

BOOROOMOOKA ANGUS

Established 1926

Your Quality Choice

Calving Ease

Quiet Temperament

Highly Fertile

High Marbling

231 Bulls

Friday 14th August 2020

12 noon at Keera, Bingara, NSW

History and Breeding Principles

The Booroomooka Angus Stud was founded in 1926 by Mr H Gordon Munro. The stud is now run by Gordon's son Hugh and grandson Sinclair. In 1926 five stud heifers were purchased from Mr NL Forster, Abington, Armidale. In 1928 further heifers were introduced from Glenelg, Waiterenui and Matapihi Studs in New Zealand.

Over the years many bulls have been imported from Scotland, USA and New Zealand. More recently semen and embryos are sourced globally to take advantage of progeny test data. Booroomooka Angus Stud was very successful in the show ring for over sixty years.

The Booroomooka Angus Cow herd functions in a tough environment. An efficient, hardy, fertile herd has been developed since 1926.

Nowadays selection tools include Group Breedplan,

visual assessment, testing on property, genomic technology and structured progeny tests. Cattle are run in larger contemporary groups so that genetic differences can be assessed.

Structurally sound, fertile, quiet bulls with the genetic potential to increase long term profitability.

Welcome to the Booroomooka Annual Bull Sale

Dear Friends,

Wow – we live in incredible times. We have seen unprecedented changes this year and an incredible rebound in the cattle industry. Prices for cattle are at all time highs and signs are that the strength will be with us for a while.

Integrity, Commitment, Reliability and Innovation are our key values. Booroomooka Angus celebrates 95 years of breeding high quality cattle – focusing on traits that help increase the long term profitability of our customers.

The Booroomooka Cow Herd is unique, developed on our hilly native grass country. The cows are resilient - adapted to cope with lower quality native grasses and seasonal fluctuations. They calve as two year olds and need to be productive with good doing ability. Our functional fertile cow herd is imperative to the success of our bull customers.

Our strong commitment to increase marbling and growth has helped increase the demand for Booroomooka Angus sired progeny. Years of performance recording and selection of cattle with high carcass quality is being rewarded.

The Booroomooka Bulls are adaptable and have been successfully used in different production systems (grain fed, grass fed and organic) - from our local area Northern NSW to Central Qld, Southern NSW, Victoria, Northern Territory, Tasmania, King Island, South Australia to WA.

We are so proud of the 231 Herd Book Registered Bulls to sell on Friday 14th August. You have a quality choice of bulls that have leading traits for Calving Ease, Growth, Fertility and Carcass to build your herd. The bulls are in condition “ready to work” for you, passing a Veterinary Bull Check, have been independently evaluated for structural soundness, temperament and coat type. If you require any more information about the sale bulls please let us know.

This year we are providing more flexibility for buyers who are unable to physically attend the sale. All lots will have video footage and buyers can bid on Auctions Plus. We also have a free inspection service available for you to use on or prior to sale day. Please contact us if you would like to use this service. Three Open Days are to be held, from 9am to 5pm on 29/7/20, 06/8/20 and 13/8/20. If you would like to inspect the bulls at any other time please let us know.

Kind Regards,

Hugh and Sinclair Munro

SALE DAY COVID-19 SAFETY PLAN

The Bull Sale is to be held On-Property Keera on Friday 14th August, commencing at 12 noon. To avoid delays we strongly encourage you to Pre Register to the Selling Agents as a buyer by Wednesday 12th August. On the Buyer Registration form please also write down names/mobile numbers of people travelling to the sale with you. Names will be ticked off when entering. If you have not pre registered you will be directed straight to a registrations desk before you can access the Sale Day Facility. Please maintain social distancing of 1.5 metres and adopt good hand hygiene practices.

More information at our website
www.booroomooka.com.au

SALE LOCATION:

The Booroomooka Angus Sale is to be held on the property Keera, 5796 Copeton Dam Rd, Bingara, NSW,2404.

Nearest commercial airports are Armidale, Inverell, Moree or Tamworth. Small planes can land on our Keera Property Airstrip or at Bingara. Please ring us – to advise landing time so we can arrange for you to be picked up. Bulls may be inspected from 9am on the morning of the sale, or at any other time by arrangement with the selling agents or vendors.

GPS: Longitude 29°59'45.3", Latitude 150°46'43.7" Keera is 28km east/south east from Bingara on the Bundarra Rd (or Copeton Dam Rd)

From Armidale: Approx 11/2 hours north west, travel to Bundarra and then Bingara

From Goondiwindi: Approx 2 hours south, travel to North Star, Warialda, Bingara

From Tamworth: Approx 2 hours north, travel to Manilla, Barraba, then Bingara.

From Inverell: Approx 50 minutes, travel on Copeton Dam Rd, from Copeton Dam travel towards Bingara.

Lot 5

ACCOMMODATION

Bingara Imperial Hotel Motel	(02) 6724 1629
Bingara Fossickers Way Motel	(02) 6724 1373
Bingara Sportsmans Hotel	(02) 6724 1880
Bingara The River House	0428 834 281
Bingara Peranjou Cottages	0427 715 726
Bingara Riverside Caravan Park	(02) 6724 0081
Warialda Sunflower Motel	(02) 6729 1344
Inverell Top of the Town Motel	(02) 67222622
Barraba The Playhouse Hotel	(02) 67821109

BUYER REGISTRATION

A Buyer Registration system will apply. We strongly encourage you to Pre Register to the Selling Agents as a buyer by Wednesday 12th August. In accordance with our Covid-19 Safety Plan please write down names/mobile numbers of people travelling to the sale with you. Names will be ticked off when entering. If you have not pre registered you will be directed straight to a registrations desk before you can access the Sale Day Facility Area.

SALE CONDITIONS

All lots will be sold subject to the usual conditions governing auction sales, these will be displayed on sale day. The auction price will be exclusive of GST.

DISCLAIMER

All reasonable care has been taken to ensure that the information provided in this catalogue is correct. However the vendor or the selling agent do not assume any responsibility

for the correctness, use or interpretation of the information included in this catalogue.

GUARANTEE

Booroomooka guarantees the structural soundness and fertility of the bulls. The entry of every bull constitutes a guarantee by the vendor that if a bull should prove infertile or breaks down to reasons other than injury, misadventure, disease, mismanagement or negligence. The vendor will provide you with a satisfactory replacement if available, or issue you with a credit equal to the purchase price minus salvage value. This credit may be used to purchase an animal at a future Booroomooka sale. Any request for replacement/credit must be lodged with the vendor within 11 months of purchase.

INSURANCE

Facilities for insurance will be available at the sale.

HEALTH

The vendor has a BioCheck Biosecurity Plan, with a JBAS-8 Score. The plan was done in consultation with veterinary advice. The plan is designed to ensure the farm has considered the major biosecurity risks and has appropriate risk management strategies in place. The herd is monitored negative TB and is confirmed free of brucellosis. In July all lots were drenched and treated for lice. They have had their booster vaccination for vibriosis and 7 in 1. All bulls have been tested PI free of pestivirus.

FEET

None of the cattle offered for sale have received treatment for their feet.

VET INSPECTED

All bulls offered for sale have undertaken a Bull Breeding Soundness Examination by Barraba Veterinary Clinic. All bulls were subjected to a physical examination of structural soundness, examination of the reproductive trait, including an internal examination and visualization of the penis. Each bull was also subjected to a semen collection and evaluation.

GENETIC TESTING

The genetic status of individual sale bulls is displayed in the catalogue.

LOOKING AFTER YOUR NEW BULL

After purchasing your bull, please ensure you fill out the buyers instruction sheet which includes delivery instructions. The sale bulls have been prepared so that they are ready to go to work with your cows. Previous to that they have been fed a nutritionally balanced high fibre mix. When you get your new bull home do not put him with older bulls. Booroomooka bulls are used to being handled with horse, vehicles and respond to quiet working dogs. When your new bull is joined to your cows, inspect him at least weekly to ensure he is walking freely and his penis appears to be normal. If there is a problem take him out of the cows and report to a vet. Early treatment is vital. It is a good idea to have spare bull/s ready to work if a problem/s occur. When joining is finished, the bull would appreciate a drench and lice treatment. The minimum vaccinations required are an annual booster dose of vibriosis and 7 in 1 vaccine, commencing no later than May next year. If you have any questions regarding the bulls, the progeny etc please let us know. If you require more information go to www.booroomooka.com.au.

SALE DAY PHONE (02) 6723 6622

Our Sale Bulls include our very best. To ensure genetic continuity we will retain semen access (rights) for specific bulls - the “Booroomooka ” bulls.

Lots showing this elite logo  will require that Booroomooka shall retain the right to collect up to 500 straws for Booroomooka use only. Booroomooka will collect semen by agreement and at its cost and Booroomooka will reimburse for any extra expenses associated with the semen collection for Booroomooka’s use.

NLIS Tag/Freeze Branding

All bulls will have NLIS ear tags attached and we will transfer to your nominated PIC. All bulls will be freeze branded with the bull ID.

Genetic Improvement Tool

To make genetic change in traits we use Angus Group Breedplan as a valuable tool. Angus Group Breedplan EBVs have been proven to be more accurate than raw performance measurements for assisting in the selection of breeding stock. Raw data in some cases can be misleading due to environmental factors. Raw measurements should not be compared unless the cattle are in the same contemporary group.

Whilst in the calculation of EBVs all available pedigree, genomic and performance information on each animal and its relatives (parents, ancestors, siblings, progeny, etc.) is combined to provide a single best estimate of an individual's genetic merit for each trait. In addition, allowance is made for environmental differences between properties, seasons and management groups on each animal's performance. Differences in heritabilities between traits and genetic associations between traits are also accounted for in the calculation of EBVs.

231 Quality Bulls to Sell

- 95 Years of Breeding a Resilient Cow Herd
- Integrity, Commitment, Reliability and Innovation
- Veterinary Bull Breeding Soundness Evaluation
- Structure, Temperament, Coat Type and Frame Assessed
- Vaccinated for Vibriosis, 7 in 1 and Drenched
- Tested PI Free
- Progeny Recognition in the market place
- Bulls Ready to work for You !

Elite Lots

1, 2, 3, 4, 5, 6, 7, 8, 9, 11, 12, 18, 21, 25, 31, 32, 40, 47, 48, 49, 50, 54, 84, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 119, 120, 143, 165, 168, 169, 170, 171, 172, 173, 174, 177, 181, 196, 203.

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following pages.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

BIRTH

Calving Ease Direct	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

GROWTH

200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

FERTILITY

Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

CARCASE

Carcase Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

FEED EFFICIENCY			
Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
TEMPERAMENT			
Docility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
STRUCTURE			
Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.
SELECTION INDEXES			
Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

Booroomooka Sale Bull EBV Summary

Purchaser..... \$.....

The Booroomooka Sale Bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft. The Booroomooka bulls were assessed by Liam Cardile (Accredited Assessor 1033) of BEEFXCEL on 03/6/2020.

The beef class structural assessment system uses a 1-9 scoring system for feet and leg structure. A score of 5 is ideal - but rare in two year old bulls.

A score of 4 or 6 shows slight variation from ideal.

An animal scoring 4 or 6 would be acceptable in any breeding program.

A score of 3 or 7 shows greater variation but would be acceptable in most programs.

A score of 2 or 8 are low scoring animals and should be looked at closely before purchasing.

A score of 1 or 9 should not be catalogued and are considered culls.

CODES FOR STRUCTURAL ASSESSMENT

FC: Front Feet Claw Set

RC: Hind Feet Claw Set

FA: Front Feet Angle

RA: Rear Feet Angle

RS: Rear Legs (Side View)

RH: Rear Legs (Hind View)

LM: Muscle Score

TEMP: Temperament (note: scores 1 to 5, lower the score - more favourable)

SN: Sheath/Navel (note: scores 1 to 5, higher the score - more favourable)

COAT SCORE (CT)

Visual Coat Scores were assessed. Selecting animals for a sleeker coat may increase their tropical adaptability. Coat Scores are recorded on a 1-7 scale, with 1 being sleek and 7 being woolly. Coat Score 1 is extremely short and found in some *Bos indicus* and some of their crossbreds.

CT	Type
2	Very Short
3	Fairly Short
4	Fairly Long
5	Long
6	Hairy

FRAME (FRM)

The Sale bulls were assessed for frame. The height or 'frame' of cattle of a given age is closely related to maturity type. Smaller Framed cattle generally have an earlier maturity pattern than larger framed cattle. The bulls have been classified into four frame groups – small (S), medium (M), large (L) and very large (VL).

REFERENCE SIRES

High Quality Sons

Rennylea L519 – 67 sons to sell

We have an outstanding lineup of L519 sons to sell. A wonderful choice for the AI, Seedstock and Commercial Industry. He is breeding true to type, very quiet with nice length and muscle pattern. L519 is a stylish easy doing bull with very good structure

L519 is highly proven with tremendous growth combining with calving ease. He ranks in the top 1percent of the breed for foot structural soundness (FC), top 2% for quiet temperament, top 2% for marbling and top 8% for muscle.

L519's sire HPCA Intensity has high growth with heaps of muscle and high marbling

L519's daughters are highly fertile with nice length and constitution. His maternal line is impeccable with his mother H414 a super impressive cow who is exceptionally well structured. His maternal grand dam C310 is a moderate framed Te Mania Limited daughter, still active in the Rennylea at 13 years old.

Buyers have a wonderful choice of 67 L519 sons from highly productive Booroomooka matrons.

Booroomooka Kingy K9 – 27 sons

Kingy is an exciting sire with superb phenotype and slick coat. Impeccable structure, combining growth, frame, length and doing ability. Proven in the Benchmark Progeny test to be a trait leader for marbling (top 2%) and days to calving (top 1%). Maternal line is from the famous Tracey family – so no surprise that Kingy is breeding so well.

Rennylea Magnum M6 – 23 sons

Is stamping his progeny with heaps of growth and capacity. High marbling with carcass yield and muscle. Top 1% scrotal size.

Sydney Black Pearl – 16 sons

Bends the growth curve with low birth weight and explosive growth. Highly proven outcross genetics and is in the top 10% for muscle.

GAR Fail Safe – 13 sons

Exciting new bull that has low birth weight with high marbling. He is heavy muscled with added capacity and pleasing phenotype. His dam is one of the highest selling females in angus history.

Esslemont Lotto – 11 sons

Producing thick stylish progeny with heaps of muscle, high marbling and finishing ability. Low birth weight with explosive growth. Top 1% Days to Calving, and Top 1% \$ABI.

Millah Murrah Loch Up – 11 sons

Heaps of power and growth with calving ease.

PA Full Power – 11 sons

Loads of muscle and shape. Beautiful slick coats, low birth weight with high marbling.

Booroomooka Marscay M570 – 5 sons

Stylish progeny, deep and thick. Bends growth curve like no other, +0.9 bwt to +158 600Day. Structurally sound with high marbling and top 1% all indexes.

Booroomooka Kulgera K270 – 10 sons

Breeding such structurally sound progeny. Calving Ease sire with explosive growth. Excellent muscularity with high retail beef yield with above average marbling.

Booroomooka Leroy L173 – 10 sons

Stylish looking bull with impressive looking progeny. Positive calving ease and high growth.

LD Capitalist – 5 sons

Deep, wide-based, strong topline with volume. Excellent feet and leg structure. Have a couple of really special sons in the sale.

We're committed to securing **successful** outcomes for our **valued** clients.

DISCLAIMER AND PRIVACY INFORMATION

IMPORTANT NOTICES FOR PURCHASERS

ATTENTION BUYER: *Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.*

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name are as follows:

PV: both parents have been verified by DNA

SV: the sire has been verified by DNA

DV: the dam has been verified by DNA

#: DNA verification has not yet been conducted

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

*I, the buyer of animals with the following idents.....
.....
from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.*

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au
