# WELL GULLY

## POLL MERINO STUD

### MULES FREE

Well Gully has not mulesed for 14 years. These soft collagen, high follicle density skins are wrinkle free, producing high fleece weights, beneficial to the wool grower and suitable to the consumer.

### PLEASE NOTE:

**Due to COVID 19 restrictions, this sale WILL NOT be held on property.**

Elders will conduct the Well Gully Poll Merino Stud Ewe Dispersal Sale on a sole agency basis interfaced with AuctionsPlus.

1	Go to <a href="http://www.auctionsplus.com.au">www.auctionsplus.com.au</a>
2	Select <b>"Sign Up"</b> in the top right hand corner
3	Fill out your details and create a password
4	Go to your emails and confirm the account
5	Return to AuctionsPlus and sign in
6	Select <b>"Dashboard"</b>
7	Select <b>"Request Approval to Buy"</b>
8	Fill in buyer details
9	Once completed go back to Dashboard
10	Complete buyer induction module
11	AuctionsPlus will send approval email
12	Login on Sale Day and connect to auction
13	Bid using the two-step process
14	If you are the successful purchaser, contact the selling agent post sale to organise delivery and payment.

### SALE CONDUCTED BY

Due to the large amount of lots on offer it is recommended that all intending buyers have completed their pre-sale calculations and are aware of what they are willing to spend. This will allow for bidding to commence from the start and prevent an influx of activity at the end of the sale when the timer comes on. The auction has been set to run over a number of days to give all potential buyers plenty of time to bid with the intention that when the timer comes on the lots are at, or close to market value. If they aren't and bidding commences when the timer starts, then the sale will go for a lot longer than intended. To avoid disappointment, it is advised that all potential bidders check with AuctionsPlus that they are registered with a buyer account 24 hours before the sale is due to commence.

# welcome / acknowledgements

## Welcome to the Well Gully Online Final Dispersal Sales

It would have been a pleasure for us to host you at **Well Gully** but the Covid 19 restrictions have thrust us into the new territory of a stud dispersal sale conducted totally online.

We feel deeply indebted to so many of you for your loyal help and support over the years. **Well Gully** would never have reached this stage without it. Thank you.

Sheep and wool growing have been my life and I'd like to pay tribute to the late John Illidge (Senior Lecturer in Sheep and Wool Technology at Longreach Pastoral College), who sowed the seeds of enthusiasm in genetics and wool science for me.

It was a case of being in the right place at the right time because the wool industry was at that point changing from the worsted system of classing to objective measurement. John Illidge was at the forefront of teaching **both** systems during this transition period. Under his stewardship, we were testing low micron wools with a 58s/60s visual count that had been grown in an otherwise strong wool environment.

This was something of a revelation ... a light bulb moment. Fine wool was, of course, king, and from that point what had been a passion to grow it became an obsession with me.

When the Floor Price Scheme collapsed in 1990, **Well Gully** was fortunate enough to have isolated client flocks in western and northern regions of Queensland and north-western NSW whose wool was low micron enough to cushion them a bit from the dramatic fall in prices.

Following the lead of **Well Gully** and their own observations, these clients didn't adopt the simplistic objective measurement culture in sheep selection which was being promoted on a grand scale across Queensland flocks.

This shone the spotlight on **Well Gully** bloodlines in those districts in the early 1990s and requests to hold Field Days started flooding in. One of the key presenters at those days was Richard Clegg who had many years' experience in clip preparation and processing for the apparel market.

The social fabric of our regional towns was taking the full brunt of the 1990 crisis and the industry one felt so passionate about really did require all the assistance it could muster.

An integrated approach evolved and for this I feel a deep sense of gratitude:

- to Phillip Toland for his generosity and sharing knowledge on breeding an advanced merino and providing those cutting-edge rare genetics he had evolved in Poll Merino breeding.
- to Richard Clegg for his tireless effort visiting shearing sheds all over Queensland helping our clients with clip preparation and taking **Well Gully** through the processing chain to light weight cloth and knitwear.
- to John Enderby, Wool Auctions of Australia, for providing **Well Gully** and clients, a showroom for marketing elite wools during the stockpile debacle.

- to Paul Swan for his knowledge of the biological principles of wool growing and for his input into the **Well Gully** genetics, presentations at many isolated regional field days and overseeing our wool processing venture to light weight wool garments.
- to Tony Wilson (Itochu) for the encouragement, support and guidance he gave to **Well Gully** and for supporting the superior wool processing venture.
- to Alex Ball for involving **Well Gully** in the Merino Validation Project and for his presentations at isolated properties in Queensland.
- to Ken Geenty, John Smith and James Rowe (Sheep CRC) for including **Well Gully** in the Merino Meat – Wool Interface project. From this research **Well Gully** kick-started new developments including nutrient partitioning and more recently DNA genomic testing.
- to Stefan Spiker and his team Chris Parker, Kate Gill and Tim Lawrence from Advanced Breeding Services for travelling so far to scan and Stefan for helping lodge our data to Merino Select.
- to Mike Rival who for 32 years conducted laparoscope AI programmes and pregnancy testing.
- to Gregg Blatchly and Jon Porteous from Tru-test and Pat Gunston from Allflex for assisting with **Well Gully** adapting new technologies.
- to the late Peter Harvey for his knowledge of Northern Australian pastures and their limitations.
- to the late Jim Watts for his steely work ethic, skin testing and identifying the biological pathways for our sheep breeding projects.
- to Emma McCrabb and Peta Bradley of Sheep Genetics.
- to Katie Teague, John Solomon and Zara Stewart of Sapien Technology for helping put this complex catalogue together.
- to My wife Candy, without her support none of this would have been possible.
- to my son-in law Jayden Ball and our daughters Jane, Anna and Kimberly for sharing the burden of the huge workload over the years.

Listed are the 5 selection priorities set in place at the outset to form the foundation of the *'Well Gully'* genetics in positioning our clients to be in a more profitable position to meet consumer expectations and demands.

- 1. LOW MICRON FINE WOOL PRODUCTION** suited to subtropical, semi-arid zones.
- 2. FLY RESISTANCE** – led to no jetting, no chemicals and no residue.
- 3. WHITE WOOL** – stylish, lustrous, silky soft, suint-free and wrinkle free skin led to no mulesing.
- 4. CONFORMATION AND SHAPE** – led to higher carcase yields and mobility.
- 5. CONSTITUTION** – early growth and maturity, foraging ability, genetic nutrient partition and water retention led to ease of survival and high fertility.

It is with pride we present these subtropical bred, entrenched female genetic packages for sale.

We hope our contribution to this genetic power house, **THE AUSTRALIAN MERINO** will help you all with your endeavours to meet rapidly increasing global demands by a population increasing by 1 billion people every thirteen years, demanding luxury, naturally grown fibres and meat.

## *unique genes*

## **An exciting line up of NEW GENERATION female gene packages**

These Ewes are the product of intense selection pressure in the subtropical heat and humidity of Northern Australia with its monsoonal rains, periodic droughts and low quality pasture. These environmentally challenging conditions are undoubtedly the toughest for sheep anywhere in Australia.

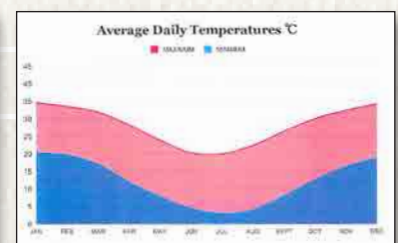

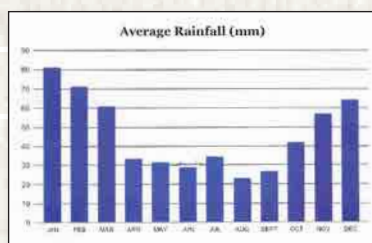

As a result, we have bred Poll Merino Ewes with exceptional fitness genes to survive, thrive and reproduce and grow permanently white wools of high density and length on plain bodies.

It is certain that outlier genes for thermoregulation, feed conversion and natural resistance to fly strike of all forms are present in the *Well Gully* flock. These unique genetic attributes can boost the overall performance and profitability of Merino Sheep in flocks throughout Australia. Key benefits such as NO MULESING, NO FLEECE ROT, NO DAGS and FAR LESS HAND-FEEDING have been reported back from our clients in New South Wales, Queensland, Victoria, Tasmania, South Australia, Kangaroo Island and Western Australia.

# overview Well Gully

<b>DIRECTION:</b>	24km NE of Mitchell, Queensland
<b>DISTRICT:</b>	Maranoa
<b>STOCK WATER:</b>	10 Sub artesian bores – 4 dams
<b>ELEVATION:</b>	377 mtrs (1236 ft)
<b>DROUGHT STATUS:</b>	7 years of drought declaration – declared June 2013 to present time.
<b>NATURE OF LAND:</b>	High basalt tableland scattered with Mountain Coolibah, Brigalow, Wilga, Whitewood, Supplejack and Bottle Trees (the latter four can be a source of fodder). Developed Brigalow/Belah scrub black to chocolate soils. Developed Sandalwood and Poplar Box clay to red loam soils. Natural open country black to grey soil.
<b>PASTURES:</b>	Native coarse grasses, Wire Grass, Fluffy Top. Native soft grasses, Mitchell grass, Blue grass and Flinders grass.
<b>IMPROVED PASTURE:</b>	Predominantly Buffel Grass interspersed with Gatton panic, Rhodes, Purple Pigeon, Bambatsi and Creeping Blue grasses.
<b>FARMING:</b>	Marginal
<b>CULTIVATION:</b>	<b>Summer</b> – Forage Sorghum, Dolicos Lab Lab and Caloona Peas. <b>Winter forage</b> – Oats, due to climate, 1 crop in 3 years average.
<b>CLIMATE:</b>	Humid subtropical – hot summers, dry severely cold winters.
<b>RAINFALL:</b>	Since 1884 – average 22.5 inches (571.9mm) annually.
<b>RAINFALL VARIATION:</b>	<b>Wettest year</b> – 32.6 inches (828mm) <b>Driest year</b> – 4.6 inches (116.8mm)
<b>AVERAGE WETTEST MONTH:</b>	January
<b>AVERAGE DRIEST MONTH:</b>	August
<b>ANNUAL EVAPORATION RATE:</b>	94.4 inches (2400mm)
<b>AIR TEMPERATURE:</b>	<b>Maximum</b> 46.8°C <b>Minimum</b> -9°C
<b>GROUND TEMPERATURE:</b>	<b>Maximum</b> 63.3°C <b>Minimum</b> -23°C
<b>BELOW ZERO GROUND TEMPERATURE:</b>	During MAY - AUGUST: Periodically up to 13.5 hours
<b>REGULAR SUMMER TEMPERATURE:</b>	<b>Recording on a sheep's back (wool tip)</b> 53°C <b>Maximum</b> 64.4°C
<b>AVERAGE HOTTEST MONTH:</b>	January
<b>AVERAGE COLDEST MONTH:</b>	July

- **Silky soft, glossy, lustrously white, safe wools of exceptional fibre length and density with outstanding elasticity**

- **Placid temperaments**  
10 month old Well Gully ewe lambs

- **Conformation**  
(shape and make)

# camel pack

Genetic capacity for nutrient partitioning to rapidly deposit fat for survival and production.

**Nutritional requirements vs availability: May joining**

**This graph clearly displays a sheep has less than 90 days to partition nutrition towards rapid weight gain and fat deposition to draw on for survival, fertility and wool growth in poor seasonal conditions.**

..... Breeding sheep for environments that are by their nature harsh, with unpredictable rainfall patterns and periodic droughts that lead to 'feast' or 'famine' in terms of nutrition, it is important to keep in mind a good balance between genetic characteristics for survival and for production. It is important to select for genetic makeup that can **partition nutrition** towards rapid weight gain and fat deposition during favourable conditions that can then be drawn on by the animal for survival and maintenance of fertility and wool tensile strength during times of poor seasonal conditions or drought. Sheep of this type bounce back quickly as seasonal conditions improve and reward the grazer with much higher fertility, fecundity and lamb survival, while still producing moderate amounts of **high quality** wool (maintaining tensile strength and wool quality characteristics).

## BALE & TEST RESULTS SUMMARY

BRUMPTON QUALITY WOOL AUST P/L  
WELL GULLY  
MITCHELL  
QLD 4465

We are pleased to forward herewith test results to be held in store until further notice.

Sale No: Consignment : P8390

## 6 MONTHS' GROWTH

We are pleased to forward herewith test results to be held in store until further notice:

**Sold:** 2000c/kg Greasy

**Shorn:** 6 months' growth off breeding ewes (4.3kg/HD)

**Uniqueness:**

- Crimped to the tip to keep out dust = **Yield 76.7%**
- Looks like a 60s quality 3 to 4 crimps per cm.
- CV of length for 6 months' growth @75mm.  
CVL @9 very even fibre growth.
- Will make fine-thin-light yarn with minimal breakages during spinning.
- Less Noil @ top making.
- High staple strength due to even fibre growth & regular smooth fibre structure.

# *environmental fitness - fertility - fibre*

This 10 month old ewe lamb with her large ears clearly boasts early maturity, a defiant will to live and maintains blood temperature (thermoregulation) efficiently - another energy-conserving trait evident in 'Well Gully' sheep.

## **LOOSE SKIN**

***A biological component is soft, thin collagen:-***

- Provides a large surface area for growing wool of high fibre density and uniformity of good fibre length. High ratio of secondary follicle density to primary follicles (S/P ratio).
- High yields.
- High number of lambs weaned.
- Less fleece rot.
- Youthful vigour.

# longevity / constitution

These biological components are inherited through the female line. The mitochondrial gene is responsible for the above traits and are inherited from the ewe, never from the ram.

The ewe is the bedrock – the power of female genetics and her major gene effects are historic foundations to the Well Gully breeding programme. This emphasis has been at the forefront of all joinings as depicted in the catalogue.

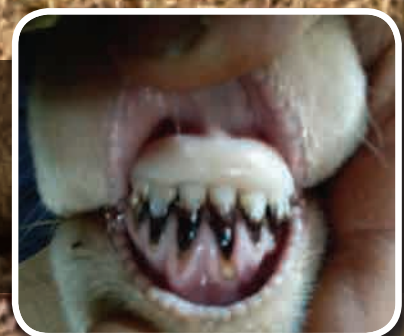

**“Major genes”  
for secondary follicle  
development, constitution,  
lifetime reproductive fitness  
– a key profit driver.**

***Inset: Well Gully ewe – 9½ years of age***

*Photo courtesy Matt Lane*

Bred and reared at *Well Gully*, sold to Matt Lane, Wongan Hills, WA at 7½ years of age. Matt reports all these ewes are still going strong, breeding lambs and growing beautiful characteristic, stylish wool. Not breaking down, not going shelly.

# major gene effects for ...

## GROWTH – MUSCLE – CONSTITUTION – FERTILITY – HEALTH

# catalogue terminology

<b>FD</b>	<b>Micron:</b> Overall mean fibre diameter.										
<b>SD</b>	<b>Standard Deviation:</b> A measure in micron either side of the mean fibre diameter in which 68% of the fibres lie.										
<b>CF%</b>	<b>Comfort Factor:</b> The percentage of fibres less than 30 micron.										
<b>SL</b>	<b>Staple Length:</b> Fibre length at 6.5 months' growth.										
<b>R to C</b>	<b>Resistance to Compression:</b> A measure of softness.										
<b>P/H Gen</b>	<b>DNA Poll/Horn genotype:</b> This is predictive breeding value for Poll Status. However animals with a "PP" genotype will produce significantly more offspring with Poll Status than those with a "PH" or "HH" genotype.										
<b>PWT</b>	<b>Post-weaning weight:</b> An ASBV which estimates genetic difference between animals' growth at 7-10 months of age.										
<b>YFAT</b>	<b>Yearling fat depth:</b> An ASBV which estimates the genetics difference between animals for C-site fat depth, at 10-12 months of age.										
<b>YEMD</b>	<b>Yearling eye muscle depth:</b> An ASBV which estimates the genetic difference between animals for eye muscle depth at the C-site, at 10-12 months of age.										
<b>NLW (%)</b>	<b>Number of lambs weaned:</b> An ASBV which estimates the genetic difference between animals for reproductive performance. A higher NLW means that a ram will have daughters that will wean more lambs genetically. <i>Well Gully</i> also places emphasis on scrotal circumferences.										
<b>BCOV</b>	<b>Breech Cover Visual Score:</b> A score 1-5, with 1 representing the largest bare area around the perineum and breech area.										
<b>Birth Type</b>	Refers to the "Number in Birth" i.e. was the animal born as a single twin or triplet and the "Conception Method" i.e. was the animal conceived via AI or a Natural mating.										
<b>FLEECE TESTS</b>	<p>All Sale ewes tested/shorn April 2020. Tested by Micron Man Pty Ltd WA at <b>6.5</b> months' growth.</p> <table border="0"> <tr> <td><b>Average FD:</b></td> <td><b>18 Micron</b></td> </tr> <tr> <td><b>Average R to C:</b></td> <td><b>6.1 kPa*</b></td> </tr> <tr> <td><b>Lowest R to C:</b></td> <td><b>3.9 kPa*</b></td> </tr> <tr> <td><b>Average SL:</b></td> <td><b>84.4 mm*</b></td> </tr> <tr> <td><b>Longest SL:</b></td> <td><b>108 mm*</b></td> </tr> </table> <p>* Based on results of all ewes tested at 6.5 months of growth.</p> <p><b>Please Note:</b> <i>Well Gully</i> shears six (6) monthly, last entirely sold wool clip averaged <b>17</b> Micron (fleece and cardings including shanks).</p> <p><b>Explanation of Resistance to Compression:</b> R to C is measured in KiloPascles (kPa). The lower the kPa, the softer the fibre. The range for 18 Micron Merino wool is from 8-12 kPa. Cashmere has an average measurement of 5.3 kPa commanding a consistently higher price due to a reputation of softness &amp; prickle free.</p>	<b>Average FD:</b>	<b>18 Micron</b>	<b>Average R to C:</b>	<b>6.1 kPa*</b>	<b>Lowest R to C:</b>	<b>3.9 kPa*</b>	<b>Average SL:</b>	<b>84.4 mm*</b>	<b>Longest SL:</b>	<b>108 mm*</b>
<b>Average FD:</b>	<b>18 Micron</b>										
<b>Average R to C:</b>	<b>6.1 kPa*</b>										
<b>Lowest R to C:</b>	<b>3.9 kPa*</b>										
<b>Average SL:</b>	<b>84.4 mm*</b>										
<b>Longest SL:</b>	<b>108 mm*</b>

**Please Note:** All Well Gully Ewes are **easily identified** with **tamper-proof electronic tags**, with an easily visually read identification Number – corresponding to the tag number in the catalogue.

## SALE EWE CLASS DESCRIPTIONS

**Top Frame/Top Wool** – Denotes top of the scale for their attributes.

**Frame/Wool** – Excellence of their attributes, used in compensatory mating.

**Special** – Stud ewes are used for progeny testing, benchmarking external sires against Well Gully sires in this environment.

## TRANSPORT

The following transport companies have been engaged to assist with the delivery of ewes to their successful purchasers:

**Dick Smith Transport**  
0428 636 236

**Lockie Falls**  
0429 826 342

**Doug Giles**  
0427 720 010

In excess of 500 ram sales are made at Well Gully annually. Clients are located across the country and therefore use the above transportation services to ensure the safe arrival of their stock. These livestock carriers have always conducted their services in a professional manner.

For your transport arrangements please contact – Peter Sealy at Elders on 0428 626 959

## ANIMAL HEALTH STATUS

Well Gully is a Brucellosis free accredited flock. All ewes receive a Glanvac 6 vaccination at each six (6) monthly shearing, the most recent in April 2020. Lice free (2 metre high netting boundary).
