## ON PROPERTY SALE

**Thursday, 27th August, 2020**

---

“Ellerslie Park”, Culcairn NSW  
Commencing at Noon  
Bulls penned from 9.00am

---

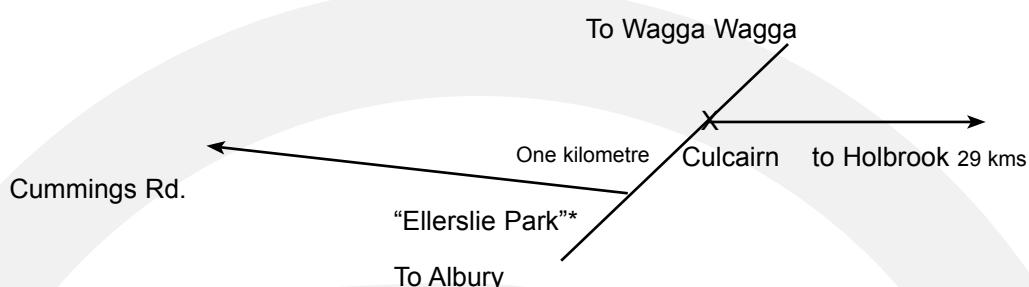

**Paull & Scollard**

**Nutrien**  
Ag Solutions™

## **TO ENSURE YOUR COPY PLEASE BRING THIS ONE ON SALE DAY**

**DIRECTIONS:** The Rennylea Angus sale is held at the Culcairn property, "Ellerslie Park" located one kilometre south of Culcairn on the Olympic Highway. Please turn west onto the Cummings road and enter the property through the open double gates. Culcairn is located 29 kilometres west of Holbrook and 49 kilometres north of Albury.

**REFRESHMENTS:** The sale refreshments are catered for by the Culcairn Early Childhood Centre. Please give generously to the centre, this is their major fundraising opportunity for the year. Minimum charge is \$10 for morning tea and lunch. Rennylea provides the scotch fillet and rolls for the lunches.

**INSPECTION:** Open Days – Bulls available for inspection on the 7th, 14th, 21st August 9am to 1pm or other times by appointment. Please contact Bryan (0429 038993), Ruth (0400 302629) or Anthony (0437 043443) to arrange a suitable time. The bulls will be penned by 9.00am on sale day.

**ANIMAL HEALTH & WELFARE CERTIFICATION:** The bulls have received regular 7-in-1 vaccinations over their lifetime. They are vaccinated against vibriosis (2x). The bulls tested negative for persistently infected pestivirus BVDV and vaccinated against pestivirus. Rennylea Angus is JDBAS8 under the industry approved Biosecurity plan. The bulls carry 3 forms of identification, they are tagged at birth with both a management and a NLIS tag, and freeze branded at 12 months of age. Their full health history is included in the sale folder for the buyer at the time of sale, along with comprehensive notes written by the Holbrook Veterinarian Dr. Reon Holmes.

**DELIVERY:** **"Our bulls on Your Property". Rennylea organizes free delivery, throughout NSW, Qld, Vic and SA following the sale.** These arrangements may be in conjunction with other bull sales held in the area. In some cases, delivery may require additional transport from a central point to your property.

**LOOKING AFTER YOUNG BULLS:** On pages 6 & 7 we set out your obligations for caring for young bulls when you take them home, compiled with the advice of Dr. Reon Holmes BVSc. The working life of young bulls will be extended by following these recommendations. Our Guarantee has been updated.

**SALE BY VIDEO AUCTION:** The sale shed is in close proximity to the bull pens. The auctioneer sells the bulls by auction, with an electronic video for each bull projected onto the screen. The purchaser & price of the previous lot is displayed on two TV screens.

**PLEASE NOTE:** The bulls in this catalogue have never been handled with horses. We recommend that if you use horses, that you move your new bull with other non-cycling cattle, so that they are not spooked by the new situation. We recommend that the new bulls are moved on their own by motorbike, as that is what they are used to. Gradually introduce the movement of bulls with horses, so they can adapt in their own time

# ANGUS SPRING SALE

## Thursday 27th August, 2020

"Ellerslie Park", Culcairn NSW  
Commencing at NOON

Actioneers: Andrew Wishart (0407 424 706) & Peter Godbolt (0457 391 929)

View the film clips of the bulls at [www.rennylea.com.au](http://www.rennylea.com.au)  
email: [rennylea@bigpond.com](mailto:rennylea@bigpond.com)

## 174 Angus bulls

HBR & APR registered with the Angus Society of Australia  
JDBAS8 - eligible for all states

Breeding Soundness by Dr. Shane Thomson & Dr. Seamus McKillop  
Structurally assessed and scanned by Jim Green

**Bulls will be penned and available for inspection from 9 am**  
**- Interfaced with Actions Plus**

**SALE TERMS:** All lots will be governed by the usual sale conditions, available on sale day. A 3% rebate is offered to outside agents introducing buyers prior to sale day. To qualify for this rebate they must do two things.

- i. Introduce the client in writing to the vendor (via email [rennylea@bigpond.com](mailto:rennylea@bigpond.com)) prior to the sale.
- ii. Settle within 7 days.

Agents not meeting the above terms will be entitled to a 1% rebate.

**PHONE BIDDING:** Please contact the Albury office of Paull & Scolland Landmark (02 60251677, or fax 02 60255144) to arrange phone bidding, 24 hours prior to the sale or one of the agents listed above.

**Sale Catalogue Disclaimer** All reasonable care has been taken to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor or the selling agents make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

Dear Cattle Breeder,

It is with great pleasure that we present our Spring On Property sale catalogue for 2020. We have catalogued 174 bulls in three age groups, there are 40 P bulls born in the spring 2018, including sires we have used, highlighted in the notes. In the Q bulls, 92 are born in autumn 2018 and there are 40 yearling spring Q bulls. By the time you receive this catalogue in the mail, the video clips will be hosted on our website at [www.rennylea.com.au](http://www.rennylea.com.au). **We also recommend sorting the bulls prior to the sale, to shortlist those that meet your breeding objective.**

Since our Autumn bull sale, Australia has been in lockdown due to the coronavirus. Much has been written about the human and economic cost of the control, limiting international and domestic travel to prevent person to person transmission. It has dramatically changed much of everyday Australian life. We are taking advice from Nutrien with whom we conduct the sale and arrangements on sale day will follow best practice recommendations.

**To make the inspection easier prior to sale day we are holding 3 open mornings on Friday the 7th, 14th and 21st August.** You will be able to inspect the bulls you have sorted in the catalogue on those mornings. We recommend that you contact the Rennylea office at Culcairn on 0427 038993 or Anthony on 0437 043443 to let us know you are coming. On sale day, there will be limits to the number of people allowed in a pen at any one time.

The sale is once again interfaced with Auctions Plus and videos and full sorting functions available on the Rennylea, Auctions Plus and Angus Australia websites prior to the sale. Please make sure you register on Auctions Plus prior to the sale.

**The sale features outstanding sons of Rennylea H708 (16), K907(15), L508 (21) and his full brothers L467 and L519. All these bulls offer proven and profitable performance, moderation and high carcase quality.**

A son of Rennylea L519 topped the Autumn sale and his progeny continue to impress around the industry. K907 is an EF Complement son with top 1% calving ease daughters, explosive growth and moderate maturity pattern. He is in the 1st percentile for all indicies.

**The 174 bulls average +3.6 for marbling which is the top 5% of the angus breed. All bulls average in the top 5% for the heavy grain index and better than the top 10% for all other breeding indicies.**

We draw your attention to Lots 4, 7, 11, 18, 23, 24, 28, 34, 35, 36, 38, 41, 42, 50, and 59. Many of these bulls were in our keeper groups.

We have done everything possible to ensure the bulls perform to their description and achieve great results with your cows. Please contact Bryan (0429 038993), Ruth (0400 302629) or Anthony (0437 043443) at any time to discuss your bull requirements.

Thank you for your interest and support,

*Bryan, Lucinda, Ruth & Anthony Corrigan*

## RENNYLEA BREEDING OBJECTIVES

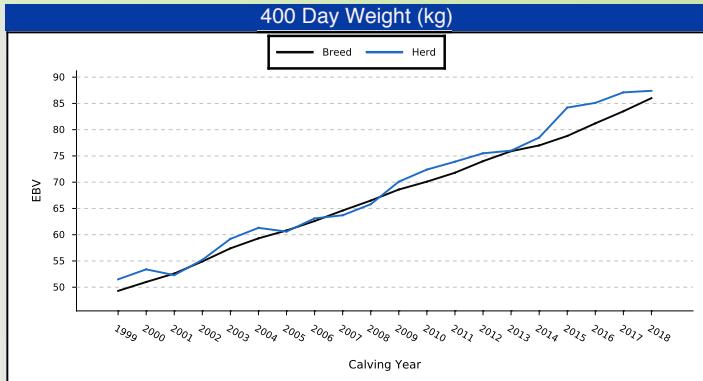

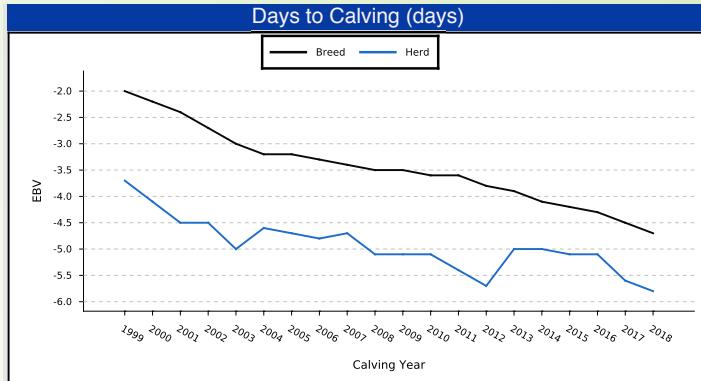

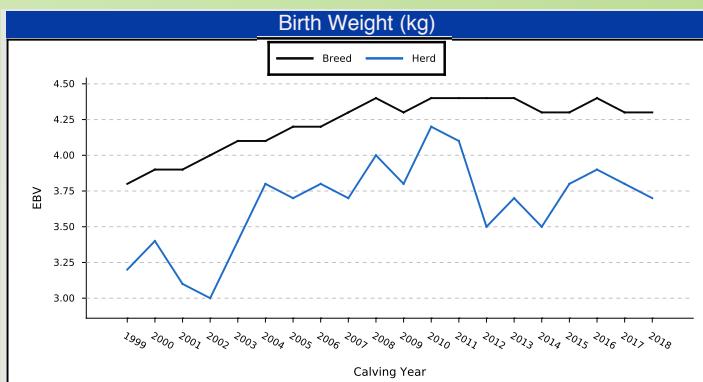

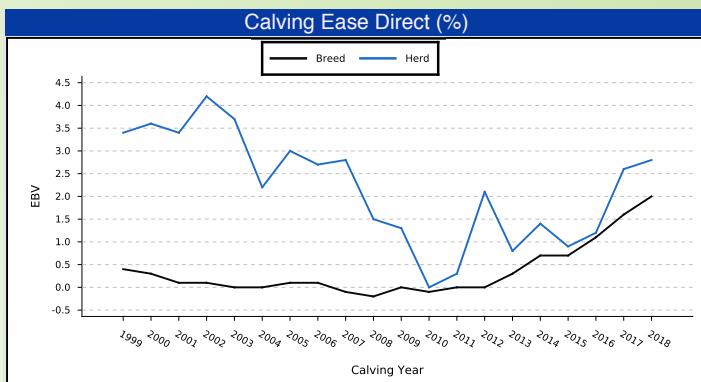

Watch this short video, "Creating an Efficient Cow Herd" @ [www.rennylea.com.au](http://www.rennylea.com.au) (on the home page) which gives a fantastic explanation of the Rennylea Breeding Philosophy.

Rennylea has a clear breeding goal with a commitment to lower cost of production and increase net profit. We have done this by maximising the 'free traits' of fertility, structure, temperament and carcase and balancing the 'cost traits' of milk, growth and yield.

In summary:

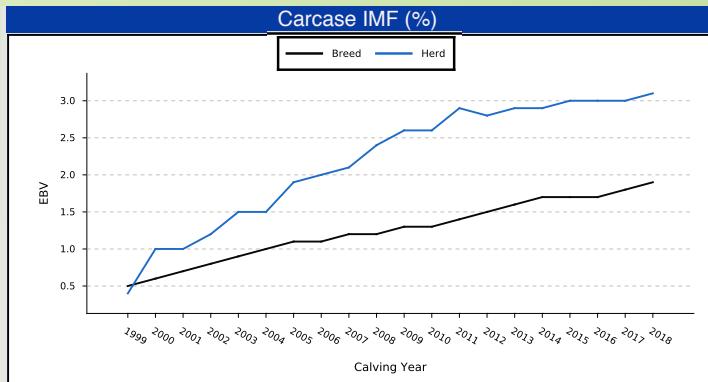

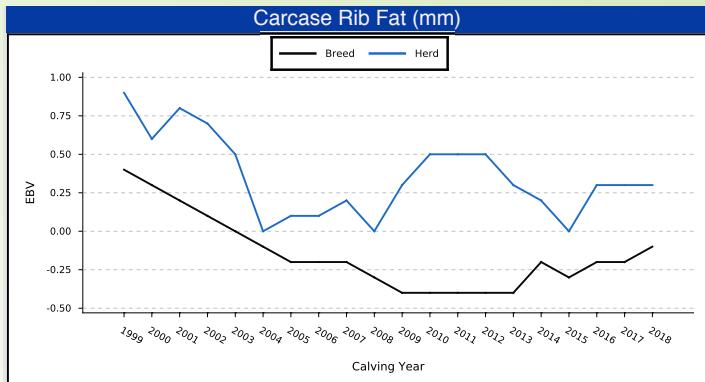

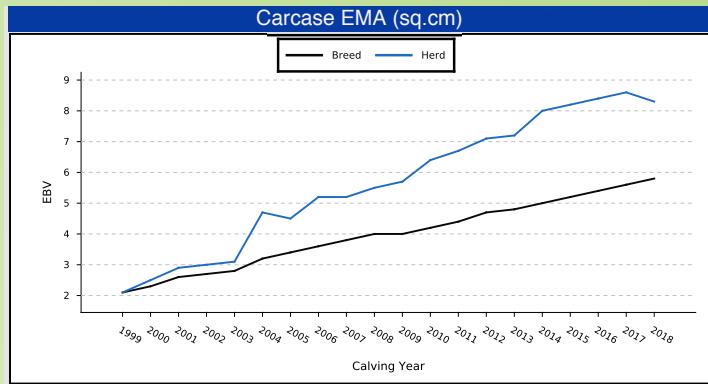

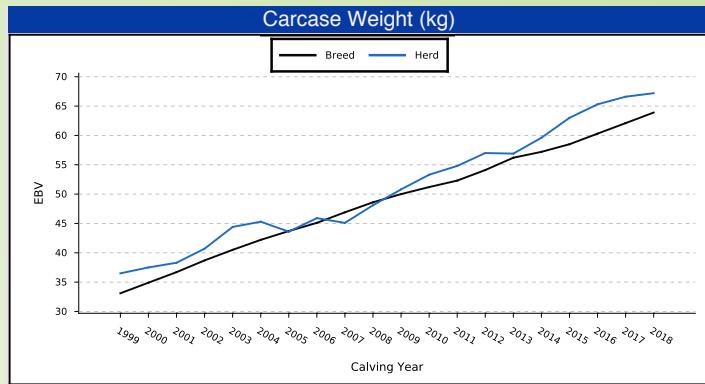

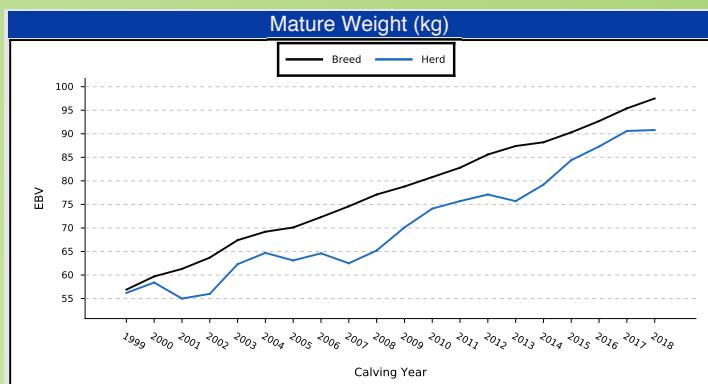

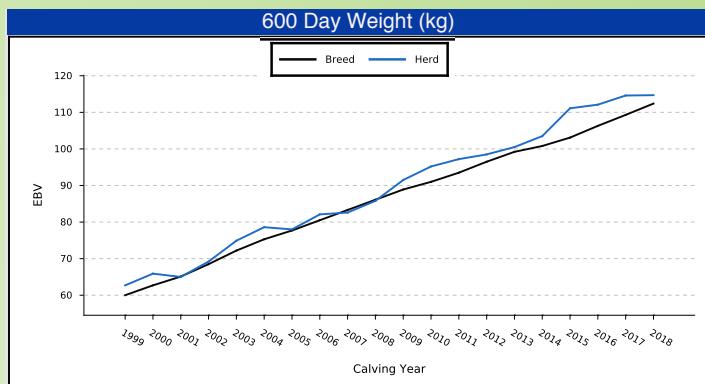

- i. Rennylea is committed first and foremost to fertility, short calvings over six weeks, profitable and functional cattle.
- ii. Moderate maturity pattern and positive fat
- iii. Fast growth to 400 days
- iv. Emphasis on meat quality and muscling, essential for the value chain. All cows average in the top 10% of IMF in the breed
- v. Market flexibility, grain and grass
- vi. The importance of an efficient cow herd on grass and roughage

## GENETIC PROGRESS IN THE RENNYLEA HERD – all calves born every year, compared with breed trends

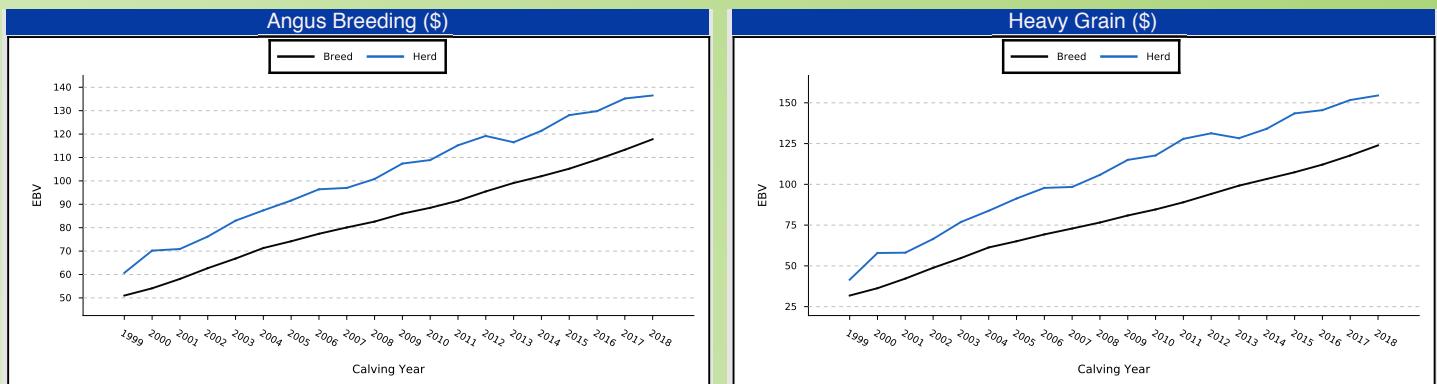

## GENETIC PROGRESS IN THE RENNYLEA HERD

– all calves born every year, compared with breed trends

## GENETIC PROGRESS IN THE RENNYLEA HERD

– all calves born every year, compared with breed trends

The Breeding Challenge, is, as performance increases, to maintain fertility and optimise the balance between maturity pattern, fat, muscle and meat quality in a sustainable cow herd. This profile reflects our long term commitment to increase the net profit for our clients.

Bryan and Ruth Corrigan  
August, 2020

### SEmen INTERESTS - Updated in 2020

- i. The bulls are sold with full physical ownership by the purchaser and the right to the salvage value of the bull. Purchasers have the right to collect and use semen within their own herd at their expense.
- ii. Rennylea is maintaining marketing rights and 50% of future semen sales to industry. If the right to collect semen is exercised, costs and proceeds will be shared between Rennylea and the owner.
- iii. For semen used in the Rennylea herd, collection costs will be at Rennylea's expense and at a convenient time and place for the owner of the bull. Rennylea is entitled to use as much semen as required in their breeding program.
- iv. There may be some bulls for whom Rennylea will sell the semen marketing rights to the new owners.
- v. If a bull is sold on at a later date, these conditions carry forward with the bull.
- vi. The physical transfer of bulls from Rennylea to the buyer recognises the above rights to the semen interests.

Please contact Ruth Corrigan on 0400 302629 or [semensales@rennylea.com.au](mailto:semensales@rennylea.com.au) for further information. If you wish to negotiate regarding semen interests please contact us prior to the sale.

# WHAT YOU SHOULD DO WHEN YOUR NEW BULL ARRIVES AT YOUR PLACE

## 1. UPON ARRIVAL

- i. Ensure your new bulls socialises with a group of animals, (anything except other bulls) in the yards, when they arrive.
- ii. Run the new bulls with a small group of empty females, (he has come from a different herd and may not have had exposure to some of the normal pathogens present in your herd). **This must be done, only two new bulls at a time, with the empty females, for a period of 2 to 4 weeks.** Ideally give the cows prostaglandin every 2 weeks so they continue to cycle.

## 2. PRE JOINING

- i. We recommend a breeding soundness examination(BSE), including structural assessment, testicular palpation and (ideally) a service ability test. This is mandatory for second joining and older bulls each year. It will improve the fertility performance of the herd, by removing non working bulls out with the cows. If bulls are not service tested it is essential you observe the bulls serve in the first week of joining.
- ii. **Keep vaccinations up to date, vibiovax, pestivirus and leptospirosis 7 in 1 and an annual drench, 4-6 weeks prior to joining.**

## 3. JOINING – new bulls have the highest risk of breakdown in the herd, this risk can be reduced by:

- a. **PROTECT a new bull by not overjoining, 40 females per bull maximum.**
- b. **It is recommended, if single sire joining with a new bull, to rotate him with a proven bull for at least one cycle.**  
Also, it is good practice to rotate proven bulls for the last cycle with all new bulls.
- c. **Recommend that all females are joined in groups with 2 bulls.**

**"Most new bull fertility issues develop during the joining period, rather than being pre existing problems, this means that bull surveillance during the joining period is essential"**

## ONCE THE JOINING IS SET UP, MONITORING IS ESSENTIAL TO IDENTIFY ISSUES AS THEY DEVELOP

Your new bulls need to be run in mobs that are easily monitored, check them 2 to 3 times a week for the first three weeks and then weekly thereafter. This includes looking for,

- a. the bull serving, (this has not been successful until the bull thrusts). If bulls are continually mounting without serving it is often a sign the bull has developed a penile infection and needs to be rested and replaced immediately.
  - b. lameness,
  - c. evidence of penile or prepucial swelling or inflammation
  - d. signs of ill health, lethargy, etc.
  - e. numbers of females cycling, (for every 21 females, one cycles each day at the commencement of joining).
- After three weeks of joining, there will be one cow cycling every three days in 21 females.

## 4. POST JOINING – Annual breeding soundness evaluation is a non negotiable procedure. Good management of bulls is a year round procedure.

Bulls need to be removed from the cows, at the same time, to create their new mobs. This will limit the amount of potential injuries by reducing the number of bull interactions.

Bull paddock management is very important to minimize injury between joinings. The bulls need enough room to reduce fighting, restricted feed and water will increase interaction.

The target between joining is to restrict weight gain in older bulls to prevent breakdowns. Ideally young bulls have access to a higher level of nutrition as they continue to grow.

Early pregnancy testing is essential for good female management and detection of surprises. The earlier the pregnancy testing is undertaken, the more likely the cause of the problem will be identified. This will not only give you early notice of the problem but also help in formulating a plan to help reduce the chance of the problem occurring in the future.

**Reon Holmes BVSC**

## RENNYLEA BULL GUARANTEE

**There is no more important time for a commercial business than pregnancy testing. Our aim is for you to have PTIC females in a tight calving pattern. To achieve a high pregnancy you need to follow the recommendations on the previous page.**

The bulls offered have passed an independent and rigorous test for:

- i. **STRUCTURAL SOUNDNESS** – bulls have been structurally assessed and those that don't meet our standards are culled. This is carried out by an Beef Excel
- ii. **REPRODUCTIVE SOUNDNESS** - Veterinarians from the Holbrook Veterinary Centre have examined the bulls for their reproductive soundness, their penis checked and checked for warts. Their testicles are measured regularly and palpated to check they are fit to breed.

These tests identify and removes the bulls in every drop that are unfit to be mated. Note that these results are valid for the next mating only and annual testing is strongly recommended.

### WHAT DOES RENNYLEA GUARANTEE?

#### 1. **YEAR ONE**

If for any reason, a tested RENNYLEA bull is unable to sire calves as a result of a failure of his **own fertility** during his first mating we will either:

- replace him with an equivalent Bull
- give credit towards future purchases, under a private treaty negotiation
- refund the purchase price of the bull
- to claim this guarantee you must follow the procedures on the previous page and submit a report from a veterinarian approved by Rennylea
- we recommend that you insure the bulls for the first 6 months

#### 2. **YEAR TWO - from the date of purchase.**

- We will refund the purchase price if the bull's structure is not satisfactory or the bull has developed a corkscrew penis problem
- We do not replace bulls on the basis of broken penis or other misadventures and strongly recommend you insure the bull for the first joining

**We take our obligation to you seriously and do our utmost to produce bulls that add value to your operation through the depth and accuracy of their genetics, the pre sale screening, the provision of full animal health records on sale day and careful delivery to your property.**

**However, we do not manage your joining. This guarantee does not replace your obligation to follow the recommendations on page 6, and to observe and manage bulls during joining and future years.**

## ESTIMATED BREEDING VALUES AND \$INDEX VALUES

**IMPORTANT:** Note that all bulls have been measured for both their phenotype (weights, scans, days, docility etc) and genotype (i50K test which records their DNA). The investment in DNA testing adds considerably to the accuracy of the Estimated Breeding Values at a young age.

**Accuracies:** Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal, its siblings, relations or progeny, then the accuracy of the EBV for a particular trait will increase. The accuracy also indicates the potential for change in values over time. Accuracies are influenced by the heritabilities of the traits and the genetic associations existing between them. Genomics throughout the Rennylea pedigrees has added significantly to the accuracy of young bulls.

**Lowly heritable traits** (less than 20%) include: fertility traits such as days to calving and calving ease, and milk. **Medium heritable traits** (20% to 35%) include gestation length, eye muscle area, 200 and 400 day weight, and rump fat.

**Highly heritable traits** (over 35%) include rib fat, scrotal size, 600D weight, mature cow weight, birthweight, marbling and retail beef yield.

### 1. Calving Ease

**Calving Ease DIR (%)**: Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to calve without assistance. Heritability of calving ease traits is 10% and positive values are desirable.

**Calving Ease DTRS (%)**: Estimate of the genetic differences between animals in the ability of their two year old daughters to calve without assistance. Positive values are desirable.

### 2. Birth

**Gestation Length (days)**: Estimation of the genetic differences between animals in the number of days from the conception to the birth of a calf. A negative value is desirable. Heritability of GL is 65%, the correlation with calving ease is -.27% & BW -.5.

**Birthweight (kg)**: Estimates of the genetic differences between animals in calf birth weight. Small or moderate birthweight EBVs are considered desirable. The heritability of birthweight is 39%.

### 3. Growth

**200 Day Milk (kg)**: An estimate of the genetic differences among animals in milk production potential, expressed in calf growth performance. The heritability of the milk trait is 10%.

**200 Day Growth (kg)**: Estimate of the genetic differences among animals in weight at 200 days.

**400 Day Growth (kg)**: Estimate of the genetic differences among animals in weight at 400 days.

**600 Day Growth (kg)**: Estimate of the genetic differences among animals in weight at 600 days. Heritability of the growth trait increases with age, 12%, 23% and 35% at

200, 400 and 600 days. Mature cow weight is the most heritable at 40%.

Optimum growth is balanced with the production environment. Note that the higher the growth figure at 600 days, then the animal will be bigger, a higher bodyweight, and a later maturity pattern.

### 4. Carcase

The Rennylea herd has been independently scanned for eye muscle area, fat cover since 1990 and for marbling since the mid 1990's.

**Carcase Weight (kg)**: An estimate of the genetic difference among animals in hot standard carcase weight at 650 days of age. The heritability of carcase weight is 42%.

**Eye Muscle Area (cm<sup>2</sup>)**: These estimate breeding values of the genetic differences among animals in eye muscle area at the 12/13th rib site on a 300kg carcase. The heritability of EMA is 20%.

**Rib Fat (mm)**: An estimate of the genetic differences in fat depth at the 12/13th rib site on a standard 300kg carcase. Significantly negative values are not desirable for either fat ebv. Heritability is 45%.

**Rump Fat (mm)**: An estimate of the genetic differences in fat depth at the 8th rib site on a standard 300kg carcase. Heritability is 32%.

**Intramuscular Fat (%)**: An estimate of the genetic differences in the percentage of intramuscular fat at the 12/13th rib site in a 300kg carcase. Heritability of IMF% is 37%.

### 5. Fertility

**Mature Cow Weight (kg)**: Estimate of the genetic differences in cow weight at 5 years of age. Rennylea believes this is a key fertility EBV and optimum mature cow weight is as close as possible to the 400 weight. Heritability of MCW is 40%, it is the most heritable growth trait & the least recorded.

As described rib and rump fat are heritable. Slightly positive genetic fat cover is important and combined with mature cow weight are useful predictors of the herd fertility profile under a commercial production system.

**Days to Calving (days)**: This EBV is an indicator of female fertility based on time between the cow's first exposure to a bull and when she subsequently calves. This ebv has the lowest heritability of all the researched traits at 7%, thus has low accuracy, and is not a key performance indicator for maintaining or improving herd fertility.

**Scrotal Size (cm)**: These are estimates of the genetic differences among animals in scrotal circumference at 400 days. The trait is highly heritable at 39%. Positive values are favourable.

## **6. SELECTION INDICES**

Dollar index values have been developed to combine the important ebvs for different markets, into a single value. They are another piece of information that may be used when selecting bulls to target particular markets, and ranking them for that purpose. We take the most notice of the Angus Breeding Index and the heavy grain index.

## **FERTILITY TESTING**

Veterinarians from the Holbrook Veterinary Centre assess the bulls for breeding soundness, prior to cataloguing. Any purchasers who require a certificate of fertility may request this on sale day, or within a month of the sale.

## **STRUCTURAL ASSESSMENT**

The structural evaluation and scanning for carcase traits has been done by Mr. Jim Green from Beef Excel. Jim has been doing this work at Rennylea for many years. See page 11 for details.

## **INTEGRITY OF DATA**

**PHENOTYPES:** Every trait published on Rennylea bulls are backed up by the bull's own performance data, collected and transferred electronically to Breedplan. At each collection point recommended by Breedplan, data is collected on all cattle in the herd, except when they have been sold. Sue Govan manages the data and recording system.

**GENOTYPES:** Rennylea genotypes every animal in the herd at birth, as part of our commitment to ensuring maximum accuracy for selection at a young age. This includes all bulls and heifers.

## **REPORTING OF RECESSIVE GENETIC GENES**

In this Rennylea catalogue, bulls that have a probability of carrying the recessive genes AM, NH and DD have been tested and identified (probability > 10%). We have taken the step of adding this information to the animal's description. We do not consider these conditions to be a significant commercial issue, any clients who wish to discuss further please contact one of the Rennylea team.

The following nomenclature identifies the status of the bulls in the catalogue.

**AMF** Tested AM free

**AMFU** Based on pedigree AM free. Animal has not been tested

**AM%** \_% probability the animal is an AM carrier

**AMC** Tested AM-Carrier

For NH or DD simply replace AM

seed average represents the average EBV of all 2018 drop Australian Angus and Angus-influenced seedstock animals analysed in the July 2020 Trans Tasman Angus Cattle Evaluation.

## BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

The Beef Class Structural Assessment System was designed by the Beef Improvement Association and breed societies, and funded by Meat & Livestock Australia to enable selection to improve structural soundness.

Rennylea uses a strict assessment program to assess the structural composition of their herd to best guarantee the soundness of their stock, the cow herd is assessed by Ruth and Bryan, and Sale bulls are independently assessed by Beefxcel.

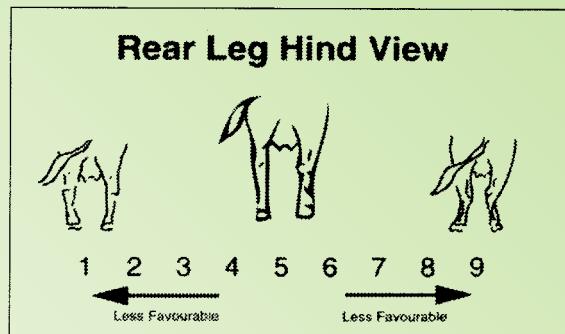

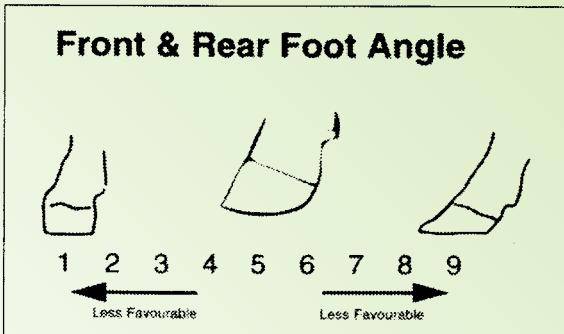

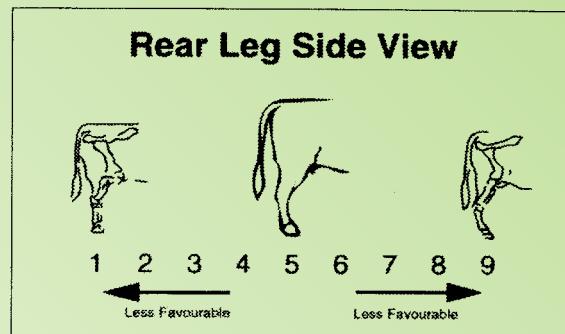

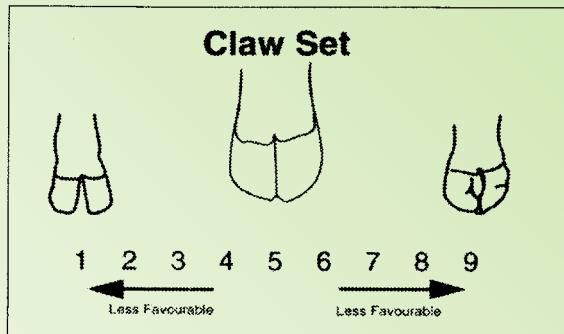

### An Explanation of the Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure;

- A score of **5** is ideal;
- A score of **4 or 6** shows slight variation from ideal, but this includes most sound animals. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of **3 or 7** shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;
- A score of **2 or 8** are low scoring animals and should be looked at cautiously and inspected very closely before purchasing;
- A score of **1 or 9** should not be catalogued and are considered immediate culs.

### TEMPERAMENT

The temperament or docility score separates animals from the same contemporary on their calmness in a confined area. Animals which are extremely quiet (touchable) score '1'. Animals that are aggressive or extremely agitated in the crush are scored as '5'.

NOTES: The K907 bulls were the absolute standouts of the Autumn 2019 drop bulls. These bulls have explosive early growth, very moderate mature weight, excellent carcass and are super docile. Q132 was in our keeper group, but we couldn't keep them all. Top 1% EMA, Angus Breeding, Domestic and Heavy Grass Indicies. Top 5% Gestation Length, 200 Day Wt, Carcase Wt, Retail Beef Yield, Heavy Grain Index. Top 10% 400 Day Wt, IMF.

Traits Observed: BWT,200WT,400WT,SC,Scan(EMA,Rib,Rump,IMF),DOC,Genomics

NOTES: Calving ease and low birthweight with excellent early growth in this K907 son. One of our breeding goals is to get the mature weight under the 400d weight, so progeny grow quickly but still have a moderate maturity pattern, K907 does this better than any bull we've used. Top 1% Maternal Calving Ease, All Indicies. Top 5% Direct Calving Ease, Birth Wt, Carcase Wt, IMF. Top 10% Gestation Length, Days to Calving, EMA.

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

2

Select “Sign Up” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “Dashboard” and then select “Request Approval to Buy”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: [info@auctionsplus.com.au](mailto:info@auctionsplus.com.au)

**"I am passionate about breeding cattle and improving the land for the next generation. This is a great area for innovative young farmers."**

Ruth had 12 years away at boarding school, university and work. She completed a first class honours degree in Livestock Science at the University of New England and then a Post Graduate Diploma in Climate Change for Primary Industries at Melbourne University.

Anthony completed school in Albury, worked in the Northern Territory and then an apprenticeship as a diesel mechanic in the Hunter Valley.

The family has continued to grow a resilient business in the face of increasing risk from climate change and global competition. The business is innovative and progressive and has goals for environmental, economic and social sustainability. They have also implemented best practice succession planning.

"We are so delighted that Ruth and Anthony have chosen to work with us," says Lucinda. Working with the next generation inspires us, whether it's adopting genomic technology or any of the improvement we make to the farms" says Lucinda.

"I always planned to come home" Ruth says. "I am passionate about breeding cattle and improving the land for the next generation. This is a great area for innovative young farmers."

Today the Rennylea herd has 1,550 cows, replacements and bulls which adds up to around 3,500 cattle. Over the past few years around 500 bulls are marketed each year, by two on property auctions, bulls that are bred on contract for long term clients, lease and private treaty bulls.

"Our clientele is spread across Australia, with the most numbers in NSW and Victoria, however our largest client is in the dry desert area of the Northern Territory".

Bryan and Lucinda have continued to grow the business from the original 400ha that they started with in 1986. Today the business operates around 3,800 hectares of land with some additional agistment as required.

The business operates with a team of 7 full time employees, 2 part time and a caretaker at one of the farms. Ruth is the COO and runs the work programs across the farms. This includes implementing staff induction, training and Safety which she and Lucinda coordinate. There are two centres for Rennylea; one at Bowna and the second at Culcaim, 50km to the west, weekly planning and monthly tactical meetings are held.

"We work on the principle of 'no cattle yard conversations', in other words if something is important and needs acting on, it needs to be written down" Lucinda says. We implemented an iMessenger group in the last 12 months which is an invaluable way of communicating during the work day.

Ruth is the manager of the Rennylea cow herd and responsible for the reproductive programs, day to day management including joining and calving. With Bryan they manage the genetics for the herd and Ruth assesses each cow each year prior to allocating them to the genetic or recipient herd and selecting a sire.

Everyone in the business has clear roles and when there are big jobs on, the teams from Bowna and Culcaim work together.

**The bulls in this catalogue were filmed for the web based clips on the 7th and 8th July, 2020. Their performance data is also available with the video clips. To view these please go to [www.rennylea.com.au](http://www.rennylea.com.au) and follow the link to where the video clips are hosted. You will be aware that Australia Post has effectively ‘slowed down’ the regular mail. It can take up to 4 weeks for some distant clients to receive their catalogues. Hence we have commenced production earlier than usual and the catalogues may arrived before the video clips are posted. Bear with us!**

# RENNYLEA QUALITY ASSURANCE

The bulls in this catalogue have been measured for every trait at every required point. They are meticulously recorded by Sue Govan and their data have the highest accuracy for their age.

## Every bull in the catalogue has been:

- ✓ Weighed and tagged at birth
- ✓ Weighed at 200, 400 & 600 days in large management groups
- ✓ All mature cows in the herd are weighed for mature cow weight, & condition scored every year
- ✓ Calving ease and gestation length data submitted
- ✓ Scanned for eye muscle area, intramuscular fat and fat depth at the rib and rump sites (400 days), testicles measured
- ✓ Parent verified through i50k test
- ✓ Those with known recessive gene frequency, >5% tested
- ✓ i50K SNP tested at birth for production traits, and incorporated into their EBVs through single step analysis
- ✓ Before sale they have been independently assessed for feet, legs, sheath, testicles and docility
- ✓ Before sale they have been independently assessed for fertility by veterinarians from the Holbrook Veterinary Centre
- ✓ Rennylea is a JBAS8 herd and bulls are eligible for entry to all states
- ✓ Tested negative for persistently infected pestivirus, BVDV, & vaccinated
- ✓ Vaccinated for 5-in-1 and vibriosis and sold with a lifetime animal health record
- ✓ They carry 3 forms of ID, management, NLIS & freeze branded
- ✓ They are **delivered free** to NSW, VIC, SA, Qld to major centres, in conjunction with other bull sales
- ✓ Our product is guaranteed see the guidelines in the catalogue.
