and will develop into a big bull as did his sire Woodbourn Magnate M24. A typical Rogilla Park bull who comes highly recommended. Vaccinated 5in1.

Notes: Quintessential by name and by nature. The first son to be offered by Monterey Mascot who has proven himself in our herd as an easy calving bull with excellent growth. Quintessential will be an improver of carcass merit with a maternal brother being a 92.25 point carcass at Ingham beef week 2019 and his paternal grandsire producing the 96.5 point Grand Champion carcass at the 2011 Perth Royal Show. Vaccinated 7in1, Vibrovax, and Pestiguard. Tested negative PI.

Notes: A stylish young bull here, out of the same mold as his sire. The first of Delhavalyn Wakefield's progeny to be offered. A moderate Birthweight, smooth moving bull with excellent structure, plenty of softness and ample carcass. Possibly the most exciting trait of this bull is his maternal strength, with the quality line of exceptional females that grace his pedigree. Five of which are ET donors. Highly recommended. Vaccinated 7in1, Vibrovax, and Pestiguard. Tested negative PI.

Notes: Qualified ticks all the boxes; silver, sleek coat, structurally sound and smooth fronted. This bull has the added thickness through his top and down his hindquarter to add extra yield to your herd but in a package that still oozes softness. Qualified is the ultimate balance in every way and would be an asset to any stud or commercial herd. This bull is also backed by the renowned Antoinette family on his dam's side and one of the breeds leading sires in Tullibardine Jeopardy J14. A young sire certainly not to be missed. Please note this bull is only 15 months at sale time. 7in1.

Notes: A fantastic young cow who unfortunately had a stillborn first calf. Rejoined on 26.3.20 to Rogilla Park Percival (ROG P1) Silver. There is outstanding breeding in this young cow and her Breedplan & Index figures are outstanding and well above breed average. Miss Gretal N21 is the last female to be offered by Rogilla Park and follows the satisfactory dispersal of our stud last year. Don't miss this opportunity. Vaccinated 5in1. Joined PTIC before sale.

Notes: The Murray Grey Youth presents Benview Bella Q4, Kindly donated by Aimee Bendotti & Jensen Harris, Benview Murray Grey Stud Western Australia. All proceeds from the sale of this heifer go to the Murray Grey Youth. Bella is a heifer that packs the qualities needed that will make her a functional female of the future and packed full of superstar genetics from the Monterey and Bundaleer Studs. Bella is sound footed, free moving female with the power to impress but with natural finesse. She has impeccable temperament and is show ready for when the season kicks off and sells open to breed to your choice of sire. DNA typed, Sire verified, PI free, B12 and 7in1.
