

# CLUNIE RANGE ANGUS STUD

ANNUAL ON PROPERTY  
**BULL SALE**  
FRIDAY 7TH AUGUST 2020

**CLUNIE RANGE**  
ANGUS STUD

# WELCOME

## Welcome everyone!

Here is hoping that if you haven't already received good falls of rain this year, that your turn is coming.

It is in these unrepresented times we have all experienced in the last few years that the benefits of breeding with high-quality angus cattle become blatantly obvious.

Quality angus cattle stand alone when it comes to fertility, do-ability and performance and these traits are paramount to us. When all is said and done, breeding is about getting calves on the ground first and foremost. As always, this year's line of bulls have been semen tested and morphology tested. Years ago a highly regarded Angus Breeder Charles Bott told us 'Never fall in love with your own cattle' and we have adhered to that adage ever since. We expect our cattle to perform under pressure and of course, we have gone further over the decades, constantly improving our genetics using all the latest and best technology and data at our disposal as well as the wealth of experience accumulated over the years. This is to ensure we supply our clients with the absolute best, cutting-edge performance genetics that the angus breed can offer.

The consistent positive feedback we receive from our clients confirms that we are on track and continually evolving forward. Our background in retained ownership continues and we have some serious runs on the board here! We have built strong relationships with feedlotters and processors who recognise the superiority and consistency of our cattle in terms of quality, yield and MSA indexes.

When our bulls are used as terminal sires over other breeds weaning weights, feedlot performance and MSA indexes increase dramatically. This is no accident -its all about consistent breeding which takes time and discipline. With considerable numbers behind what we do, we know that our bulls will breed the way they look. This enables our clients to take full advantage of the ever-increasing demand for quality, angus genetics, from feedlotters, processors and end-users alike.

This year's sale offering includes a line of outstanding yearlings that we are excited about. A run of embryo sons of Baldrige Beastmode, Scale House and Proceed lead the pack.

The vast majority of our rising 2 year old bulls were weaned early and trucked to Prairie in North Qld where they certainly had to forage and walk for water. We think it has been an ideal preparation for a long working life in front of them. As a result of the early weaning and tough start to life they will present at sale time perhaps a little lighter than normal

There will be a contemporary group that stayed at home and had life a little easier and we had a third group that we used as yearlings at various locations. These 3 groups will be presented on sale day in separate groups.

We are proud of this year's sale draft and look forward to seeing you on sale day.

**Brett Guest**

# SALE INFORMATION

## **INSPECTION**

Pre-sale inspections are always welcome and can be arranged by contacting Clunie Range or your selling agents. Bulls will be on display from 10am on the morning of the sale.

## **GUARANTEE**

Every bull is guaranteed to be a breeder at the time of the sale and is guaranteed fertile for twelve months from sale day. If a bull should prove infertile or unable to serve cows naturally (provided it is not caused by injury suffered or disease contracted after sale), the purchase price will be refunded or a credit given, equal to the purchase value of the bull less salvage value.

## **PHONE BIDDING**

There is full mobile phone service at our property. If you wish to bid by phone please arrange this prior to sale day with Brett or your one of the selling agents.

## **INSURANCE**

We recommend that purchases insure their bulls. McGregors and Elders will be able to assist with all insurance inquiries.

## **AGENT REBATE**

A rebate of 4% is offered to all licensed agents introducing buyers in writing at least 24 hours prior to the sale and settling accounts on their behalf within seven days.

## **REGISTRATION TRANSFERS**

Upon the request of the purchaser, Clunie Range is happy to transfer the registration of bulls, free of charge.

## **REFRESHMENTS**

Join us for our complimentary morning tea, snacks, lunch and after sale drinks.

## **HEALTH**

All bulls have been vaccinated with a 7 in 1 (Lepto), Pestiguard (Pestivirus/BVDV, Vibriosis and Trivalent Tick Fever Vaccine. Clunie Range Angus is within the Johnes Protected Zone and is a JBas 7 herd. Bulls are free to travel throughout Queensland and Northern Territory.

## **AM, NH & CA GENE STATUS**

All bulls have been DNA tested for the recessive genes AM, NH, and CA. Any bull that does not have the result in the catalogue will be available on a supplementary sheet on sale day. We do not consider any of these to be a significant commercial issue, any client wishing to find any further information is welcome to contact us at any time.

## **FERTILITY**

All the bulls have passed a semen test, including semen morphology. They have also had a physical examination of external and internal reproductive organs by Inverell Vet Clinic.

## **DISCLAIMER**

Every care has been taken during the compilation of the catalogue to ensure the accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occurred.

## **DIRECTIONS**

There is a map at the back of the catalogue.

# THAT CLUNIE CONSISTENCY

We have built our reputation on performance, integrity and consistency... Our performance track record is a genuine reflection on the success that our clients have obtained as a result of using Clunie Range Genetics.

Our footprint continues to grow into every

state of the country. We measure our herd's success by the consistent feedback on performance and the data obtained reinforces our commitment to our breeding program.

Our number one aim is to produce consistency across the entire draft.

## ALL ABOUT THAT CARCASS

We have always preferred getting feedback on lines of cattle in preference to small numbers of animals in carcass competitions. Clunie Range enjoys a reputation for carcass quality.

A background steeped in a history of retained ownership and value adding. We have followed our product all the way through to Korea and we know that our cattle perform where it counts – in the Boning Room. The depth and capacity of our cattle translate to yield through the Boning Room. We regularly achieve high marble scores, however it is the consistency that we are proud of.

# 2019 CLUNIE RANGE BULL SALE HIGHLIGHTS

Last year's sale was a great success and we'd like to thank all those who supported us! We wish you every success with our genetics – *The Guest Family*.

# UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

## What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following pages.

# UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

BIRTH			
<b>Calving Ease Direct</b>	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
<b>Calving Ease Daughters</b>	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
<b>Gestation Length</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
<b>Birth Weight</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
GROWTH			
<b>200 Day Growth</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
<b>400 Day Weight</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
<b>600 Day Weight</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
<b>Mature Cow Weight</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
FERTILITY			
<b>Days to Calving</b>	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
<b>Scrotal Size</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
CARCASE			
<b>Carcase Weight</b>	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
<b>Eye Muscle Area</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
<b>Rump Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
<b>Retail Beef Yield</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
<b>Intramuscular Fat</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

FEED EFFICIENCY			
<b>Net Feed Intake (Feedlot)</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
TEMPERAMENT			
<b>Docility</b>	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
STRUCTURE			
<b>Front Feet Angle</b>	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
<b>Front Feet Claw Set</b>	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
<b>Rear Feet Angle</b>	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
<b>Rear Leg Hind View</b>	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
<b>Rear Leg Side View</b>	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.
SELECTION INDEXES			
<b>Angus Breeding Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
<b>Domestic Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
<b>Heavy Grain Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
<b>Heavy Grass Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

## DISCLAIMER AND PRIVACY INFORMATION

### IMPORTANT NOTICES FOR PURCHASERS

**ATTENTION BUYER:** *Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.*

#### **Parent Verification Suffixes**

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name are as follows:

*PV: both parents have been verified by DNA*

*SV: the sire has been verified by DNA*

*DV: the dam has been verified by DNA*

*#: DNA verification has not yet been conducted*

*E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.*

#### **Privacy Information**

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

#### **BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA**

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

*I, the buyer of animals with the following idents.....  
.....  
from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.*

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)

Traits Observed: GL,200WT,Genomics

**Notes:** Starting the sale with a Clunie Range Legend son who has been the ninth heaviest used sire in the country in the past two years, this fellow is a good example of why. P364 is well balanced with a good spread from birth to 600-day growth with huge scrotal and good IMF.

**Notes:** Many debates internally here about selling or keeping this young sire. Combines the data and frame of Lotto with the soundness and type of Hingai 469. It's hard not to be impressed with this young bull, being very structurally correct, long bodied with great depth and an impressive topline. Described by two separate southern stud breeders as the best Lotto son they had seen.

**Notes:** A feature bull- This is a stylish bull with tremendous length and genuine presence. He has massive growth, big EMA and strong IMF. For a young bull to scan with an IMF of 6.1 with 6 and 5 mm of fat is very impressive. H381 is possibly our best donor cow, this is a cracking young sire. H381 has already produced Kaluha K330 and another young sire Miles M425 that was purchased by Granite Ridge Angus who rate him very highly.

**Notes:** From the dam of Clunie Range Legend, Q324 offers low birth with massive growth. As well as a great spread from birth to growth, he has large scrotal, and extremely strong carcass as well. At 13 months of age this is a young sire with a big future. He has the style and presence to add to his data set.

# Performance supplements for beef cattle

## Deliver protein and minerals to optimise production

Improving results in beef cattle systems requires year-round nutrition planning. Performance Feeds provides convenient, custom nutrition supplements that optimises available forage, minerals, and protein for herd health and profitability:

### **Anipro** Liquid Supplements

- Molasses based liquid supplement
- Provides essential protein, minerals and vitamins
- Up to 27% improvement in forage intake
- Fully serviced PCAS approved program saves time and money

### **WeatherPro**

- Waterproof and highly palatable loose lick
- Effectively manage mineral and vitamin deficiencies
- Suits all classes of grazing cattle
- Improve fertility, growth and immunity

**Coolatai Rural Supplies** - 0427 790 582  
Servicing Coolatai, Walgett, Willow Tree  
and Surrounding districts

**Scott & Casey Ayre** - 0488 441 181
