Veterinary Certificate

On 6/08/2020 I examined 55 stud Angus heifer weaners, at the request of David Murray, at "Straban" Walcha. The heifers were pregnancy tested, and a physical examination undertaken, which included palpation of the uterus & ovaries, observation of the head, eyes, legs, feet & gait. All the heifers were Not detectably pregnant, and appeared to be satisfactory breeding animals.

The following is a list of comments:

- NURQ27 : warts on neck
- NURQ35 : Left eye healing corneal ulcer, treated at time of examination
- NURQ37 : Right eye cloudy, pink eye scar
- NURQ39 : Left eye cloudy
- NURQ47 : Warts around Right eye
- NURQ59 : Tail base offset, not detrimental
- NURQ67 : Left eye cloudy
- NURQ71 : Right eye cloudy
- NURQ101: Right eye healing corneal ulcer, treated at time of examination
- NURQ125: Left eye cloudy
- NURQ163: Left eye cloudy

Please note these are comments only. All the animals seemed to have satisfactory vision at time of examination.
